Marshall's Liverpool Salt,

FOR SALE BY

BALFOUR, GUTHRIE & CO.
230 California Street, San Francisco

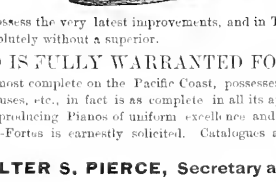
CALIFORNIA
Piano Manufacturing Co.

INCORPORATED UNDER THE LAWS OF CALIFORNIA, MARCH 8, 1882

Manufacturers of Strictly First Class

UPRIGHT PIANOS.

Factory, 431 and 433 Fourth St., corner of Bryant.
Old Kimball Carriage Factory.



Salesroom, 30 New Montgomery St., under Palace Hotel.

Our instruments possess the very latest improvements, and in TONE, TOUCH and DURABILITY are absolutely without a superior.

EVERY PIANO IS FULLY WARRANTED FOR 5 YEARS.

Our factory is the most complete on the Pacific Coast, possesses every kind of machinery, steam, dry houses, etc., in fact is as complete in all its appointments as any Eastern establishment, producing Pianos of uniform excellence and durability. An examination of our Piano-Fortes is earnestly solicited. Catalogues and full descriptive mailed on application.

WALTER S. PIERCE, Secretary and Agent.

Disputed Land Grants before Congress.

The House Committee on Public Lands has engaged in a crusade against the land-grant railroads, and the House thus far has registered the decrees of the committee. The action of the committee as to some of the roads is undoubtedly justifiable. Its course as to others is marked by a trace of communism. For instance, last week it was decided to forfeit an entire land grant, notwithstanding 47½ miles of it had been completed. This action is based upon the theory that the contract between the land grant roads and the government is, in fact, not a contract, but a donation on the part of the government and that the roads, even when their contracts are in part complied with, can only retain their lands as an act of grace or bounty on the part of the general government. This theory is essentially communistic. It ignores the principle of vested rights, and is not in harmony with the principles upon which all land-grant legislation is found'd, as can readily be ascertained by any one who carefully reads the history of the land-grant roads, as it is found in the debates.

The first land grants were justified upon two grounds:

First: That they increased the value and the salableness of the remaining lands.

Second: That they resulted in securing better and cheaper transportation facilities for government purposes.

The government placed its lands in the position of any large land owner, and adopted the policy which was best adapted to increase the value of its domain. It was necessary for the prosperity of the country that the unoccupied western territory should be settled, and it was necessary that roads should precede settlement. People had no inducements to purchase and improve lands without they could be sure of communication with civilization and access to markets. It was a profitable enterprise for the government to give the alternate sections of land to a railroad company or to a State, upon condition that the railroad should be built, the result of which would enable the government to sell the remaining half of the lands at double the former price, which it probably in every instance has done. The government lost nothing by the transaction, while it gained very much. It not only found purchasers for its vast domain, but it secured exactly the price which it asked, an average of $1.25 for the whole number of grant'd acres, or the equivalent of $2.50 for the remaining alternate sections. Besides, it obtained the advantage of ready transportation of its troops and munitions of war at fixed and low rates; it was able to save vast sums in the transportation of its supplies to the Indians, and was also able to furnish the mails to the people rapidly and at much less expense. The principle, in short, was applied to railroads in the way of land grants which, during the entire period from 1822 to 1850 had been adopted with respect to the construction of highways and canals. The vast number of turnpikes which were constructed with government aid in the country during that period cost the government a much larger relative amount, while they conferred both upon the settler and the government much fewer benefits than are derived from the land-grant roads.

The first land grant was to the state of Illinois to aid in the construction of a canal from the Illinois river to Lake Michigan, and the first land grant for a railroad was in aid of the Illinois Central. The debates upon these grants give the keynote to all subsequent land-grant legislation, and it is expressly denied through them all that these grants were donations. It was maintain'd that, under the constitution, the general government could not make donations to the various states much less to private corporations, and that the grants were to be regarded as in the nature of contracts, from which the government expected to secure full consideration for all the lands conveyed. Had these grants been sought upon any other ground they would not have been obtained. In later years grants were made to corporations on a slightly different basis, but the same general purpose runs through them all.

Congress is now engaged in a crusade against these land-grant roads, and is standing upon the strictest letter of the contract, while not in all cases admitting that it is a contract, and seems in some instances to be going beyond the terms of the contract, equitably interpreted, and to be exercising the right of the strongest. In a nutshell, of the 35,000,000 acres of land granted to States for the benefit of railroads within their limits, some 26,000,000 acres have been earned and 9,000,000 can be forfeited, and, of the 145,000,000 acres granted directly to railroad corporations, only 50,000,000 acres have been earned and 95,000,000 acres may be forfeited. The docket of the House Committee on Public Lands, which is the starting point of the legislation which proposes the forfeiture, had upon it on February, 1, 1884, the following list of roads:

Bills pending in Committee on Public Lands in House to be considered in this order; Texas Pacific; Oregon Central; Ontonagon & State Line; California & Oregon; Oregon & California; Northern Pacific; Atlantic & Pacific; Southern Pacific of California; New Orleans, Baton Rouge & Vicksburg; Kansas Adjustment, roads doing business in Kansas; Atlantic, Gulf & West India Transit Company; Pensacola & Georgia; Florida, Atlantic & Gulf Central; Mobile & Girard; Selma, Rome & Dalton; Vicksburg, Shreveport & Texas; Sioux City & St. Paul; Minnesota & Wisconsin railroad; Chicago, St. Paul & Minneapolis; Chicago, St. Paul & Omaha; Wisconsin Central, et al.

A summary of the facts connected with these roads is as follows:

The House has already passed the bill to forfeit the Texas Pacific grant, only one representative, Barr, of Pennsylvania, voting against it, and there is no doubt that the Senate will also pass the bill. The Texas Pacific Company received its charter March 30, 1871, which required the completion of the entire road within ten years. By legislation in 1872 the time for the completion was extended another year. The grants were located in Texas, New Mexico, Arizona and California. The length of the proposed road was 1,483 miles and the number of acres granted 14,309,760. The date when the road should have been completed was May 2, 1882. The number of miles actually completed before that time was only 181. The company received no patents for the lands, and 1,302 miles remain uncompleted. Congress did not recognize the form of assignment from the Texas Pacific to the Southern Pacific Company. The owners of the latter company, however, claim that the grant was one *in personâ*; that the assignment was authorized, and that the Southern Pacific, which was completed within the time, is entitled to the Texas Pacific unearned grant. The question will be taken to the courts.

The Oregon Central received its charter May 4, 1870, and was required to complete its road in six years. The length of the line was 144½ miles. The amount of the grant was 1,130,880 acres. There had been completed before the time fixed for the completion of the road 47½ miles, leaving 97 miles uncompleted. No patents had been issued. The House Committee has voted to forfeit the entire grant and to refuse to permit patents to be issued for the 47½ miles of completed road.

The California & Oregon received its charter July 25, 1866, and was required by an act passed two years later to have its road completed July 1, 1880. The length of the road was 288 miles, and aggregate grant 2,426,576 acres. One hundred and fifty-two miles had been completed and 136 miles uncompleted at the time of the expiration of the period. The company has received patents to 1,337,949 acres. The House Committee on Public Lands has agreed to a bill recommending the forfeiture of all the grant except the number of acres which have been patented.

The Oregon & California road was to have been completed July 1, 1880. Its grant was for 3,701,760 acres; 197 miles were completed, 118 miles uncompleted. The number of acres patented is 322,052. The committee has recommended forfeiture of all except the patented lands.

The committee has not yet acted upon the Northern Pacific road. The terms of its charter require that that road should be completed by July 4, 1879. The total grant was 18,215,040 acres. The number of miles uncompleted at the time fixed for the completion of the grant was 1,739, the total miles then completed having been only 541. The road, however, made strenuous efforts, and before any adverse action has been taken the whole road has been completed, so that it is not expected that as to any portion of the main line there will be any declaration of forfeiture. The committee, however, may report a forfeiture as to some of the branch lines.

The Atlantic & Pacific road was required by the terms of its charter to be completed July 4, 1878. At that time, however, only 125 miles were completed, leaving then 2,301 miles to be completed. The company, however, has constructed a good deal since that time. The total amount of its grant is 40,630,560 acres, of which 526,991 acres have been patented. The case is now under argument before the committee of the two houses.

The Southern Pacific of California was required to be completed July 4, 1878. The total amount of its grant was 5,511,264 acres, of which there had been patented to recent date 1,037,910 acres. This road, although not completed within the fixed period, is now completed, and it will stand in the same relation as the Northern Pacific does, as completed after the term.

The New Orleans, Baton Rouge & Vicksburg was to have completed its road by March 3, 1876. It had received a grant of 903,218 acres, of which not an acre has yet been patented to it. It has been assigned to the New Orleans & Pacific Company, and the Attorney-General of the United States has decided that the assignment was valid. It is this case which is used as a precedent by the Southern Pacific people in their argument that the assignment of the Texas Pacific to them should also be considered good, but the Secretary of the Interior has not yet issued any patents, even under this assignment. He is waiting for the action of Congress, and if that action shall be adverse the patents will not be issued.

These are all of the grants made directly from Congress to corporations which are now in dispute, and which are before the House Committee on Public Lands under propositions for forfeiture. The remaining roads in the same category come within the grants which were made to States, and are of minor importance. They are, for the most part, roads upon which no work whatever has been done, although the owners of their charters insist that if now given the time they will be completed. The remaining roads are as follows.

Atlantic, Gulf & West India Transit, 1,178,880 acres; Pensacola & Georgia, 1,178,880; Florida, Atlantic & Gulf Central, 226,560; Mobile & Girard, 858,624; Selma, Rome & Dalton, 641,285, Vicksburg, Shreveport & Texas, 925,760; Sioux City & St. Paul, 187,240; Chicago, St. Paul & Minneapolis and Chicago, St. Paul & Omaha, 1,408,452; Wisconsin Central, 1,800,000 acres.—*Bradstreet's.*

Clearly, we shall in a few years have to grow less wheat or consume more of it at home. Then why not raise the tariff and bring the operatives of Manchester and Leeds here, where we can feed them? We may lower the tariff and furnish them employment where they are, but India will find them in bread.

Special Inducement.

THE WINE PRESS AND THE CELLAR,

BY E. B. RIDGRD.

For price, address see advertisement in another column.

The Visalia *Delta* recommends for Tulare county, outside the artesian belt, wells on Mr. Blowers' plan, twelve to twenty feet in diameter, reaching the upper flow or surface water, at eight to ten feet in depth, and if that supply is not sufficient, boring several six inch wells in the bottom to the second flow, which may be 60 feet lower. By this means sufficient water can be obtained at light expense any where in the valley, to irrigate a quarter section of land. Mr. Blowers says that the straw from an acre of wheat, or even the prunings from an acre of well-grown vines, will make steam enough to raise the water necessary to irrigate that acre. The difference between Mr. Blowers and his brother commissioner, Mr. Wetmore, is not whether irrigation is sometimes in some places necessary, but on the use of water in summer to stimulate the crop unnaturally and at the cost of quality.

If some of our good people who pay high prices for wines and brandies with French labels would study the statistics issued by the National Bureau at Washington, they would get some hints which would save their pockets. In the year ending June, 1883, we imported from France only 315,776 gallons of spirits and cordials and 79,127 dozen bottles; value, \$1,319,720. Of wine in casks, 2,511,982 gallons and 417,642 dozen bottles; value, \$5,205,856. From Germany of spirits and cordials, 37,292 gallons and 9,971 dozen bottles, value \$62,747; and of wine in casks, 508,033 gallons and 29,481 dozen bottles, value \$667,114. The total value of the spirits, cordials and wines imported from France and Germany into all ports of the United States, in the year ending June 30th, 1883, was only \$7,245,438. The product of the vintage of the State of California in 1882 was not less than 8,000,000 gallons, besides 350,000 gallons of brandy. Other States also made some wine, and there is a good deal of spurious wine made on the Atlantic side. Considering the relative quantities of imported French and German wines and spirits and of wines and brandies produced in the United States, a man must have a large faith who, when he orders a costly wine with a foreign label at the most showy hotel, or a glass of, so-called, French brandy at a saloon bar, believes he is getting what he orders.

Lake county is moving into line as one of our future great wine and fruit localities.

WINEGROWERS IN SESSION.

An important Meeting—the Tariff Question—What to Plant and What to Graft.

[St. Helena Star, February 25.]

Winegrowers met in regular session, President Krug in the chair. The committee appointed to frame resolutions to Congress on the Tariff question reported progress and asked for further time—this led to an informal discussion of the subject and on motion it was decided to ask the Viticultural Clubs of Napa, Healdsburg, Cloverdale and Sonoma to join with us in these resolutions. Pellet thought that nothing would be done by Congress this year, touching on a reduction of Tariff, both parties having too much at stake just now to risk a wrong move. It would be well to watch and if necessary act. Ewer said that in framing any set of resolutions it would be well to state, that under the stimulus of high duties, an immense acreage of new vines had been planted—a repeal or a reduction of duties would very seriously affect this industry, stop the further planting of vines and injure those who already had their capital invested. A continued maintenance of high duties would stimulate the planting of a large acreage of new vines and these maturing would soon produce sufficient wine to exclude all foreign products of this nature.

WHAT TO PLANT.

Reference was made to the fact that Governor Stoneman had recently planted 100 acres of Mission vines on his place in Los Angeles County and much surprise was manifested that he should select a variety which is now conceded to be the very poorest grape we have.

Pellet said the question of "What to plant" was a difficult one to answer. Out of a dozen men, each would have a different theory. An important factor in the answer would be where one was going to plant and the kind of soil. Some varieties do well on high dry lands and would not be adapted to low, rich land. For claret no grape was superior to the Carignan on high land. Zinfandel he considered one of our standard grapes. Pinot or Black Riesling was good—on gravelly soil it produced a fine dark wine of excellent flavor.

Mataro was one of our very best varieties; in rich land it bore very light, but produced a fine wine. A combination of Mataro, Carignan, Zinfandel and Cantal would make a perfect wine of the best flavor—if he had 1,000 acres to plant, he would use these four varieties.

W. A. C. Smith asked for some rule to be laid down stating what varieties are adapted to different soils and locations. Information of this kind from those who have had experience would be valuable. In viticultural matters we are all benefitted by the success of our neighbors. He spoke of a vineyard enterprise on Howell mountain in which he was engaged, describing the different soils and asked what varieties were best adapted to same.

Lyman said Mataro and Black Burgundy were well adapted to a rich, red soil. Ewer said Cantal or Grosse Blauer will grow on the poorest soil. Black Pinot was the best on low land; it was a tough and hardy grape.

Pellet said that Carignan and Mataro are late grapes, and do not ripen before the latter part of October, even on his place, he thought they would be later on Howell mountain, and for that reason believed they would not be adapted to that location. The Carignan was a vigorous grower, never sunburns no matter how much exposed. The Pinot ripens early, and is one of the best for Howell mountain.

Castner had no experience on hills, his vineyard was on bottom land. Had some Frankenand Gray Riesling which were a success on that soil. Sauvignon Vert was frozen back and would do better on hill. He was trying Carignan which was a fine grower; they were, however, only two years old, and he could not tell how they would bear.

Krug said he could not see why Carignan and Mataro would not do well on Howell mountain; the peculiar climate of that region was such that frost, mildew, etc., does not affect the grapes there, as they do in the valley. He thought there would be no trouble about ripening, and would not hesitate to plant these varieties.

Smith: I have on my ranch a patch of about 3 acres, comparatively level, sloping slightly to the East and South—on the West is a hill rising about 100 feet—here I propose to plant my Carignan, where they will catch the morning sun. It is perhaps a *better* location than can be found in the valley, and insures an early maturing of the grape.

It had been stated that Crabb's Burgundy would make an intensely sour wine, grown on the Howell mountain heights. Wade suggested that the idea was probably advanced because of the opinion that this variety would not ripen early enough in that locality to have a sufficient amount of sugar.

Sauvignon Vert was recommended as a good grape for hill lands, as it ripened very early.

GENERAL REMARKS.

A rambling talk was then indulged in, during which interesting facts were stated, the most important of which we shall endeavor to give as briefly as possible.

White grapes are, as a rule, better on bottom land, black grapes not generally attaining sufficient color.

In selecting a site for a vine yard, attention should be paid to drainage; it was very important to have land well drained.

On rich land plant a larger proportion of white grapes, on hill land more of the black varieties for claret. Under favorable circumstances it would be well to plant in the following proportion: two-thirds claret grapes and one-third white.

Mr. Pellet said his sons, Frank and Louis, were planting a vineyard in Sonoma county, at the junction of the Healdsburg and Windsor roads, in Alexander Valley. He had advised them to plant Carignan, Mataro and Cantal, as the land was slightly rolling, of a deep, red soil, and capable of producing a first-class claret.

The demand for white wines is said to be growing, and it was urged that the finer qualities of white grapes should be planted on bottom lands.

The Zinfandel was highly endorsed as one of our best grapes, the true basis for California claret. Its true character was not shown in rich, bottom land; it should be planted in a dry, gravelly soil.

Never plant vines in a gulch; a low, damp and narrow strip of land, surrounded by hills, was not suitable for vineyard—frost, fog and dampness settle there and nothing can thrive. Keep out of the gulches.

The Malbec is a fine grape, makes excellent wine, and thrives on the hills.

Grenache, of the Bordeaux varieties, was an immense grower, and would thrive where no other variety would grow. Pellet said he made 500 gallons of wine from this grape; it was an excellent wine, tart and pleasant, but slightly deficient in color.

Wade suggested that our endorsement of these new vines should go out as *opinions*, not as *facts*, until we had thoroughly experimented and proven our theories to be correct.

The Lenoir was endorsed as a fine grape of *resistant* qualities, a good bearer, plenty of color, lots of tannin and nice flavor but withal rather rough. It is the only resistant stock, the fruit of which is good.

The President strongly urged the necessity of planting resistant stock. Riparia and Vitis Cahiornen were both good—with the latter the seeds were planted, as cuttings were difficult to propagate.

Vitis Californica seeds, to plant, should be thoroughly ripe, soaked in warm water and kept in a warm room until they burst a little; they are then ready to plant; they should be put in the ground to the depth of about 1½ inches. Mother has proven that a graft on a wild vine produces more grapes than would the foreign vine itself.

Castner gave a good rule for taking care of Lenoir cuttings in a nursery. He lays them down flat and covers them with sand or light alluvial soil about four inches deep, and finds this the most successful way of rooting them.

Norton asked, "How can we make our vineyards permanent? must we tear up our vines and plant resistant stock?" The answer was, by no means—it is time enough to tear up our vines, when they are attacked. In planting new vines or in replacing old ones, resistant stock should be used and foreign varieties grafted on.

SEASON OF 1884!

VINES and VINE CUTTINGS

I take pleasure in informing my patrons that I shall be able to furnish, if called for soon, limited quantities of

GENUINE CUTTINGS

Of the following rare varieties:—FOLLE BLANCHE, COLOMBAR (Sauvignon vert) MATARO, CARIGNAN, GRENACHE, PETIT PINOT (Crabb's Black Burgundy) CHAUCHE NOIR, TROUSSEAU, MEUNIER (same as the so-called Franc-Pinot of Mr. Schieffer—misnamed), CHARBONO, FOLLE NOIRE, MALBECK (same as Lefranc's so-called Cabernet-Malbeck) MOSELLE RIESLING, WEST'S WHITE PROLIFIC, MUSCAT of FRONTIGNAN, SEEDLESS SULTANA, etc.

The prices of the foregoing are capricious and some of the varieties, particularly MATARO, MALBECK, CARIGNAN, MEUNIER and WEST'S WHITE PROLIFIC, are nearly all engaged at the present time.

Price lists will be forwarded to those inquiring, as circumstances vary them.

Also, All the Well Known Varieties

such as ZINFANDEL, RIESLING, CHASSELAS, CHAUCHE GRIS, BERGER, MUSCATS (Gordo Blanco and Alexandria) FLAME TOKAY, etc., etc.

ROOTED VINES.

Particular care will be taken in respect to rooted vines to guard against infection by diseases. I can furnish rooted ZINFANDEL, MALVOISIE, VERDAL, FEHER ZAGOS, CHARBONO, etc; at varying prices, according to the demands of different producers.

Also a few thousand CALIFORNICA SEEDLINGS; RIPARIA SEEDLINGS all engaged.

RIPARIA CUTTINGS.

Having made necessary arrangements, I am prepared until January 15th to offer fresh RIPARIA CUTTINGS from the forests of Nebrasska—car load already arrived in better condition than ever before received in this State, as follows:

36 INCH CUTTINGS at \$10.00 per M.
42 " " " \$12.00 " "

Ten per cent off for cash within 10 days after receipt and acceptance of orders.

For those who desire shorter lengths I will furnish

10 to 15 inch cuttings at \$3.50 per M.
15 to 18 " " " \$5.00 " "
18 to 20 " " " \$6.00 " "

But I advise purchasers to take the long cuttings and prepare them to suit themselves. This is the cheapest offering of Riparia cuttings ever made in California

SEED.

I have fresh Riparia seed (from Nebraska) to offer at

\$2.50 per lb. for less than 5 lbs.
\$2.00 " " " 5 lbs. and more.

Also, Fresh California Seed at

\$1.50 per lb. for less than 5 lbs.
\$1.00 " " " 5 lbs. and more.

CIRCULARS

will soon be ready to explain the importance of certain of the rarest varieties and will be furnished on demand.

Address

CHAS. A. WETMORE,
No. 321 Montgomery St., or
No. 111 Leidesdorff St.,
San Francisco, Cal.

P. O. Address
111 Leidesdorff St. S. F.

Just as soon as a vine is found to be affected, it should be taken up and at once replaced by some resistant variety.

The President called attention to the fact that in the day's discussion we had only spoken of what varieties to plant, but stated that the same varieties could be recommended for grafting. The same rules applied; a grape recommended as adapted for planting in certain localities and soils, would be equally suitable for grafting.

As the hour was late the election of officers was postponed and the meeting adjourned.

Fresno Vines.

BARTON VINEYARD,
FRESNO CITY, Cal., Feb. 22, 1884.

EDITOR MERCHANT:—So far as my vineyard is concerned, no water is troubling me. In coming from the foothills of the Sierras and in passing on southerly through the lower lands, past me, it backs onto my low points to the extent of about twenty acres, which drains all off as soon as the supply stops. To avoid a re-occurrence of this in early spring, after the vines had out, I shall have to spend about $300 in throwing up a dirt bulkhead along the low places on the southern front of my southeast quarter. Of course, at this time of the year, no damage is done to vines, even if covered with water for six weeks, as long as one can draw it off before early spring. Again, I find my vineyard fortunately located, as I have complete drainage on the lower country, southerly.

This will be a prosperous country this year on account of the natural moisture coming in such abundance, and no irrigation will be necessary in any grown vineyard. In fact, I find no vines here require summer irrigation after the first two years, and older vines will only require what water nature does not supply in winter. This winter, nature supplies in abundance what generally has to be supplied artificially from our never-failing, snow-capped Sierras. ROBERT BARTON.

White and Red Wines.

The Cloverdale *Sentinel* says: "The white wines of California seem, as a rule, to be better thought of than the reds. This is easily accounted for, since our best white wines are made from the most celebrated white wine vines of Europe, while with the reds this is not true; for, with us, few of the better varieties of the red wine vines are used at present, to any considerable extent, in the manufacture of these wines, the great reason being that, generally speaking, high-class red varieties bear less than high-class white wine vines. Soon this will be altered, and we will find our clarets and Burgundies coming well to the front, and our ports making names for themselves; for we believe there are now, in the various parts of the State, all the varieties planted necessary to do this. However, it is yet necessary to determine the special soils, climate and districts necessary for the highest development of quality of each special variety, and the most suitable method for pruning required to secure best bearing powers."

Fresno Claret.

Col. M. Denicke a few days ago sent a bottle of claret made at his vineyard to Geo. West, the Viticultural Commissioner for this District, and has since received from Mr. West a very complimentary letter relative to the wine, from which we make the following extract: "Yours of the 13th instant received, also, the wine, which was a surprise to me, and I want to know all about it; what grape was used; how long fermented, and what amount of saccharine when fermented, etc. I am very much pleased that you can make such a wine, for it is the best by far I ever saw in Lower California."—*Exposition*.

Mr. West told us personally that this wine, said to be made from Carignan and Grenache grapes, was better than any wine he had ever tasted in Stockton or south of it.

In the year 1591 Queen Elizabeth used a thousand vessels of glass and silver at one banquet. Wines, if made in England were boiled with rice and sugar.

Raisin Grapes.

A correspondent of the Los Angeles *Times* on the raisin question says:

Muscat grapes sold at the winery last Fall for $18 per ton. Allow three tons of grapes for one ton of raisins, and the grapes for one ton of raisins, at winery prices, are worth $54. In either case the grapes must be picked and delivered. It is surely as easy to deliver one ton of raisins to the railroad warehouse as to deliver three tons of grapes to the winery. Now then, dried-grape culls, at the lowest price conceivable, in sacks, are worth $3 per cental; that is $60 per ton, or $20 per ton for fresh grapes. Allow $6 per ton for drying and sacking, and we have $54 for dried grapes, or $18 per ton, net, for fresh grapes and no excuse for selling them at the winery. But dried grapes (common) are worth, at lowest rates, $4 per cental, that is $80 per ton. Allow $10 for drying and sacking, and we have $70 per ton for dried grapes, or $23 33, net, for fresh grapes. But the No. 1 dried grapes are worth, readily $5 per cental; that is $100 per ton. Allow $20 per ton for drying and sacking, and we have $80 per ton for dried grapes, or $30 per ton, net, for fresh grapes. Now about the raisins: The lowest class of cull raisins, put up in fifty pound boxes, are worth $3 50 per box, that is $125 per ton. Allow $35 per ton for curing and packing, and we have $90 per ton, net, for grapes. But common raisins are worth more, and will usually bring 7½ cents per pound, or $1 50 per box or $150 per ton. Allow $50 per ton for curing and packing, and we have $100 per ton net for raisins, which equals $23 33 per ton for grapes. But good layer raisins are worth at least $2 per box, or $200 per ton. Allow $50 for curing and packing, and we have $150 per ton net for raisins, or $50 per ton net for grapes. Lastly, when extra layers retail east of the mountains at 25 cents per pound, is it too much to think that such raisins here ought to bring at least 12½ cents, that is $2 50 per box, or $250 per ton. Same allowance for curing and packing leaves $200 net per ton for raisins, or a net of $66 66 per ton grapes.

Justice for Railroads.

The Colusa *Sun* never hesitates to speak its mind boldly on any question, and yet never descends to demagogism or clap trap. It recently said referring to the railroad tax suits and the outcry fomented by the *Examiner* for another session of the legislature:

We believe in treating the Railroad Company and all other corporations, exactly as other persons are treated, exacting no more of them and taking no less. We hold that it is not only the prerogative, but it is the duty of the people to assume a healthy control over railroads, canals, irrigating ditches, and all other public or quasi-public corporations, but we can tell the people that this control will never be exercised as long as they follow off after "howlers"—after men who for personal gain would ask the people to do an injustice to any of their great interests. These corporations are necessary, and they should be fostered and encouraged *as well as controlled*, and these "anti" chaps are, nine cases out of ten, simply humbugs, with no more honesty than the capper for a game of cards.

Whenever we make up our minds that we are going to do equal and exact justice by every interest in the State, and that we will not listen to a man who announces himself the enemy of any interest, we will be in a condition to take control of these great interests, and see that they do not impose upon us. The man who announces himself an enemy to a great and a necessary interest—and if the transportation interest is not necessary, what is?—and that he is willing to do it an injustice, depend upon it he will sell you out. If *justice* is not a part of his composition, he will not care on whom the injustice falls, and with such men in power, these great corporations are always able to take care of themselves!

The steamer Austral, which capsized and sank in Sydney harbor, a little over a year ago, is to run across the Atlantic, in the Anchor Line with her sister ship, the City of Rome.

GRAPE CUTTINGS.

Mataro, Charbono, Black Burgundy, Sauvignon Verte, Franken Riesling, and other leading varieties; also

This Company now offers to the market a large stock of wines and brandy of its own manufacture. Correspondence solicited. Address:

San Gabriel Wine Co.,
SAN GABRIEL, CAL.

EL CAJON.

27,000 Acres of Choice Vine, Fruit, Olive, Alfalfa and Grazing Land to be Sold in Large and Small Tracts.

To hasten the development of the colony now growing up in the Cajon Valley, San Diego county, the El Cajon Land Company will temporarily suspend the sale of its stock, and will make most favorable offers to induce rapid settlement of the country. The 27,000 acres controlled by the Company will, until further notice, be offered in tracts, as follows:

First—The 2500 acres of platted, level land, in lots from 5 to 160 acres—uniform in quality—at $60 per acre, cash. These lands are most favorably situated for vine, olive, citrus and fruit culture, or for making pleasant homes, where the benefits of climate only are sought. Adjacent lands of same quality cannot be purchased at less than $100 per acre. The Cajon Valley already has the nucleus of a fine settlement, a school-house, church, post-office, hotel, etc. About 500 acres in vines and trees are already planted.

Second—The so-called "T." tract, containing 10,000 acres of land, comprising 2,500 acres of valley land, 1,500 acres of rolling mesa, suitable for grain, and 6,000 acres of hills suitable for grazing, will be sold entire. This would make a first-class stock ranch, or could be cut up advantageously for a small colony; wood on this tract is estimated at 20,000 cords. The price will be so low that an investor may subdivide and sell off 1,000 acres of the valley land, and clear all his expenditures.

Third—The so-called "Monte"—a tract of 1,000 acres of the richest alluvial soil along the San Diego river; carries about 20,000 cords of wood. This land in any upper county of the State would sell for $150 to $500 per acre. It will be sold entire, together with adjacent hills.

Fourth—The grazing lands of the "S." tract between the platted lands and the "Monte," about 10,000 acres, partly suitable for cultivation, will be sold either together with the Monte, or separately.

For further particulars apply to

MEXICO Per same—1 bundle bananas, 5 cs fruit, 160 box limes, 71 box oranges, 5 pkgs raw sugar, 24 cs miscellaneous, $11500 treasure.

Spirit of the New York Markets

NEW YORK, Feb. 29th. A number of causes have conspired to retard business, or prevent an increase which is naturally looked for upon the near approach of spring, the potent of which are the prostration of last weather and the Western floods, embarrassment of land transportation, the extent to which by transportation has been more or less hindered. Prices have remained almost unchanged, except in grain, commodities which are subject to speculative manipulation and in which the laws of demand and supply are ignored. Almost every product of which we have a surplus is thus maintained above the demands of foreign markets, which are in consequence drawing supplies from other sources. Notwithstanding the remarkable cheapness of our products, our exports have fallen off, there being no responsiveness in foreign markets to the increased prices in our own, and there is therefore no little suffering among the shipping and all related interests. The only redeeming element in all branches see before them nothing but not for worse than has been the rule for several months, but the more sanguine see in the future a decided change for the better in March. Taking a broad view of the whole field of industry and commerce, there is a reasonable foundation for the hope that the worst has been met. Confidence will return slowly at the best, but this again is safer than a rush for a business which may not come. It is an anxious season, but the rally sound concerns will go through. There is money enough and to spare for those who have the sagacity of actual prosperity, or of business ability, directed in and to legitimate channels.—*Shipping List.*

THE WOOL MARKET.

Our wool market has again been very quiet during the past week. The small stock of fall clip left over will probably be taken gradually by our local scourers

We quote:	
Northern Choice Fall	.15 @16
do Medium Fall	.14 @15
Southern Fall, free	.11 @13
do do defective	.8 @10

TOBACCO MARKETS.

SAN FRANCISCO.—Dealers in leaf complain of light business this week.

Manufactured tobaccos are also dull of sale, sharing the quietness which pervades the grocery business.

Those cigar manufacturers who have agreed to the demand of the Chinese makers are fairly busy.

The lack of communication by mail or otherwise with the south in consequence has helped to increase the depression so noticeable this week.

Total imports by sea and rail, 5,930 lbs Manufactured Tobacco, 5 cs Cigars, 29 cs Cigarettes. Total exports by sea, 1,200 lbs Manufactured Tobacco, 1,498 lbs Leaf Tobacco.

[U. S. Tobacco Journal.]

NEW YORK, Feb. 16th.—As a whole, the business of the week differed but little from that of the previous one. Again there was a great deal done in looking at goods, and comparatively very little in buying them. City manufacturers claim to be enshrouded in dullness, and therefore have not an exactly rapacious appetite for seed leaf, but as our manufacturers are noted for their shrewdness they are not expected to trumpet their demands for leaf or post the market as to their ideas in any shape. An incident took place, though, which set tongues a-wagging and made leaf dealers fall into a dark-brown study and solemn reverie. One of our largest manufacturing firms, who also pack all the tobaccos used by them, saw fit to sell 500 cases of '82 Pennsylvania wrappers to a Water street leaf firm; and though the price obtained was left a matter of conjecture, most people in the trade were positive that, according to the best rules of arithmetic found also probably owing to the unusual redness of the sky at sundown lately) the price was either 20, 30 or 40 cents; and if it was not one of these, then, very likely, it was "other."

"Why did they sell?" was asked and argued on all side.

The bulls said: "This goes to show that the market for good leaf is gradually getting scarcer and scarcer, and that in order to be prepared for a famine in such stock the purchase of this lot even at high figures was absolutely judicious."

The bears said: "This goes to show that the '82 Pennsylvania is bad tobacco; the firm that sold it knows the market as well as anybody, and when they have a fine piece of tobacco they keep it, like any other same manufacturer would do."

At any rate, there was no lack of theories and opinions on this sale, and most absurd rumors floated in the market. Even at the time of writing, a broker chuckelsomely breaks the news to us that the firm which sold this lot had offered $3,000 profit to the buyer. We are only prevented from publishing information lucidly by noticing an unsteadiness in the gaze of our esteemed informant.

Sumatra—An active business was done. Much complaint is made by buyers regarding the quality of stock offered, showing so little dark and silky material. The prices for the latter are continually increasing, and the predictions are that the price will go as high as $2 a pound before next summer. Sales 350 bales, at $1 10 to $1 80.

Havana—Was very active. Sales 1,100 bales, partly old, partly new. Among the weights of new a great quantity of heavy, wet stock is being found, which is very difficult of sale. Price, 85 cents to $1 30.

[New York Tobacco Leaf.]

NEW YORK, Feb 16th.—*Western Leaf*—The market has been dull as a consequence of the scarcity of desirable supplies and the flood-embargo in Western markets.

Virginia Leaf—The sales of Virginia stock have embraced smokers at from 20 to 34c; new dark wrappers at full prices; lugs at high prices; new primings, just received, very common, at 5 to 5½c, and export leaf.

Seconds—Havana fillers partake of the general dullness; sale 500 bales at from 80c to $1 15.

Plug—The demand for plug goods has been brisker than of late, and jobbers have been trying to fill orders at old prices. Manufacturers, however, remain firm, and insist upon an advance of from one to two cents a pound on prices prevailing a month or two ago, which checks operations for the present.

The exports were 106,576 pounds.

Smoking—All popular brands have been in good request.

Cigars—The cigar market continues fairly active.

THE WINE MARKET.

The sales of wine from makers' hands have been few during the week and of no importance. There are only a few small cellars or little lots of larger cellars that were not in order when the main stock changed hands, now to sell.

There is some demand for new brandies, but the prices offered are very low.

For Exports and Imports, see Merchandise Markets.

Brandy—Original Government Gauge in Bond made prior to 1881.

Bbls	'81—	90 @$1 10	'82–85 @ 95 cts
Hf bbls	'81—	$1 05 @$1 15	'82–90 @$1 00

Pumace—

Bbls	'81	90 @ 95	'82– 75 @ 80
Hf bbls	'81	95 @ 100	'82– 80 @ 85

The above is in round lots of 100 bbls or more.

Jobbers furnish shipping lots in good coopage f. o. b. ship or rail, as follows:

White Muscat	'82–42½ @ 45 '81–50 @
Rei Mission	'82–42½ @ 45 '81–50 @
Hock	'82–60 @ 65 '81–65 @ 70
Reisling	'82–60 @ 65 '81–65 @ 70
Gutedel	'82–60 @ 65 '81–65 @ 70
Zinfandel, Red	'82–57½ @ 60 '81–65 @ 70
Burgundy, Red	'82–57½ @ 60 '81–65 @ 70

RETAILERS' CORNER.

In many branches of the wholesale trade, business has been very dull during the week. A few houses make a different report, probably from the fact that some of their regular customers who are on those lines of railroad which have not suffered from the storms have visited them during the week and purchased their regular spring invoices. The brokers and manufacturers' agents, whose transactions are a fair criterion of what jobbers are doing, all report a flat and unprofitable week.

Coffee is very quiet, buyers are holding off, expecting that the incoming March steamers will bring large supplies of the new crop, and that holders may then be willing to make concessions on present quotations. On the other hand, importers are very firm in their views of future values, knowing that the stocks in jobbers' hands are light and that a few days' active business will force these gentlemen to replenish their stocks at full or even higher figures. The New York market has fluctuated during the week a point or two; closed firm yesterday at the higher figure—12 ¼ for fair Rio cargoes.

The demand for Refined Sugars is excellent but the new CaliforniaR efinery is supplying chiefly Dry Granulated, also some Cube and Powdered. They are not delivering any Crushed at present, rumor saying that some changes are necessary in the machinery. We have notice of a reduction in D. Sugar from 7⅛ to 7c. The sales of grocery grades during the week have been large, amounting to a little over 4000 bags and reages. Prices continue low and dealers are inclined to carry heavy stocks in anticipation of an early change upwards.

We have now a good stock of Hawaiian Molasses—prices are unchanged.

Hawaiian Rice is weak, owing to large arrivals. We note a sale of 200 bags at 4¾, 60 days, but rumor says there has been a sale at 4⅛ cash.

In Asiatic Rice No. 1 China is very firmly held on account of rumors that the Chinese government will shortly prohibit the exportation of that quality of Rice. The general demand has improved.

Trade in most varieties of Canned Goods is very dull and canners who are very anxious to make sales have had to give concessions in Jellies, Preserves, String Beans, Lima Beans and Asparagus. On the other hand Gherkins and Mixed Pickles are a turn higher.

Bacon, Lard and Hams for local consumption are dull of sale at present, though a better business is shortly expected. Possibly the commencement of the Lenten season may have helped to make a dull season duller. Barrel goods for export and for ship use are, however, moving off freely.

In Codfish there is no change. Mackerel, No. 1, in kits, is higher; on the other hand Salmon and Salmon Bellies in barrels are lower.

Raisins are dull of sale, especially California. Sonoma layers are lower. California pitted Prunes are on the market.

There has been a slight concession in lozenges made by our local confectioners.

In Drugs we notice an advance in Asafetida.

John D. Spreckels returned from the East on Monday.

Moore, Furgason & Co. have removed to 310 California Street.

PRODUCE MARKET.

The Imports and Exports given below are compiled from last Thursday morning to Wednesday evening of the current week:

The heavy rains during the earlier part of the month have been succeeded by warm weather and the growing crops of cereals are much improved in their condition. No better outlook for excessive yields as the result of the incoming harvest was ever before presented at this season of the year. With this much in view, dealers on Call are very shy bidders for futures, even at prices which have been materially reduced since the beginning of the current month. Under the circumstances, no wonder, considering that, according to the last telegraphic advices, crop prospects throughout the world, as regards the more important grain raising sections, were never more promising.

In this St ate the fruit crop gives promise of an unusually large yield, and providing that we are not hard slapped with heavy frosts during the coming month it is assumed that California will have more fruit for consumption, canning and export than ever before in the history of the trade.

FLOUR—
Imports, 5579 sks. Exports, 38,858 bbls.
Receipts for the week, 78,219 qr sks

Though the export demand continues active the market is weak at rather lower figures, and a further decline is anticipated in the near future.

Extra, $3 37½@3 65. Superfine, $4 00@4 75. Country mills, $3 50@4 30. Interior Extra, $5 00@5 37½ per bbl for jobbing parcels to local consumers

WHEAT—
Exports, 56,371 ctls.
Receipts of week, 119,261 ctls

The English and Continental Markets have shown a slight decline, and in Chicago prices have varied from day to day. No 2 is decidedly cheap, but, as usual, there several shiploads are loading on owners account and no great difference in prices is noted, though the tendency is towards lower rates. In the speculative trade there has been a very weak feeling on the part of those holding buyers' contracts, and trade in futures shas been comparatively light.

In the Sample market $1 60 can be had for lots of good to choice No 2 in store, while at $1 55@1 57½ On Call yesterday quotations for No 1 White were as follows: Buyer season, $1 63; seller season, $1 54 bid, $1 58 asked seller, 1885, $1 52 per ctl.

BARLEY—
Exports, 13,774 ctls
Receipts of week, 186,018 ctls

With continued favorable weather and no probable prospect of a large export demand, the market has been quiet to weak, and prices are lower

In the Sample Market, No. 1 Feed sells for 87½@90c; choice do do for Brewing were made yesterday at 81 02½. Bay Chevalier, $1 25@1 30. For No. 1 Brewing, ordinary, $1 02½@1 07½ for fair to good and $1 15@1 80 per ctl., for choice to extra choice.

CORN—
Receipts of week, 2259 sks.

Quotations are nominal at $1 20@1 30 per ctl.

RYE—
Receipts of week, 882 sks

Quotations are entirely nominal, at $1 20@1 30 per ctl

BUCKWHEAT—
Receipts of the week, 17 ctls
Quotations are nominal at $1 20@1 30 per ctl.

MILLSTUFFS—
Imports, 250 ctls Millstuffs. Exports, 400 ctls Bran, 502 ctls Middlings.

Receipts of week, 1259 sks bran, 810 sks mid dlings, 1000 sks ground barley

We quote ground barley, $20 00@21 00 per ton, Middlings are selling at $17 50@20 00 per ton, Wheat Bran, $16 00@17 00 per ton, oil cake Meal, $36 00, mid ground and $26 50 per 100 pounds, Front on Meal, $4 00@5, Cracked Corn, $26 per ton, Rye Flour, $6 per bbl, Rye Meal, $5 50 per bbl, Buckwheat Flour, $6 per bbl, Pearl Barley, 6½c per lb, Eastern Oat Meal, $5 75 per bbl, Cracked Wheat, 4c per lb.

HAY—
Exports, 51 tons.
Receipts of the week, 1170 tons.

We quote Alfalfa, $7 00, Wheat, $11 00@13 50, Stubble, $10 00@12 00, Wild Oat, $11 00@13 50, Oat, $9 50@11 50, Barley, $10 00@12 00 per ton

STRAW—
Receipts of week, 16 bls.
Quotable at 50c@60c per bale—as to condition

SEEDS—
Imports, 71 bags. Exports, 157 bags
Receipts of week, 496 sks Alfalfa, 153 sks flax, 197 sks mustard

Flax quotable at $2 50@2 75 ₱ ctl; Canary, 6@7c ₱ lb; Alfalfa, 8½@9c ₱ lb; Timothy, 7@7½c for native and 8@8½c for imported; Mustard, choice Brown, $2 25@3 75 ₱ ctl, White, $2 75@3 00; Hemp, 3½c per lb; Rape, 2½@3c

BRANS—
Imports, 39 bags Exports 23 ctls
Receipts of the week, 2141 bags.

Beans are still the center of attraction the high prices that prevail have brought out a great many lots, yet holders are firm in their demands

Pinks a little weaker Butters firm and advancing White are not moving, the expected Eastern demand has not come along yet. Limas lack vigor, some lots are being offered at lower prices than they could be sold at last week.

Our quotations are, for round lots from the wharf, Small White and Pea, $3 35, Bayos, $4 85, Pinks, $4 10; Reds, $5 00, Butters, $3 3½, Limas, 3c.

VEGETABLES—
Arrivals of Asparagus have been light during the week.

We quote Carrots, 25@35c ₱sk, Turnips, 50@65c; Cauliflower, 65c@75c ₱ doz; Cabbage, 60@65c, ₱ ctl; Garlic, 2@2½c ₱ lb. Celery, 50c ₱ doz; Dried Okra, 30c ₱ lb. Dried Peppers, 12½@15c ₱ lb. String Peppers, 15@20c per lb. Artichokes, 10@50c ₱ doz; Beets, 75c ₱ ctl; Parsnips, $1 25 ₱ ctl; Marrow Fat Squash, $15@18 ₱ ton, Mushrooms, 60c@$1 ₱ lb; Cucumbers 25@50 $1 50 per doz, Tomatoes, 8@10c per lb, green peas, 6@10c, string beans, 15@17c; Asparagus, 10@20c per lb.

FRUITS—
Imports, 5 cs Fruit, 1191 bunches Bananas, 160 cs Limes, 71 cs Oranges Exports, 36 cs Fruit, 20 bxs Prunes

We quote Domestic Apples, $1 25@2 00 ₱ box

NUTS—
Imports, 140 Cocoanuts
We quote, Cocoanuts, $6 00 50 ₱ 100. Calif

There is nothing of interest to report. Stocks on hand are equal to the demand.

Walnuts, 8@9c; Soft Shell do, 8@9c; Almonds, California, hard shell, 6@8c; soft shell, 11@12c; Filberts, 15@16c; Pecan, 12@13c; Peanuts, 5@6c; Brazil Nuts, 15@16c; Hickory Nuts, 7@8c; Pagan Nuts, 15@16c

DRIED FRUITS—
Pears, 75c@$2 00 per box; Wisconsin Cranberries, $18 00 ₱ bbl, Western do, $17 00@17 75 ₱ bbl.

Tropical Lemons, $5 00@6 00 per box for seedlings, $12@13 per box for Mexican, Tamarinds, 12@13c per lb; Bananas, $1 75@4 00 per bunch; Oranges, California, $3@3 50, choice, Riverside, $4 for 150, Choice Natel, $4 50@5 50 per box.

The market is fairly supplied, with a dull trade and no change of importance in price

HONEY—
Exports, 1 cs.
The market is as usual very dull.

We quote Extracted, 6@7½c; Extra White Comb Honey, 20@22c; White, 15@16c; Dark, 8@10cts

DAIRY PRODUCE—
Imports, 4500 lbs, 49 cs Butter, 8583 lbs Cheese
Exports, 9525 lbs Butter, 2119 lbs Cheese

There is only a light Receipt, 225c, Choice 27½@30, Fair to Good, 27½@30, inferior lots from country stores, 17@20c; firkin, 20@22c for old and 24@25 for new. Eastern, 15@17c, Pickled Roll, out of Brine 20@22c, Factory, 16@17c for choice, 14@ 12½ for Fair to Good, Gilroy, in firkins, 16@18c; Eastern, 17@18c; Western, 10@15c.

A sudden break in butter took place in the market since our last issue, 25c, and before 27½ were the ruling quotations for fancy and Point Reyes product. These figures held only for a short time and Point Reyes declined to 25c and fancy to 27½c 29. The Receipts for the week ending to-day are indications point to a still further decline ere our next report, as our late favorable weather has done away with the feed, forcing heavy production. We are glad to note an improvement in quantity all along the line

EGGS—
We quote California Eggs, Choice Ranch, 27½c per doz; Common, Dried, 22½c.

Market firm at 27½c, with liberal supply and large demand. Lent having commenced has had some effect on the market, and from 24c Tuesday we have to quote to-day 27½c. The absence of Eastern stock compelling bakers to use our local supply has done much to keep prices up. We look for no material change for a few days

POPPY SEED—
Exports, 280 ctls.
Receipts of the week, 18,708 sks.

We quote, Early Rose, 85c; River Reds, 45c; Toluca and Petaluma, 65c; Valley Rose, 75c, Humbolts, 55c, Salmon, 52½@55.

There are but few River Reds on the Wharves. Petaluma and Tomals are in plenty and stocks are accumulating. Prices are about steady. Seed potatoes are in heavy supply. Early Rose are eagerly picked up at an advance

ONIONS—
Exports, 11 ctls
Receipts of week, 1725 sks
Arrivals of choice sell readily at $1 35

BEESWAX—
We quote 26@28c per lb
Business in Beeswax is quiet

HOPS—
Receipts of the week, 142 bls.

No material change in the situation since last week. Eastern and English markets continue strong and sales are show. Market here is in sympathy and in fact governed by same conditions

Some sales have been effected here to local dealers for either local use or for speculation, at figures above quotations, but for export these quotations are all that can be procured to-day.

Quotations may be put, choice 20 to 22c, prime 19 to 20c, fair to middling 17½ to 18½c.

POULTRY—
Receipts have been light but sufficient stocks on hand to meet the demands.

We quote Turkeys, live Gobblers, 20@21c per lb; Turkey Hens, 22@23c, Dressed, 22@24c, Young Roosters, 28@30@50, old Roosters, $7 50@8 00, Hens, $6 50@8 00, Fryers, $5 00@7 50, according to size, Ducks, $11 00@14 00 ₱ doz; Geese, $2 25@2 50 per pair.

GAME—
The Quail season ends this week, as the game law goes into effect on the 1st and lasts until the 15th of October.

We quote: Quail, 1 25@$1 50 ₱ dozen; Hare, $1 50@2 00; Rabbits, small, $1@1 25, cotton tail $1 25@1 50 ₱ doz; Teal, $1 50, Sprigs, $1 75@2 25@2 50, Widgeon, $1 50@1 75, Mallards, $1@1 25 ₱ doz, canvas backs, $5 00@6 00 per doz, common Snipe, $1 00@1 50 ₱ doz, do, English, $2 50@3 00 ₱ doz; Grey Geese, $2 75@3 25 White Geese, $1 25@1 50, Honkers, 4 00@5 00 per doz. Brant, $1 25@1 50

HIDES, SKINS, ETC
Imports, 4826 sks Hides, 13 bdls Skins, 7 cases Tallow

Heavy Salted Steers, over 55 lbs, 10@10½c per lb Medium Salted Cows and Steers, 50@55 lbs, 8c, Light Salted Cows and Steers, 50@55 lbs, 8c per lb Salted Kips, 40@ per lb. Salted Veal, 11@per lb Salted Calf, 15c per lb.

Dry Hides, in all selections, 18@——per lb, Dry Kips, do, 18@—c per lb. Dry Calf, do, 18 @26 per lb.

WOOL—
Receipts of week, 202 sks.

For Wool market see Wool Department.

MERCHANDISE MARKETS

AGRICULTURAL IMPLEMENTS—
Imports, 18 pkgs

Steel Iron Plows, $5 or 11, Star Moline Plows, $9 50@50, Collins' Plows, $9 00@11, 147, Hill's Plows, 17 50@25, Gale's Plows, $7 50@17 00, Eureka Gang Plows, $100@150, Stockton Gang Plows, $75@$100, Granger Gang Plows, $95@$100, Wood Frame Harrows, $13 50@38, Hills Iron Harrows, 11@12, Calhoun Steel Scrapers, $17 50, do wood Scrapers, $25@35, Graham Scrapers, $100@$150, Triumph Grain Drills, $100@200, Buckeye Force Feed Grain Drills, $115@200, Eagle Broadcast Seeders, $120@$150, Buckeye Gang Plows, $100 @$150, Deere Gang Plows, $100@$150, Deering Mollne Single Plows, $7 50@20 00, Sattle Hard Chilled Iron Plows, $8@$17, Rice's Straw Burner Engines, $1,800@$2,500, Sandyke & Marston Co's Plantation Corn and Feed Mills, $75@500, Windlenge Feed Mills, $85, Champion Fan Mills, $65@$100, Giljan 13 in and 16 in Sulky Plows, $75, Kalamazoo Spring Tooth Harrows, 24 teeth, $45, 30 teeth, $60, Corbin Disc Plow, $50@$80, Buckeye Chisel Cultivators, $15@$110, Advance Cultivator, $35, Peerless Cultivator, $17, Keystone Corn Planters, 1 horse, $15, 2 horse, $20, Jackson Cider Mills, Stone, $50, Burrer, $70, Perkins' Wind mills, $100@$1475, Regulator Windmills, $90@ 150, Schuttler Wagons, $85@$290, Schuttler Dump Carts, $350@$450

BAGS AND BAGGING—
Standard Calcutta Wheat Bags are quoted at 57½c 61½c for spot, and 58@57½ for June-July delivery. Potato Gunnies sell for 11@11½

BORAX—
There is no change of importance in this article to note. Supplies are moderate, the bulk going forward either by rail or ship to Eastern markets. The price here is nominally 8c to 10c per lb to the trade in round lots.

BREAD—
Exports, 18021 lbs

We quote: Alphalet, 12c ₱ lb, Assorted, 10c; Assorted, 12c; Bananas, 11c, Boston, 8c, Butter, 8c; Charms, 12c, Cocoanut Cakes, 11c, Congress, 15c, Crackled, 22c; Cracker Meal, 8c, Cream, 8c, Graham Bars, 11c, Excelsiors, 12c, Frosted Creams, 12c, Galettes, 7c, Ginger Cakes, 10c, Ginger Nuts, 12c, Graham, 8c, Jenny Lind, 10c, Lafranchi, 10c, Lemon, 10c, Lunch, 8c, Meal Cakes, 12c, Milk, 8c, Milk Lunch, 10c; Monitors, 9c, Nic Nacs, 12c; Novelties, 12c; Nunerals, 12c; Oatmeal, 10c; Overland, 10c, Oysters, 8c; Palace Mixed, 16c; Pearl, 8c, Penny, 6½c, Penny Ex, 8c; Perfects, 10c, Pilot Bread, Soda Crackers, 8c; Scroll Cakes, 10c, Soda, 6c, Soda Ex, 7c; Spice Jumbles, 12c, Vanilla Bars, 11c, Sugar, 16c; Wafers, 8c; Waters, 8c; Whips, 8c, Pilot Bread 4c; Pilot Bread Ex, 15c.

BROOMS—
Imports, 58 doz, 8 bdls.

We quote, "Common" Hurl—No. 4, $2 50; No 3, $2 75, No 2, $3 00; No 1, $3 50. "Extra" Hurl—No 4, Parlor, (Little Beauty,) $2 00; No 3, $2 50, No 2, $3 00, No 1, $3 50. Best Hurl—No 4 $3 00, No 3, $3 50, No 2, $3 00; No 1, $3 50. Shop, Mill and Stable—No 3, $1 50; No 2, $1 00; No 1, $1 50. Soap, Paint and Sand, 75c. Ox, without galvanized bands, 50@ 75 dog bxs, "Common" Stalk—No 3, $2 25, No 2, $2 50, No 1, $3 00. Arines' Star Extra—No 3, $3 50, No 2, $4 00; No 1, $4 50. Stalk Handled Whisks, $1 75. Toy Brooms, $2 00, Stalk Handled Whisks, $1 75. 4 String Wood Handled Whisks, $1 75, 2 String Wood Handled Whisks, $2 00, 4 String Carpet Top Whisks, $2 50, do, $2 50, 1 do, $ 875

BRICKS AND FIREBRICKS—
In consequence of less arriving freights for outward loading business is much restricted. There are a few orders offering from dealers in prompt shipment, but importers are clearly holding out for cent prices, as the business would not yield them a now dollar for an old one. We quote:

	Spot bx. Wharf	To Arrive
Brown's Fire brick per M	35 00	32 50
Lowers	30 00	27 50
T Cares	32 50	30 00
Cutting	32 50	30 00
Heatherly Knowe	30 00	28 00

CANDLES—
Imports, 150 bxs. Exports, 780 bxs

We quote, Calcutrex Bay Improved Wax, 15@ 16c, do Stearic Acid, 15c, do Solar, 10@—

The following are current rates to the trade for lots of 1,000 boxes or the equivalent, adding brands of Eastern as well as of California production. Work's Stearic Acid, 16@ 16c, 1½s, 15½c, 1lbs, 14½@, 18c; Harkness' Extra Stearic, 16c; Schlichte's Stearic Acid, 14@c, 1½s, 13½c, 12-oz, 10@c; A. Gross & Co's Adamantine, 14@c, 13@14c; F. Darr & Co's, 12 oz, 10@; Proctor & Gamules Adamantine, 14@c, 15@, 12-oz, 10@c; Star, 14@c, 1½s, 13½c, 1lbs, 12½c, 16 oz, 10@; Grant's Stearic Acid, 12@c, 14@c; do do Hotel, 13@; Mitchell's Adamantine, 14 oz, 17c, 16 oz, 13½; C. & Candle Co's Adamantine, 14@c, 16c; Woods & Co's Stearic, 14@c, 15@; do Solar, 13½, 14 oz, 14@15c; San Francisco Candle Co's Crystal Wax, 14@c, 15c; Stearic Acid, 14@c, 15c; Star, 14@c, 13½; Apex, 12@c; Diamond Wax, 17c, Cincinnati, 12@c, 10@c; Diamond, 10 oz, 10@; Tiewer & Judel's Paraffine, 20@; Calcium Light, full weights and 14 oz in 20 and 40 lb. bxs, the agency, price is 17½c for full weights and 15c for 14 oz; Reguis, 10@14, United States, 10@c, 8@; Schmidt's 12 oz., 9½

CANNED GOODS, ETC—
Imports, 1857 cs canned goods, 264 cs canned meats, 100 cs milk Exports, 117 cs canned goods, 142 cs milk

There is better demand this week than last, in both local and Eastern trade

We quote California assorted Table fruits, 2½ lb cans, $2 25 ₱ doz, do pie fruit, 2½ lb cans, $1 50 doz, do gallon Table fruits, 2½ lb cans, $1 50 doz, do Fruits, $1 25; Tomatoes, 2½ lb cans, $1 15 ₱ doz. Jellies, $2 25, 1lbs, $2 25 ₱ doz. Pickles in 5 gallon kegs, $13½, California Sauces, pints, $4 50, ½pts, $4 75 ₱ doz. Ketchup, $1 25@1 75 ₱ dozen. English Groceries Crosse & Blackwell's Pickles, 1lbs, $4; ½lb, $6 75, Olives, ½lb, $7, Lunch, ½lb, $9 50, Sauces, ½lb, $4 50, Paste Jams, 1lb, $6; Jellies, $5 00 ₱ doz, Fry's Chocolate, 50c ₱ lb, Cocoa, 45c ₱ lb, Colman's Mustard, 60c ₱ lb.

CEMENT—
Exports, 50 bbls lime.
This article at the moment is very slow of sale. Some dealers estimate the stock on hand as being fully sufficient for this year's needs. Part of a lately arrived unsold invoice of foreign was warehoused by importers to await more remunerative prices. Our quotations are:

	Spot.	To Arrive
Eastern-Rosendale, in round lots. .$2 20	2 15	
English choice brands, in round lots. .$ 3 12½	3 10	
English outside brands, in round lots	3 00	3 00

COAL—
Imports, 6182 tons Pacific Coast, 6456 tons Foreign and Eastern. Exports, 1 ton Coal.
Harrison's weekly circular says:
The present week's trade has been very light, nothing of any interest occurring. Dealers' requirements for the moment are fully supplied, and no disposition is shown to purchase cargoes for future delivery, even at figures which preclude business.
If the new Tariff Bill now being introduced before Congress would place coal (where it naturally belongs) on the free list, it would be the stepping stone of success for manufacturing interests in California. It is simply absurd that millions of poor people must subscribe 75c. per ton extra for their fuel to enhance the revenue of a few colliery owners.
Two cargoes of Cumberland arriving this week will fully supply all immediate demands. There is very little English Coke in market, and only a small quantity on the way.
Importers' prices of coal, Foreign and American, to arrive: Australian, $7 75@8 00; Liverpool Steam, $8 or $8 25; West Hartley, $8 75@9 00. Scotch Splint, $8½ @9; Cardiff Steam, $7 75@8; Lump Lehigh, $13@ 13½; Egg Hard, $11@11½; Cumberland, bulk $10½ @10½. Spot prices are as follows: Australian, $8 00; Liverpool Steam, $8 50; West Hartley, $9½; Scotch Splint, $9 00; Cardiff, $8 00; Lehigh Lump, $13; Cumberland, bulk, $11 50; Egg Hard $11 50.

We quote: N Carolina Rosin, $3½@4½ for No 1, $5 00 for Extra Pale; Pitch, $3½@4; Tar, $6 00@ 6 50; Swedish do, $8 75; Oakum, $1 00, for ordinary California, extra do, $4 50; and $4 50 for Eastern ₱ bale; Spirits Turpentine, 48@50c ₱ gal; Anchors, 7½@8c ₱ lb; Chains, 5½@10c ₱ lb; Wire Rope, heavy, 9@12c; light, 14@17c; Yellow Metal, 18@20c.
OILS—
Imports, 4567 cs oil, 16 csks sperm oil. Exports 13 cs oil, 2114 gal whale oil.
We quote: California Castor Oil, No 1, $1 25 ₱ gal; No 2, $1 00. The Pacific Oil Co's list for Linseed, 65c ₱ gal for boiled; 62½c for raw in 100 bbl lots. We quote: Eastern linseed oil, 61½c; winter strained lard oil, 95c, in bbls; Cocoanut oil, in bbls, 7½c; China Nut Oil, 80c ₱ gal; Coast Whale, 37½c; Arctic Whale, 60c; Cal Neatsfoot, 85c; Eastern do, 90; Naphtha, 20c; Red Oil, 5¼; California Olive Oil, $1 ₱ gal or $12 ₱ doz.
PETROLEUM—
Imports, 1241 cs Coal Oil, 4 tanks gasoline. Exports, 529 cs Coal Oil.
PROVISIONS—
Imports, 6325 lbs Bacon, 25 cs Beef, 145500 lbs Ham. Exports, 4976 lbs Bacon, 32 bbls Beef, 6287 lbs Ham, 3352 lbs Lard, 30 bbls Pork.
Trade has been dull, but firm and good prospects for a good trade after Lent is over.
We quote: California Hams, 13½c Eastern, 15½@ 16½c; extra Choice hams, 16@16½c; California bacon, 13@14c; California covered bacon, 14@c; extra clear sides, @13½c; California shoulders 9½c; mess pork, $20 per bbl; prime mess, $18; clear pork, $21 per bbl; extra clear do, $22 per bbl; pig pork, $24 per bbl; mess beef, $14 50 per bbl; extra mess beef, $15 50 per bbl; family beef $17½ per bbl; Eastern refined lard, in tes, 13½c per lb; California refined lard, in tes, 14½c per lb; 10s, 10c; 5s, 10½c; Banner lard, 10s, 13c; 5s, 13¼c; 3s, 13½; Fairbanks lard, 13¾c for 10s, 13¾c for 5s, and 14c for 3s.
QUICKSILVER—
Rothschild advanced his figures in London on the 22d to £5 5s per flask. A good trade there for the China market is expected. Receipts there in January about 4,000 flasks. The last here from first hands is 36½c per lb, with a good demand for the home trade; 500 flasks went recently to Mexico. Receipts in town, so far this month, about 1,600 flasks.
RICE—
Imports, 71245 bags. Exports, 37295 lbs.
Quiet at unchanged prices, viz. $4 05@4 10 for Mixed, $4¼@4¾ for No 2 China, $5 @5¢ @5 50 for No 1. Extra No 1 $5½@5¾.
Asiatic is in a little better demand. Strictly No 1 China is firmly held on account of a rumor that the Chinese Government will shortly prohibit the exportation of this quality of Rice. Hawaiian is weak owing to large arrivals.
SALT—
Exports, 28416 lbs.
Liverpool has ve quote at $20@22 50 ₱ ton. California, $6@10 ₱ bag; do crystal, $10@15 Carmen Island, fine, $16@22; do coarse, $12; do do ball ground, $9@14.
SOAP—
Imports, 785 bxs. Exports, 2 bxs.
We quote: California Castile, Mottled, 8¾@12c; White, very choice Castile, Mottled, 12½c; White, 16@17; California Pale and Chemical Olive 5½@7c; Washing Powders, 3½@3 12½ per gross.
WHOLE SPICES—
Imports, 60 cs Spices. Exports, 1 cs Spices.
We quote: Black Pepper, 15@16c; White Pepper, 22@—c; Allspice, 12@15c, Cloves, —@22½c; Cassia, 20@9 c; Ceylon Cinnamon, 40@45c; Ginger, 8@15c; Nutmegs, 62½@65c; Mace, 60@62½c; Borneo Ginger, 16@18c.
SPIRITS—
Imports, 118 bbls spirits, 58 bbls Alcohol, 1 cs Brandy, 100 cs Gin, 172 bbls Whiskey, 2 cs liquor. Exports, 20 cs Spirits, 10 cs Alcohol, 10 cs whisky, 1243 bbls Brandy.
STARCH—
Imports, 76 bxs.
We quote: Kingsford's Pure Starches 8½c ₱ lb; Corn and Silver Gloss, 10½c; Pearl, 7¾c; Pure Starch, in barrels, 7¾c; Ground and Wheat Starch, 8½c, in barrels, 8¾c; Gloss, in barrels, 9¾c.
SUGAR—
Imports, 43152 bags Raw Sugar. Exports, 10000 lbs refined.
The California demand for Refined Sugars is excellent. From New York, by telegram, we learn that Granulated is quoted at 7⅞. That market for both Raws and Refined is unchanged and dull. Allowing for the refined weight on the barrel as well as on the sugar, $2 06 per hundred, Dry Granulated is selling by our refineries, nett, at .325 of one cent less than the New York product can be laid down in this market for, allowing nothing for time shrinkage, drayage and re-cooperage.
The sales of grocery grades this week have been unusually large, amounting to 1,450 kegs and 2,600 bags, at prices ranging from 5¾ to 6¾c.
We quote local refinery rates, prices subject to change without notice. The California Refinery has reduced the price of D Sugar from 7¼ to 7c.
A, 1 Pat Cube Sugar, in bbls, 10¾c; (A) Crushed Sugar, 10¼c; Extra Powdered sugar, in barrels, 10½c. Fine Crushed sugar, in barrels, 10¼. Dry Granulated sugar, in barrels, 9½c; Extra Granulated sugar, in barrels, 9¼c; Extra C, 8¾c; Golden C sugar, in barrels, 8½c; D sugar in barrels, 7c; Extra Fine Powdered, in bbls, 11½c; Confectioners' (A), 10c; El Dorado C, in barrels, 9½c; Mariposa C, 8¾c; Nonpareil, 8¾c; half barrels, ¼c, and boxes, ½c, more for all kinds.
TEA—
Imports, 1729 pkgs. Exports 3682 lbs.
TIN, ETC—
Exports, 162 pigs.
Remarks made last week apply to present condition Holders are strengthening prices on account of the near approach of Salmon canning season. Ere long we may expect higher prices to rule, as the quantity on route and loading is short of what will be required, should we have anything like an average fruit crop.

We quote:

A B Grades		6 25
Yspitty	$6 15	
Good B V "	$5 85@6 10	$6 00
Ordinary "	$5 50	$5 62

" Terne Plates (Roofing)		

We quote: Pig Tin, on spot, 22½c.
WINES—
Imports, 58 cs Foreign, 1 cs Native. Exports, 51 cs 620 gals Native.

Freights and Charters.

The spurt in chartering, owing to wheat holders who wished to avoid the March assessor, is over and dullness and apathy again prevail. A wooden vessel has been taken during the week at 31s 3d cash for orders U. K., Havre or Antwerp. Nominally iron ships yesterday were asking 35s but brokers would have been glad to find the man who would offer 32s 6d for Cork, U. K. Wood ships, though one has been taken during the week, by conceding more than the ordinary options, are practically out of the market.
The engagements for the week have been as follows: British ship Garfield, 22885 tons, wheat and merchandise to Liverpool direct. Schooner Emma Claudina, 186 tons, merchandise to Hilo. Schooner Fannie Butard, 252 tons, lumber from Humboldt to Panama. Ship Brooke Brothers, 1420 tons, coal from Seattle to this port. Bark Elsinore, 658 tons, returns to Honolulu. Barkentine Ella, 249 tons, merchandise to Honolulu. Hawaiian brig Dora, 197 tons, merchandise to Mexico. British ship Denbighshire, 1367 tons, wheat to Cork, U. K. British ship Borrowdale, 1277 tons wheat to Liverpool direct. German ship Hugo, 1618 tons, wheat to Cork, U. K. Havre or Antwerp. 30s. British ship Mount Carmel, 1595 tons, wheat to Cork, U. K., 35s. Brig Consuelo, 279 tons, returns to Honolulu.

Trade Failures.

There were 243 failures in the United States reported to *Bradstreet's* during the week ending Feb. 16th, 11 less than the preceding week, 22 more than the corresponding week of 1883, and 71 more than the same week of 1882. About 82 per cent. were those of small traders whose capital was less than $5,000. Compared with the previous week the middle states had 57, an increase of 4; New England states 34, an increase of 1; southern states 30, a decrease of 13; western states 86, a decrease of 4; Pacific states and territories 21, a decrease of 2. Canada had 66, an increase of 33. Among those reported embarrassed were William S. Page & Son, bedding; Joseph Freeman, importer of dry goods, and George Parsons, toys and breworks, New York city; J. M. Jones' Sons, car-builders, West Troy; Jones Car Manufacturing Company, Schenectady, N. Y.; Central Bank of Upper Sandusky, Ohio; Edward Pilsbury's Sons, cotton commission, Mew Orleans; L. D Mowry & Son, cotton factors, Charleston, S. C. In this principal trades they were as follows: Grocers 44; general stores 42; shoes 16; clothing 13; hardware and agricultural implements 13; dry goods 13; liquors 11; manufacturers 11; drugs 9; hotels and restaurants 9; produce and provisions 9; grain, flour, etc., 6; jewelry 6, books, stationery, paper, etc, 5; cigars and tobacco 5; fancy goods 4; bakers and confectioners 3; cotton 3; crockery 3; furniture 3; men's furnishing goods 3; butchers 3; banks 2; lumber 2; millinery 2, toys 2.

Meat Market.

Beef continues firm, with light supply. Mutton is scarce and high. Arrivals have been very light during the past week. Pork is high, with very few first-class Hogs coming to market.
Following are rates for whole carcasses from slaughterers to dealers:
BEEF—First quality, 9½@10½c; second quality, 8½ to 9c; third quality, 8@8¼c ₱ lb.
VEAL—Large Calves, 8@8½c; small ones, 9c to 10½c ₱ lb.
MUTTON—Wethers are quotable at 7@7½, and Ewes at 6@7c ₱ lb.
LAMB—Quotable at 7@8c ₱ lb; spring do 13@15c per lb.
PORK—Live Hogs, 6½c@6¾ for hard grain hogs on foot; dressed do 10c@10½ ₱ lb.

Things a Business Man Can Not Do

[A man in any business whose success depends on the support of the many can not do a great many things that he might feel like doing. A merchant or any other business manager can not afford to make enemies. Even though he may feel himself slighted, and perhaps wronged, he must put up with such things if he would retain his trade. A merchant can not sit behind his desk and say, "the public be — —, I am running my own business," and yet expect people to patronize him. He runs his business out.
It is the work of a business man to please, and not to offend. Personal likes and dislikes must be kept under. A supercilious air will not do. The I-am-great-than-thou spirit may do for the militia, but it will not do in trade matters. Here all are on a level, and the even-tempered, reasonable man succeeds where the selfish and haughty fail. The peacock is a gay bird, but the common barn-yard fowl will lay all over him as a business institution.

A. D. BELL ....Editor.

FRIDAY FEBRUARY 29, 1884

The annual rate of consumption of brandy in Russia is at the rate of ten quarts for every man, woman and child in the Empire. The consumption of malt liquors in the United States is nine gallons for every man, woman and child.

That unless the Democrats in Washington can settle amongst themselves whether their administration, if in power, would mean a low tariff and a large free list or would make the interests of the great body of the people superior to that of American importers and British manufacturers.

Henry George recently addressed an immense audience in the most fashionable hall in London, St. James. Labouchere was in the chair. Though George's doctrines were eminently distasteful to the majority of his audience, he acquitted himself nobly and won applause for his eloquence, though it was not after the models of Oxford or Cambridge, from men who look upon his philosophy with horror as something akin to robbery.

At least four of the Central American republics are in earnest about the early construction of the Nicaragua Canal, with the assistance of the United States, if it can be had, without if it cannot be had. In the latter event, these Republics will probably go to Europe for financial aid and government influence and protection. We Americans cannot play the "dog in the manger," and, because we are unwilling to help the Central Americans in developing their country, forbid them doing it themselves. But, to return to the original subject: Señor Antonio Batres Jnaregui, a distinguished lawyer of Guatemala, and a relative of one of the firm of Cabrera, Roma & Co., of this city, Minister of Guatemala at Washington, has received credentials from the other Central American republics to act for them in bringing this canal matter to the attention of the Administration. What President Arthur will do is uncertain he is a candidate for re-election. Possibly he may think the great trunk lines will oppose the Nicaragua Canal project because it is a feasible scheme, while they have no fear, because no confidence, in the completion, during the lives of the present generation, of the Panama Canal scheme. The Democratic party, in this case, seem to have an opportunity of putting the Monroe doctrine in practice, by forestalling foreign intervention in American canal matters.

DISPUTED LAND GRANTS.

As many California interests are involved in the settlement of the disputed land grants now before Congress, for the better understanding of the several questions we present our readers, in another column, with what appears to be a careful and impartial statement of the condition of one of these grants, from the columns of our esteemed New York contemporary, *Bradstreet's*. Clearly, from this statement, some of these grants have no merit, others some merit, and others, again, much merit. It would not be just or statesmanlike to class all land grants in one category and revoke them all. Whatever change of public opinion may have taken place since these grants were made, as they were in the nature of contracts, each claim must be decided on its own merits. Because no earnest endeavor has been made to comply with the terms imposed on them by one or more companies is no reason why the lands allotted another company which has striven to construct its road and been thwarted by circumstances beyond its control, should be forfeited. *Bradstreet's* seems to think the Southern Pacific and Northern Pacific, both roads being completed, should receive liberal treatment. Of the California and Oregon, the road in which San Francisco is so deeply interested, 152 miles were completed within the stipulated time, and, we understand, twenty miles since and much grading done ahead. There are about 116 miles yet to complete, on which some work has been done. It is necessary, if the two roads, the California and Oregon and the Oregon and California, are to be completed so as to be any benefit to the present generation of merchants, both these land grants should be renewed for a limited time. There is about 220 miles of road to be built, and this is at an elevation of 4,000 to 5,000 feet above the level of the sea, and in a country as rough, wild and inclement as any part of the Sierras. The failures on the part of the California company was due not to any unwillingness on its part to go on, but the inability of the company which had undertaken to meet it at the State line, to continue operations. No company could be expected to build a most costly road, up one side of a mountain, if there was no road down the other side. Certainly, the California and Oregon has an excellent case before Congress, and, as the roads already built are of little use, though so much needed, until the gap is bridged, the instinct of self-interest should lead all Californians to exert their full influence to preserve these grants. California and Oregon are close neighbors, the two most important, indeed, the only important States on the Pacific Coast, and there is no practical communication between them, except by sea. Need more be said?

The Standard Sugar Refinery, as will be seen by their advertisement, to encourage the growth of sugar beets by farmers who are within easy access of Alvarado, by rail or water, will furnish the best French or German seed, in lots to suit, at a nominal price. The season promises very favorably for a good beet crop, and it has proved, with the farmers who have tried it the most profitable crop that they can grow. Mr. Dyer will furnish printed instructions for the cultivation of sugar beets. Farmers who have suitable land should put in ten or twenty acres; it will pay better than barley or hay.

SAN FRANCISCO TO SALEM.

Salem, the capital of the State of Oregon, would be as cheaply, quickly and conveniently reached by rail from San Francisco and nearly equally so from San Francisco, as Los Angeles, if the gap of little over 200 miles between the end of the track on the California and Oregon and the Oregon and California was completed. If we had one month's railroad communication with Oregon, the merchants of both States would feel it an almost intolerable hardship to have that communication interrupted. What inconvenience the temporary suspension for a few short days only of railroad communication with Los Angeles is working! Yet we are no worse off in these few days than we were before the railroad was completed. We still have the sea and the steamers. But steamers and the sea route are not enough for modern travel and modern commerce. Oregon is, practically, to-day no nearer to us than if it were an island, like Vancouver. We can only make it a next-door neighbor by completing the C. & O. and O. & C. R. R's., and our merchants, or a few of them, have actually thrown an obstacle in the way. They have in effect said to Congress: "We do not want any closer connection, socially or commercially, with Oregon." Even their rivals, the Board of Trade of Portland, were wiser, because, though they have something to lose by perfecting communication between the interior of Oregon and San Francisco, they have recognized that they would, also, have something to gain.

There are strikes and strikes; some are justifiable, some are unjustifiable, a few are successful, some are partially successful, most are failures. Of one hundred and fifty-nine strikes in Massachusetts between 1830 and 1880, one hundred and nine were unsuccessful, and only six fully successful. Of two hundred and seventy-seven strikes in Great Britain in 1878, only four were successful. The worst time to strike is on a falling market, for, as a workingman once remarked, he had noticed that when two employers were running after one laborer wages were high, but when two laborers were running after one employer they were low. The latter appears to be the state of things just now in the East, and it should be a matter of serious consideration among laboring men whether they are not likely to lose more than they can gain by striking at a time when stockholders are getting small or no returns on their investments.

Mrs. Mackay did not like her portrait, as painted by Meissonier, her friends telling her it was a caricature. The lady paid the artist his commission, nearly $15,000, and destroyed the painting; hence the row. If it had only been a photograph, no one would have objected, and we do not see why a lady should be attacked because a great painter having made a failure, she chose to destroy it, any more than if Worth had made a misfit and she had paid his bill and torn the garment into shreds. Nay, the case can be put more strongly. No woman, even though she had no pretensions to beauty or elegance, would wish to leave behind her a portrait that gave a false idea of her appearance, a caricature. That Meissonier has a great reputation only made its preservation more objectionable. The wives or mothers of any of us would, under similar provocation, throw a photograph in the fire.

Spafford's Canning Factory Burned.

A few minutes before one o'clock Thursday, those in the vicinity of Clay street, between Front and Battery streets, were startled by two or three reports of explosion followed by flames bursting from the upper windows of Spafford's canning factory, at 310 and 312 Clay street. A little later Mr. Spafford ran out of the building badly burnt and cut about the face. The firemen were soon on the spot and with considerable difficulty subdued the flames; the building being wood frame sheeted with iron. Three Chinese employees are known to be dead and another is likely to die. The general supposition is that the fumes of some benzine used in making varnish for the cans took fire and caused the explosion. The building is badly burned, but it is not likely that the total pecuniary loss is much over $6,000 to $7,000. It was fortunate that the accident occurred in the dull season or the loss of life and destruction of property would have been much greater. It is said that Mr. Spafford had or was on the point of selling out his interest in the business.

The *Chronicle* had something to say on Wednesday about some South Sea laborers who, before returning from the Hawaiian Islands to their homes, had purchased fire-arms and made bad use of them in their own country. The *Chronicle* says these men were held in slavery in the Islands and, apparently, did not see the contradiction involved in its statements. The men were well-paid laborers, and that they were not slaves, but freemen, was shown by the fact that they all had large sums of money in their possession, some of which they laid out in purchasing articles that they thought would be useful to them in their own country; amongst these purchases were American fire-arms. The writer was in Honolulu and saw these men before they sailed. Their purchases of guns and ammunition attracted attention at the time, and the Immigration Commissioners investigated the matter, and found that there was no law by which they could interfere with the purchase of fire-arms by a South Sea Islander, and that he was as free to spend his money as he liked as a Hawaiian subject or a citizen of any other foreign country. While these purchases were deplored by the Hawaiian government, it had to acknowledge that these men and all others were free to spend their earnings as they chose. So much for the last phase of the Hawaiian slavery charge.

Geo. A. Davis & Co., whose advertisement will be found in our viticultural department, are an old established firm of this city, dealing in wagons, farm and spring, horsepowers and all kinds of agricultural machinery and implements, also improved rotary windmills. We can recommend this firm to our agricultural friends with confidence that in all transactions they will be honorably and liberally dealt with. Their illustrated catalogue can be had by addressing Geo. A. Davis & Co., 12 California street.

When pilot commissioners, harbor masters, wharfingers and pilots are segregated for politics, port affairs will be better and more economically managed.

The year 1884 bids fair to be one of the most prosperous California has ever seen.

That British prestige in Egypt is lost.

That Nature is doing her best for us all.

That our Southern floods were only blessings in disguise.

That the dynamite devils have got in their work again in London.

That we must spin, weave, sew, shape, forge and cast more of what we use.

That Governor Stoneman must be doing pretty well, because the demagogues are abusing him.

That in a month all California will be in her glory, a carpet of flowers from Del Norte to San Diego.

That the fine weather will soon dry up the roads and travel and transportation in the interior will be renewed.

That there is still a profit in honest, intelligent trading, but there is more in industrious cultivation of the soil.

That the railroad land agents are doing a big business, and the Immigration Association officers have all they can do.

That Bradlaugh won't down, and Nottingham electors prefer to go without representation, rather than submit to the hypercritical rulings of the House of Commons.

That the increase of purchasing power in those who follow agriculture is largely making up for the reduction in the purchasing power of those who follow mining.

That fair protection will lead to more home manufactures; that more home manufactures will enlarge our home market for our field products, the best market we have.

That sober, industrious laborers that have not acquired the loose habits of the older Californians, are in much demand in vineyards and orchards, at a dollar a day and found.

That as we increase our fruit canning business, we should still more largely increase the proportion of fruits put up in glass. This would open the East India markets to us.

That there has been more agricultural land sold to persons who are going into immediate occupation and cultivation, within the past six months than in any previous six months in the history of the State.

That if we could only get home the survivors of the Greeley expedition, if there are any, it ought to be made a criminal offense to propose or take part in any more expeditions to the frozen sea.

That the South grew cotton and was always in debt—now she spins yarn from her own cotton and is becoming rich. When will California spin her own wool and sell yarn to the East, instead of greasy fleeces?

That a wise farmer says, "I used to be a free trader, because I thought I had no benefit from the tariff on European manufactures. I am now a protectionist, because I want the weaver who makes the cloth for my coat to eat the produce of my farm."

QUICKSILVER REVIEW FOR THE YEAR 1883.

The production of quicksilver in California for the year ending 31st December, 1883, was, in round numbers, 47,000 flasks, of 76½ lbs each, against 53,000 flasks for 1882. Of this quantity, 33,247 flasks were exported by sea, including 16,330 to China, 10,764 to Mexico, 760 to Australia, 1,253 to Japan, 970 to South America, 3,100 to New York by vessel; in addition to which 4,600 went East by the cars, leaving of the year's production about 9,000 flasks for the nearby trade, assuming that the entire out-turn for the year was disposed of.

According to the London "Board of Trade" returns, there were exported from England to the United States for 1883, 14,382 flasks, which, added to the portion of the product of this country for 1883 retained at home, gives about 30,000. Probably a portion of that 4,600 by rail Eastward went into Mexico by some of the newly-opened railways in that country, and, as the bulk of this importation—13,000 flasks—was made prior to 1st July, when the tariff went into effect, probably a portion of this may yet be on hand, so that we may estimate the consumption for the entire country at about 25 000 flasks for the year.

The imports into London for the year 1883, mainly from the "Almaden" mine, in Spain, were 54,520 flasks, while the exports from there for the same period were 48,097, against 40,424, and 24,842 for the years 1882 and 1881, respectively. Assuming that the production of the Spanish mine and that of the various mines in this country amounted to 100,000 flasks, and that of the Austrian and Italian mines 15,000 to 20,000 more, we have a possible production for the year of 120,000 flasks of 76½ lbs each, or 9,180,000 lbs, net. The leading markets for this article, as shown by the course of trade, are our own country, estimated as above, China, over 22,000 flasks, Mexico, 15,700, South America, 6,700, East Indies, 4,600, England, 10,000 to 12,000, etc., etc. While the consumption in this country has fallen off largely for milling purposes, owing to the collapse of the Comstock District, it has doubtless increased very much in the arts, manufactures, etc., owing to the low price ruling, as well as the increased volume of general business.

While the production abroad seems to be increasing, as shown by the imports into London, that of this country is falling off, being for the year 1883, 6,000 flasks less than for 1882, and some 32,500 less than for 1877, the year of our greatest production. The New Almaden mine, situated in Santa Clara county, and the oldest of its kind in this country and, next to its namesake in Spain, the most productive in the world, gave about 60 per cent of the output for 1883, or 29,000 flasks, and about the same quantity as in 1882. The falling-off for the year has been mainly with the "Great Western," "Napa Consolidated," and "Sulphur Bank," the latter two of which, as also the "Guadalupe," formerly producing largely, are reported closed down, to which may be added the "Great Eastern," as that is, at present, on the non-producing list.

The stock in London at the beginning of the present year was about 80,000 flasks, and of that in China, New York, Mexico and on this coast, only an estimate can be formed, probably altogether some 30,000 to 40,000 flasks. In this city only a few thousand are on hand, and there may be 5,000 to 10,000 at the mines ready for the market. For the first time in many years the trade in England has exceeded the quantity imported the exports for 1880 being 16,070 and those for 1883, 18,997 flasks! The low price ruling there—the equivalent of 31½d. per lb, the lowest of which we have any record—doubtless had much to do with the large volume of business.

The price in this market during 1883 ruled the lowest of which we have any record, while our production is less than that of any year since 1874, when the price touched £1.55 per pound here, and £26 per flask in London. While the price *ruled* the lowest of any year, it did not touch quite so low a figure as in 1879, then 33 cents.

One year ago, when it was evident that we should have a tariff upon the article, there was considerable activity and large sales were made. The tariff, imposing a duty of 10 per cent *ad valorem* was passed, to take effect 1st July, 1883, but, prior to that date, for the six months immediately preceding there were imported into the country about 13,000 flasks, and after the duty went into effect 1,400, notwithstanding the duty of 10 per cent. The heavy importation during the first half of the year was in excess of the wants of the trade, and it is doubtful if any advantage was obtained thereby, as the price subsequently fell off abroad, and importations could then be made under the duty advantageously, taking into consideration interest, storage, insurance and other charges.

The cost of production varies in the different mines, some producing the article at a total cost of less than 20 cents a pound, while others do not get back the cost of producing at the extremely low price of 34 cents. The tariff of 10 per cent, equal to about 3½ cents per pound on the present price, does not seem to have helped the price, as was hoped at the time of its passage, and in view of so large a portion of the product being compelled, for want of an adequate market at home, to seek a foreign one, where it comes necessarily in competition with the large production of the Spanish mine, it is doubtful if even a prohibitive duty would materially aid our mines. Were the demand for our home market equal to or greater than the supply, legislative action might give relief and bring prosperity to this important interest, in which so much money has been invested. Formerly, when there were but three or four mines producing, the price was easily regulated by agreement, and, with the aid of a 15 per cent *ad valorem* duty, then in force, the market price for this country was kept steady at something above that in China and other leading markets. But, with the number of mines now being worked, it is doubtful if any equitable and profitable understanding could be reached by the various parties in interest so that the benefits of even a high tariff could be secured. All would be anxious, in the absence of an agreement, to sell in the best market, and all produced would be for sale here and only be sent abroad when our local market had fallen to about the parity of that.

Unlike copper, iron, lead, etc., this metal is not seriously affected by general prosperity or the lack of it. It is restricted in its uses, the leading two of which are making vermillion and in amalgamating the precious metals. Hence the large market in China and India for the former, and in Mexico, South America and this country for the latter, especially where silver ore bearing bodies are worked. Nothing, so far has been found to take its place successfully in either of these two uses, and, until such is the case, it is likely to hold its present station, subject to such fluctuations as are incident to the wants in Asia and in working gold and silver mines elsewhere. During the bonanza days of the Comstock District, the consumption there was 2,000 to 2,500 flasks monthly, now it is probably less than that quantity for a whole year. The new mines opened in Arizona and New Mexico have called for considerable quantities of this article, and with the opening of Mexico by means of railroads, we may look for an increased consumption there, as well as facilities for certain districts in that country now supplied from England by way of Vera Cruz. Possibly the new process, *leaching* of ores, by which it is claimed there is a saving of 15 per cent, or more, in reducing the ores—a material difference in *rich* ores—may prove a successful competitor or supplant quicksilver altogether in this, the largest use to which it is applied.

The Forfeited Land Grants.

The *Alta* says, "Congress is doing some splendid work in restoring to the public domain millions of acres of lands heretofore, for many years, tied up by railroad grants in cases where no effort was ever made to build the roads. We know of no case but one where the proposed restoration is not just and right. That one is the case of the California & Oregon Railroad grant. . . . The bill before Congress to forfeit the grant to the California & Oregon road stands upon a different footing. That road is now and for a long time past has been rapidly running completion. At least the work is proceeding with energy, the builders showing good faith, and that they will complete it as soon as possible. The people of this State and particularly the people of the northern counties, are greatly interested in having the road built at as early a day as possible. Can the road be built, and will it be built without the grant? Would it be just to those whose millions have gone into the road on the faith of the grant, and, after they have got the road running into an uninhabited and uninhabitable country, for Congress to say, "Now, gentlemen, if you do not continue your road is valueless; if you do, the grant you received as an inducement for the beginning of your enterprise shall be taken away." The commercial interests of this city and this State demand the completion of the road, that we may have connection by rail with the Northern coast and with the Northern Pacific Railroad. No argument is needed to convince any reasonable man of the soundness of this position. We hope our delegation will, if they can, wipe out every land grant ever made, so far as not earned, except this one, which is being earned. As to this particular grant, we hope to see them act for the good of California, in total disregard of the buncombe of the misinformed."

Our friend, the *Alta*, is right, but overlooks the fact that a railroad to the State line would end on a mountain top, some four or five thousand feet above the level of the sea, and, if this road is to be of any use, the Oregon & California must be constructed to meet it, and, therefore, this Oregon grant must be left in force, as well as that in California. The two grants are necessary to give access from one State to the other.

No journal in this State is more closely read or more valued by its subscribers than the MERCHANT.

Relative Values of Wheat.

Bradstreet's London correspondent, under date January 28th, writes: "Prices for Indian wheat are ruinous, but the supply has exceeded the demand, as millers can not take more than a certain proportion of Indian to mix with softer wheat. The exceptionally fine quality and weight of English wheat keeps it relatively high in price, low as it is. The natural weight of the best samples is from 66 to 67 pounds per imperial bushel, and millers say that it yields more flour than any crop of wheat since that of 1874. On the other hand, as is scarcely necessary to state in these columns, the American crop of 1883, both from the Atlantic and Pacific States, is generally inferior in quality. It is stated that 4.45 bushels of No. 2 red winter are required to make a barrel of extra flour, against 4.35 bushels last year; also that it takes from 5 to 5¼ bushels of New York grade of No. 3 red winter and 7 bushels of No. 4 to make a barrel of extra flour. Pacific Coast wheat also grad s badly."

JOBBERS' PRICES.

FEBRUARY 29 1884

The following Prices are those at which city and cuntry Retail Grocers can buy in lots to suit their trade and are corrected weekly.

Staple Groceries.

SUGAR.

California Sugar Refinery.

Bogus Butter.

It was only last July that the Bureau of Statistics began to publish the figures showing the exports of oleomargarine. The latest revised statement gives the movement of "imitation butter" and "oil" for the month of October, and for the ten months ended October 31st in each of the years 1882 and 1883. This statement indicates that the trade in oleomargarine, butterine, and the like is growing rapidly, and already has reached no mean proportions. It may be that our friends abroad are not aware that they are building up our own manufacturing interests; but if they buy the patent prodnct believing that it is dairy butter, they probably find that it smells and tastes just as sweet as it would under any other name, especially its own.

In October there were 222,741 pounds of so-called "imitation butter" and 3,908,064 pounds of oil exported, a total of 4,130,805 pounds, valued at $516,655. The exports of butter for the same month amounted to only 2,957,753 pounds, valued at $752,446, so that the bogus-butter manufacturers are getting a pretty large share of the foreign trade, whatever they may be doing for the domestic market.

For the ten months ended October 31st, the exports of imitation butter amounted to 1,698,712 pounds, valued at $198,925, and of oil to 31,601,926 pounds, valued at $4,104,105, making a total of over 33,000,000 pounds, valued at $4,300,000. The total exports of butter for the same time were only 18,884,346 pounds, having a value of $3,414,290, being over 40 per cent less in quantity and twenty per cent less in value than the exports of oleomargarine.

The cause for the great excess in shipments of the imitation article will probably be found in its relative cheapness; the relative price of the artificial butter exported during the ten months having been 11¾ cents and of the oil a little less than thirteen cents per pound, while genuine butter averaged over 18 cents per pound. If, after reaching the other side, the manufactured product can be sold as real butter, a considerable margin of profit is afforded the dealer. The fact that nearly twenty times as much oil as imitation butter is sold for export also indicates that the business of manufacturing the stuff is becoming an established industry abroad. Perhaps the next thing will be agitation for protection against American butter.—*New York World.*

The Olive Oil Crop.

Holders of olive oil are very well satisfied with the present condition of the market, which has a strong tendency upward. The recent advance in values is attributed to the short Italian crop, and this in turn has been caused principally by a new species of a worm. The little mischief worker is described by our informant, who recently visited the olive fields, as being no thicker than a thread. It bores through the centre of the unripe olive where it thrives until no sap remains.

As the oil is expressed from the entire pulp and body of the fruit, it will be seen that an army of such worms could readily destroy a whole crop in very short order. Two-thirds of the entire production of olive oil in Italy is used for industrial purposes and finds a ready market here among silk, woolen and other manufacturers. The stock on hand is limited, and gradually diminishing, but it may be some time before consumers are compelled to use other kinds of olive oil as a substitute. The Italian product is esteemed for its purity and lasting qualities. Much depends on harvesting the olives properly, and this is said to be done much better in central Italy than elsewhere. It has become a leading industry among the natives of that sunny land, and the failure of a crop proves rather disastrous to other commercial interests as well. In Naples the oil is sold by certificates on Change like crude petroleum in America, and the finer grades are stored in large cisterns at Messina, instead of tanks as oil producers do here. It plays an important part in the business of the above named cities, but with little or no oil to handle, attention will be diverted to the Spanish, French, Austrian and Grecian oils, the crops of which have not suffered from the same cause. Spain ranks second in the extent of olive cultivation, but its product is not so highly esteemed, and importations have been gradually diminishing in consequence. Last year this country consumed 500,853 gallons of all kinds, an increase of 42,985 gallons over the year 1882. The quality produced in France is pronounced much superior to that of Spain, but cultivation is not carried on to any great extent. As we go down the list of foreign empires and provinces, the annual yield of oil grows much less. Grecian and Turkish are very little known here, as Europe exhausts the supply in soap manufacture. Thus it will be seen that America depends principally on Italy for her supply and in the event of this being cut off, the field will be open for competitors of an inferior grade. Cottonseed oil is displacing olive oil in some manufactures, especially in the woolen industry, and it may succeed in obtaining a stronger foothold.—*Oil, Paint and Drug Reporter.*

The rag trade reaches about $30,000,000 a year, and there are 2,000 rag pickers in New York city alone.

Morrison's Abortion.

For a short, sharp, and common sense criticism of Ways and Means Morrison's tariff bill, we present the following from the St. Louis *Grocer*. It is an argument enclosed in a nutshell.

"The new tariff bill, the main points of which we published last week, does not meet with that abounding enthusiasm that was anticipated by a few favored ones. The bill at the best is but a makeshift, and the plan of an horizontal reduction is but a confession of inability to properly approach the tariff problem. While it may be desirable to reduce revenue twenty per cent, it is not desirable to reduce all duties twenty per cent without taking into account the conditions of the various industries. It is true that the bill says that the reduction must not go below the Morrill tariff of 1861. But to assume that conditions and the same now as they were twenty-three years ago is a fallacy of the worst kind. Compared with 1861 this is a new country, with new industries, new developments, and new conditions generally. It is doubtful if the bill presented by Mr. Morrieon could even pass the House, but when it it returned by the Ways and Means Committee it may present a vastly better appearance. Revenues may have to be decreased by a reduction in rates of duty, but let the reduction be done intelligently, and not after the jack plane order."

The Commercial Insurance Company will soon remove to more convenient quarters, No. 439 California street.

The Merchants' Exchange is now lighted by electricity.

What is Congress Doing?

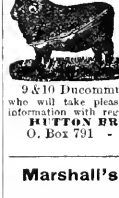
[Correspondence of Fresno Expositor.]

EDITOR.—What is Congress doing? Reducing tariffs or doing away with them altogether, where they are badly needed to build up, foster and protect home industry. These last two words, the meaning and importance of which do not seem to be properly understood by a great many of the members of Congress; if they were, they would not be so greatly neglected and slighted or ignored. Peace at home and broad statesmanship first, then comes the proper protection of home industries. This badly-abused child of our nation suffers. Can there be complete success in the progress of a nation without proper protection of home industry? No lasting prosperity without it: What is Congress doing? Reducing tariff on wool. What is the consequence? A great reduction in the value of our wools. How was this great change brought about? Simply by a combination of Australian wool growers and a successful manipulation through Congressional lobby. Can we stand this? and how long? Then our citrus fruit pioneers were getting along too swimmingly and they had to be hit on the head, and they got hit. Then the more tender and younger raisin-growers were put down. Now the more hulky and stancher wine and brandy producers have got to be kicked. Is it a wonder that the American nation sometimes puts me in mind of a forbearing camel? Why is all this? Does it not take years and even generations to build and form any national industry or enterprise? Is it not a shame and disgrace that a people bent on competing with other nations, where labor is much cheaper than here, would thus be crippled and foully dealt with? What is the use of civilization when our home industries are assassinated by foreign schemers? All they have to do is to send their representatives to our halls of Congress and they are received with open arms and listened to by willing ears. Does not this look very silly for a nation like the American nation, which claims such high and exclusive intelligence? Reduce or remove the tariff from such articles and merchandise as cannot be produced in this country, if Federal receipts are large enough to do without such tariffs, but do not allow your Representatives or Senators to remove the protections placed around your home industries for the sake of pleasing and playing the fool for other nations. This is not industrial progress. Those members of Congress who abuse the trust their constituents placed in them, either by virtue of ignorance, lack of statesmanship, or other reasons, should be recalled from office and better men placed in their stead. They are as great a drawback to their country at large as the riparian land-owner is to the great and promising San Joaquin valley of California. Those members that vote for the destruction of our national industries for the sake of furthering foreign industries should be called to strict account, as much so as a traitor in war times. We must not let this thing go on any further, but awake from this lethargic inactivity and placidness. Let us put in an extra plank in the next political platforms guarding against such fearful and fatal abuses. It is a shackle which must be shaken off at all hazards. This thing of being outgeneralled by foreign legislation in your own halls beats the struggle of 1776. Where is the American community that will submit to it? If we submit to it a great many industries will be strangled in their infancy. What American citizen who has the interest of his free country at heart will stand by and see such faulty legislation go on without lending his individual aid to stop it. Let our new jo ano epum aq ɹnuɹd protection of our home industries. Let each Congressional District throughout the country forward mammoth protests to their Members of Congress against any such unwise legislation as reductions and removals of tariffs, unfailingly aiming at the destruction of such industries. Let us demand the immediate abrogation of reductions of tariffs on any and all domestic productions that suffer from such tariff reductions. This is not a local matter, but one that concerns the well-being and independence of every person in the country at large, and should therefore be acted upon immediately, with promptness and dispatch, by one and all. M. DENICKE.

Fresno, Feb. 10, 1884.

Attention, Sheep-Breeders!

MR. CERMAIN PELLISIER



Has a few of his unequaled Thoroughbred French Merino Yearling Rams for sale. Breeders of fine stock will do well to call or write to the office of the

HUTTON BROS

9 & 10 Ducommun Block, Los Angeles, who will take pleasure in exhibiting and giving information with regard to the stock.

VOL XI, NO. 22. SAN FRANCISCO, MARCH 7, 1884. PRICE TEN CENTS.

ANTI-RAILROAD COMMUNISM.

The *San Francisco*, which has now reached its third number, has not yet made much impression on the public mind, though it has contained, of course, some well-written and entertaining articles and some good ideas. Some of the editorials are spun out and show the fault, so common in the *Bulletin* of late, expressing the same idea two or three times over, with slight changes in the phraseology. Its worst fault, perhaps is in the temper of the editorial mind. It shows an inclination towards red-hot anti-railroadism; that is, it has joined the herd of demagogues, office-seeking politicians who believe that votes can be obtained by false and slanderous representations of the condition of affairs in this State. Not that we suppose that the proprietors of the *San Francisco* want office for themselves, but they believe there is money in catering for the men who do, and to their followers. An editorial on Governor Stoneman opens with the question, "Is he a rascal or a fool?" and, after describing California as a "railroad-plundered State," answers its question by the declaration; "He is merely a fool." The tone of the article is as coarse as a coarse mind could make it, and is better fitted for the columns of a small mining camp newspaper than that of a journal published in a metropolitan city and claiming the support of respectable families and educated readers.

Another writer on the "Railroad Question" says:

> "A scholar would say that such a thing as the scientific study of economic questions did not exist in California. He would be mistaken. Not a few writers on this coast have clear ideas as to the theory of the subject, but those ideas are overborne on the one side by the public necessities, on the other by perhaps equally convincing reasons. It is not that we are all totally ignorant of history and political economy, but that our railroads have made the cool application of economic science for the present impossible. The problem, now, is to get their hands off our throats; when that is thoroughly solved it will be time enough to listen to the calm voice of reason. These upstart tyrants, swelling with the pride of unaccustomed power, must be brought to their knees and so thoroughly humbled that hereafter they will never dream of denying their masters. When they are once whipped into their senses, we may be able to send the demagogues to the rear and bring statesmen to the front. The enemies of monopoly in California know—none better—that railroads cannot be permanently managed by two hostile authorities; that the companies and the government must sometime be brought into harmony; that rigid tariffs by commission are crude, and tariffs by constitutional amendment barbarous. . . . If we are communists for advocating a judicious State supervision, we can be no more than communists if we favor forfeiture of charters and confiscation of property."

This writer openly acknowledges that the Anti-Monopoly Party are seeking to right wrong-doing by a wrong that is much greater, because it involves a wider injury. He advocates communism and appeals to the socialistic spirit, too prevalent in many countries, to-day, for their peace and prosperity, to come to his aid in perpetrating this wrong, and he can only promise us that the leaders of his party, when they have accomplished their ends, "*may* be able to send demagogues to the rear and bring statesmen to the front." He would postpone the hour for listening to "the calm voice of reason" until the conflagration of unreason has consumed railroad franchises and railroad ownership in this State. He would raise the demon of disorder and destruction as a remedy for a wrong that is bearable, and yet he cannot promise, nor even honestly hold out a hope for all history tells the contrary, that such a demon, once flushed with conquest, will accept dismissal at the hands of those who raised him. Clearly, that writer is too frank for the success of his own party. He tells too much, and the editors can have no clear idea of what is consistent, expedient or possible when they allow such an article to appear in their journal. If the choice is between leaving railroads alone to manage their affairs as their consciences and interests dictate, and raising the devil and bringing on open war between corporations and the masses, involving, perhaps, bloodshed or even interruption of peace and business avocations in this State, we say, and nine-tenths of the non-office-seeking taxpayers of this State will say, better bear the evils we complain of than involve ourselves in greater. And what effect abroad have such writings, even though they lead to no action at home? They damn our reputation, they bring our State into disrepute, they prevent immigration, for, whatever the advantages we can claim in the salubrity of our climate, in the fertility of our soil, in the varied productions of our valleys and our mountain slopes, who will invest their all, little as it may be, or plant their families in a State in which journals claiming to be representatives of public opinion openly advocate violation of justice and invoke the dormant power of an unreasoning and unreasonable mob? The MERCHANT, not being a railroad organ, but a fair representatative of those classes, the commercial and producing, which have the most reason to complain of railroad extortion and most to fear from political disorder, dares to say, without fear of its motives being impugned, that the publication of such papers as the *San Francisco*, the *Evening star*, the Stockton *Mail* and others threaten greater injuries to this State than anything the railroad companies have done or are likely to do.

But the *San Francisco* is not yet a very formidable power. The intention of its founders was, probably, to rival in success and divide control of popular opinion with the *Argonaut*. There is often much in the *Argonaut* that we cannot agree with, and some things, occasionally, that disgust us, but, as a rule, it is a well-edited and well-written journal; its editorials are brilliant, if one-sided, its original stories are nearly always entertaining, its selections are well-made. And what can even a friend of the owners of the *San Francisco* say of it? Its editorials are either coarse or rambling, requiring the free use of the blue pencil of some one imbued with the journalistic faculty of condensation; and as for some of the lighter original articles, they are not worth the cost of setting them in type. As an instance, we would cite, in the last issue, "My Friend, the Undertaker." Hinchman's incident of the wrecking clergyman and congregation, of Barnegat, New Jersey, which he says he witnessed, is false, because the same story, with the same utterance by the clergyman, was published forty years ago as occurring on the coast of Cornwall, England. Hinchman reminds us of the young lady in the East, who publicly declared that she was present when Beecher, one hot day, entered his pulpit and, mopping his face, said, "It is damned hot" (a pause) "in hell." The same he had been got off, in London, on Spurgeon, six or eight years before. Like the wrecking story, it has probably been made to do duty in every generation for the past three centuries, and has always been vouched for by some untruthful witness. "A Visit to San Gabriel Mission" is a good subject spoiled by the incompetency of the authors to treat it as it deserved. Some of the shorter anecdotes are either stupid or, like that of Daniel O'Connell's handkerchief, vulgar. Good enough for Bohemians to laugh over, after their fifth glass of beer in a Sutter street cellar, but not worthy of a place in any journal that pretends to higher rank than Thistleton's *Jolly Giant*. Joe Goodman has done good work in his day, but his pen seems to be out of joint. Cannot he write for his own paper as good a story as that he gave the *Argonaut*, of the little newsdealer who, by a stroke of fortune, became a millionaire in stocks for a few weeks? McEwen should shake off his Virginia City ideas—Montgomery and C streets are very different localities. Flynn has done the best work of the trio, so far, but he needs a judicious but arbitrary editor to pass upon his manuscript. Lastly, the *San Francisco* is much in need of a larger waste basket.

A NEW BRANCH OF AGRICULTURE.

Our sheep masters and farmers, who have alfalfa lands, would do well to pay more attention to "mutton" sheep. Such sheep produce a long, coarse, heavy-fibred wool, and are known as English blood; but cross-bred and English wools, grown in Australasia, coming into this country, are classed as clothing wools, and therefore, if washed, pay double duty. Washed wools, such as the above, range in London from 19 to 43 cents per pound. On wool costing 19 cents, the duty, therefore, is over 105 per cent. On wools of this class, scoured, the duty is 30 cents, or nearly 158 per cent. If such wool costs 34 cents per pound, the duty is equivalent to 88¼ per cent. Having suitable pasture, sheep-owners and farmers who are convenient to a market would do well to give more attention to mutton or English blood sheep. For of their wool John L. Hayes, the Secretary of the National Association of Wool Manufacturers, says: "The wools that will be most needed during the next decade are fine merino combing, fine cross-bred combing and medium fine combing wools. What is known in the Eastern trade as No. 1 combing, or half-blood combing wool, is relatively in the most limited supply all over the world. It is very difficult to find in quantity, among foreign wools, any that will take the place of our American No. 1, or half-blood delaine and combing wool." Hitherto, in this State, we have paid little, if any, attention to mutton sheep and combing wools, but have confined ourselves to merino sheep and clothing wools. English and half-bred English sheep, in bands of one or two hundred or less, will pay small farmers who have alfalfa twice as much per head as the great flock-masters make on their merinos.

If there is a paper in this state that should be patronized by vine growers it is the SAN FRANCISCO MERCHANT. It is laboring assiduously for their interests.—*Gilroy Viticultural Record.*

The *Pacific Seaboard* is right: Grape growers and wine makers should organize and marshal themselves like soldiers in companies, regiments and battalions.

Beringer Bros. of St. Helena are putting out fifty acres of vines on hill lands, in addition to their present large vineyard. The varieties they have selected are Carignan, Grenache, Grosse Blanc (cuttings imported by Mr. Thomas of St. Helena from Switzerland, which makes a deep red wine), and some Riesling and Burger.

MR. DEWEY'S WINE FIGURES.

The *Call* of the 3d inst. has a correspondence from New York, in which Mr. Geo. E. Dewey, considered by the interviewer one of the best-informed grape growers, states that of forty millions of gallons consumed in the United States, thirty-five to thirty-seven millions are from our own vineyards and only five millions of the whole wine imported, per annum. He again states that the forty millions of gallons are drunk one-half as foreign and only one-half as native wines. This statement of only one-half of native wines being consumed as such, and the other half under foreign label, we do not doubt to be perfectly correct. But, then, in making the output of American wines to be thirty-five to thirty-seven millions of gallons, we think there is some illusion. Are our statistics so deficient that we cannot reach the exact total of our native wine crop? Mr. Dewey gets confused when he goes to detail the items. He says that California produces 9,000,000, Ohio, 3,500,000, Missouri, 2,500,000, New York, 2,000,000, Illinois, 1,000,000, Kentucky, 1,000,000, and so on. Now, if we get yet 3,000,000 gallons, it sums up 22,000,000 and not 35,000,000 to 37,000,000 of gallons, and the lower figure will be nearer the mark. But how much foreign wine comes into the United States? This we would like to learn from the pen of a statistician who can give more trustworthy figures than the emotional ones of Mr. G. E. D. X.

[NOTE. In last week's issue we gave in the MERCHANT the importations of wine from France and Germany, in the year ending June 30th, 1883: In casks, 3,020,015 gallons; in bottles, 427,673 dozen, or, at 2½ gallons to the dozen bottles, 1,069,032 gallons; total, 1,089,047 gallons. Allowing that 900,000 in casks and bottles came from other countries than France and Germany, Mr. Geo. E. Dewey's figures are correct. EDITOR.]

THE BLOWERS-WETMORE CONTROVERSY.

Mr. Blowers called on the MERCHANT on Monday morning, and asked us if we would publish another communication from him, in reply to Mr. Wetmore's rejoinder on his letter, which appeared, with the rejoinder referred to, in the issue of February 15. We told Mr. Blowers that some of our viticultural subscribers had spoken deprecatingly of the personalities which had passed between these controversialists, and that we had shown to them, as we had published in the MERCHANT, that the personalities began with himself. He said we did him injustice; that Mr. Wetmore had impugned his word, about his big crops. We took up the pamphlet, "Ampelography," and showed him that in using the phrase *cum grano salis*, Mr. Wetmore had not done so; he had only warned people that in other soils, without free irrigation, and as the vines became aged, such crops could not be relied on as average results. The inference was that investors should not be led astray by the delusive hopes of raising enormous crops. As an instance of this extravagance, we handed him a clipping from an interior newspaper, speaking of 15 tons of grapes to the acre being obtained. Finally, we agreed to publish his letter if he would leave out personalities and discuss principles. On Wednesday we received his promised communication, and it was full of personalities and insinuations against the conduct of the Commission and its Chief Executive. It is not what we agreed to print, and we decline to give it publicity.

In substance Mr. Blowers makes denials of certain statements made by Mr. Wetmore, but as the latter gentleman reiterates what he has formerly said, there remains only a question of veracity, not interesting to our readers. Mr. Blowers gives a copy of a letter from the Land Agent of the Central Pacific Railroad Company declaring that he had not negotiated for land in Shasta county; Mr. Wetmore replies that Mr. Blowers told him that he intended to purchase land there and was going to visit it with Mr. Mills. Mr. Blowers denies any personal interest in the recent land sales in Yolo county, but does not deny what Mr. Wetmore asserts, that he had ventured his money in the enterprise and was anxious to get it back again; that he was doing this to assist another person is not a material point of difference. Other points made are merely matters of denial and reassertion, excepting certain reflections and insinuations against the official conduct of Mr. Wetmore, as an officer of the Board, which the latter gentleman says he will reply to only by furnishing us the following copy of a letter addressed by him to the President of the Commission.

SAN FRANCISCO, MARCH 6th, 1884.

ARPAD HARASZTHY, ESQ., PRESIDENT BOARD OF STATE VITICULTURAL COMMISSIONERS.

Dear Sir: I regret that I am compelled by circumstances to bring to the notice of the Board of State Viticultural Commissioners the recent conduct of one of its members, whose public actions are tending to impair the usefulness of this body by creating popular distrust, where the truth may not be known. I refer to Mr. R. B. Blowers, your member for the Sacramento district, and respecting him I charge as follows.

1st. That he has shown a want of proper respect to this body by making use of his official report before the same has been completed, and before it has been presented and filed officially, to satisfy the ends of personal controversy in the public press.

2d. That, notwithstanding he has used in such public manner, in the name of his office as Commissioner, a portion of an unfinished report, or one purporting to be such, the same has neither been completed nor has any portion of it been filed in the office of the Board.

3d. That, subsequently to publishing such garbled report he has caused to be printed in the SAN FRANCISCO MERCHANT, over his own signature, an insinuation that I, as an officer of this Board, had been using public position and State funds to advertise my personal speculations; that such insinuation was intended to destroy public confidence in my integrity, and that the same was falsely and maliciously published.

4th. That it was the duty of Mr. Blowers, who audits all accounts of this Commission, to have made complaint officially to this body, if he was aware of any misconduct in my office, and that by making such insinuation public without first taking official notice of what he complains of he has shown a want of proper respect to this body.

5th. That subsequently also, he has attempted to publish again in the columns of the SAN FRANCISCO MERCHANT, a communication over his own signature in which the following paragraph occurred, viz:

> On the other side of the question, we have a chief who draws a salary, room rent free, janitor free, traveling expenses, etc., the control virtually of the greater share and patronage of $10,000 State funds per year. If others think they see, running through the ample writings of our chief, an undertone of vine speculation and real estate speculation such as should not be found in a State department, I respectfully submit to the public this question: Should I be publicly vilified for not desiring to share in the profits?

And I do charge that the intention, as apparent from the words and contents of said article, of the writer of said extracts was to convey falsely and maliciously to the public an impression unjust to me and calculated to injure the work of this Commission.

I do, therefore, request you to present this communication to the Board of State Viticultural Commissioners, and submit the same for such investigation as is proper in the premises.

Respectfully yours,

CHAS. A. WETMORE,
CHIEF EXECUTIVE VITICULTURAL OFFICER.

Now that Mr. Blowers is given an opportunity of defending himself before a tribunal where the facts may be made known, and of which he is a member himself, we hope the present controversy will be suffered to rest by him, as no one else seems desirous of touching upon it.

California is not a free trade or low tariff State. Every fruit grower, every grape grower, every wine maker, every wool grower, every wool manufacturer, every pattern maker, molder and machinist in every foundry in the State, and every man employed in a hundred other producing and manufacturing interests, is a protectionist and the day is coming when he can no longer be induced to support such a blind, halting, illogical platform as that of "a tariff for revenue with incidental protection."

The Fair Trade movement in contravention of Free Trade is gaining ground in England and if our tariff mongers can be kept quiet will gain more ground rapidly.

SEASON OF 1884!

VINES and VINE CUTTINGS

I take pleasure in informing my patrons that I shall be able to furnish, if called for soon, limited quantities of

GENUINE CUTTINGS

Of the following rare varieties:— FOLLE BLANCHE, COLOMBAR (Sauvignon vert) MATARO, CARIGNAN, GRENACHE, PETIT PINOT (Crabb's Black Burgundy) CHAUCHE NOIR, TROUSSEAU, MEUNIER (same as the so-called Franc-Pinot of Mr. Schoffler—misnamed), CHARBONO, FOLLE NOIRE, MALBECK (same as Lefranc's so-called Cabernet-Malbeck) MOSELLE RIESLING, WEST'S WHITE PROLIFIC, MUSCAT of FRONTIGNAN, SEEDLESS SULTANA, etc.

The prices of the foregoing are capricious and some of the varieties, particularly MATARO, MALBECK, CARIGNAN, MEUNIER and WEST'S WHITE PROLIFIC, are nearly all engaged at the present time.

Price lists will be forwarded to those inquiring, as circumstances vary them.

Also, All the Well Known Varieties

such as ZINFANDEL, RIESLING, CHASSELAS, CHAUCHE GRIS, BERGER, MUSCATS (Gordo Blanco and Alexandria) FLAME TOKAY, etc., etc.

ROOTED VINES.

Particular care will be taken in respect to rooted vines to guard against infection by diseases. I can furnish rooted ZINFANDEL, MALVOISIE, VERDAL, FEHER ZAGOS, CHARBONO, etc; at varying prices, according to the demands of different producers.

Also a few thousand CALIFORNICA SEEDLINGS; RIPARIA SEEDLINGS all engaged.

RIPARIA CUTTINGS.

Having made necessary arrangements, I am prepared until January 15th to offer fresh RIPARIA CUTTINGS from the forests of Nebraska—car load already arrived in better condition than ever before received in this State, as follows:

36 INCH CUTTINGS at $10.00 per M.
42 " " " $12.00 " "

Ten per cent off for cash within 10 days after receipt and acceptance of orders.

For those who desire shorter lengths I will furnish

10 to 15 inch cuttings at $3.50 per M.
15 to 18 " " " $5.00 " "
18 to 20 " " " $6.00 " "

But I advise purchasers to take the long cuttings and prepare them to suit themselves. This is the cheapest offering of Riparia cuttings ever made in California.

SEED.

I have fresh Riparia seed (from Nebraska) to offer at

$2.50 per lb. for less than 5 lbs.
$2.00 " " " 5 lbs. and more.

Also, Fresh Californica Seed at

$1.50 per lb. for less than 5 lbs.
$1.00 " " " 5 lbs. and more.

CIRCULARS

will soon be ready to explain the importance of certain of the rarest varieties and will be furnished on demand.

San Diego County.—Its Climate.

NO. 1.

Public interest has gathered even more closely than usual around this extreme corner of Uncle Sam's dominion since the recent railroad complications involving the forfeiture of the rich grant bestowed originally on the Texas Pacific road. A few remarks from the pen of an old resident, familiar with the country from Lower California to Los Angeles, may furnish practical information as to its inducements for the safe investment of the capital and labor of the thousands weary of battling with severe climates, niggardly returns for human industry or of eking out a frugal existence amidst the competition and discomforts of overcrowded cities.

The physical aspect of San Diego county is one of striking contrast. The lofty, snow-capped San Jacintos look down from their height of 8,000 feet into the burning bed of an ancient lake—a desiccated, dedeserted, desolate waste to-day—a prolific and populous extent when reclaimed. On the other side, the snowy peak guards the fertile and flourishing vale of San Jacinto. Westward to the sea, rise brushy or chaparral-clothed hills, hiding the beauty of the rich basins, verdant valleys and furrowing cañons from the glaring ugliness of the alkali spots and sun-cracked soil of the coast, with its unique but unattractive vegetation of *cholla*, cacti, greasewood and cobble stones. But, despite the forbidding appearance of the land, the *coast climate* is the finest feature of the county. Since "health is the first wealth," the climate of any locality should be of paramount interest to the intending settler. At the most noted landmark on the Pacific coast, Point Conception, the shore line, turning abruptly Eastward, relieves Southern California from the disagreeable Northwest winds prevailing at San Francisco and Monterey. This circumstance together with its extended frontage on the ocean, insures for San Diego a climate the most equable in the world, exhibiting at National City a variation of but nine deg., and at Encinitas a difference of only seven degrees. Its latitude of 32° lends a tropical warmth to the peculiarly pleasant weather, and palms, agaves, bananas, the orange and the olive, the fig tree and the vine are living witnesses of its genial mildness.

The proximity of the great Mojave, the Colorado desert and the dry elevations of Lower California impart to the atmosphere that uniform freedom from humidity which makes San Diego the most desirable refuge on earth for those afflicted with throat and lung complaints. Nature here does penance for her unkindness in other climes by providing every friendly factor in the invalid's ideal—evenness, geniality, dryness.

Up in the mountain *potreros*, now and then, the thermometer registers 100 degrees, but, so remarkably dry is the air, that it promotes a profuse and healthful evaporation from the body, and, rarefied as it is by elevation, every breath adds a "vulgar" zest to the appetite, and "nature's sweet restorer" is fostered by the delightful coolness of the night. For the cure of some maladies, the deliciously mild, though not enervating, climate of the inland valleys is best adapted. The coast a cool and bracing in summer, warm and dry in winter, thus benefiting the most obstinate cases of catarrh, asthma, rheumatism, consumption and lung affections.

Its sunshine, free from the smoke of factories; its air, soft and taintless; its all-pervading quiet, invoking meditation and rest, render mere physical existence a luxury, and trial and pain exorcised strangers. As the sea air imparts to the apricots a delicious taste, and to the grapes a peculiarly fine raspberry flavor, so to the veins does it give an agreeable tingle, and to the spirits a buoyant exhilaration. Here, every breath of air is a healing, delightful sensation; in the cold North and bleak East it is a painfully sharp and fatal arrow. Here, the sunsets are mellowed by a southern warmth and reflected by the blue-tinged waters of the calm Pacific; their crested waves break with gentle force on a far-stretching, broad-lying beach of firm, white sand; the delightful surf-bathing, driving and riding; the exhilarating sails on the placid ocean and magnificent bay; the excellent salt-water fishing—ever-new and never-ending pleasures of the seashore—combine to make life on the coast of San Diego more than ordinarily enjoyable.

The old and the young, the delicate and the strong, alike revel in these matchless fascinations of the ocean beach.

Throughout the county, excellent roads make horseback rides and drives agreeably practicable; whilst an abundance of game—quail, deer, etc.—furnishes ample sport for the amateur Nimrod; and cool, moonlit nights allow that American institution of "camping-out" to be a much-patronized amusement.

Appreciative tourists have extolled the charms of San Diego, to the pecuniary benefit of the hotel-keepers, and a sanitarium on a large scale is in course of completion at Paradise Valley, five miles south of the bay. In the "dry years" a few leave; but in nine cases out of ten they return with a better appreciation of its incomparable climate and a firmer belief in its inherent wealth of resources. The remaining case, unless he be indeed a phlegmatic individual, is always haunted by a lingering regret that he ever left this quiet, quaint old place. Last season—'82–83—there occurred an exodus of ten friends of the writer, who migrated northward. All have returned, but one—myself—and my days in this semi-tropic land of fog and snow are numbered. Winter in San Diego exists but in name, and besides the unrivalled physical delights imparted by the salubrious climate, the farmer here enjoys the incalculable blessings of greater ease and comfort than in rainy countries, as the uninterrupted line of cloudless, pleasant days exempts him from the anxiety of damage to the crops by summer showers, and the toil of turning, drying and sheltering his grain, exacted in the East.

But is San Diego only a sanitarium? is the practical inquiry of many. A perusal of the horticultural triumphs achieved in El Cajon and other valleys will show the intending settler the varied capabilities of the coast region, whose soil is no less permeable and prolific, and whose transportation facilities are superior to those of lands now readily selling at from $60 to $115 per acre.

A. McC. C.

OLIVE CULTURE.

Mr. F. Pohndorff read at the monthly meeting of the State Horticultural Society, on February 29th, an elaborate essay on olive culture, which, upon the desire of that Society, is being printed in pamphlet form. The memoir will contain twenty

...ipal Spanish olive ... are being intro... the State.

... Dohndorff, which ... as full for practical ... may be obtained by remit... in postage stamps to ... Dohndorff, St. Helena, Napa ...

... Dohndorff had prepared several ad... answer to questions put ... read by Professor Dwinelle. ... these papers below:

In regard to Professor Dwinelle's question ... development of the olive fruit, I ... ... quote from the ex... of Dr. A. Furano, gained two ... at an olive plantation near Pisa, ...

From July 10th until February 25th, Dr. ... olives from the tree for suc... examination, analyzed fresh, and ... fruits.

The fruit of the fruit that was formed was the largest. On July 25th the stone was not formed completely, but on August 10th this was the case, but it was soft and not well separable from the cover. On September 25th it was at the maximum of its development. Then the pulp began to form and developed in weight and volume. Likewise the greasy matter began to form, the watery parts diminishing; but the latter oscillating from one day to the other in its quantity, according to atmospheric circumstances.

The olives grew slowly from August 10th to September 10th, but from then to September 25th the increase in weight was double. One hundred olives on September 10th weighed 75.94 grammes, and on September 25th 144.22 grammes. From September 25th the increase was gradual, slow up to the end of October, and at the latter period a slight diminution was observed. The weights of 100 olives were found to be:

October	10	163.73	grammes.
"	25	163.93	"
November	10	117.53	"
"	25	128.88	"
December	10	136.50	"
"	25	136.40	"
January	10	163.85	"
"	25	109.85	"
February	10	132.50	"
"	25	131.65	"

The changes in weight were due to the different amounts of water in the fruit, dependent upon the state of atmospheric moisture, winds, rains and frost; but it is evident that up to the end of October the weight of the fruit increased, and since then declined.

Analyzing the pulp, it was found that from September 10th the quantity of water in it diminished, having been on that date 59.73 per cent, and at the end of February 48.35 per cent.

From the end of September the increase in the percentage of weight of oil in the fruit was notable up to the end of November, when it augmented but little.

Mr. Harz of Vienna found, in his studies, that the oil in the olive generated in special cells near the clorophyllic cells. The oil cells, at the season when the fruit is yet quite soft and tender, are full of a substance which is neither a fatty matter, nor starch, nor any other hydrate of carbon, but of a composition near to all of them. It is a nitrogenous substance, a product which in maturing is transformed into a matter between gum, basorine and fat, being converted into oil, liquefying gradually the small cells, in secretions from inward, out, until the membranes of the cells become an oleaginous substance themselves.

The fatty matter of the pulp does not augment until the period of maturity, when it takes place rapidly. In maturing, the bitterest principles are converted equally.

Proverbs which are centuries old have confirmed, and our generation sticks to their teaching, that the longer the olive is left on the tree the more oil is to be extracted from it. Researches, as those of the Italian scientists cited before, show that errors are difficult to be extirpated. Besides the loss by birds, who feast on overripe olives, from the winter rains and frosts, it seems to be a natural consequence that the right time to gather the fruit is when it is just at the point of maturity. The weights quoted before, on October 25, 1878, and February 25, 1879, show a loss of 19 per cent on the latter date. Then, in charity to the tree, picking should not take place late, whereby its period of work is unduly lengthened. Experience shows that the olives in the warmest regions, at an incipient maturity, yield a finer oil, and that stage should be considered the right moment for gathering, while, in cooler regions and where wintry colds are prevalent, full maturity aids that result.

THE WINE MARKET.

The only sale of importance this week, that we hear of, is that of Barney Hoen's cellar, at Windsor, near Santa Rosa, at 29 cents.

For Exports and Imports, see Merchandise Markets.

Brandy—Original Government Gauge in Bond made from Wine—

EL CAJON.

27,000 Acres of Choice Vine, Fruit, Olive, Alfalfa and Grazing Land to be Sold in Large and Small Tracts.

To hasten the development of the colony now growing up in the Cajon Valley, San Diego county, the El Cajon Land Company will temporarily suspend the sale of its stock and will make most favorable offerings to induce rapid settlement of the country. The 27,000 acres controlled by the Company will, until further notice, be offered in tracts, as follows:

First—The 2500 acres of platted, level land, in lots from 5 to 160 acres—uniform in quality—at $60 per acre, cash. These lands are most favorably situated for vine, olive, citrus and fruit culture, or for making pleasant homes, where the benefits of climate only are sought. Adjacent lands of same quality cannot be purchased at less than $100 per acre. The Cajon Valley already has the nucleus of a fine settlement, a school-house, church, post-office, hotel, etc. About 500 acres in vines and trees are already planted.

Second—The so-called "T." tract, containing 10,000 acres of land, comprising 2,500 acres of valley land, 1,500 acres of rolling mesa, suitable for grain, and 6,000 acres of hills suitable for grazing, will be sold entire. This would make a first-class stock ranch, or could be cut up advantageously for a small colony; wood on this tract is estimated at 20,000 cords. The price will be so low that an investor may subdivide and sell off 1,000 acres of the valley land, and clear all his expenditures.

Third—The so-called "Monte"—a tract of 1,000 acres of the richest alluvial soil along the San Diego river; carries about 20,000 cords of wood. This land in any upper county of the State would sell for $150 to $500 per acre. It will be sold entire, together with adjacent hills.

Fourth—The grazing lands of the "S." tract between the platted lands and the "Monte," about 10,000 acres, partly suitable for cultivation, will be sold either together with the Monte, or separately.

SEATTLE—Per str Willamette, Feb 27—2000 tons coal.

PRODUCE MARKET.

The Imports and Exports given below cover compiled from last Thursday morning to Wednesday evening of the current week.

At intervals during the week light showers have fallen in the middle and northern sections of the state and in the south, particularly in Los Angeles and San Luis Obispo Counties, the fall has been exceptionally great and the result is that further damage to property has taken place. though for agricultural purposes these rains were not needed, the re-an have been but slight, if any, injury to such interest, yet in some cases plowing and seeding has been unavoidably stopped and operations in such instances will be delayed until the cessation of rain and a few days dry weather.

It unquestionably is a fact that the acreage devoted to Wheat and Barley will be very much greater than in any preceding year and the present outlook is that the yield per acre will be fully as large as ever before, unless we meet with serious injury later on through strong, and long continued, drying northerly winds.

FLOUR—

Imports, 402 sks. Exports, 16161 bbls.

Receipts for the week, 13,357 qr sks

The export movement continues active and stocks on hand are light, owing to the lessened cost of the raw material prices for flour are weak and at best irregular.

Extra, $5 37½@5 65; Superfine, $4 00@4 75. Country ditto, $3 50@4 00, Interior Extra, $5 00@5 37½ per bbl for jobbing parcels to local consumers

WHEAT—

Imports, 56606 sks Exports, 521165 ctls.

Receipts of the week, 597,120 ctls.

Eastern and European quotations show no material change, but the local market has had a declining tendency all the week, and it is quite generally conceded that the sellers of options for future delivery are largely parties in the interior whose crops promise abundant yield. Bidders on Call are exceedingly shy, and evidently have little faith in the future of the market.

Sales of No 1 White on Call yesterday included 700 tons $1 45⅝@1 45⅞ seller 30, 200, do $1 47½@1 47⅝ buyer season, 400 do, 30, 54 seller season, 100 do top price for the same grade in the sample market is $1 47½ per ctl for round lots of spot.

BARLEY—

Exports, 3701 ctls.

Receipts of the week, 56379 ctls.

In each session of the Call Board the fluctuations have been from ½ to 2½ and speculators have had ample opportunity of making a good profit on the operations completed. The trade have been both large purchasers and sellers, and the volume of business has been unusually great. Prices are lower than one week since and that a decided reaction, in favor of those long on the market, seems unavoidable. Accounts from the barley raising sections of the State are very encouraging for an unprecedented yield, stocks of the old crops are very light, and the afternoon session yesterday, sales of No 1 Feed were as follows, in 100 ton lots. Seller season, 100, 83½@ 100, 84⅛; 800, 84½@ 200, 84⅝; 100, 84¾@ 300, 84⅞; buyer season, 200, 85@ 100, 85⅛; 100, 85¼; buyer season, 200, 85½@ 100, 85⅝; 100, 85¾@ 500, 86; 300, 86⅛@ 100, 86¼; 100, 86⅜; seller 5; 100, 86⅝; 100, 86¾@ 500, 87½; 200, 91¼@ 200, 91⅜; 200, 91½; 200, 91⅝; 200, 91¾. Prices as follows buyer season, 83½; seller season, 84½; buyer 1884, 91¾. In the sample Market quotations are as follows. No 1 Feed, 85@ 87½; Bay Brewing, 97½@ $1 per ctl.

OATS—

Imports, 2716 sks Exports, 573 ctls.

Receipts of the week, 37420 ctls.

We quote: Black, $1 50@1 57½; White, $1 50@ $1 55 for ordinary; $1 62½@ $1 70 for fair to good and $1 75@1 80 per ctl., for choice to extra choice.

CORN—

Exports, 119 ctls

Receipts of week, 3170 sks.

Recent arrivals from Nebraska have been liberal and prices shaded. There has of late been considerable disposition shown on Call to effect sales of Eastern Corn for future delivery.

We quote: Nebraska, $1 42½@$1 45; California $1 45@$1 50 for white, and $1 60@$1 65 per ctl for yellow.

RYE—

Receipts of week, none.

Quotations are nominal at $1 10@1 20 per ctl. Stocks are known to be unusually large, so consumers show no anxiety to secure parcels for future use.

BUCKWHEAT—

Receipts of the week, 75 ctls.

Quotations are nominal at $3 25@3 75 per ctl

MILLSTUFFS—
Exports, 1,650 ctls bran, 17,220 ctls middlings.
Receipts of week, 11,425 sks bran, 32,295 sks mid dlings, 600 ctls corn meal.
We quote: Common Barley, $20 00@21 00 per ton; Middlings, selling at $17 50@20 00 per ton; Mixed Feed, $25 00@26 50 per ton; Oil Cake Meal, $30, oil pieces, nominal; 20 00 per pieces, Feed corn Meal, $ 15@30, cracked corn, $30 per ton; Rice Flour, $6 per bbl; Hay Meal, $5 50 per bbl; Rolled Oats, Wheat Flour, $6 per bbl; Pearl Barley, 4@5c per lb; Eastern Oat Meal, $9 75 per bbl; Cracked Wheat, ½ per lb.

HAY—
Exports, 170 tons.
Receipts of the week, 1463 tons.
We quote: Alfalfa, $8@10; Wheat, $12 00@13 00; Stable, $10 00@12 00; Wild Oat, $11 00@17 00; Oat, $8 50@10 00; Barley, $8 00@10 50 per ton.

STRAW—
Receipts of week, 118 bls.
Quotable at 40@50c per bale as to condition.

SEEDS—
Imports, 5 bgs. Exports, 4 bgs.
Receipts of week, 2,731 sks alfalfa, 2,711 sks mustard
Business is very dull for the season.
Flax quotable at $2 50@2 75 ₰ ctl. Canary, 5@ 5½c; Alfalfa, 9@9¾ ₰ lb; Timothy, 7@7½c for nat tive and 8@8½c for imported; Mustard, choice Brown, $3 25@3 75 ₰ ctl; White, $2 75@3 00; Hemp, 1c; Rape, 3@3½

BEANS—
Exports, 574 ctls
Receipts of the week, 15,038 bags
For several weeks we have cautioned our readers to beware of small Whites as the circumstances surrounding them looked no good for holders—but we did not think that those who have such large stocks would allow the market to wilt so soon, the most ferocious Bear expected to have some fun in the way of a fight, but the enemy has shown the white feather on the first approach of the foe and both Bulls and Bears now join in an indiscriminate slaughter on the poor Whites—which have not yet touched bottom. Colored are all right, a little easier, but not lower. "the" quiet acting so much like a child and finds out what "the" wants to do himself—if that is possible — all kinds of colored will maintain a firm tone for the balance of the season. We may feel some Bayos from Chili in about three months from now, to what extent no one knows. Limas are very sick—deserted by all friends—with no hope for any recuperation in the outlook for this variety is anything but bright, lower prices are expected

Our quotations are, for round lots from the wharf, Small White and Pea, $3 00. Bayos, $4 75; Pinks, $4 25; Reds, $5 00; Butters, $3 75; Limas, 3c.

VEGETABLES—
Receipts of Asparagus have been liberal during the week, and prices have fallen considerably. Rhubarb is also coming in lively, and brings 10@15c. Green Peas coming in very slowly.
We quote: Carrots, 35@50@¾h; Turnips, 50@65c; Cauliflower, 65@75c ₰ doz; Cabbage, 1@1½ct 00 ₰ ctl; Garlic, 2½@3½ ₰ lb, Celery, 50c ₰ doz; Dried Okra, 3@c ₰ lb; Dried Peppers, 15@15c ₰ lb; String Peppers, 18@20c per lb; Artichokes, 40@50 ₰ doz; Beets, 75c ₰ ctl; Parsnips, 50@1 25 ₰ ctl; Marrow Fat squash, $30 ₰ ton; Mushrooms, 6@ 8c ₰ lb; Cucumbers, 25@50 $1 50 per doz; Tomatoes, 8@10c per lb, green pease, 4@10c; string beans, 15@17c; Asparagus, 12½@17c per lb; Rhu barb 10@15c per lb.

FRUITS—
Imports, 718 bxs fruit. Exports, 490 bxs fruit, 53 bxs apples.
Lemons and Oranges are in good supply, while Limes are scarce and those on hand are held for higher prices. Business generally in fruits is quiet.
We quote: Bonnesise—Apples, 75c@$2 50 ₰ box Pears, 75c@$2 00 per box; Wisconsin Cranberries, $14 00 per bbl; Westcott, $17 00@17 75 ₰ bbl.
Tropical—Lemons, $5 00@6 00 per box for Sicily Limes, $11@12 per box for Mexican; Tamarinds, 12@ 13c per lb; Bananas, $1 75@$4 00 per bunch, Oranges, California, $2 50, Choice Riverside, $4 for 4 50, Choice Navel, $4 50@5 50 per box.

NUTS—
Imports, 20 sks. Exports, 30 sks
Business is quiet, though a slight improvement is noticeable.
We quote: Cocoanuts, $6@6 50 ₰ 100; California Walnuts, 80@90c ₰ lb; Chili do, 8@8½c; California Almonds, hard shell, 6@7½c; soft shell, 11 @12c; Filberts, 15@16c; Pecan, 12@13c; Peanuts, 5 @6c; Brazil Nuts, 15@16c; Hickory Nuts, 7@9c. Italian Chestnuts, 15@16c.

HONEY—
Exports, 8 cs.
Business continues very quiet and prices are unchanged.
We quote: Extracted, 6@9c; Extra White Comb, 17@18c; White, 13@16c; Dark, 8@10cts.

DAIRY PRODUCE—
Butter The market is now well supplied and in dications are that still lower prices than those above quoted will rule ere our next report.
Cheese—Is coming in freely and 16 to 17c is a high quotation—more seller's than at the former than the latter price. Market declining.
We quote: Point Reyes, 30c; Choice, 16@27½c inferior lots from country stores 17@20c; Eriem, 20@24c for old and 24@ 25 for new; Eastern, 15@17c; Pickled Roll, out of market. Cheese, California, 16@17c for choice; 11@ 12½c for Fair to Good; Gilroy, in drums, 16@18c; Eastern, 17@18c, Western, 10@15c.

EGGS—
Our quotations of last week remain unchanged: The market continues well stocked. We do not anticipate any material fluctuation in prices for the present
We quote: California Eggs, Choice Ranch, 27½@ per doz; California fined, 22½c.

POTATOES—
Imports, 721 sks. Exports, 1908 ctls.
Receipts of the week, 20,495 sks
Some excitement in Early Rose, which are being ordered from all parts of the State for seed
Tomales and Petalumas have been as low as 50c for best, but receipts having fallen off the last few days, prices are a little higher. Although the wharves are pretty well cleaned up, dealers are not showing any anxiety that they won't be able to get all they want at quiet reasonable figures.

There are but few River Reds Their place is taken by off Tomales and Petalumas
We quote: Early Rose, $1 10, River Reds, 40c; Tomales and Petalums, 50c, Cuffey's Cove, 65c; Humboldts, 65c, Sweets, 1½c.

ONIONS—
Exports, 253 ctls
Receipts of week, 1479 sks
The demand not being heavy as easily met by light receipts. There is still readily at $1 50 down to 25c per bag for poor

BEESWAX—
We quote 26@29c per lb

HOPS—
Imports, 157 bls. Exports, 1195 lbs
Receipts of the week, 126 bls
Since last week the market has been exceedingly dull, both here and in the New York and London markets. To day's telegrams from New York report that it is almost impossible to make sales, even at reduced prices Choice are offering in that market at 22½c, without drawing out buyers. In this market, goody prime Hops are offered at 15c, without finding buyers, while the would buy strictly choice. One sale of Oregon good, almost choice, at 16c.
We quote the market: 16@18c for good to prime: 19@20c for strictly choice.

COAL TRADE—
Receipts have been large and business good Prices have advanced
We quote Turkeys, Live Gobblers, 24@26c per lb; Turkey Hens, 22@25c; Dressed, 22@24c; Young Roosters, 8@ 50@9 50; Old Roosters, $7 50@8 00; Hens, $7 50@8 00; Broilers, $6 00@7 00, according to size; Ducks, $13 00@15 00 ₰ doz, Geese, $2 25@ 2 50 per pair

GAME—
Quail are now out of the market. Game generally is coming to market in very bad order, and receipts are largely in excess of demand As a result prices have fallen.
We quote: Hare, $1 5 @2 00, Rabbits, small, 50@1 25; cottontail $1 25@$1 50 ₰ doz, Teal, $1 50@2 00; Snipes, $1 75@2 25@2 50, Widgeon, $1 50 @1 75; Mallards, $2 75@3 00 ₰ doz; canvas-backs, $2 75@3 00 per doz, common snipe, $1 00@1 50 ₰ doz; do, English, $3 00 ₰ doz, Grey geese, $2 50@3 00 per doz, White Geese, 50c; Honkers, $2 50@3 00 per doz. Brant, 50c.

HIDES, SKINS, ETC
Imports, 2852 bdls Hides, 61 bdls Skins, 72 pkgs Tallow. Exports, 2961 lbs Tallow.
Heavy Salted Steers, over 55 lbs, 10@10½c per lb Medium Salted Cows and Steers, 50@55 lbs, 8½ Light Salted Cows and Steers, 30@50 lbs, 8c ps Dry Salted Hides, over 40 lbs, 9½c per lb, Salted Veal, 11c per lb Salted Calf, 15c per lb.
Dry Hides, usual selections, 18@——c per lb; Dry Kips, do, 18@——c per lb. Dry Calf, do, 18 @20c per lb.

WOOL—
Imports, 7 bls
Receipts of week, 100 sks
For Wool market see Wool Department.

MERCHANDISE MARKETS

BAGS AND BAGGING—
Imports, 1000 bls jute. Exports, 15 bls bgs
Standard Calcutta Wheat Bags are quoted at 7¾@ 8c for spot, and 7¾@7⅞c for June-July delivery. Potato Grainers sell for 14@14½c.

BORAX—
Exports, 22 100 lbs.
The price is heavy and sellers are disposed to meet buyers at 9½c per lb, for concentrated and refined respectively when taken in parcels of 10 t ns or more The "Leicester Castle" cleared recently for Liverpool with 224 bbls.
Late advices from London state that the demand is good and transactions large at the low figures ruling there, £36@38 for American concentrated and £38@ 40 for English refined.

BRICKS AND FIRE BRICKS—
Exports, 98 M bricks.
A G Platt's circular says, "The market is inactive, nor ertheless the large stock carried over from last year is being slowly but surely depleted. It would seem as though the present disparity between importers' and dealers' views will soon be adjusted in favor of the former."

	Spot Ex. Wharf	To Arrive
Brown's Firebricks per M	35 00	32 50
Cowen's	35 00	32 50
T. Carr's	32 50	30 00
Martine	32 50	30 00
Heathery Knowe	30 00	28 00

CANNED GOODS, ETC.—
Imports, 1532 cs Canned Goods, 994 cs Canned Meats, 1255 cs Milk. Exports, 3896 cs Canned Goods, 83 cs Milk.
Trade in canned goods still very light, and prices favor the buyer. Large parcels can be placed only by concessions on the market prices.
We quote California assorted Table fruits, 2½ lb cans, $2 25 ₰ doz; do pie fruit, 2½ lb cans, $1 50 doz; do gallons Table fruits, $3 00 ₰ doz. Peaches, 2½ cans, $1 75 ₰ doz; Tomatoes, 2½ cans, $1 15 ₰ doz; Jellies, $2 25, Jams, $2 25 ₰ doz Pickles in 5 gallon kegs, $4 15; California Sauce, pints, $4 50, ½pts, $1 75 ₰ doz. Ketchup, $1 25@1 75 ₰ dozen. English Groceries—Crosse & Blackwell's Pickles, pts, $4; qts, $6 75; Olives, qts, $7; Lireea, qts, $9 50; Sauces, $9 00 ₰ case. Jams, $4 00; Jellies, $4 00; Gray's Chocolate, 50c ₰ lb; Cocoa, 45c ₰ lb; Colman's Mustard, 60c ₰ lb.

CEMENT—
Exports, 530 bbls Lime.
A G Platt's circular says: "Present stock is abnormally large, consequently there is very little inducement for shippers to send any invoices forward. Recently arrived parcels met with so little encouragement that they were warehoused by importers to await a better market.

	Spot.	To arrive
Eastern Rosendale, in round lots	$2 20	2 15
English cement brands, in round lots	3 12½	3 10
English cement brands, in round lots	3 00	3 00

COAL
Imports, 2600 tns Pacific Coast, 2275 tns For eign and Eastern. Exports, 14 tns Coal.
There have been very light arrivals of foreign coal this week, and the amount listed to arrive within the next 60 days is extremely small, not exceeding 17,000 tons The last Australian advices show only 6,000 tons to have been shipped here from Newcastle in January, and only 4,200 tons in port, awaiting their turns to load. The above figures evidence very strongly that in June and July next there will be very small stocks on hand of Foreign Coals.
Quotations remain unchanged, as any attempt to advance the prices of Foreign Coals is checked by the liberal arrivals from our coast colliers, besides the encouraging outlook for an immense crop of grain this year will necessarily divert a large amount of coal tonnage this way. Later on, when our yield will become more assured, prices will become affected.
Imports per arrivals of coal, Foreign and American, to arrive: Australian, $7 75@8 00; Liverpool, steam, $8@ $8 25; West Hartley, $8 75@9 00, Scotch Splint, $8½ @8¾, Cardiff Steam, $7 75@8; Imperial, Lehigh, $13½, Cape Breton, $11@11½; Cumberland, bulk $10½ @10½. Spot prices are as follows: Australian, $8 00; Liverpool Steam, $8 00; West Hartley, $9½; Scotch Splint, 9 00; Cardiff, $8 00; Lehigh, Steamo, $13; Cumberland, bulk, $11 50; Egg Hard $11 50.

COFFEE—
Imports, 2278 bgs. Exports, 3008 lbs.
Coffee is in good demand for Eastern shipment and local consumption.
We quote:

Costa Rica, good to prime	.13 @14
Guatemala, good to prime	.13 @13½
Salvador, good to prime, washed	.13 @13½
Salvador, good, unwashed	.12 @12½

CORDAGE—
Imports, 25 cs Cordage. Exports, 79 cs Cordage
We now quote as follows: Manila, 1¼ inch (7-16 dia) and upward, 16c; do, 12-thread, ⅜ dia) 15½c; do, 6 and 9-thread (¼ and 5-16 dia) 16c; Manila Bale Rope, 2, 3 and 4-thread, 15c; Manila Cordage, tarred, 2-in (⅝dia) and upward, 15c; do Lathyarn, 15c, Second to No 1 quality Sisal Rope (1¼ in (7-16 dia) and upward, 11c; do, 12-thread (⅜ dia), 11¼c; do 6 and 9-thread (¼ and 5-16 dia), 12c. Sisal Bale Rope, 3 and 4-thread, 11c.

DRIED FRUITS—
Imports, 615 cs Prunes Exports, 1814 lbs Dried Fruits, 213 bxs Raisins.
Business remains quiet, as is usual at this time of year, but a slight improvement may be noted. Prices are unchanged.
We quote: Sun dried Apples, 8@8¾c ₰ lb for sliced and 6¾@7¾c for quartered; Alden and Plummer, 11 @12½c; Apricots, 12c; Blackberries, 12½@13c; Figs, 6c for pressed and 4@5c for unpressed; Smyrna, @ c; Nectarines, 9½@9½c; Peaches, 15@16c for peeled and 11@11¾c for unpeeled; Pears, 7½@8c; Plums, 12½@13c for pitted and 3½@4c for unpitted; German Prunes, 9¾@10c; French Prunes, 10½@11c ₰ lb; Raisins, $1 50 for loose Muscatel and $1 75 for London Layers, with the usual advance for fractional boxes.

DRUGS AND CHEMICALS—
Imports, 164 cs 130 lbs Gensing. Exports, 31 cs Drugs, 58 crbs Acid.
We quote: Muriatic Acid, 12c; Strong Sulphuric Acid 3@3½c; Sulphuric Acid, 2½c; Muriatic Acid, 3½c; all lots of 20 carboys or more); Caustic Soda, 60 deg, 5c; 70 deg, 4½@5c; 76 deg, 6¾@6½c; Powdered Caustic Soda, 7¼@8c; Caustic Potash, 9½@10½c; Chlorate of Potash, 16@19c; Soda Ash, 2½@3½c; Soda Crystals, 1¾c
Quicksilver—Ample side: Soda Ash, 1 90@2¼c for 52 deg. Ash; Soda Crystals, 1¼c; Chloride Lime, 3@ 3½c; Copperas, 1¾c on spot; Caustic Soda, 60 per cent, 5c.

FISH—
Imports, 375 pkgs Codfish, 909 pkgs Fish, 177 cs Salmon. Exports, 332 pkgs Fish, 3198 cs Salmon.
Columbia River very scarce in market. Trade in small parcels very good, with but little demand for large lots. We note a decline in California Cod since our last
We quote: Columbia River, $1 27½@1 35; Sacramento, $1 17½, f.o.b.; barrels, 8@8½; hf barrels, 8½@8¾; California, 7½@8c, in 50-lb bundles, 4c; selected, in cases, 5c; boneless, 6c.

IRON—
Imports, 1166 pcs 778 rls, 139 bars Iron, 1707 pcs Iron Pipe, 77 bars, 24 pcs Steel Exports, 2032 bdls, 173 pcs Iron, 122 pcs Iron Pipe, 27 bars Steel
Business in this article is at a standstill and very little is changing hands, as consumers are yet fully supplied, still recent rivals have been very light and considerable is being melted, and the large stock we commenced the year with is being gradually reduced.
Prices remain unchanged for Spot Iron, and quotations for Loading are being lowered somewhat, the tonnage of vessels being relatively cheaper than spot.
Importer's prices of pig Iron, Foreign and American, to arrive: Shotts No. 1, $27½@——; Eglinton, Glengarnock, $26 50@——; Eglinton, $25 00, Clay Lane, $23; Shotts No. 1, $28 50; American, Soft Eastern, $25 00; Upper Gap Nos. 1, 2 & 3 $32 50@35 00.
Spot prices are as follows: Glengarnock, $25 00; Eglinton, $24 00; Clay Lane, white, $23; Shotts No. 1, $28 50; American, Soft Eastern, $25 00; Spot prices are as follows: Glengarnock, $25 00; Eglinton, $24 00; Clay Lane, white, $23; Shotts No. 1, $28 50; American, Soft Eastern, $25 00; Upper Gap Nos. 1, 2 & 3 $32 50@35 00.

Crudeum, 150 deg test, cases		30

PROVISIONS—
Imports, 1 cs 560 lbs Bacon, 50 bbls Beef, 111459 lbs Hams, 51960 lbs Lard. Exports, 4350 lbs Bacon, 212 bbls Beef, 16557 lbs Ham, 16991 lbs Lard, 37 bbls Pork.
The market for meat products is active, and prices have an advancing tendency, except in Eastern Hams, which are in large supply and selling at prices paid at Eastern packing points, with freight added thereto.
We quote: California hams, 13½; Eastern, 13¾@ 14½c; Our Choice hams, 16¢@16½c; California bacon, 13@14c; California covered bacon, 14@ 14½c; extra clear sides, 13@13½c; California shoulders 9½c; mess pork, $21 per bbl; prime mess, $18; clear pork, $21 pr bbl; extra clear do, $22 per bbl; pig pork, $24 per bbl; mess beef, $14 50 per bbl; extra mess beef, $15 50 per bbl; family beef $17½ per bbl; Eastern refined lard, in tes, 13¼c per lb; California refined lard, in tes, 11¾c per lb; 10s, 10c; 5s, 10½c; Banner lard, 10s, 13c; 5s, 13¼c; 3s, 13½; Fairbanks lard, 13¾c for 10s, 13¾c for 5s, and 14c for 3s.
PAINTS—
Imports, 37 cs Paints, 11 bbls Varnish, 164 kgs White Lead, 25 bbls Whiting. Exports 45 cs Paints, 32 cs Varnish, 354 kgs White Lead.
No improvement can be noted in business, and none may be expected until the rains are well over and country roads are opened. Prices remain the same.
We quote White Lead 6¾ in ton lots; and 6¾ in 5 ton lots; Lutharge, 6; Ochre, Yellow, dry, 3 to 3½c; Ochre, ground, 5 to 6 cts.; Venetia Red, 2½ to 3c; do, in oil, 5 to 6c; Chrome, dry, 18 to 30c, do, in oil, 18c; Red Lead, 6 cents.

QUICKSILVER—
Imports, 1005 flasks.
Rothschild's price was advanced on the 29th of February to $50 lbs per flask, and private advices from London report an active market there during the month of January and the first half of February, the sales being in excess of the receipts.
The price in San Francisco is $29 per flask, about 38c per lb. The Panama steamer on the 1st inst carried 952 flasks for New York.

RICE—
Imports, 13100 bags. Exports, 149,430 lbs
Is in fair demand at unchanged prices. Strictly No. 1 is firmly held at $6 25. The steamer Oceanic brought about 8,000 mats of new Mixed, which has been sold at $1 60@4 75. The market for Hawaiian is very slow.

SALT—
Quiet at unchanged prices, viz. $4 05@4 10 for Mixed, $4½@4¾ for No 2 China, $3 25@ 5 50 for fair No 1. Extra No 1 $5¾@6¼; Hawaiian, $4 75.

SALT—
Exports, 173,546 lbs
Liverpool fine we quote at $20@22 50 ₰ ton. California, $6@10 per bbl; do coarse, $4@5; 6@15 Carmel Island, fine, $16@22 do coarse, $12; do 65 half ground, $9@14.

SOAP—
Imports, 425 box. Exports, 331 bxs.
We quote: California Castile, Mottled, 8¾@12c; White, 16; French Castile, Mottled, 10c; White, 16@17; California Pale and Chemical Olive $5@6 per case; Washing Powders, 8¾@12½ per gross.

WHOLE SPICES—
We quote: Black Pepper, 15@16c; White Pepper, 22@—c; Allspice, 12@15c; Cloves, 22½c; Cassia, 8@9c; Ceylon Cinnamon, 40@45c; Ginger, per 85c; Nutmegs 62½@65; Mace, 60@62½c; Borneo Ginger, 16@18c.

SPIRITS—
Imports, 60 bbls Spirits, 58 bbls Alcohol, 40 cs Brandy, 192 bbls Whiskey, 1223 bbls Liquors. Exports, 180 gallons Brandy, 372 cs Whiskey.

STARCH—
Imports, 1025 bxs.
We quote: Kingsford's Pure Starches 8½c ₰ lb; Corn and Silver Gloss, 7½c; Pearl, 7½c; Pure Starch, in barrels, 7½c; Ground and Wheat Starch, 8½c, in barrels; Silver Gloss, in barrels, 9½c.

SUGAR—
Imports, 2712 bags Raw, 2,000 lbs Refined. Exports, 668,811 lbs Refined.
The California demand for Refined Sugars continues excellent. Hard sugars have been reduced this week half a cent per pound, all round. From New York, by telegram, we learn that Granulated is quoted at 7¼c. That market for both Raws and Refined is unchanged and dull The California Refinery is now making other grades of yellow sugars, in addition to the standard grades, which are sold as per sample, at iron six cents upward.
(A) Pat Cube Sugar, in bbls, 10¾c; (A) Crushed Sugar, 10½c; Extra Powdered sugar, in barrels, 10¾c. Fine Crushed sugar, in barrels, 10½c. Dry Granulated sugar, in barrels, 9½c; Extra Granulated sugar, in barrels, 8¾c; Extra C, 8¼c; Golden C sugar, in barrels, 8¼c; D sugar in barrels, 7c; Extra Fine Powdered, in bbls, 11¼c; Confectioners' (A), 10c; El Dorado C, in barrels, 9½c; Mariposa C, 8¾c; Nonpareil, 8¾c; half barrels, ½c, and boxes, ¼c, more for all kinds.

TEA—
Imports, 1283 pkgs. Exports, 8533 lbs.

TIN, ETC.—
A G. Platt's circular says: "Brands of Tin Plate suitable for Salmon canners are this week the turn dearer. Holders of choice goods advancing their prices."
We quote:

A. B. Grades			
Yapitty	"	$6 15	6 25
Good B. V.	"	$5 85@6 10	6 00
Ordinary	"	$5 50	5 62
Common	"		
Lantwit	"	7 00	7 00
I. C. Charcoal, Alloway Grade		6 35	
Terne Plates (Roofing)			

We quote: Pig Tin, on spot, 22½c.

WINES—
Imports, 5 cs Foreign, 6 cs Native. Exports, 82 cs, 72734 gals Native Wine.

That Ohio is equally noted for producing Presidents and floods.

That demagogism is the worst enemy California encounters.

That the best health resort for the sick is an educated physician.

That every effort should be made to encourage home manufactures.

That California needs greatly more sober and industrious white laborers.

That if you have not subscribed for the MERCHANT, do it, and do it quick.

That land around Auburn, Placer County, is in demand for fruits and vines.

That a good mother makes good sons, and good sons make good citizens.

That murderers tried on information are to hang, as well as those tried on indictment.

That fortifications are good, but fortifications, equipped with heavy guns, are better.

That Tehama is one of our most prosperous agricultural counties and is filling up fast.

That the number of counties which are working into line as fruit, wine and raisin producers are astonishing.

That some newspapers seem to be edited for the express purpose of injuring the fortunes of those who support them.

That a good newspaper, like the MERCHANT, is a valuable factor in developing the material interests of the State.

That the United States does not need a large standing army, but is surely in need of an effective fleet of war vessels.

That we want more variety of home manufactures, and our people are thoroughly alive to the advantage of supporting them.

That there is a principle of regeneration in human nature, and that the son of an indifferent father may make a noble and patriotic citizen.

That a tariff for revenue only really means a tax on what now comes in free and placing on the free list nearly everything that is now taxed.

That Governor Stoneman is unfortunately in a position in which it is much easier to lose a good character than to add anything to his previous reputation.

That Lake county promises to be one of our best wine and fruit counties, and is looking forward with hope for railroad communication at an early period.

That the arguments which can be used for local purposes in advocating encouragement for home manufactures apply with equal force to the national policy of protection.

That it is only from the pens of a few English writers that we learn how much 50,000,000 of Americans have suffered from not allowing free imports of foreign mere handi

That a party which dares to announce "protection with incidental revenue" would gain more votes than one which straddles the fence with "tariff for revenue with incidental protection" as its motto.

That every manufacturer and producer in California should inform his representative in Congress how he stands on the tariff question and should thunder his position into the ears of the editor of his local paper.

That British free trade is unjust to the working man. Such common luxuries as coffee, tea, tobacco and beer (in the malt duty) are taxed, while the rich man's luxuries, silks, laces, carpets, gloves, etc., are admitted free

That the tariff question if not the only important is the most important question to be discussed in the next election, and yet office seekers being afraid of it say it is not a political question. Since when has it ceased to be a political question?

That the thermometer does not make the temperature, it only regulates it--so London and Liverpool do not fix the prices of grain and provisions, but they register the amount of surplus in the various producing countries from which Europe draws her supplies.

That President Nickerson, of the California Southern, hopes that the Atcheson, Topeka and Sante Fe will take hold and make his road a part of their system. This road has been seriously injured by the storms, and will take a bushel of double eagles to restore.

That the London *Times* in summing up England's manufacturing condition, at the close of 1883, labors hard to find some grounds for comfort if not cheerfulness regarding the future, but acknowledges the main dependence is the wider opening of our ports for British manufactures.

That a restaurateur in Paris has been convicted of selling an inferior champagne for that of Moet and Chandon, and was imprisoned fifteen days, fined $400, and ordered to pay the firm named $2,000 as damages for the loss the reputation of their wines sustained—a severe but wholesome lesson.

That Governor Stoneman in calling an extra session of the Legislature, has succumbed to the pressure of an insignificant minority of the tax-payers of the State. But it was a minority which if he was guided by the expressions of a few violently partizan newspapers he might well think was a majority.

That British syndicates and individual foreigners are known to own, in tracts varying from 5,000 acres to 4,500,000, not less than 21,000,000 acres of land in the United States, and are holding them for speculative purposes. The total area of such lands is more than the combined area of Massachusetts, New Jersey, New Hampshire, Connecticut and Rhode Island.

That if the United States has gained no greater share of the world's carrying trade since 1860, she has developed gigantic transportation facilities of her own far more profitable to the nation than ship owning. In 1860 we had only 30,000 miles of railroad; to-day we have nearly 130,000 miles or nearly equal the aggregate railroad mileage of the rest of the world.

That one of the causes which led to the quarrel between the American colonies and the mother country was the refusal of the British government to allow the colonies to encourage or protect their infant manufactures, and the struggle of British manufacturers to recover and maintain their hold on our markets has been going on ever since the Declaration of Independence.

That when the Cobden Club of London point to the enormous strides that English manufacturers have made during the era of free trade, other nations can point to greater, and the United States, in an era of protection, can show a far greater ratio of progress in manufactures. If tables showing the increase of manufactures are to decide the merits of the two policies, protection wins the day.

That Judge Field, in his adverse opinion on the Legal Tender Act, shot at two birds with one stone: He preached old-fashioned Democratic doctrine to the South, and flattered the National Banks by accepting their view, that these institutions, created by Act of Congress and issuing notes secured by the credit of the Government, have a right to a monopoly of the note-issue of this nation. Very clever, Judge Field, but not clever enough to make you President of the United States!

That it is common to row one way and look another, but it is not possible to look two ways at once. No man can intelligently and sincerely say that he is in favor of imposing duties first of all for revenue when he votes for a duty upon articles produced in this country, until he has first imposed or endeavored to impose a duty upon every article not produced here and in respect to which, there being no incidental protection, every dollar of the tax would go into the treasury. If he did this he would place a tax on coffee, tea, tin in ingots, and fifty other articles now on the free list, which would raise all the revenue needed and place on the free list not only sugar and wool but all manufactured fabrics and a hundred of other articles of which we produce some at home and buy others abroad.

That if the leaders of the Democratic party in the East believe that some of the staunchest partizan newspapers of this State represent public opinion in California, they will suppose that the Democrats are in favor of a sweeping reduction of the tariff and favor reinserting the old plank in the platform about the tariff for revenue with incidental protection. For instance, the Los Angeles *Herald* favors this plank, and yet there is not a producing subscriber of the *Herald*, and they are the majority, that does not want protection for the products of that county. These Democrats should make their views understood by the *Herald* and as early as possible, for if the Chicago Convention listening to that and other party journals makes a mistake on this tariff question, Democratic voters will find themselves next November in a dilemma. They will have to choose between the success of the ticket which they have hitherto supported and casting a ballot which while defeating the ticket will secure the prosperity of their business.

We really cannot see any necessity for calling the Legislature together. The railroad company has paid or is paying its taxes and is willing to stipulate that the further payment of penalties and interest shall abide the decision of the U. S. Supreme Court. New legislation cannot affect these suits. The alleged financial distress of the several counties is ended or alleviated by the railroad tax payments. It would be absurd to call the Legislature together for the single purpose of laying the foundation for amending the constitution at some future time. Lastly, if one of the purposes is to put Messrs. Humphreys and Carpenter out of office, can it be done? and if it can, is it worth while calling the Legislature together at an expense of $200,000 to do it? It seems to us that it would be a good deal cheaper for the State and much safer for the Democratic party if the authorities would let the legislators remain at home. It may be presumed they are all usefully employed now; at Sacramento some of them would be neither useful nor ornamental. "Let well alone."

RETAILERS' CORNER.

The effect of the washouts on the Southern Pacific road and on the Central Pacific has been very depressing to trade during the week. Before the Southern Pacific was finished, our merchants were well satisfied with the steamer accommodations, but today they feel at a great hardship. Trade, even in places easily reached, is dull, and, as an interior merchant remarked, who was in town buying, this week, "I take goods like medicine a teaspoonful every hour." There is great competition among our merchants to capture these small orders, and the way they run after small buyers would make any one think that the trade of the year depended on it. The interior merchants themselves report trade very dull, but hope for an improvement soon.

SUGAR.

Refined Sugar was reduced this week a half cent on all the hard grades. The soft and yellow Sugars remain unchanged. The California Sugar Refinery is now making other grades of yellow Sugars, besides the standard, which it sells by sample from six cents up. The New York market is lower for Granulated, but other grades are unchanged. The sales of Hawaiian Raws are free, at unchanged prices.

COFFEE.

There is a good demand for shipment East and local consumption, at higher prices. The New York market is stronger in sympathy with Rio and higher options in the Exchange.

The principal feature of the cable advices received from Rio since our last issue has been a falling off in receipts, which last week averaged a trifle over 10,000 bags per diem, but on Monday were only 2,000 bags. Purchases both for this country and Europe have been moderate, about absorbing the receipts, so that there has been no material change in stocks, nor quotations. The smaller receipts have been considered favorable for the bull side of the market, but the statistical situation has really undergone no significant change.

RICE.

Asiatic Rice is in fair demand at unchanged prices. Strictly No. 1 is very scarce. The steamer Oceanic brought about 8,000 mats of New Mixed, which is selling from $4 60 upwards, according to quantity. Hawaiian Rice is very slow of sale at unchanged prices.

FISH.

Codfish, as was expected from the excessive supply, has declined 1½ cents all round, and is now selling in 50 lb bundles at 4 cents, selected in 100 lb cases at 5 cents and boneless in 30 lb boxes at 6 cents. The last change before the present one was an advance during the week ending February 8, of half a cent. But from the well-known fact regarding the excessive stock it was generally expected that such prices could not be maintained after the catch of the outside fleet was thrown on the market.

The Salmon trade is only retail, but in that way, is very good. The stock of Columbia River is very small.

CANNED GOODS.

Trade is very quiet, and canners will shade prices very much in order to effect sales. Jams and Jellies, however, are firm at an advance.

DRIED FRUITS.

Dried Fruits are in better demand, and though there is no advance in prices yet dealers are firmer in their views.

PROVISIONS.

There is a good trade in barrel Provisions for export, but Hams, Bacon and Lard are very dull.

FRIDAY ..... MARCH 7, 1884

There is a bill now slumbering before Congress for the purpose of offering a reward of $50,000 to any whaler or other private vessel which rescues the Greely party. The Government has sent out one expedition, and is sending another, but the proposed reward is an excellent idea. It would set every whaler in the Atlantic at work searching for this unfortunate expedition, and give the survivors, if there are any, ten chances of life where they otherwise would have one. Will not some member of Congress resurrect this bill and force it on the attention of Congress? It is no use waiting until the whaling fleet has sailed — the quicker it is done the better, because some of those whalers would, if they had timely notice, make special preparations for earning it.

There can be no equal competition between the artisan and mechanic on one side the Atlantic, who has been bred to the idea that he is the task-master of his wife; who seldom thinks of her comfort; who scouts the suggestion that his children should be educated, to say nothing of giving them pleasure in their youth; who is unable to properly clothe or even feed them; who watches their growth only with a view of grinding out of them by labor, at the earliest possible moment, a few miserable pence, that he may have more to spend at the beer-shop; there can be no equality in competition between such a man and the American artisan, mechanic or laborer, who is cheered in his daily task by no motive so high as supporting his wife in comfort, furnishing her some little luxuries, providing his children not only with plenty of the most nourishing food and warm and tasteful clothing, but with innocent amusements and healthy pleasures, and qualifying them by education and the habit of reading books and newspapers for the duties of life, and for taking advantage of the many opportunities which a prosperous and progressive country gives intelligent youth for rising to the highest rank in the social scale. The free-trade theories of Carlisle and Morrison, and their Democratic followers, if carried into effect, would shortly end all this, and reduce the workingmen of America and their families to the level of the English, French, Belgian and German mechanics at present. Can it be possible that the workingmen of the United States could be induced by former party associations to the suicidal course of voting for candidates who favored such an outrage on their interests?

A MISTAKEN BID FOR POPULARITY.

Congressman Henley is a thorough going Democrat and is always found in the swim. We remember when railroad subsidies and land grants were popular, he was one of the staunchest and most vehement advocates of such subsidies and land grants. Public feeling has changed since 1869-70 and Mr. Henley is now in the first ranks of the party who are in favor of forfeiting all partially earned as well as unearned land grants. The telegraph wires tell us he is about to report in favor of the bill for forfeiting the California and Oregon land grant and gives us his reasons. Knowing Mr. Henley's general course of action, we do not believe that he cares one cent whether the California and Oregon get the grant or not, or whether the forfeiture or non-forfeiture of the grant would be beneficial to California or injurious, but he does care for popularity in his own district. In canvassing his district he found that the more latterly he spoke against all railroads and corporations, the more he screamed "down with these monopolies" the more vociferously he was applauded. He learned his cue and he is acting his part in firm confidence that it insures his re-election. He is not aware that the second sober thought of this city and of nearly all North-eastern California favors the completion of railroad communication with Oregon at the earliest possible moment. He says Villard forced the Central to promise to construct their end of the road. Perhaps so, but Mr. Villard has no power now to make good his promises or his threats. The telegraph tells us that out of those threats grow "the agreement to divide the road," that is, for the California and Oregon and Oregon and California to build it between them. This is nonsense—each company has a charter and a land grant extending to its State line, and the agreement only referred to the time when each should complete its share of the work. A sentence found in the Associated Press telegram as printed by the *Chronicle* is an interpolation by the news editor of that paper as it does not appear in any other morning journal or in the *Bulletin*. The interpolated matter is as follows:

"Huntington, the report says, when before the committee, was forced to admit that the road would be built whether its lands were forfeited or not."

News and editorial arguments should be kept apart, but the *Chronicle* has always made use of its telegraphic columns to back up its views. Mr. Huntington may have told the committee that the road would eventually be completed, grant or no grant, because his associates on this coast have on several occasions said the same. But they all say the road can be completed much quicker if the grant is extended. This is reasonable. It is well known that the unfinished portion of the road is as costly and difficult as anything that has been met with in railroad construction on this coast, the Sierra Nevadas or Tehachepi not excepted. The grant has no value except that portion which is timbered and that timber is inaccessible without the road."

The closing statement is as meanin principle as inconsequent in argument. Because some one has eaten and drunken intemperately there shall be "no more cakes and ale in the land."

The telegram says: "The Central Pacific they say, has already got enough from the Government, and in all future transactions with that road the committee and Congress will be disposed to stand on the strict letter of the law, and as the Central Pacific must complete the road to save the capital already invested, the committee are forced to recommend the forfeiture. Similar grounds will be taken in the report to declare the lands granted to the Oregon and California forfeited."

Because Mr. Henley has changed his mind since he voted, and worked for the Southern Pacific San Joaquin subsidies which the company did not get, or, rather, the temper of constituents has changed, he would now rob the C. & O. of an equitable right to get even with another corporation, the C. P. R. R. Just such arguments as Mr. Henley makes could be made in favor of any act of spoliation. We do not mean, of course, that the C. & O. have a strictly legal right to the grant, but they have an equitable right, based on the circumstances beyond their control which prevented the completion of the road within the contract time. It is as unworthy as it is dangerous for any government to plead statute of limitations or technicalities against an equitable claim. But, apart from all consideration of law or equity, California interests require the early completion of the road—the interests of San Francisco commerce demand its completion at the earliest possible moment. Every day that road remains incomplete robs us of some trade and sinks our business relations with our Oregon customers in deeper and deeper jeopardy. Mr. Henley thinks it will be popular with the Democratic voters of his district to secure the forfeiture of this grant and maintain an impassable barrier between two adjoining States. The Oregon steamship companies may possibly approve his action; the merchants of San Francisco as a body, we believe, do not. The Board of Trade of Portland, and it is creditable to their judgment and shows their breadth of view in mercantile matters, do not approve of this forfeiture. The worst of these lawyer politicians, like Congressman Henley, is that they are always to be found at one extreme or the other—they never can take a moderate and statesmanlike view of any subject. They always want to be doing something sensational, something that will win the plaudits of the unthinking element of their party. The intelligent class of voters who opposed Assemblyman Barclay Henley, when he would have mortgaged the San Joaquin valley from Stockton to Bakersfield to one railroad company, now oppose Congressman Barclay Henley, when he would take from another railroad its equitable rights, and keep adjoining States from enjoying railroad communication.

M. Leon Chotteau deprecates the idea o retaliatory measures against France in the matter of the American hog. He undertakes to enlighten the French people, on his return to his country. Some people might wonder what inducement this Frenchman has to come over here to investigate the hog question. The explanation is, that M. Chotteau's friends, the chocolate manufacturers, and the wine and brandy exporters and silk weavers of Lyons, see that, if there is recourse to retaliation, the blow will fall on them. It is not disinterestedness; it is simply self-interest.

The tariff bill passed by the First Congress under the present Constitution of the United States expressly declared that protection to manufactures was one of its purposes.

THE BEGINNING OF A STRUGGLE.

The effects of the Chinese Restriction Act are beginning to be felt, and every industrial pursuit in the State is interested in the events that are now occurring in this city. The Chinese in the country have taken every advantage they could of the circumstances. In every branch of employment—in field work, in domestic and house service, and in manufacturing establishments—they are not only assuming a more dictatorial tone, but have demanded and are obtaining higher wages. Their tone has now become insupportable—at least, in one quarter—and the cigar manufacturers have declared open war. The views of the leading cigar manufacturers of this city are that the time has come to give white labor the preference and predominance, and rid themselves of heathen domination. It has been hitherto said by some who, perhaps, hardly recognized the progress the State was making in diversified industries, that it was difficult to find steady employment for labor, adult and juvenile, all the year round. All causes for this complaint are passing away, and California in 1884 offers as many opportunities for steady employment to men, women and youths, of both sexes, as any State in the Union.

The Associated White Cigar Manufacturers, it is said, will establish on their own account a technical school for teaching youths the trade of cigar manufacturing. It will be proposed that the cost of maintaining this school shall be borne by the Association, and as the pupils attain proficiency they shall be allotted in equal proportions to the contributing members. In one year such a school can turn out 500 fairly competent cigar-makers; in two years, 1000; and so on. The result of the Restriction Act, of course, will be a yearly reduction in the number of Chinese cigar-makers in this State; but the Association's technical school will more than refill their places. Thus, white labor will regain its ascendency, and parents of large families will be induced to emigrate to California, because they will be assured of work, not only for themselves, but for all other members of their families who desire profitable employment.

GEORGE PEN JOHNSTON.

George Pen Johnston, of the *Examiner*, is dead. All Californians of the earlier days knew him and the bright future then before him. During the last few years he has been best known by fellow-journalists. An unfortunate difficulty which occurred between him and Ferguson in the stormy days of California politics closed his public career and cast a melancholy tinge over his later life. None regretted the fatal result more than he, but he was not to blame. In the condition of California society in those days he could not do otherwise. As a journalist he was one of the most painstaking in the profession. His fluency was remarkable, and he could, when he gave vent to the humor, build up a pyramid of adjectives, every one well fitted for its place, worthy of Macaulay. He was a noble, kindly gentleman, honorable and conscientious in a rare degree. Poor soul, *requiescat in pace*, free from the labors of journalism, beyond the turmoil of political strife, and relieved from the stings of exaggerated remorse.

The Ohio floods are acting as immigration agents for our State.

LOCKED OUT.

NO MORE CHINESE DICTATION.

The White Cigar Manufacturers Assert Their Manhood.

WHITE LABOR TO REPLACE MONGOLIAN.

On Friday last, at a meeting of the leading white cigar manufacturers of this city, an association was formed, pledging all members, under penalties, to stand by each other and resist the encroachments of Chinese cigar-makers on the privileges which naturally belong to employers. The most important step was ordering a "lock-out" to take place on Monday morning, which order has been faithfully obeyed by the Association members. The Association prefers to confront the Chinese in a compact body to allowing them to fight the several cigar factories in detail.

The following is a substantially correct report of the history and present status of the struggle:

Since the Restriction Act was passed, there have been so few Chinese arrive in the country that there has been steady work for all who are here, and in some cases a scarcity of labor. The Chinese knew that their services were in demand, and the knowledge of that fact has made them arrogant to an offensive degree. So much so, in fact, that, as the gentleman stated, "we have been compelled to handle them without kid gloves." They formed a trades union and have assumed to dictate to their employers. The latter grew tired of this, and in turn formed an association, which embraced about 30 of the leading cigar manufactories of the city. After operating about a month under their association laws, it was found that the plan was not working well, and one was adopted which had previously been offered in the form of a resolution by Sammel Lewis, but rejected.

ASSOCIATION OF EMPLOYERS.

This placed the San Francisco association upon precisely the same basis as the one in New York, which was formed for protection against the workmen, who were nearly all Germans and socialists, and who, guided by two or three radical socialistic leaders, kept the New York manufacturers in continual hot water. Under this plan, the manufacturers bound themselves by heavy penalties to submit any trouble that might occur in their shops to the decision of an Arbitration Committee. If the men in the shop struck, the committee would proceed there and hear testimony from both sides. If the employers were found to be wrong, they were directed to accede to the demands of the men. If the latter were found to be in the wrong, they were ordered to return to their work, and if they refused, then every factory in the association was ordered to, and did, discharge every man in their employ and keep them locked out until the decision of the Arbitration Committee was accepted. One or two lock-outs settled the question, and now a strike among the New York cigar makers is something unknown. In this city the papers were all drawn by competent legal talent, and in case a lock-out is ordered, every firm who employs a Chinaman during the lock-out is compelled to pay $5 a week for each one employed into the treasury of the association. In addition, during a lock-out, a committee of three of the association is compelled to visit each factory once a day and see that no Chinese are at work.

ANNOYING STRIKES.

The Celestials have grown very annoying of late. As stated, they have formed a trades union and, for some time, perhaps for no other reason than to give a hint to the Melican man of their power and unanimity, have ordered a strike once a week in some particular shop. The *modus operandi* was, or, rather, is, as follows: Supposing there are thirty cigar manufactories represented in the membership of the Chinese Union, tickets bearing numbers from 1 to 30, inclusive, are placed in a box, shaken up and one drawn out. It makes no difference what factory that number represents, a strike is ordered at once on some easily devised pretext. The next week another number is drawn, and so on, care being taken not to order a strike the second time in any shop until all the others have had a benefit. On Thursday last a strike went into effect in the factory of William Lewis, who refused to comply with the demand of the Chinese Union to immediately reinstate a new man, who had been discharged for incompetency. A strike is also in progress in the factory of H. Plagemann & Co., who refused a demand for an increase in wages of $1 per thousand cigars manufactured. The men in another factory are also on strike because the proprietors refused to discharge a couple of packers who were non-union men. It must be borne in mind that the white help employed in the various factories are not affected by these controversies. Their position will be explained further on. It may be stated here that, when the association was formed, an effort was made to induce Chinese owners of factories to become members, but they declined, and the plan fell through of making a general combination of all manufacturers.

A LOCK-OUT ORDERED.

The association grew tired of continual and causeless strikes—causeless, as they claimed, for the reason that the men were being paid good wages, averaging $8 and $9, and some $15 per week, and did not have long hours—and the strike in the factory of William Lewis & Co., on Thursday, was the straw that broke the camel's back and exhausted the patience of the association. A meeting was held and a general lock-out ordered to take effect on last Monday morning, of all Chinese employés, and the doors will remain closed upon them until they come to terms. The white men and girls will be retained at full wages, unless the lock-out is of too long duration, and be kept at work preparing material for the cigar-makers when they return. Sammel Lewis stated last evening that, in anticipation of the lock-out, he had already discharged a number of his men, who did what may here be termed preparatory work, retaining the cigar-makers, however, so that all stock should be cleaned up by Monday. As soon as the men agree to come back to the three factories where they are on strike, accepting the terms of the owners, then the doors of all the factories will be opened, and not until then. Mr. Lewis, who is one of the Visiting Committee of three above referred to, states that all the factories in the association have been large buyers of outside and cheaper cigars, in that way being the chief support of the strictly Chinese factories. These cigars have been used for shipment into the Southern States, where a brisk trade has sprung up since the opening of the Southern Pacific Railroad. It was necessary to take the cheap brands for this business, in order to compete with the New York market. When the lock-out is inaugurated, no more of these will be purchased, and a committee will wait upon the dealers in leaf tobacco and request them to sell no leaf to the Chinese during the progress of the struggle, which, owing to these measures, is expected to be brief. There is no skilled white labor here, and none can be obtained outside of New York, where it is all concentrated.

The Chinese Cigar-makers' Union held a meeting on the same evening (Friday), but nothing important was decided upon.

NUMBER EMPLOYED.

The White Cigar Manufacturers of San Francisco employ, on an average, 3,000 cigar-makers and 1,000 packers and strippers—the latter in preparing the tobacco. These, with a few paltry exceptions, are now locked out. The Chinese-owned factories employ 1,500 cigar-makers and 400 packers and strippers. From the Internal Revenue Department we learn that the Chinese factories have not increased the number of their employés in consequence of the strike in the white factories, but, on the contrary, the larger Chinese factories, recognizing the justice of the "lock-out," have reduced the number of cigar-makers. For every cigar-maker employed bonds have to be furnished, and therefore the statement of the officers of the Internal Revenue Department are authoritative.

The following firms are parties to the lock-out agreement: Koenigsberger, Falk & Meyer; I. S. Rosenbaum & Co.; Samuel Lewis & Co., William Lewis & Co.; L. Eisenberg & Brother; Lachs Brothers & Co.; H. Plagemann & Co.; Engelbrecht Fox & Co.; L. Greenbusky & Co.; John S. Bowman & Co.; Sidenman, Lachman & Co.; G. Cohn & Co.; J. W. Schaefer & Co.; Grunstein & Co., Mayrisch Brothers & Co.; J. Salomon & Co.; Har is Brothers; M. Werthemer & Co.; Hahn, Levy & Co., C. C. Dietz, I. Werthemer & Son; Seligmann, Meyerfeld & Co.; Charles Jacobs & Co.; Kaufman, Baer & Co., Michalitschke Brothers & Co.; Conradi & Moss; C. Klopstock; M. Armer & Co.; Meyer, Mish & Co.; Gabriel Cohn and Franklin & Sultan.

The Executive Committee of the Cigar Manufacturers' Association, whose Chinese hands have been locked out, met in secret session yesterday afternoon to perfect a plan of conquering the crafty Mongols who now claim to be masters of the situation, whether the manufacturers adopt white labor or not. The association claims that if the project now on foot can be carried through, it will put an effectual quietus upon the Chinese cigar-making industry. How it proposes to accomplish this certainly very desirable object is a secret which its members will not divulge until the scheme has been perfected far enough to stand the test of publicity.

TOBACCO MARKETS.

SAN FRANCISCO—There is nothing of interest to report since our last. Trade in Leaf has improved very considerably, while for Cigars there is a fairly active demand.

[U. S. Tobacco Journal.]

NEW YORK, Feb. 23rd.—With the exception of one or two large holders of '82 tobaccos, nobody cares to lend zest to the market by making reports of sales or pronouncing business as being good. The great majority of the dealers in the market are now interested in preventing prices from being quoted high in public. Privately, every one holding good tobaccos would like to see the figures for such stock gallop upward. There is, and there will be, for a great while to come no difficulty in disposing of anything good at, we may venture to say, extravagant profits, and the only care that the manufacturer has to render such goods

The '83 crop in general is of such an uncertain growth and yield that an investment at high figures is extremely risky. If there existed a general scarcity of tobacco, the condition of the new crop would not play such an important role, and an investment even at high figures would be correspondingly safe. But the country is flooded with poor tobaccos, and only in fine stock is there a scarcity. This makes the purchases of the new crop by packers not alone a most hazardous undertaking, but also one unusually difficult to accomplish. The grower wants the highest prices profited, and as most every grower considers his tobacco the best, with just as much as anybody, views, the great difference in prices existing in the market for good and poor tobaccos has for him no argument that power in order to influence him in his demands. Therefore, the general desire in our market to keep buyers from packing and not to divulge prices to, from a commercial standpoint, to be called very proper.

As far as sold, business is certain and without resorting to colossal figures, and, upon the transactions, the sales for the four days of the week were quite numerous, and for the reasons named our quotations to-day do not vary from those of last week. Pennsylvania of the '82 crop again holds the lead, by reason, possibly, of the unmistakable "fearlessness of woman in the field." She was the handsomest, because there wasn't another woman present. The great cry in the market is for Havana seed, but it is not the thing, as everybody goes for the next best thing, viz., '82 Pennsylvania. And even the best of it is not what the manufacturers really desire, but, under the circumstances, they have to take it, pay for it, and, if necessary, recover permission from the seller to make any faces or cruise.

The year 1884 will present a hard one to the manufacturer of fine cigars. He will experience the greatest difficulty in obtaining seed leaf to suit his purposes, and the prices will surely conflict with those he has been in the habit of realizing in the cost of his material for a like-sized cigar. Higher values will doubtless rule at about $2 per pound during the year. As matters stand now, manufacturers will be compelled to raise their prices for fine cigars. For manufacturers of low grade cigars the lead is their offers, and will continue to offer, at no end of accommodation.

[New York Tobacco Leaf.]

NEW YORK, Feb. 22nd.—*Seed Leaf*.—We note a better general demand the past week, the sales reaching 3,500 bales. At the exchange the sales were 525 bs, mostly for future delivery.

Virginia Leaf.—Very little doing the past week, a few lots of bright cutters at 22½c, and a lot of export leaf at 10c, comprising the reported sales

Seed Leaf.—There have been four hour business days this week. Friday being a holiday, yet 1,200 cases of seed leaf are reported sold, which quantity shows a fair demand. We anticipate more activity from this time forward, provided the weather is such as to admit of buyers getting into the market. For a fortnight or more past alternating rain, ice, fog, snow and slush to coldness have made trade an undertaking to be ventured upon only under stress of necessity.

Spanish.—[0] Havana bales 500 bales were sold at from 80c to $1 15

Plug.—There was a fair inquiry for plug tobacco, and sales embraced all styles. The exports to Thursday evening amounted to 142,711 pounds

Smoking.—A good inquiry for all popular brands is announced

Cuttes.—The cigar market has been less active than of late, owing to recent strikes

Trade Failures.

There were 218 failures in the United States reported to *Bradstreet's* during the week ending February 22nd, which contained a holiday. The number was 25 less than the preceding week, 14 more than the corresponding week in 1883, and 83 more than the same week of 1882. About 83 per cent were those of traders whose capital was less than $5,000. Compared with the previous week the middle states had 10, a decrease of 17; New England states 26, a decrease of 8, southern states 51, an increase of 6; western states 82, a decrease of 1, Pacific coast states and territories 19, a decrease of 3, Canada and the provinces 33, a decrease of 35. Among the failures reported were McGinnis Brothers & Fearing bankers and brokers, New York city; United states Smelting Company, Philadelphia; Hall & Curry, banker and manufacturer, and Delano & Hickok, dry goods, Augusta, Ga. In the principal trades they were as follows: General stores 60, grocers 53, shoes 16, liquors 12, manufacturers 10, bakers 9, coal contractors 9, clothing 9, dry goods 9, hardware and agricultural implements 9, furniture 8, grain, flour and millers 7, fancy goods, jewelry 6, tobacco and cigars 5, produce and provisions 5, stationers, printers, etc., 5, drugs 5, hotels and restaurants 4, bankers and brokers 3, carriages 2, coal 2, crockery 2 lumber 2, musical instruments 2, butchers 2, .

Spirit of the New York Markets

The advance of the season naturally brings some increase in general business, but the weakness and other long-standing adverse influences serve to prevent anything like activity in the general markets. The damages to the late frosts are much less than had been expected, and the prospects are much confirmed; some of the machinery and furnaces which had been idle for some time past have resumed operations; the failures among business men are increasing, and the slight diminution in the number of new ones of the failures is indicative of an increased demand for money. These are favorable indications, though it would be too much to expect that the business of the whole country should rise suddenly from the state of extreme and protracted depression. The exports of leading productions of the country show no improvement, and gold is being shipped abroad. It is too early yet to conjecture either its probable volume, its effect on prices or the condition of trade in this country. There is nothing in the fact to excite apprehension, much less alarm.—*N. Y. Shipping List*.

Freights and Charters.

The condition of the ship market may be summed up as slow. Small vessels from Cork, U. K., command 35s and larger ones only 30s.

The engagements for the week have been as follows: British ship Stockbridge, 2018 tons, wheat to Cork, U. K., Havre or Antwerp, 30s; three-f. p. ships, 34s less. British bark Isabella, 803 tons, wheat to Cork, U. K., 35s. Hawaiian bark Lily Grace, 579 tons, lumber from Puget Sound to west coast South America, owners account. Ship L. Phelps, 1,838 tons, coal from Seattle to this port. Bark Elsinore, 658 tons, coal from Departure Bay to Honolulu—and not as before reported

The *New England Grocer* contends that reporters of the daily press should not be admitted to the meetings of trade associations. It is well taken, brother Dowse. We have long thus argued, trade matters are not intended for the masses in the sense they are usually given by reporters of daily papers. To our best recollection, we have not seen a truthful account given, or one that does credit to the trades spoken of, by any daily within the past two years. The tendency is to garble it and make it as sensational as possible, in order that it may be more readily digested by the people at large, and in this manner it creates bad impressions and injures the good purposes of the trade associations. - *Philadelphia Grocer.*

Many a business man has, by assiduous neglect of his duties, inaugurated a "early closing movement," with the help of the sheriff.

Meat Market.

Beef is a shade lower with light supply. Mutton is unchanged, being in fair supply, with improvement in the quality of offerings. Hogs are firm, with very few of good quality arriving.

Following are rates for whole carcasses from slaughterers to dealers:

BEEF—First quality, 9½@10½c; second quality, 7½ to 8c; third quality, 6½@7¼c ℔ lb.

VEAL—Large Calves, 7@9c; small ones, 7c to 11c ℔ lb.

MUTTON — Wethers are quotable at 7@7½, and Ewes at 6@7c ℔ lb.

LAMB—Spring is quotable at 10@15c ℔ lb.

PORK—Live Hogs, 7@7½c for hard grain hogs on foot: dressed do 10@10½ ℔ lb.

The British Grain Market.

London March 3d.—The *Mark Lane Express*, in its review of the British grain trade for the week, says: There exists material from which a very large wheat crop is possible. Fine native wheat firm; inferior white and red, weaker. Flour inactive. Foreign wheat unimproved. Small cargoes off coast declined 9d. Two cargoes No 1 California have gone to the Continent with extra freight at 39s 6d. Eleven cargoes arrived, four sold and four withdrawn, including one of No. 1 California and one of No. 2 do. Sales of English wheat during the week, 61,854 quarters at 37s 3d per quarter, against 45,039 quarters at 42s 8d the corresponding week last year.

THE WOOL MARKET.

The local market has been very quiet during the past week

ADULTERATIONS IN GROCERIES.

What a Wholesale Grocer says About Them.—Some New Adulterations.

[New England Grocer]

"Any new deceptions or adulterations to report in your line?" was the question put to a wholesale dealer in groceries, Saturday, by a *Globe* reporter.

"Well, yes; there are a few that I guess a good many consumers don't know about, though they are pretty generally known among the trade."

"For instance?" said the questioner.

"In the first place, take canned vegetables. Pumpkin, plain or mixed with a very little squash, is called squash, and few consumers can tell the difference. Green Lima beans are a great delicacy, and very different from dried California beans, soaked in the can, which some packers sell for them. We know them as 'soaks,' but have to get them to satisfy the demand for a cheap article. There is a good deal of deception in string beans. They are nice when canned green, but some packers lay them away in brine in the fall, when they are exceedingly cheap, and pack them away as the opportunity offers. A packer will sometimes put only a single tomato in a can and fill it up with the juice of good tomatoes, making a very wishy-washy preparation. Cheap peaches, what we call 'seconds,' are put in water, instead of syrup. Yellow and almost unmerchantable peas are frequently labelled 'Standard Marrowfats,' which they do not at all resemble."

"How about fish?"

"There is as much deception in that line as in any other. Nearly everybody knows that small herrings are put up for sardines; but a great many do not know that large ones are put up for mackerel. The great scarcity of mackerel in '82 started this deception, and since then packers have been putting up anything from the Nova Scotia frozen herring to those found in this bay, and labelling them mackerel. They contain a good many more bones than mackerel, are darker and in every way inferior. This deception bids fair to ruin the canned mackerel trade altogether. Several different kinds of fish, too, come to us from California, labelled salmon. I do not know what they are, but they are decidedly inferior to the genuine article. There is great deception, too, in jellies and preserves. A certain grade of so-called raspberry jam is, to my certain knowledge, composed of apple jelly, glucose and tomato seeds, and every known variety of jelly is made from apples, glucose and flavoring extracts. Many packers have two brands of everything they put up, 'standards' and 'seconds,' on the standards he puts his own name, but on the seconds he puts a fictitious one. Consumers who want a reliable article would do well to confine themselves to standards. It is the history of all adulteration: consumers cheat themselves in their desire to get things so cheap. There is really no economy in buying cheap goods in my line, and I question if there is in any other."

The new year has opened with a much better feeling prevailing in dry goods circles. A good many buyers are in the market, and takings of miscellaneous assortments have been of very fair proportions. There is nothing new in the woolen market. Business continues fair on old orders, but no new business worthy of mention is reported. The clothing market shows some improvement, and dealers are hopeful of a good business this year.—*Bradstreet's.*

Taking Account of Stock.

Once in a great while, a merchant is found who lacks the courage to take an inventory, fearing that the revelation will prove anything but pleasant. This, it is needless to say, is a sort of moral weakness which it is not creditable to possess and which should be sternly overcome. If one has reasons to fear that there is something wrong in his business, the sooner he can locate the cause the better, but if a remedy be needed, the earlier it is applied the sooner will be the recovery. Thousands of business men drift through life, not knowing whether they are making substential progress or not. Some awake to find that they have been going gradually but surely down hill, while they were thinking that they were going the other way. If one takes a frequent inventory of his business, he is likely to be informed as to his true financial condition all the time. It cannot well be otherwise, unless fraud or deception is practiced upon him. Besides this, the taking account of stock necessitates a frequent, thorough overhauling of the latter. It often happens that certain lines of goods accumulate faster than the demand is aware. Sometimes quantities of goods get stowed away out of the owner's sight, and these are brought to light when stock-taking occurs. In the case of a hardware merchant, he may find concealed in some out-of-the-way place a few gross of knives or a lot of butts or screws, or some equally valuable article which he supposed had been disposed of. Finding them, he places them in their proper receptacle, and in time sells them in the regular order of business. Had there been no annual invoicing, he would not, perhaps, have discovered these articles for years.—*Exchange.*

Important to Consignees.

The following order will be strictly enforced at the Custom House from this date: In order to do away with certain irregularities which have been in some cases connected with the entries of imported merchandise and for the purpose of fixing the responsibility for the entry on the proper person, it is hereby prescribed that agents and attorneys (unless they are the consignees, as such mentioned in the bill of lading), shall not be permitted to make entry of merchandise in the name of their principal, unless their principal is absent from the limits of the port, or, sick, and then only upon their taking and filing an affidavit at the Custom House to the effect that the principal is absent from the port, or is so sick as to be unable to be personally present at the Custom House. When entry is allowed on such affidavit, the affidavit will be annexed to the bond for the production of the required oath, and form part of the records of the case. No entry of imported merchandise by the agent or attorney of the owner or consignee will be permitted, except under the conditions above set forth, unless in cases where the officer receiving the entry has personal knowledge of the absence from the port or the sickness of such owner or consignee, in which case an endorsement to that effect shall be made on the entry by the officer, which shall take the place of the affidavit before referred to.—*Commercial News and Shipping List.*

Lawyers are always politicians and often Legislators, but seldom Statesmen.

Occasionally a contemporary remarks, "It is needless to say," and then proceeds to say the needless thing. Why do they take and go and do the needless writing?

CULLINGS.

If a woman were to change her sex, what would she become? A he-then.

"The canning interest"—from seven to ten per cent, according to security and the "gall" of the lender.

When a lady dentist begins to yank irresolutely on a molar you begin to think that a fairy may become a fury.

One does not care so much to know who wrote "The Bread-winners" as to know who will bake the bread after it is won.

The people of Spain are to poor to educate their children, but they manage to find $80,000,000 a year to spend on tobacco.

An agricultural paper exhorts farmers, "Don't forget the Cows." Why don't it give this advice to farmers who ship milk and the men who peddle it?

The word "esteemed," as often used by the press, reminds us of a notorious liar who rushed up and said to another liar: "My esteemed liar, you are a scoundrel."

"I don't like to have my husband chew tobacco," remarked a young married lady, "but I put up with it, for the tin foil is just too handy for anything in doing up my front crimps."

"Why don't you get up as early as you used to a few days ago?" angrily asked a wife of her lazy husband. "Because, my dear, it's sleep year," he grinned as he turned over for an other snooze.

Patient, to doctor who was shaking his head like Burleigh—' Is there any thing wrong, doctor?" "My friend, I really can not say till after the autopsy."

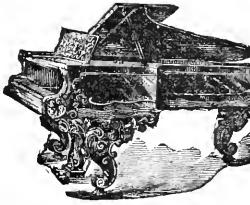
CALIFORNIA Piano Manufacturing Co.

INCORPORATED UNDER THE LAWS OF CALIFORNIA, MARCH 8, 1880

Manufacturers of Strictly First Class

UPRIGHT PIANOS.

Factory, 431 and 433 Fourth St., corner of Bryant. Old Kimball Carriage Factory.



Salesroom, 30 New Montgomery St., under Palace Hotel.

Our instruments possess the very latest improvements, and in TONE, TOUCH and DURABILITY are absolutely without a superior.

EVERY PIANO IS FULLY WARRANTED FOR 5 YEARS.

Our factory is the most complete on the Pacific Coast, possesses every kind of machinery, steam, dry houses, etc., in fact is as complete in all its appointments as any Eastern establishment, producing Pianos of uniform excellence and durability. An examination of our Piano-Fortes is earnestly solicited. Catalogues and full description mailed on application.

A TALK WITH MISS AUSTIN.

STEADY, INDUSTRIOUS LABORERS NEEDED.

We have just returned from a flying trip to Fresno, in response to pressing invitations, first accepted two years ago and too often deferred or postponed. As it is not unlikely that we may frequently visit this most promising wine and raisin district at other seasons of the year, we do not regret having seen it once under conditions that seldom occur. One of the special objects of our visit at the present time was to taste the wines of the vintage of '83 in the cellars of the makers, and decide for ourselves whether the very general opinion that good dry white and red wines could not be made in this county was correct or not. That there has been amongst the wine makers of other counties and among so-called experts a prejudice against Fresno county, cannot be denied; and there is much force in the general complaint of the Fresno vineyard owners, that they have been condemned as a county partly through the mistakes in the former management of the only vineyard that has been in bearing more than a season or two, and before the newly-planted vines of the finer varieties had had time to yield any fruit. Moreover, that portion of the county around Fresno town has not been visited by the Chief Executive Viticultural Officer, at least, not during the past three years, nor by any member of the State Viticultural Commission; not even by Mr. George West, in whose district it lies, though he is interested in a young but large vineyard at the extreme northern boundary of Fresno county. Without the better knowledge that comes from examining the soil, inspecting the vines as they are growing and comparing the wines to be found in the Fresno cellars, they have been judged, and the decree has gone forth that good port, sherry, sweet wines and brandy they may produce, but good, dry red and white wines—no! We have seen enough to satisfy ourselves, without claiming to be an expert, that this decree is about as sound as the old woman's declaration to her husband—"They can't put you in jail; they can't do it, I say." "Shut up—ain't I in jail now?" It is no use saying Fresno cannot make good dry and red wine, when it has done it. If any one doubts it let him go to the Fresno cellars and taste their wine, or, if he will not take that trouble, he can call at this office and the writer will show him samples brought from there. We do not mean that every lot of wine in Fresno is of high character; neither is every lot of wine in Napa, Sonoma or Santa Clara, but we found no wine that was not merchantable and much that surprised us by its excellence. A fortnight ago (Page 335) we quoted the Fresno *Expositor* regarding some wine made from Carignan and Grenache grapes, by Mr. Denicke, at the Henrietta Vineyard, adding to it what Mr. West personally told us, that is, that it was the best young wine he had ever tasted grown in Stockton or south of it. We have a small sample of this wine and shall be glad to show it to any doubting Thomas who knows good wine from bad. What has been done this year on a small scale will be done next year on a larger, and two or three years hence on a grand scale. The cool judgment of dealers, who pay their coin and would suffer financially if they err, should go for something, and when Zinfandel like Barton's has sold naked at the cellar (though the freight per carload to San Francisco is $56 and for return empties over $40) at 26 cents, to a San Francisco wine dealer, and that dealer has refused an offer for several carloads at a large advance, it cannot be possible that the wine is not good. But enough of this subject at present, we will return to it in noticing the contents of some of the cellars.

GENERAL REMARKS.

The population of the town of Fresno, not yet incorporated, has doubled within the last four years and the county at large has at least kept pace with the town. The town now contains 3,500 inhabitants and many new buildings are going up on the unoccupied lots in the center as well as in the outskirts of the town as laid out. The progress of this county in wealth may be judged from the assessment roll. The total, real and personal, in 1882, $8,000,000, in 1883 was $12,000,000; the total for 1884 is not completed, but as regards the town it is known that the ratio of increase will be not less than that of last year; say 50 per cent. and with the aid of the colonies it is not unlikely that the total real and personal for the county will reach somewhere between $16,000,000 and $18,000,000. In the last two years Fresno has suffered twice severely from fire and on both sites the wood buildings destroyed have been replaced with two-story brick. The new hotel, the Grand Central, is a three story brick. This hotel has 87 well-furnished bed-rooms and has been full and over full from its opening to the present time, always requiring some and often as many as thirty outside rooms. It furnishes a good table and is ably managed by our old friend Thomas H. Reynolds, formerly of San Francisco and latterly Assistant Secretary of State. The Ogle House, immediately opposite the depot, is a smaller establishment, but keeps well up with the requirements of the better class of travel. Of cheaper hotels and lodging houses there are several. There are also a number of restaurants of all grades. The traveler, whatever his means, need not fear that he will not find suitable accommodations. There are general stores, as well as those dealing in specialties, in great number, and of the former, two we noticed are very large establishments, carrying immense stocks of implements, hardware, dry goods and groceries, namely, Kutner & Goldstein and Louis Einstein & Co. Donahoo, Beasley & Co. have also a large store devoted to the hardware business. Fresno has, of course, its planing mill, and the Puget Sound Lumber Company have a large depot contiguous to the railroad station.

One of the events of the week has been the opening of a new theatre, a handsome brick building with a good stage, four sets deep, four proscenium boxes, parquette and dress circle, and capable of seating 1,600 people. It was erected by District Attorney W. D. Grady, a wealthy and enterprising lawyer, who made Fresno his home several years ago.

Speaking of new enterprises, like other towns and counties, Fresno has its jealous and anti-progressive clique. We mentioned two or three weeks ago, Mr. Robert Barton's project for building a short branch railroad to connect his winery, three miles distant, with the main line of the S. P. R. R., so that he could load his wine at the cellar and have the same conveniences as Messrs. Groezinger, Thoman and Krug have in Napa Valley. Mr. Eggers, whose vineyard is some two or three miles beyond Mr. Barton's, proposed to continue the line to his cellars, and there was every probability that the road in the not distant future

could be extended to the foothills, and become the increased transportation through a thriving district, a benefit to the foothill settlers, and make the lumber of the forests available for the rapidly-growing colonies lying west of Fresno town. The petition was for a franchise to run through one of the streets, the only available one, lying south of the settled portion of Fresno, and on the protest of two or three jealous or greedy property owners, the Board of Supervisors refused to grant the petition. The people who have interests along the line of the proposed road and those merchants and colonists and others who will benefit by its traffic, ought to make the present supervisors hear through their deaf ears, or elect a Board that understand and appreciate the projects that build up a country.

There are two commercial banks in the town, the Fresno Bank and the Fresno County Bank; the latter is quite a recent incorporation. The capital of each, we learned, was $100,000, with $50,000 paid up. There is also a savings bank, where the provident laborer is invited to invest his savings, however small, with a certainty of security and the gain of a moderate interest. It must be remembered that Fresno is yet but a young town, the child of the railroad, and that, the great non-resident land owners excepted, few of those who built up Fresno to its present eminence had any capital when they settled there.

THE FRESNO FRUIT PACKING CO.

The Fresno Fruit Packing Company was established in 1882. The present President of the Company is Mr. Beasley, of the firm of Donohoo, Beasley & Co., merchants of Fresno. The manager is Mr. U. J. Stevens, formerly of the San Jose Packing Company. We desired to interview the President, but he was absent in San Francisco. The buildings which we inspected are well-arranged and commodious. From Mr. Stevens we learned that the present buildings have a capacity for packing 10,000 cases of fruit annually, but have steam and power enough for 20,000 cases, and can easily at light expense be so enlarged. In 1882 the pack was 3,500 cases, and in 1883, 3,000 cases. The fruits they have packed consist chiefly of apricots, peaches, German prunes, Bartlett pears and grapes. Mr. Stevens assured us that the Fresno peaches were the largest he had ever, in his long experience with Santa Clara fruits, handled. The apricots offered were remarkable for their excellence in every respect. Indeed, everywhere we heard this statement about Fresno apricots confirmed. The Bartlett pears were also excellent. The grapes are large, and from another source we learned that the concern putting up canned grapes in New York for Thurber & Co. used Fresno fruit to fill the order. Mr. Stevens said, and this is again corroborated by others not directly interested in the growth of fruits, that the Fresno nectarines beat the world, in other words, it is the only locality in California which has yet produced a first-class nectarine, in any quantity. The nectarines grown in the colonies and other fruit orchards are extraordinary. The rapid development of the fruit interest in several colonies, and also in conjunction with the vineyards of Messrs. Barton, Eggers & Co. and others, affords a wide scope for the Fresno Fruit Packing Company and more establishments, yet the fact remains that the Fresno Company needs more capital and needs it badly. We have heard of no opportunity for the investment of a moderate capital superior to that offered by the Fresno Fruit Packing Company. Anyone who desires can purchase a controlling interest for a moderate sum, not exceeding $10,000, probably at $8,000 or a little under, but the better way would probably be for an investor to get the stockholders to double the capital stock and buy the new issue of shares and enough of the present issue to give him the control. It only needs money and business skill to make this concern a large and highly remunerative undertaking.

SANITARY NOTES.

We were at some pains to get some information regarding the mortality and general sanitary condition of the district in and around Fresno. We succeeded at length in interviewing Dr. Rowell on these topics. We learned from him that the mortality of this part of the county is very low; the percentage of deaths does not exceed 17 in the thousand, and is probably a little less. From the neglect of the physicians in giving certificates of death for registration, students of vital statistics have to depend principally on the undertakers for information. The appearance of the cemeteries in the vicinity of Fresno seems to confirm Dr. Rowell's opinion that the death rate is unusually low. The county is singularly free from those pulmonary complaints, phthisis, bronchial difficulties and catarrh, which swell the mortuary reports of the bay counties. Zymotic diseases are more or less prevalent, but they can generally be traced to local causes, such as drinking the water of the irrigating ditches, the water of shallow surface wells in the immediate vicinity of cesspools, to sleeping in chambers of houses built on the surface and without sufficient space for ventilation between the floors and the soil, and to allowing decaying animal and vegetable matter to accumulate around the houses. As in all towns located in warm climates, strict cleanliness and good drainage are an absolute necessity. Unless more attention is paid to sanitary affairs in the future, the health of the inhabitants must of course suffer. Diphtheria, that scourge of infancy and youth and terror of parents, seldom appears in a malignant form in the valley, but, strange to say, on the face of the foothills all along the valley, at about 3,000 feet elevation above the sea, it is frequently malignant. In one case our friend Dr. Rowell told us of, where three children out of six died in one house, it was clearly traceable, in his opinion, to a dead animal being allowed to rot near the spring which supplied the drinking water used by the family. In another case, where the family drew their water for domestic consumption from a tank supplied from a stream which carried along a great deal of vegetable matter, which was deposited in the tank, the children let out the water and got in to clean it out—the result was diphtheria and death. These facts should be interesting to intending settlers, for, from all we could learn, Fresno, by adherence to the commonest hygiene rules, is as healthy as any part of the world. "But," says some reader, "how about chills and fever?" If people are foolish enough, wasteful enough, ignorant enough to irrigate vines and fruit trees (citrus excepted, which are not much grown in Fresno), when the natural moisture rises to within eight feet of the surface, or to allow water to stand stagnant under the hot sun, in ditches they are not using, they must expect to suffer from malarial diseases. From the same causes they would suffer from similar diseases in any of the semi-tropic or warmer temperate countries of the world. Unnecessary and injurious summer irrigation, now abandoned, has had much to do with creating a prejudice against Fresno. The running streams in the ditches do not contribute to disease, unless contiguous to a low-built residence.

FREIGHTS.

The wine makers of Fresno as well as the raisin makers and wheat growers, and we are not speaking of rabid anti-corporation, anti-railroad communists, complain and with some justice of the high freight charges from Fresno to this city. On wine it is $56 a car-load and we believe $48 a car-load on the return empties, and on raisins in like proportion. We were also told that in shipping East the local rate from Stockton to Fresno was added, but this we do not vouch for. We hoped to get from the local agent of the S. P. R. R. the actual rates, but were prevented meeting him.

The company we understand has said that when the production of wine and raisins at Fresno reaches certain figures they will make a handsome reduction in rates. We would suggest that if some of the contemplated reduction was made now, while the vineyard men and colonists are struggling for life, it would materially help to hasten the day when the Fresno freight depot will be doing an enormous business. Already, it should be said, Fresno is the most important railroad point between Stockton and Los Angeles and the coin receipts average $800 daily.

SOMETHING ABOUT THE COUNTY.

San Bernardino is the largest county in the State, but Fresno ranks third and contains 5,600,000 acres or 8750 square miles of land, of which three fifths is located in the valley and two-fifths in the Sierra mountains and on their slopes. It lies between the 36th and 37th parallel of latitude and is nearly in the center of the State. Its average breadth is over sixty-five miles and its length from the North-east to the South-west 120 miles. The mountainous parts of Fresno comprise some of the finest pine lumber in the State amongst which are many groves of the *sequoia gigantea* or "big trees," also of oak and some stunted tamarack. Besides the valley land proper, there is about 300,000 acres of low marshy or swamp land. About one-third of the valley land of Fresno lies west of these marshes. With the exception of these marsh lands, much of which capital and labor may reclaim, nearly every acre of the main valley and many of the smaller valleys in the mountains can be profitably cultivated. The exception is some lands in which alkali abounds, but they are small in area, indeed Fresno is freer from alkali than most California counties. There is a good deal of mineral wealth in the eastern or mountainous portion, the famous new Idria Quicksilver mine being located within its borders. Besides quartz lodes, petroleum has been discovered, but there has not been work enough done to prove the value of the deposits.

Lux & Miller, the great cattle dealers, have one of their largest farms all enclosed within a strong fence comprising many square miles, on the west side of the San Joaquin river and in this county. Their lands are irrigated by a canal brought from the upper San Joaquin. Besides that and the Kings river canal, there are a number of smaller canals on the East side, two of which water the town of Fresno, and with others extend to the colony lands. The Bank of California came into possession of some immense tracts of land in this county a few years ago through making advances, and looked upon them as bad bargains. Times have changed, however, and they have sold sufficient and the value of what they still own has so enhanced, that these Fresno lands more than anything else have raised the selling price of California Bank shares to their present high figures.

The general character of the soil varies in different parts of the county and sometimes in the same section. Near the foothills of the south, there are miles upon miles of red clay mixed with quartz like the Malaga grape lands of Europe. Strips of these red lands run down the plains to Fresno town and even into Washington colony. Then there are what are known as the "ashy lands," the best large fruit soil in California. The great bulk of the plains of the Eastern slope (the fall towards the south-west is about six feet to the mile except near the foot-hills, where it is ten) are composed of a soft, sandy loam, a mixture of clay, sand and decayed animal and vegetable matter, impregnated with iron and mineral salts. In places adobe prevails.

In former times while water could be had by sinking near the streams and sloughs at eight to ten feet of the surface, in the higher portions of the plains it could not be found nearer than eighty. The numerous canals and free irrigation have raised the water level all over the cultivated districts, and even on the higher portions of the plains the natural moisture in summer is now within eight to twelve feet of the surface. The general planting of shade trees and fruit orchards seems to have checked too rapid evaporation, as well as moderated the dry north winds, and the need of irrigation, even in winter, for cultivation of matured fruits and vines is becoming less and less as the years roll on. The dry plains are disappearing as nature, helped by man's labor and skill, spreads her carpet of green grasses and luxuriant foliage.

THE FRESNO COLONIES.

The Central Colony, a little southwest of Fresno town, is the oldest of the colonies, and was established about seven years ago. For some three years it seemed to hang fire, but during the past four years has filled up fast. Indeed, most of the present occupants are four year residents and most, therefore, who were at one time comparatively embarrassed, are now out of debt and accumulating money.

The lands in Central Colony are all occupied, and, as a rule, substantially and even elegantly improved. The fruit trees and raisin vines are bearing. Their shade trees, avenues and cypress hedges have attained a size that gives the colony the look of an older place. There are about 100 families in the Central Colony.

In Washington Colony, which was improved about the time that the Central took its second start, there are nearly seventy families in residence. In Fresno Colony there are forty families. In the Scandinavian Colony there are forty houses. In the Temperance Colony, generally known as Church's Colony, Mr. Church, of Fresno, being the owner of the "Church" and other irrigating ditches, there are twenty-five families. In the Villa Homestead Colony there are twenty houses. In the Nevada Colony, 15; in the Easterby, ten houses. The last mentioned colonies are younger and do not make the show that

the Central, Washington, Fresno and Scandinavian do, but this season is likely to prove one of rapid growth, and though they may not catch up with their older neighbors for some years, the settlers will soon find themselves amply remunerated for their privations and labor of the earlier days. The colonies above named contain now 320 houses, or between 1,200 and 1,500 inhabitants, and every month sees accessions to their number.

WEST PARK COLONY.

West of Central Colony, and southwest, five miles distant, from the town, is a new colony formed only last autumn. The Bank of California has several thousand acres in this vicinity, known as the Church & Marks tract. John S. Dore purchased a section of this land last October and has already sold it. There were between forty and fifty purchasers, all men with families, and several have already moved onto the land. Five houses are already up; one is owned by a Canadian, the other residents, and, indeed, all the purchasers, with the exception named, are Americans. The first purchase was sold so rapidly, mostly in twenty-acre lots, that Mr. Dore, by arrangement with the Bank, is enlarging his operations. This land is watered by the Fresno Irrigation Company's, Church's Mill and three other ditches. Ten acres have been set apart for a public park and school lot. A telephone system, connecting with Fresno, is contemplated and will be shortly built. In short, it is intended by the promoter, Mr. Dore, to make this a model colony. The lands are offered at the very moderate price of $40 an acre, including the water right. The latter, however, does not relieve the settler from a small annual payment for the maintenance of the ditch. This is, however, only $12.50 per year for twenty acres, or just in proportion to what large vineyards, comprising a whole section, pay. Some of the twenty-acre lots in this colony have already been planted, this spring, with avenue, fruit trees and vines. The remainder of the land has been sown to barley and alfalfa. It is the determination of the purchasers to get all the advantage out of the present moist season they can. Barley sells well in Fresno, better, in proportion, than wheat, as it generally fetches San Francisco prices and sometimes even more. The cause for this is the great demand for feed, owing to the enormous number of animals employed in preparing and cultivating the orchards and vineyards.

THE WITTRAM COLONY.

Mr. Wittram, of 230 Montgomery Street, San Francisco, recently, caught the Fresno colony fever badly, and imparted the contagion to his immediate friends; consequently they purchased, jointly, a section and one-half, eight miles south of Fresno, and three miles west of Fowler, on what is known as the Kirby tract. They had it surveyed and laid out by Mr. Shepherd, engineer, and under the superintendence of Mr. Henderson, formerly of the Golden Gate Park, and later of Mr. Flood's grounds at Menlo Park. The head of this undertaking is Mr. Wittram, after whom the colony is named and who forms a sort of executive committee of one. The tract is watered by the Kingsburg and Centreville canals, and has already been checked. Sixty horses, eleven yoke of oxen and a force of twenty-four men are employed in plowing and preparing the ground. A row of eucalyptus has been planted all around the property. The cross avenues have been laid off and planted with magnolias, oleanders, black walnut and other ornamental shade trees. A fine well of drinking water has been obtained in the centre of the colony, and this necessity of health will be conveyed by pipes to every house, from the central pumps. A central gas works for the use of the residents is also contemplated; also a telephonic system. When the fruit trees and vines bear, a winery and a Wheeler cannery will follow if there is any difficulty in disposing of the Colonial products at remunerative rates. This year the owners will put in about 800 acres of barley, and next year the fruit trees and vines will be planted, each owner deciding for himself what varieties he wishes the company to plant on his ground. The only restraint on the individual owners is the location of their residences, so as to preserve a certain uniformity. It should be said that the fifteen gentlemen who own this tract are all friends, and their families, without exception, are on terms of the closest intimacy. No owner in this colony, under the conditions of his deed, can sell to an outsider without first giving the company the option of purchasing.

A TALK WITH MISS AUSTIN.

While in Central Colony we took the opportunity of calling upon Miss Austin, the well known viticulturist and raisin maker, and gained from this lady much valuable information. Miss Austin is no believer in excessive or summer irrigation for vines. With natural moisture at eight feet below the surface, the latter, is in her opinion, not only unnecessary but injurious. The grapes, when summer irrigation is practised, do not contain a sufficient proportion of saccharine. Miss Austin is, of course, interested in the tariff question now before Congress, and has joined in the petition for advancing the custom duties on foreign raisins to three cents a pound. Such a reduction as Morrison contemplates, namely, to one cent a pound, would be ruinous to the raisin growing interests of California, especially to those colonists who, on the strength of a protective law, have recently invested their all in the business and have not completed their final payments for their land. The rates paid here for labor are so much higher than in Malaga and Denia, and labor forms so large a portion of the cost of making raisins, that it is impossible to compete with the Mediterranean on anything near equal terms. Speaking of the labor question brought up the Chinese Restriction Act, and we regretted to find that Miss Austin was not on the popular side. This lady is not alone in the view that we need more Chinese if our vineyards and orchards are to be profitable. We sought to show her that we have not yet exhausted or even begun to use our opportunities for bringing docile, industrious and sober white laborers to California. Miss Austin related some instances of the difficulty she had with labor, and also the absurd pretensions of gentility which families, without any of the conveniences of life, and a scanty supply of the necessities, will put on, when they have been a few months on the soil of California,

Neither Miss Austin nor her most experienced neighbors will irrigate at all this season. This lady is satisfied with a yield of six tons of grapes, giving her two tons of good raisins to the acre, and prefers it to twelve tons of grapes and four tons of poor raisins. By selling her raisins early this season, she had avoided the break in prices and got, as usual, good returns. Miss Austin prides herself not only on the quality of her raisins, but on the superiority of her packing, and says that while the Riverside raisins are good, they are so badly packed that they cannot be sold for top prices. Miss Austin can herself pack six boxes of layers a day, but cannot keep it up as her Chinamen can—and says that when the Riverside Superintendent told her that their men packed twenty boxes a day, she thought she had discovered the cause of their raisins selling so badly. Neither does Miss Austin believe in a joint packing house, for however well intentioned the Superintendent may be, there will not be as much pains taken in packing as when it is done under the eye of the owner.

Miss Austin believes in the Sultana raisin, if grown under the same conditions as she follows in raising Muscatels; that, is not forcing the crop by excessive water.

Speaking of Miss Emily Faithful brought up the question of what prospects single women had of establishing themselves in these colonies. "What capital, Miss Austin, we asked, should an energetic woman, with some business tact, have to enable her to make a comfortable living on ten acres of land, such as yours?" "I do not recommend their taking up so small a lot, they should take up twenty acres, and should have $5,000. Of course, a man who could earn something by his labor could start with less, and some have succeeded by their industry and economy who had only fifty cents when they reached the town four or five years ago. Some ladies would succeed with four thousand dollars, or even with three, but it would be by hard work and undergoing many privations and, probably, at the risk of their health. In answer to a question if there was nothing that could bring in money while the vines and fruit trees were growing, Miss Austin said: "Yes; small fruits pay and so do poultry, and anyone who had a taste for the latter could eke out a moderate income from them until her vines and trees came into bearing." We found in Miss Austin an excellent example of the educated and practical New England woman, quite capable of holding her own in the competition of life, taking pride, no doubt, in her successful independence and entertaining a feeling of pity for those helpless sisters who know nothing but to lean on some man for maintenance. We left Miss Austin's home with an idea that there are hundreds of educated women in the world who would find more comfort and happiness by following Miss Austin's example, than in any other course they could pursue.

FRESNO VINEYARDS.

Like the postscript to a lady's letter, we have in this article left the most important business to the last. It was to examine the vineyards, as well as they could be seen at this season of the year, that we hurried off to Fresno on Friday, and the weather made even that almost impossible. We could only take a general view. But, as the storm did not penetrate the cellars, we could look at their wines and form some idea of what they had done and what they could do, in making wine. We went to Fresno with less bias than we entertained a year ago, because we had already tasted some of the wines made in this district at the last vintage, and knew that our better impressions of these products were justified by the favorable judgment of two or three men who had made wine a life study. The wine makers of Fresno were pleased to say that the MERCHANT had not joined in the very general outcry against their wines, but had always treated them with consideration and fairness, though not volunteering any very pronounced opinions on the merits of their productions. A new wine district, that in 1883 produced 360,000 gallons of wine and 15,000 gallons of brandy, and two years hence will produce 1,500,000 gallons of wine and 50,000 gallons of brandy, and continue from present plantings to increase rapidly for three or four years more, is deserving of more than a passing notice.

THE FRESNO VINEYARD COMPANY.

One of the first cellars we visited was that of the Fresno Vineyard Company, owned chiefly by Messrs. L. P. Drexler, Joseph Brandenstein and Lachman & Jacobi. This vineyard consists of 400 acres. The product last year was 15,000 gallons of Zinfandel, 8,000 of Burger, 8,000 of Riesling, 3,500 of Gutedel or Chasselas, 4,000 of Blaue Elbe, 3,000 of Malaga, 5,000 of Muscat and 9,000 of port, making a total of 55,000 gallons, besides brandy. The product of this vineyard goes to the firm of Lachman & Jacobi. Mr. D. B. Hudson is the General Manager and H. W. Quitzon is the wine maker and distiller. The latter gentleman was brought up in the business by his father, who was a wine maker and dealer in New York. He afterwards spent two or three years in the vineyards and wine cellars of France, Germany and Spain, then returned to New York, where he made wine. Shortly after the viticultural interests of California took their present start, he came to California and has had several years' experience among us.

We sampled the new Zinfandel and found it a good, clean tasting wine, with plenty of tannin and color, and reported to be 13 degrees alcoholic strength. The Blaue Elben and Rieshing were each good of their kind, though not yet so bright as they will be. The Burger was excellent. The sweet and half-sweet Port were good in their respective kinds. The Malaga was a pleasant sweet white wine; and the new brandy was an excellent article, and promised well when it shall have been aged.

The buildings are adobe cemented where most exposed to the weather, and have capacity for a larger production than that of 1883, and as this company is owned by men of large capital the necessary additions will be made as the young vines come into fuller bearing.

THE EISEN VINEYARD.

The Eisen vineyard has not enjoyed among wine men hitherto so high a reputation as those of other districts, on which much less capital per acre has been expended. In fact, the Eisen vineyard has to some extent been the cause of the prejudice which has obtained until recently against Fresno dry wines. The cause has undoubtedly been the excessive irrigation, especially in summer, which not only injured the vines by keeping their roots too near the surface, but seriously degraded the quality of the wine. The malaria produced from the hot sun acting on the wet soil gave all of that part of the county of Fresno a bad name. Whether there was anything wrong in the method of making the wine, we cannot say. But irrigation was not carried to excess last year, and Mr. E. J. Baber, a young Englishman, who studied chemistry in the best London schools and at the University

of Bryant and has since learned the art of wine-making in Europe and more recently in Germany, is now in charge of the cellar. He knew the vineyard well before he occupied his present position, having acted as secretary for some time under the former management. Mr. R. W. Heath, formerly of St. Helena, is the general manager and we can, without flattery, say that the condition of the wines now in Mr. Lasuen's cellar do both gentlemen much credit. The vineyard consists of two hundred acres in bearing, the oldest vines being five years old. There are twenty acres of young vines, which will bear next year. The total product this year was 135,000 gallons of dry and sweet wines and 4,000 gallons of brandy. These wines consist of Zinfandel, Chasselas or Gutedel, Riesling, Malvoisie, Traminer, Malvoisie and Feher-Zagos. Of the latter 30,000 gallons were made.

This Feher Zagos was made in the middle of November, from very ripe grapes, and a sample, without "baking," is developing already a true sherry flavor. Indeed, there is no sherry house in this district possibly it has been so damned into the ears of these people by everybody from Professor Hilgard downwards, that the soil and climate would make port or sherry of all their wines in spite of all they could do, that they began to have some misgivings, themselves. As they have not started a sherry bakery yet, perhaps they will let nature take its course, when they do want to make sherry, and, possibly, when they do this they will find that they have made the first really good sherry in California. Meantime, they are rapidly proving that they can make good, sound, merchantable dry wines, white and red.

We tasted some Pedro Ximenes, also intended for sherry, but it was by no means so far advanced as the Feher Zagos.

A sample of Lenoir and Cynthiana, mixed, was a deeply-colored wine, but, contrasted with the Zinfandel, seemed deficient in tannin. Blending the Zinfandel with the Lenoir-Cynthiana wine, made, to our taste, as also to that of those present, a better wine than either alone. It also seemed as if the Lenoir-Cynthiana wine would stand a larger proportion of Zinfandel.

Some Pinot promised to make a good Burgundy.

We also tasted, for the first time, some Norton's Virginia. It had an excellent color, considerable bouquet for so young a wine, pleasant flavor and showed the Medoc type. Its grave fault is that the vine is a shy bearer and that other varieties which make as good a wine are larger bearers.

The Riesling and Gutedel were bright and clear, good flavor and promised in time to give out a fair aroma. The Muscat had a strong flavor of its class. We learned that the grapes were very ripe when gathered, and the saccharometer showed 42 per cent sugar.

The port wines made last year were 47,000 sweet and 5,000 gallons of dry.

We have a small sample of the Norton's Virginia, and will be glad to show it at this office to any vineyard owner who desires to taste it.

EGGERS & CO.'S VINEYARD.

Eggers & Co., of San Francisco and Fresno, have owned for some years a large tract of land east of Fresno town. Some of this they have recently sold, but have reserved 800 acres for farm, vineyard and orchard purposes. This is the well-known Eggers vineyard. There are now 300 acres of vines, and 40 planted this spring. About 54 acres of Zinfandel came into bearing in 1883. There was a small crop, about 35 tons, in 1882 from these same vines. This year, 1884, the whole 300 acres will come into bearing—the larger portion for the first time and lesser portions for the second and third time. Eggers & Co. will in the future plant 100 acres more in vines, and reserve the balance for orchard and farming purposes. Eggers & Co. have just completed a large residence, with all modern improvements, and will shortly occupy it.

The main winery has capacity for making 75,000 gallons of wine. It is contemplated putting up another building this year, with capacity for fermenting 100,000 gallons, and the present building will then be devoted to storage purposes. The distillery is first-class, the machinery, as well as that for elevating, crushing and stemming, having been built by J. L. Heald of the Vallejo Iron Works, and the copper work by Sanders & Co. of Mission street, in this city.

This firm did not go into vine planting in earnest until the spring of 1880. Their product this year was 30,000 gallons, chiefly claret and port, and a little sweet wine. Of brandy they made about 2,000 gallons. The claret is a good merchantable article, and brought a fairly full price in this market. The brandy brought ruling market rates for 1883 gauge.

The vines planted this spring were Burger, Trousseau and Folle Blanche. Some Mataro and Carignan will be grafted on some Mission stocks that were planted in 1881. The vineyard contains now Zinfandel, Trousseau, Blanc Elbo, Folle Blanche, Feher Zagos, Burger, Traminer, Mission and a few Riesling and Malvoisie. In the raisin vineyard, which will all bear this year, are Sultana, Muscat of Alexandria, and Muscatel Gordo Blanco; a few acres of raisin vines will be planted this spring. There are some eight or ten acres planted in Flaming Tokay and White Malaga, for table and shipping purposes. The season in Fresno being earlier than in Los Angeles, and shipment last year to that city having paid well, larger quantities will be shipped there in the coming autumn.

The orchard, which is now in bearing, covers twenty acres, and consists of apricots of several varieties, peaches, nectarines, Bartlett pears and German prunes. About ten acres more orchard will be planted this spring.

THE HENRIETTA VINEYARD.

The impassable condition of the roads and the drenching rain prevented our reaching this vineyard, though we saw it from a distance. Our good friend, Mr. M. Denicke, we afterwards met in town. He has almost entirely recovered from the fracture of his leg, and seemed in high spirits. The vineyard, or, at least, so much of it as we saw, had not yet been plowed, and we were told that the larger portion was neither plowed nor pruned last year. Common rumor says—not Mr. Denicke, for Common rumor says—not Mr. Denicke, for we did not allude to the subject to him—that Messrs. Miller, Lund & Co., the owners, refused to go to the expense, last year, but now the vineyard is to be cultivated as it ought. In explanation, it may be said that Malter, Lund & Co. became scared at the outcry against Fresno and believed what others told them, that Fresno could not make anything but port and sherry. Looking at this vineyard gave us an inkling of what was in poor Morel's mind when he wrote that letter to the San Francisco press, to the effect that he, by his success in the Barton vineyard, had saved Fresno vineyards from being plowed up and the land turned to other uses. When before his eyes he saw one of the larger vineyards of Fresno going to destruction, this impulsive, and, we should add, mortally sick, Frenchman could not restrain himself. He was justified by Malter, Lund & Co. refusing to spend an unnecessary dollar on their vines. Now all is changed. the vineyard is to be cultivated. From the small quantity of wine Mr. Denicke made from his Carignan and Grenache, of which we have already spoken and of which we have a sample, and from what Messrs. Barton, Eggers & Co., Eisen and others are doing, confidence has been restored. And all honor to such gentlemen as Robert Barton, who never weakened or closed his check book when public opinion was ranged against his judgment. Mr. Denicke understands his business, and, if he is given scope and power, will make the Henrietta vineyard not only a credit to the county, but a profitable investment for the owners.

A SMALL WINERY.

D. Duquesne, a wine dealer and wine maker of Fresno, showed us a good sample of young Zinfandel of his own making. Previous to the last vintage this gentleman made wine for Messrs. Leach, Froehch & Co., but in 1883 commenced on his own account. He has a small establishment just west of the railroad, where he made between 2,000 and 3,000 gallons last year from grapes purchased from the colonists.

"Great oaks from little acorns grow," and from this humble winery there may spring an establishment worthy of being recorded amongst the leading wineries of the State. The field is favorable.

THE BARTON VINEYARD.

Last, but not least, indeed greatest of all the Fresno vineyards, the largest of all investments, the thriftiest vineyard, the best appointed, and, for its age, the most productive and the most promising in the future, is that of Robert Barton. Hardly three miles east of the town, on the choicest of Fresno soils, Mr. Barton has 640 acres, of which he has made and is making a paradise, and out of which a fortune must or soon not excelled by any other investment of the same amount of money—that is, over a quarter of a million—in any other industrial pursuit in this State.

This property consists, as we have said, of 640 acres, of which 500 acres are planted in vineyard, nearly 30 in orchard, 25 are occupied by roads and irrigation canals, 15 by buildings and yards, leaving 70 acres for barley and alfalfa—more than enough to feed all the working animals on the property. A stout board fence surrounds this property, and 80,000 Lombardy poplars, besides the eucalyptus near the buildings, stand shoulder to shoulder to defy the winds. The present wine cellar, built of adobe coated with cement inside and out, and finished with brick, looks like and is equal in solidity to stone. It is 100 feet square. The distillery, finished in the same style and equipped with machinery by J. L. Heald of Vallejo and Sanders & Co., copper smiths, is 60 feet square. The barn holds fodder for and the stables accommodates 40 horses and mules. The office is on the same scale and of the same material as the wine cellar and distillery. A new fermenting house, also of adobe coated with cement, is in progress. It will be 320 feet long by 96 feet wide and 40 feet to the ridge. The cooperage is in a separate building. Besides the right to 40 miner's inches of water from the Church, and out of a ditch, which runs along the north side of the property, there are three artesian wells on the property, and water by steam or windmills is raised to a height that commands every building and renders fire insurance premiums hardly necessary. The dwelling house is not only commodious but elegant, being frescoed throughout by the best artists in California. All the appointments and the pleasure grounds show taste and appreciation of the beautiful as well as the useful. The vineyard, 500 acres, which will all be in bearing this year, and four-fifths of which bore last year, consists of Zinfandel, Trousseau, Black Malvoisie, Blanc Elbo, Burger, Feher-Zagos and White Riesling, besides a few vines grafted with Black Sauvignon, Pinot de Burgoyne, Carignan, Green Sauvignon and some other foreign varieties. About forty acres have also been planted with Sultana, Malaga, Muscatella Blanca and Traminer, but the main reliance of the vineyard is on the first named vines. The distillery outfit, engines, boilers, pumps, wind-mills and cooperage in this establishment, up to June 1st last, had cost in cash, over $25,000. The cost of running such an enterprise is necessarily heavy, but the receipts are also large. It is noticeable that the late M. Eugene Morel, who reported on the probable expenses and receipts for the year, overestimated the former and underestimated the latter. If his judgment was correct, the net profits of this vineyard in 1888 will be $128,000. If his estimate of expenses is as much over the mark in that year as it has proved in 1883, the net profits will be over $140,000. In recounting the sources of profit, M. Morel omitted the orchard, which, besides what is reserved for family use, consists of twenty-five acres planted with the choicest varieties of apricots, nectarines, peaches, pears, German prunes, and which here for acre will yield a profit equal with that of the vineyard, and yet has been taken no note of in estimating the future revenue of this vineyard.

Of the quality of the Zinfandel wine shipped from this vineyard we need not speak on our own judgment only. It was purchased by the firm of Gundlach & Co., allowing for the heavy freight bills to be paid, at a price higher at the time than the average paid for the better kinds of Sonoma and Napa Zinfandels. The brandy fetched the full market price of the day. The port wine has not yet been sold, but when that event occurs, we will stake our judgment that it will fetch full figures.

TO CAPITALISTS

FOR SALE

AN UNDIVIDED HALF-INTEREST

—IN THE—

Most Valuable Paying Vineyard Property in California.

—CONSISTING OF—

640 ACRES

OF THE FINEST FRUIT LAND ON THIS COAST.

500 Acres of Vines, of which 400 Acres bore fruit last vintage and all will be in bearing this Autumn.

25 ACRES OF BEARING FRUIT TREES, THE BALANCE IN ALFALFA and BARLEY FOR FORACE.

Substantial Buildings and Distillery for making and storing 250,000 gallons of wine and 40,000 gallons of Brandy.

Large and handsomely finished residence, Commodious barns, stables, and quarters for workmen

MORE THAN SUFFICIENT WATER PRIVILEGES.

THREE ARTESIAN WELLS.

The owner will sell one-half interest to an energetic business man, as he wishes to devote some of his time to building up an Eastern connection for the sale of the products of the vineyard. Or, will divide the property and sell one-half to a purchaser who prefers separate ownership.

For full particulars as to the money invested in bringing this property to its present condition, yield last year and expected yield in the present and future years,

Apply to

A. D. BELL,

S. F. MERCHANT PUBLISHING CO.,

323 Front Street, San Francisco.

Eligible parties seeking an opportunity for investment are invited to examine this property.

N. B.—Principals only will be dealt with.

The day has gone by when any expert in California who cares for his reputation can afford to sneer at Fresno wine or deter would-be investors from looking for opportunities in that county.

That our friends may judge for themselves, and neither approve nor condemn our judgment on the Barton Vineyard wines without examination, we have provided ourselves with samples, and shall be glad to show them at this office to those interested. All may not have time to visit Fresno and see the vineyards for themselves, but most of them can call on us and taste the products of the Barton vineyard. We might say much more, but space is lacking. We may recur to the subject again, for we can affirm without hesitation that of all the vineyards we have seen in California, and except the Natoma Vineyard and Governor Stanford's we have seen all the notable vineyards, beyond comparison Robert Barton's is the model vineyard of the State.

It is perhaps worth mentioning in reference to the Trousseau vines in Mr. Barton's as well as Eggers & Co. vineyards, and indeed in many Anaheim and other vineyards, that they were purchased of the Hon. L. J. Rose of Sunny Slope for Charbono, but fortunately for all have proved to be the much better vine, the Trousseau. The mistake was detected when the writer and several members of the Viticultural Commission visited Sunny Slope last summer, while attending the Los Angeles District Convention of wine growers. It seems that Mr. Rose purchased from Mr. Lefranc of San Jose, if we remember aright, an equal quantity of Charbono and Trousseau cuttings. By some accident the labels were confused and the larger portion of one variety perished by exposure. It was supposed that it was the Trousseau cuttings that died and the Charbono that flourished, and the latter variety when Mr. Rose had cuttings to sell, enjoying a short lived popularity, many orders came in for Charbono. To the gratification of Mr. Rose and all who purchased from him, the stock that survived proves to be the true Trousseau; a notable case of the survival of the fittest.

Planting Orchards.

The planting of orchards is now going on all over the county and State. Many inexperienced hands are at work, and many more who have had experience in other countries, and, therefore, think they know all about it here. The first mistake is generally to plant the trees too close. We believe that twenty-five feet is the proper distance for nearly all trees, except pears, which can suffice with twenty feet, but in a small orchard it is better to have all the trees the same distance apart. It is better to plant the trees in quincunx, twenty-five feet apart, than in squares with twenty feet distance between the trees. But, whatever way the trees are set, they must row every way. Nothing is more disgraceful than to see trees out of line; it is not only painful to the eye, but prevents close cultivation and is always a sign of carelessness and ignorance. Wherever we find a crooked orchard, we can also be sure to find the stable full of manure. After the trees are a t, they should be cut back, at least all trees except nut trees. The crown should begin not more than one foot from the ground, and six inches would be better yet. The stem or trunk usually seen on fruit trees is not only useless, but decidedly injurious to the tree, when fruit is the object. It is, therefore, necessary at the planting to make the branches start low down. After the trees are set, the holes should not be filled entirely full, but a few inches left for well-rotted manure, which, however, should not touch the trunk of the trees. The firmer the soil is stamped around the tree the better, but a layer of soft, pulverized soil should always be put on top of the stamped soil, serving as a mulch and preventing the ground from cracking.—*Gustav Eisen in Fresno Republican.*

Brown "What! smoking? I thought you swore off." Fogg—"So I did, and I got along bravely until it came to me that this was leap year. I hadn't thought of that extra day. A fellow might be able to keep from smoking 365 days, but the man's got to draw the line somewhere. You can't expect impossibilities from a fellow.

BALTIMORE—Per ship Columbia, March 9—2005 tons coal.

SAN MARCOS ISLANDS—Per Ger brig Mary, March 9—200 tons gypsum.

[Continued on Page 370.]

EL CAJON.

27,000 Acres of Choice Vine Fruit, Olive, Alfalfa and Grazing Land to be Sold in Large and Small Tracts.

To hasten the development of the colony now growing up in the Cajon Valley, San Diego county, the El Cajon Land Company will temporarily suspend the sale of its stock and will make most favorable offerings to induce rapid settlement of the country. The 27,000 acres controlled by the Company will, until further notice, be offered in tracts, as follows:

First—The 2500 acres of platted, level land, in lots from 5 to 160 acres—uniform in quality—at $60 per acre, cash. These lands are most favorably situated for vine, olive, citrus and fruit culture, or for making pleasant homes, where the benefits of climate only are sought. Adjacent lands of same quality cannot be purchased at less than $100 per acre. The Cajon Valley already has the nucleus of a fine settlement, a school-house, church, post-office, hotel, etc. About 500 acres in vines and trees are already planted.

Second—The so-called "T." tract, containing 10,000 acres of land, comprising 2,500 acres of valley land, 1,500 acres of rolling mesa, suitable for grain, and 6,000 acres of hills suitable for grazing, will be sold entire. This would make a first-class stock ranch, or could be cut up advantageously for a small colony; wood on this tract is estimated at 20,000 cords. The price will be so low that an investor may subdivide and sell off 1,000 acres of the valley land, and clear all his expenditures.

Third—The so-called "Monte"—a tract of 1,000 acres of the richest alluvial soil along the San Diego river; carries about 20,000 cords of wood. This land in any upper county of the State would sell for $150 to $500 per acre. It will be sold entire, together with adjacent hills.

Fourth—The grazing lands of the "S." tract between the platted lands and the "Monte," about 10,000 acres, partly suitable for cultivation, will be sold either together with the Monte, or separately.

For further particulars apply to

DR. JOSEPH JARVIS,
San Diego.

PRODUCE MARKET.

The Imports at I Exports given below are compiled from the Shipping Bulletin morning to Wednesday evening of the current week.

The weather outlook is not favorable for the growing crops. In no portion of the State has there been a lack of rain, and in some few instances the fall has been so great as to wash away the plant of many a ree, but the damage so sustained is of little importance when compared with the thousands of acres of seed land which will, probably, produce an unprecedented yield.

The fruit crops are reported to be in excellent condition, and give promise of an exceptionally large product.

FLOUR.

Imports, 500 sks, 2830 bbls. Exports, 27052 bbls.

Receipts for the week, 126,213 qr sks

Although prices for wheat are lower and weak, flours for Flour have not been reduced so far as the jobbing trade is concerned, yet purchasers of round lots for export find the market more in their favor.

Extra, $3 37½ @ 3 65 Superfine, $4 00@4 75 Country dutto, $3 50@4 30; Interior Extra, $3 00@ 3 37½ per bbl for jobbing parcels to local consumers.

WHEAT

Imports, 6977 sks. Exports, 3000226 ctls.

Receipts of week, 335,525 ctls

At no time in the history of the trade has the plant in this State been more promising, and if we except strong, drying northerly winds later on, the yield will be greater than ever before. Equally encouraging reports come from nearly all parts of wheat-growing sections of the world, and in face of these facts, prices in England and Continental Europe are weak and declining from day to day. It would now seem that California growers are not likely to realize more than a moderate profit for their labor, and in many cases, from their present outlook, the receipts will fall below the cost of the product.

Trade in the Call Board has shown increased activity, but prices recorded are very unsatisfactory to the seller or grower, buyers being shy and predicting lower rates than in any previous year.

For No 1 White in the sample market, $1 57½, many lots being sold for $1 55. A shipper secured a round lot of 24000 tons, mostly Choice Milling, for $1 60. No 2 White is quotable at $1 50@1 52½.

On Call yesterday the bids for No 1 White were as follows: Seller August or September, $1 47; seller 1884, $1 45⅞; buyer 1884, $1 58½; buyer season $1 58¾.

BARLEA—

Exports, 12 ctls.

Receipts of week, 15,888 ctls

The indications are favorable for an exceedingly large crop, and buyers hesitate to make purchases for lots for future delivery, even at present low prices As a consequence figures are lower, and have a further declining tendency.

In the sample market No 1 Feed is not quotable above 80c, and other grades range down to 77½c; choice Bay Brewing can be had for $1, and choice Bay Chevalier is nominal at $1 25. On Call yesterday No 1 Feed was sold as follows: Seller season, 83¼@83⅝c; buyer season, 86⅝@87½c; buyer 1884, 90¼@90½c; spot, 82½c per cental closing at the morning session at the outside figures.

OATS—

Imp rts, 1555 sks. Exports, 134 ctls.

Receipts of week, 6715 ctls.

With liberal supplies on hand and the cheapness of other kinds of feed, the oat market is decidedly weak, and shows no probability of any enhancement in values.

We quote: Black, $1 45@1 50; White, $1 50@ $1 55 for ordinary; $1 62½ @ $1 65 for fair to good and $1 70@$1 75 per ctl., for choice to extra choice.

CORN—

Receipts of week, 1144 sks.

Both the local and interior consumers are for the most part supplied with consignments from Nebraska, other stocks being light and receipts from California sources of supply meager.

We quote: Nebraska, $1 40@$1 42½; California $1 45@$1 50 for white, and $1 60@$1 62½ per ctl for yellow.

RYE—

Receipts of week, 288 sks.

Although stocks on hand in the interior are unusually large, prices obtainable here are not sufficient to warrant the forwarding of consignments, and many growers are said to be using their product for feeding purposes. Nominally quotable at 90@$1 10 per ctl.

BUCKWHEAT—

For Buckwheat flour we are almost exlirely dependant upon consignments from the East.

MILLSTUFFS—

Exports, 391 ctls millstuffs, 388 ctls bran.

Receipts of week, 6250 sks bran, 2345 sks middlings, 380 ctls Ground Barley.

We quote. Ground Barley, $20 00@21 00 per ton, Middlings are selling at $17@$20 00 per ton, Wheat Bran, $14 50@15 00 per ton, Oil Cake Meal, $30, old process, and $26 50 new process; Feed Corn Meal, $33 50@34; Cracked Corn, $34 per ton; Rye Flour, $6 per bbl; Rye Meal, $5 50 per bbl, Buckwheat Flour, 6c per lb; Pearl Barley, 4@5c per lb; Eastern Oat Meal, $8 75 per bbl; Cracked Wheat, 4c per lb.

HAY—

Exports, 4 tons.

Receipts of the week, 868 tons.

We quote: Alfalfa, $8@10; Wheat, $11 00@13 50; Stable, $10 00@12 00; Wild Oat, $11 00@13 50; Cow, $9 00@11 50, Barley, $9 00@11 00 per ton

STRAW—

Receipts of week, 118 bls.

Quotable at 50@60c per bale—as to condition.

SEEDS—

Receipts of week, 1621 sks mustard.

Business continues good with some slight improvement in some lines Prices unchanged with a tendency to stiffen.

Flax quotable at $2 50@2 75 ₱ ctl; Canary, 5@6 ¢; Alfalfa, 8@8¢ ₱ lb; Timothy, 7@7½¢ for native and 8@9c for imported; Mustard, choice Brown, $3 25@3 75 ₱ ctl; White, $2 75@3 00, Hemp, 4c, Rape, 3@3½c.

BEANS—

Exports, 2960 ctls

Receipts of the week, 2051 bags

The Bean Market is weak all round, particularly Whites & Limas. Colored must under any circumstances keep up to some where near present figures.

Receipts have been light and so has trade.

Our quotations are, for round lots from the wharf, Small White and Pea, $2 80. Bayos, $1 62½; Pinks, $1 25, Reds, $3 00. Butters, $3 75. Limas, $2 50

BUCKWHEAT—

Receipts of week, 3345 sks peas, 1066 sks lentils

Receipts are fair and sufficient to supply the demand.

We quote Carrots, 35@50 ₱sk; Turnips, 50@65c; cauliflower, 65@75c ₱ doz, Cabbage, 30@$1 00 ₱ ctl, Garlic, 2½@2½c ₱ lb. Celery, 50 ₱ doz; Dried Okra, 10@12½c ₱ lb. Dried Peppers, 12@15c ₱ lb, String Beans, 15@20c per lb. Artichokes, 10@50c ₱ doz; Beets, 75c ₱ ctl; Parsnips, $1 or 1 25 ₱ ctl; Marrow Fat Squash, $25 ₱ ton, Mushrooms, 6@ 8c ₱ lb, Cucumbers, 50c@$1 50 per doz; Tomatoes, 8@10c per lb, green peas, 8@12c; string beans, 15@17c; Asparagus, 10@12c per lb; Rhubarb 9@11c per lb.

FRUITS—

Imports, 3602 bunches bananas. Exports, 177 box fruit, 166 box apples

Oranges are scarce while nearly lemons are in extra large supply, caused by low prices East. Very few California on hand, as it does not pay to ship them at prices Sicily are sold for. Limes are more plentiful and lower.

We quote: Domestic Apples, 75c@$3 00 ₱ box Western apples, $4@$8 00 ₱ bbl; Western do, $17 00@17 75 ₱ bbl.

Tropical—Lemons, $4 00@5 00 per box for Sicily Limes, $4 00@5 00 per box for Mexican, Tamarinds, 12½c per lb; Bananas, $3 75@4 00 per bunch; Oranges, California, $2@3 50, Choice Riverside, $4 or 4 50, Choice Navel, $4 50@5 50 per box.

NUTS—

We have nothing of importance to note in nuts. Trade remains quiet; prices unchanged, slightly favoring the buyer

We quote. Cocoanuts, 50@6 50 ₱ 100, California Walnuts, 8@10c ₱ lb, Chili do, 8@8½c; California Almonds, hard shell, 6@8c, soft shell, 14@ 15c, Filberts, 15@16c; Pecan, 12@13c; Pea nuts, 5 ctls; Brazil Nuts, 15@16c, Hickory Nuts, 7@8c. Italian Chestnuts, 15@16c.

HONEY—

Exports, 13 cases.

We quote: Extracted, 6½@7c; Extra White Comb, 17@18c; White, 15@16c, Dark, 8@10c.

DAIRY PRODUCE—

Butter is coming in freely and stocks accumulating, hence the decline in quotations since our last Indications point to lower figures next week In Cheese stocks are accumulating, dealers waiting for a decline

We quote: Point Reyes, 26@27½c; Choice, 25@25c; inferior lots from country stores 17@20c; Petaluma, 1 to 15c for old and 24@ 25 for new, Eastern, 15@17c, Cheese, California, 15@16c for choice; 11@12½c for Fair to Good, Giltroy in drums, 16@16c, Eastern, 15@18c; Western, 10@12c.

EGGS

Market well supplied and prices declining.

We quote, California Eggs, Choice Ranch, 25c per doz, California fluwed, 22½c.

POTATOES—

Receipts of week, 11 610 sks

Imports, 611 sks. Exports, 375 ctls.

There are but few River lots. Their place is taken by off Tomales and Petaluma.

We quote: Early Rose, 90c, River Reds, 40c, Tomales and Petaluma, 45c, Coffey's Cove, 70c, Humboldts, 65c, Sweets, 1½c

Light receipts has given the market more tone Good Reds sell readily at better figures Early Rose are lower, as the high prices of last week have induced heavy ar rivals

ONIONS—

Exports, 46 ctls.

Receipts of week, 1469 sks.

There are but few good ones arriving; selling readily at $1 35.

BEESWAX—

We quote 26@2 c per lb

HOPS—

Imports, 61 bls. Exports, 335 lb.

Receipts of the week, 82 bls.

Market quiet. Choice quotable at 20@23c. Stocks of fair to small, but medium grades difficult to sell at 17@18c. There was a shipment of 130 bales East this week, which sold at 20c.

POULTRY—

Receipts are very small, and prices have advanced all along the line. As will be seen by our quotations prices are unusually high; higher for turkeys than they have been for ten years, while nearly the same may be said for chickens.

We quote: Turkeys, Live Gobblers, 30c per lb Turkey Hens, 30c; Dressed, 32½@33½c; Young Roosters, $10@$12 00; Old Roosters, $9 00@9 50; Hens, $9 00@11; Broilers, $8 00@9 00, according to size; Ducks, $14 00@15 00 ₱ doz; Geese, $2 25@ $3 00 per pair.

GAME—

Receipts in all lines are very light and what comes in brings good prices,

We quote: Hare, $1 5 @2 00; Rabbits, small, $1@$1 25; cotton-tail $1 25@$1 50 ₱ doz; Teal, $1 50; Snipes, $1 75@2, 25@2 50, Widgeon, $1 50 @1 75; Mallards, $2 75@3 00 ₱ doz; canvas-backs, $2 75@3 00 per doz; common snipe, $1 00@1 50 ₱ doz; do, English, $ 50 @ 3 00 ₱ doz; Grey Geese, $1 75@2 00 White geese, 50c; Honkers, $2 50@3 00 per doz. Brant, 50c.

WOOL—

Imports, 3 sks. Exports, 22 bags

Receipts of week, 186 sks.

For Wool market see Wool Department.

HIDES, SKINS, ETC

Imports, 1509 bls hides, 86 bdls skins, 50 pkgs tallow Exports, 8057 lbs tallow

During the past week salted hides have been more active, as the supply is somewhat limited. Prices have not really advanced, but fair average lots have been readily taken. Heavy steers and medium hides continue in the same demand as heretofore, but light cows are desirable and sought after.

Heavy Salted Steers, over 55 lbs, 10¾c per lb Medium Salted Cows and Steers, 50@55 lbs, 8¾c per lb. Light Salted Cows and Steers, 30@50 lbs, 8@8¾c per lb. Salted Kips, 10c per lb. Salted Veal, 11c per lb. Salted Calf, 15c per lb.

Dry Hides, usual selections, 18¾@——c per lb; Dry kips, do, 18@—c per lb. Dry Calf, do, 18½ @21 per lb.

TALLOW—

The market is, as usual, rather quiet. We quote fair to good 7½@8c per lb.

IMPORTS.

[Continued from Page 369.]

PHILADELPHIA—Per ship Hagarstown, March 9 —150 bbls alum, 100 bbls Carbonate of Soda, 1000 tons coal, 3638 pcs firebricks, 793 bdls iron, 503 pcs 3864 bdls iron pipe, 8624 pcs lumber, 29700 cs oil, 25 cs steel, 35 bbls whiskey, 125 bbls whiting, 1211 pkgs miscellaneous.

GLASGOW—Per Br ship Golden Fleece, March 6—210 cs beer, 1246 tons coal, 65 tons coke, 350 bars iron, 93 bbls whiskey, 218 pkgs miscellaneous.

MANZANILLO—Per schr Canute, March 6—507 cs bar logs.

Butterine vs. Butter.

There is a good deal of butterine made and sold in Europe, and there, as here, people seem to have little apprehension how extensively it is used. The *Farmer's Gazette*, of Dublin, publishes a statement showing how difficult it is for ordinary judges to tell butter from butterine. Some fine Normandy butter, costing 48 cents a pound, and a sample of butterine, bought of a local retailer for 22 cents a pound, were submitted to a jury of nineteen farmers, who tasted and examined both samples. Ten out of these nineteen judges declared the butterine to be the butter. The makers of butterine in this country use all the way from 60 to 85 parts of neutral lard to 40 and 15 parts of good butter, respectively, in making butterine. These are thoroughly mixed, salted, and colored a golden yellow, and the tubs are branded with fancy names as from country creameries.

It is said an infallible test is to melt the butterine and then suddenly chill it by surrounding it with cracked ice, when the lard goes to the bottom and the butter to the top, the line of separation being plainly visible.—*Scientific American.*

A good laying hen will lay her weight in eggs in 35 to 40 days.

RETAILERS' CORNER.

It would be a waste of the reader's patience to descant on the obstructions of railroads, the loss of county bridges, the bad condition of the wagon roads of the interior as the reason for business in the wholesale line in this city being dull. And yet is it so very dull? Some old established grocery houses showed larger total sales for February and for March, as far as it has gone, than they did in the corresponding periods of last year. Moreover, it must be remembered that sugars, refined and raw, form fully one-third of the grocery trade, and the price this spring has been a round twenty per cent. less than last year. This difference in values should reduce the volume of their trade in proportion, but as it has not, and there can be no doubt that from the improved circumstances of our people, or the larger population of our State, the grocery trade of San Francisco is actually growing in spite of the losses we have sustained in the partial loss of the Los Angeles and Oregon trade.

The demand for Refined Sugars has been uniformly excellent for weeks past. Grocers are pretty well stocked with grocery crates, bags and kegs, but a fair quantity of bags have changed hands and some kegs. Of "Hutchinson," none were received by the last steamer

Coffee buyers and Coffee importers do not coincide in their views, and as will be seen in our merchandise report under that heading, there is little doing. The difficulties in transportation are partially accountable for this state of affairs.

There has been a good demand for Asiatic Rices, and we notice that No. 1, Extra China is a point higher than last week. Hawaiian is selling in round lots at $4\frac{3}{4}$, 60 days, or $1\frac{1}{4}$ per cent. discount for cash.

Tea is firm at the recent advance.

Provisions of all kinds are dull at unchanged prices.

Nails have ruled low for some time, but from the several strikes, we presume, are now advanced 15 to 25 cents all round.

Oatmeal in ten-pound sacks is 25 cents lower per 100 pounds. Oat groats have also fallen in the same proportion.

Manila and Hardware Paper are a cent lower.

Green Peas, Sugar, are now quoted at $1 50@1 65.

Castor Oil continues to advance. No. 1 and 2. in cases, are advanced 25 cents, respectively.

Quinine, as we have reported, advanced to $2 50, owing to the fire in Powers & Weightman's at Philadelphia, who are the largest manufacturers in the United States. It appears, however, that on opening the fireproof vaults a large quantity of the stock was found to be uninjured; prices therefore have receded to $2 per ounce, on a weak market.

The sponge, really an animal, was regarded till a very late day, by our leading zoologists, as a plant.

A New York female, whose dog lost an eye in a fight with a cat, employed an oculist to put a glass eye in place of the member that had been clawed out.

They have a new game in Indiana. A man who can hold an egg in either hand and jump five feet without breaking the eggs by involuntary squeezing wins the bet.

Over 34,000 of the 4,440,822 pieces of mail matter that were sent to the Dead Letter office last year, contained checks, money, etc, to the amount of about $1,030,000.

MERCHANDISE MARKETS

BAGS AND BAGGING –
Imports, 123 bls Gunnies. Exports, 3 bls Bags

It would seem that holders, in some instances, are not so firm in their views, lots of 50,000 Standard Calcutta Wheat Bags, importation of 1884, having been sold for 7¼c, buyer June. Spot lots of the same are quotable at 7¾c. Potatoe Gunnies sell for 14@14½c

BORAX—
Exports, 413 lbs.

The market is heavy, and tending downward, both here and in New York. In the latter place, concentrated is held at Scand refined at 8c Here refined is 7½@8c for carload lots. Receipts are quite small, affected, doubtless, by the heavy storms and interruption of the railroads.

BREAD—
Exports, 13,069 lbs.

We quote: Alphabet, 12c ₱ lb; Assorted, 10c; Assorted, 12c; Bananas, 14c; Boston, 8c, Butter, 8c; Charms, 12c; Cocoanut Cakes, 14c; Cocoanut Drops, 14c; Cracknel, 22c; Cracker Meal, 8c; Cream, 8c; Egg Gumbles, 14c; Excelsiors, 12c; Fruits, 10c; Galletta, 7c, Ginger Cakes, 10c; Ginger Nuts, 12c; Graham, 8c, Jenny Lind, 14c; Lazarande, 10c; Lemon, 10c; Lunch, 8c; Medalions, 12c; Milk, 8c; Milk fancy, 10c; Monitors, 9c; Nic Nacs, 12c; Novelties, 12c; Numerals, 12c; Oatmeal, 10c; Overland, 10c; Oysters, 8c; Sandwich, 16c; Pearl, 8c; Pic Nic, 12c; Picnic Ex, 8c; Pretzels, 10c; Saloon Pilot, 6c, Santa Clara, 8c; Seed Cakes, 10c; Soda, 6c; Soda Ex, 7c, Spice Gumbles, 12c; Vanilla Bars, 14c; Sugar, 16c; Wafers, 8c; Waters, 8c, Wines, 8c; Ship, 4c; Pilot Bread 4c; Pilot Bread Ex, 4½c.

BRICKS AND FIREBRICKS—
Imports, 9,698 pcs Fire Bricks.

Ketchup, $1 25@1 75 ₱ dozen. English Groceries—Crosse & Blackwell's Pickles, pts, $4; qts, $6 75; Olives, qts, $7; Lucca, Oil, qts, $9 50; Sauces, $9 00 ₱ case. Jams, $4 00. Jellies, $5 00 ₱ doz; Fry's Chocolate, 50c ₱ lb; Cocoa, 45c ₱ lb; Colman's Mustard, 60c ₱ lb.

COAL—
Imports, 11,970 tons Pacific Coast, 22,116 Tons, in and Eastern Exports, 7 tons coal

Again the arrivals for this week have been very light, mainly as far as the consumption is concerned, remain unchanged for spot cargoes or those nearly due, yet concessions are offered for loading, anticipating free arrivals of vessels later on. The whole question of the future of the Coal market as to quantity shipped, and probable quotations, rests entirely on the future outward freight rates on grain, say for August, September, and October next, if, as in the past there should be free offerings for vessels for cancellations in the above months at full rates, say 50 to 55 shillings then lower figures may be anticipated Cardiff Egg Hard $11@11¼, Cumberland, bulk, $10@10½. Spot prices are as follows:

EX-SHIP AND YARD	Ship.	Yard
West Hartley	$9 50	$10 00
Scotch Splint	9 50	10 00

Seattle		8 00
Wellington	10 00	10 00
Egg Hard	11 00	11 50
Mount Diablo		5 50
Cannel		12 00
Cumberland, bulk		11 00
do sks		13 00
do csks		14 00
Lehigh, bulk		14 00
do sks		16 00
English Foundry Coke, bulk		15 00
do sks		16 00
Australian Shale		25 00
Southfield		9 00

COFFEE—
Imports, 325 bgs Exports, 55508 lbs

Only slight differences in ideas between buyers and sellers as well as to the bad state of the roads in the interior, business has been somewhat restricted during the week. There is no change in quotations viz, Rio, 12@12½c; Rio prime Costa Rica, Guatemala and Salvador, 12@12½c for unwashed Salvador.

We quote:
Costa Rica, good to prime 13 @14
Guatemala, good to prime 13 @13½
Salvador, good to prime, washed 13 @13½
Salvador, good, unwashed 12 @12½

CORDAGE—
Imports, 1363 cs cordage, 1542 bls hemp. Exports, 35 cs cordage.

We now quote as follows: Manila, 14-inch (7-16 dia) and upward, 15c, do, 12 thread ⅞ dia) 15½; do, 6 and 9-thread (⅝ and 5-16 dia) 16c; Italian Bale Rope, 2, 3 and 4 thread, 15c; Manila Contercarted, 2-in (⅝dia) and upward, 15c; do Lath 15c; Discount to the trade. Sisal Rope, 12-in (7-16 dia) and upward, 11c; do, 12 thread (⅜ dia), 11¼c; do 6 and 9-thread (¼ and 5-16 dia), 12c. Sisal Bale Rope, 3 and 4-thread, 11c.

CORKS—
Imports, 2 bls.

DRIED FRUITS—
Exports, 13892 lbs dried fruit, 32 bxs raisins.

Trade is fair, though not at all active; we note some changes in quotations. In Raisins, loose Muscatel may be had for $1 15 @ 1 25 in large lots

We quote Sun dried Apples, Dor@¢ ₱ lb for sliced and 8¢@9¢ for quarter-ed; Alden and Plummer-ed, 9¢@10¢; Evap do, 11 @12; Blackberries, nom; Figs, 7c for pressed and 4@5c for unpressed; Nectarine, or c; Nectarines, 8@9c; Peaches, 15@16 for peeled and 11@11½c for unpeeled, Pears, 5cm for whole and 7@8 for sliced; machine-dried, 10@12c; Plums, 15 @17c for pitted and 3½@4c for unpeeled; German Prunes, 9@10c; French Prunes, 10½@11c. Bbl. Apricots, 15 @ 25@or loose Muscatel and 20 @ 25@ 25 for ½ box for London Layers, with the usual advance for fractional boxes.

DRUGS AND CHEMICALS—
Imports, 111 cs drugs, 156 bbls alum, 20 bbls brimstone, 100 bbls carbonate of soda, 100 casks bicarbonate of soda, 278 pkgs caustic soda, 200 cs gypsum, 500 lbs nitrate of soda. Exports, 42 cs drugs, 2302 lbs ginseng

We quote: Alum, 2½c; Acid, 12c; Strong Sulphuric Acid, 3@3½c; Sulphuric Acid, 2½c; Muriatic Acid 4½c all lots of 20 carboys or more); Caustic Soda, 60-lb, 5c; 70 deg, 4¾@5c, 76 deg, 6¼@6½c; Powdered Caustic Soda, 7@7½c; Caustic Potash, 10@12c; Chlorate of Potash, 16@19c; Soda Ash, 2@3 ; Soda Crystals, 1½c

We quote at wholesale side: Soda Ash, 1 90@2¼c for 52 deg Ash; Soda Crystals, 1¼c; Chloride Lime, 3@ 3½c; Copperas, 1¼c on spot, Caustic Soda, 60 per cent, 5c.

DRY GOODS—
Imports, 300 cs. Exports 123 cs.

FISH—
Imports, 111 cs 616 pkgs fish, 2803 cs salmon. Exports, 806 cs fish, 30 cs salmon.

The market is very quiet; business is dull with some little demand from the East for salmon. The Eastern market price is somewhat unsettled, owing to the unsettled weather a large consignment hereper sailing vessel now due at New York

We quote, Columbia River, $4 25@4 75, Sacramento, $4 50@5 00; Kippers, $8@9, in barrels, $4 75@5 00; California Cod, in 50-lb bundles, 4c, selected, in cases, 5c; boneless, 6c.

G. & B POWDER—
Exports, 282 cs blasting.

Business very good for this season of the year.

California Blasting is quotable at $3 25 ₱ case; Indpont Blasting, iron kegs, $3 25, Hazard do do, $3 25; Hazard K K F, in canisters, 50c ₱ lb, do do Rifle, 1, do American, Spot 75c, Dupont's Sporting—Golden Pheasant, kegs F, FF and FFF, $5 50, ½ kgs, $3 00; ¼ kegs, $1 75; Superior Rifle, kegs, Fg, FFg, FFFg, $7 00, ½ kegs, $3 75, ¼ kegs, $2 25 Eagle Duck, kegs, Nos 12 and 15, $11, ½ kegs, $7 50, ¼ kegs, $4 00, Diamond Grain, 5 brands, Nos 1, 2 and 3, $1 75, Rifle canisters, $1 00 Winchester Metallic Cartridges, mm fire, according to brand from $2 50 to $16 00 ₱ 1000, central fire, according to brand, from $8 50 to $35 ₱ 1000, U S Cartridges, $10 ₱ 1,000

HARDWARE—
Imports, 886 cs Exports 149 cs

IRON—
Imports, 12980 pcs IOSSS bdls 54 pkgs 7257 lbs 455 cs iron, 3561 bdls 7082 pcs iron pipe, 876 pcs steel. Exports, 2000 pcs iron, 61 pcs iron pipe, 61 pcs steel

The arrivals of Foreign Iron this week have been very light, and the amount not all that has been storage by the wharfs. The decrease of stock continues In importers do not commence loading on their own account and will only permit two or three months more to elapse without shipping, there will be a hope for a better figure in the latter part of the year, as at present we are still largely overstocked.

There has been a fair demand for Scrap Iron, and still this week has and several orders have gone for ward

Importers prices of pig Iron, Foreign and American, to arrive: Scotts No 1, $27½@—; Eglinton, $25 00, Clay Lane White, $23 50 ; American, Eastern soft, $28 00 ; Spot prices are as follows: Glengarnock, $25 00, Eglinton, $24 00, Clay Lane, white, $23 50 ; Summit, $28 50, American, Soft Eastern, $28. Clipper tap Nos 1, to 4 $32 50@35 00

Black Sheet Iron—Nos 14 to 16, 5c ₱ lb; Nos 18 and 20, 5½c; Nos 22 to 24, 6c; No 26, 6¼c; No 27, 6½c, No 28, 7c, Galvanized Sheet Iron—Nos 14 to 16, 7c; No 18 to 20, 10 ½ lb, Nos 22 to 24, 11; No 26, 12; No 27 2½, No 28, 13½; second quality 1c ₱ lb less than first.

PROVISIONS—
Imports, 23,000 lbs bacon, 122,170 lbs hams, 58,230 lbs 50 tes lard, 50 kgs pork Exports, 91223 lbs bacon, 87 bbls beef, 4015 lbs hams, 2304 lbs lard, 27 bbls pork.

The demand from the country is still light, the roads not yet being in good condition for forwarding. Of course, as there are opened the continuation of dry weather a great change in this element will take place The local market for most products is active and prices show a tendency to advance, except in Eastern Hams, of which large supplies on hand at prices paid at Eastern packing points, will limit sales.

We quote: California hams, 13½c, Eastern, 15½@ 16½c, Oor Choice hams, 16@16½c; California Bacon, 13@13½c, California, covered hams, 14½, extra clear sides, 13@13½c, California shoulders 9@9½c, mess pork, $24 per bbl, prime mess, $18; clear pork, $21 pr bbl, extra clear do, $22 per bbl; pig pork, $20 per bbl, Eastern lard, $11 50 per bbl, extra mess beef, $15 50 per bbl, family beef $17@ per bbl; Eastern refined lard, in tes, 13½c per lb, California refined lard, in tes, 13½c per lb; 10s, 10c, 5s, 10½c; Banner lard, 10s, 13½c, 5s, 13¾c, Fairbanks lard, 13½c for 10s, 13¾c for 5s, and 14c for 3s.

QUICKSILVER—
Exports, 157 flasks.

Rothschild again advanced his figures on the 6th inst to £5 12s 6d per flask, the equivalent of 57½c per pound. Here the price has been reduced from $2 50 to $2 37½ per flask, equal to 49½c per pound, with limited transactions. It is noteworthy that the treaty with Mexico, recently passed in the Senate, admits this article duty free, coming from that country, notwithstanding that extent the duty of 10 per cent, imposed one year ago and taking effect last July.

RICE—
Imports, 2714 bgs Exports, 61377 lbs

Rice has been in good demand, at 4 65@4 10 for Mixed, old, $4 70@4 75 for Mixed, new; 4 80@4 85 for No 1 China; 5 05@5 25 for good No 1, 5¾@5¾ for fair No 1, 6@6¼ for Extra No 1.

SALT—
Exports, 1155 lbs.

Liverpool fine as quoted at $20@22 50 ₱ ton. California, $6@7 50 ₱ ton; do crystal, 40@45 Carmen Island, fine, $16@22 do coarse, $12, do do half ground, $10@11

SOAP—
Imports, 181 cs. Exports, 116 cs.

We quote: Caldron Castile, Mottled, 8½@12c; White, 16, French Castile, Mottled, 10c; White, 16@17, California Pale and Chemical Olive 5½@6c; Washing Powders, 3½@4½ per gross.

SPIRITS—
Imports, 192 cs brandy, 100 bbls gin, 100 bbls rum, 1892 bbls 30 cs whiskey, 50 bbls 75 cs liquors. Exports, 48 gls brandy, 15 cs 108 gls whisky

SUGAR—
Imports, 18576 lbs raw, 271 bbls 27500 lbs refined. Exports, 27125 lbs refined.

The California demand for Refined Sugars continues excellent From New York by telegram, we learn that Granulated has been reduced to 7¾c, the market for both Raws and Refined is somewhat lower than last week. The California Refinery is now making other grades of yellow Sugars, in addition to the standard grades, which are sold, as per sample, at from six cents upward.

There have been sales during the week, by the leading brokers, of 1,000 tons of Refined Sugars, at prices ranging from 8¼ to 6½c. He has made no sales of keg sugar, there being none on hand.

An importer who received 500 kegs by the O. S. S. Alameda, as reported to have sold between 200 and 300 kegs, the prices we have not ascertained.

(A) Pat. Cube Sugar, in bbls, 10c; (A) Crushed Sugar, 10c; Extra Powdered sugar, in barrels, 10¾c. Fine Crushed sugar, in barrels, 10c. Dry Granulated sugar, in barrels, 9 ¼; Extra Granulated sugar, in barrels, 10½c; Extra C, 8¾c. Golden C sugar, in barrels, 8¾c. Dsugar in barrels, 7½; Extra Fine Powdered, in bbls, 11¼c, Confectioners' (A), 9½c; El Dorado C, in barrels, 8 ¾c, Mariposa C, 8¾c. Nonpareil, 7½c half barrels, ¼c, and boxes, ½c more for all kinds.

STARCH—
Imports, 150 bxs.

We quote: Kingsford's Pure Starches 8¾c ₱ lb; Corn and Silver Gloss, 10½c; Pearl, 7½c, Pure Starch, in barrels, 7½c; Ground and Wheat Starch, 8½c, in barrels; Silver Gloss, in barrels, 9½c.

TEA—
Imports, 3235 pkgs. Exports, 941 lbs.

WINES—
Imports, 792 cs foreign wine, 200 bskts champagne. Exports, 666 gals native.

FRIDAY . . . . . MARCH 14, 1884

The cities of San Francisco and Mexico are now in direct connection by rail—or rather would be if the Southern Pacific had not suffered by the storms, but by an indirect route, that is via the Needles, we can reach the City of the Montezumas. The marchof progress has reached sleepy Mexico.

It is good news for California that the reciprocity treaty with Mexico has been ratified by the Senate, and only now awaits the joint action of the lower House to revise the statutes so that Collectors of revenue can admit Mexican products according to the provisions of the treaty schedule. It is good news, because it enlarges the trade of our State with a near neighbor; because it will attract the attention of the Central American Republics to the advantages of reciprocity; and, lastly, because it draws the teeth of the rabid opponents of the Hawaiian reciprocity treaty, and leaves them nothing but the power of idle barking.

The most serious difficulty that vineyardists and orchardists will have to contend with in the near future is not over-production, but labor. The temper and arrogance of the Chinese is shown by their action towards the cigar manufacturers. Fortunately, those gentlemen can close their factories until such time as white labor can be brought from the East. But when grapes and fruits are ripe they must be gathered or spoiled, and if at that time the mandate should go forth from the Chinese Consulate that wages of Chinamen should be two, three, or even four dollars a day, our friends would be compelled to pay it or allow their crops to perish. We have spoken of this danger before, but so far we do not know of any of our viticultural or horticultural associations having taken the slightest notice. The members of the Board of Trade of this city, at their own cost, are maintaining a Bureau for the purpose of bringing immigrants with some capital, but it cannot be expected they are going to spend money to bring laborers to save the property of men who are quite as able, though indifferent, to save themselves. The same machinery and organization that is bringing us 26,000 capitalized settlers a year, with a very light addition to the expense, would bring us in addition 26,000 laborers, and next harvest we shall need every man of them. The question is, will the owners of vineyards and orchards put their hands in their pockets? If they do not they must suffer. A dollar now will save them ten before a year passes over their heads.

DUTIES ON WOOL.

The present duties on foreign wools are as follows:

On Clothing Wools.—Unwashed, value not exceeding 30 cents a pound at the place of exportation, duty 10 cents a pound; valued at exceeding 30 cents a pound, 12 cents a pound. Washed wools of this class pay twice and scoured wools three times the amount of duty imposed upon unwashed wools.

On Combing Wools.—Washed and unwashed, valued at not exceeding 30 cents per pound, 10 cents duty, valued at exceeding 30 cents per pound, 12 cents per pound. Scoured wools pay three times the duty imposed upon washed or unwashed.

Carpet Wools. Valued at not exceeding 12 cents a pound, washed and unwashed, duty 2½ cents per pound; valued at at over 12 cents per pound, duty 5 cents per pound. Scoured carpet wools pay three times the duty imposed on washed and unwashed wools of this class.

The cost of importation from London to Boston, including commission, on unwashed clothing wool, costing 10 cents a pound at the former place, is 1.78 cents per pound, making cost of the wool in Boston, duty, transportation and commissions paid, 21.78 cents, or 117 80 per cent over London value. On unwashed clothing wool costing in London 20 cents a pound, transportation to Boston and commissions amount to 4 05 cents, and, with duty, the cost of the wool at the latter port is 43.05 cents, or 34.48 per cent over first cost.

Washed clothing wools pay double duty; and Australian washed merino fleeces range in London from 26 to 73 cents per pound and pay double duty. Tasmanian washed wools of this class, costing 26 cents in London, pay 20 cents per pound, or 76.92 per cent duty. Port Philip washed fleece, costing in London 33 cents per pound, pay 24 cents duty, or 72.79 per cent. The duty on scoured wools of this class is three times that on unwashed. On New Zealand scoured wool, costing in London 31 cents per pound, the duty is 36 cents per pound, or 116.13 per cent on its first cost. On Port Philip scoured fleece, costing in London 42 cents per pound, the duty is 36 cents per pound, or 85.7 per cent duty.

The tariff is so arranged that imported Australia clothing wools must be brought in the grease and all combing wools either in the grease or washed, not in the scoured condition.

On wool waste or substitutes for wool, the duty is practically prohibitory, namely 10 cents per pound.

The shoe manufacturers, the clothing factories, and the directors of the many industries which are now closed to white labor by the presence of the Chinamen, should follow the philanthropic and patriotic course which the cigar manufacturers ave taken, and answer Chinese arrogance by locking them out and supplying themselves for the present with white labor from the East, and for the future supply, and to make up the ordinary vacancies, establishing technical schools for the instruction of our youth. Moreover, horticulturists and viticulturists might take a lesson, and by encouraging the immigration of white labor, prepare themselves for the day, not far distant, when Chinese exactions will make their business unprofitable if they are not prepared to meet them.

SAN DIEGO COUNTY.

Viticulture, Raisin-Curing and Fruit-Drying.

ARTICLE NO. II.

It is now generally conceded that the ripening fields have proved a vastly more precious crop than the golden grains so laboriously delved for in the bowels of the "New El Dorado." But, in a far higher proportion than that in which grain takes precedence over gold, do grapes enjoy a superiority over grain, wine over wheat. Patient investigation and practical experiments are the cogent forces that have conclusively established this incontrovertible truth. Nevertheless, though any average grape-grower can pocket $100 each year for every acre of his cultivated vineyard and may glean even twice that amount, the inexplicable fact still remains that hundreds of farmers are content to follow the old, beaten tracks of agriculture and the meagre reward of $10 to $25 per acre satisfies them.

But in San Diego the recent sale and subdivision of many extensive Mexican grants have changed the entire farming programme, and a general increase in the cultivation of the wine and raisin grape, as also the olive and fig tree, has ensued. Statistics show that in 1879 cultivated lands numbered 29,824 acres; in 1883, 53,759. Under the benediction of the copious rains of 1884, together with other stimulating inducements, the area of utilized lands will be nearly trebled. A by no means inconsiderable portion of this land now being rapidly pre-empted or purchased will be devoted to raisins that will aim to equal the Cajon, awarded the first prize in Southern California, and to the Zinfandel and other wine grapes.

The intelligent vine grower will consider the adaptability of his soil and section for the raising of this sensitive grape, as uncongenial circumstances of location and weather detract from its fine characteristics of richness and raciness.

The warm foothill granite soils impart a delicious sweetness to all fruits, whilst the sea air bestows an inviting freshness and flavor. The secret of successful money-making is to meet a demand well. Surely, then, California's most southern county has a bright future before her—for "a long-felt want" by *bon vivants* and families generally throughout the United States and the Pacific Islands and even in European countries is a pure, cheap light wine. Cheapness is the great desideratum, as the California grower has to contend with the drugged, inferior French wines in the Eastern markets. Many exposés of Parisian deceptions in claret and brandy have been made public recently, and, since the electrifying revelation that wine is manufactured from refuse fruits, the so-called glucose, the Zinfandel claret of California has won the popular Eastern patronage. Thus one home product is driving the deleterious foreign wines out of the reputable market, by simply the talisman of purity. Cheapness is the next quality requisite to bring it within the reach of all, and, this accomplished, California wines will ultimately revolutionize the lager-drinking East and West, by the substitution of her cheap, light table wines. Leading men in the State lend their strenuous support to the wine-growing movement. They assert that when California is one vast vineyard, from the Sierras to the sea, true temperance will receive an unprecedented impetus, as the full, rich juice of our native grapes is said to have a remarkably beneficial effect on the human body, decidedly different from that produced by poisonous compounds of foreign manipulation. The Rancho Santa Maria, twenty miles from San Diego bay, and over 1,500 feet high, would be an attractive site for a colony on the plan of Riverside, Anaheim or El Cajon. Thousands of acres of the moist, valuable soil of this immense tract, now prostituted from their rightful uses of fruit and wine culture to the desecration of sheep-grazing, could be made to support a flourishing settlement. Many other desirable tracts, now relegated to the office of cattle ranges, will soon be cut up into small farms, and thus the standard of the soil will be maintained, the yield increased, the products diversified.

The absence of canneries and wineries, to preserve the perishable fruits, has materially retarded the proper development of the important and promising pomological and viticultural interests in San Diego as has also the lack of adequate means of transportation to a paying market. But with the increasing demand of consumers that their lives be made as luxurious as a California farmer's, these obstructions are being rapidly removed from San Diego's horticultural progress.

Every autumn, thousands of bunches of luscious, firm-textured grapes are transformed, by the interesting process of curing, into moist, juicy raisins. Every box of choice raisins allows the producer to pocket $2, and an eighth part of a settler's homestead claim when devoted to the raisin grape is found to bring a ten-fold greater income than an eighth sown to wheat.

But the most profitable of all fruits for canning is the deliciously-flavored apricot of San Diego's dry climate, which has everywhere gained favor. Unquestionable authorities state that quite frequently a single acre of apricots has yielded $500 to the fruit producer or dryer.

Certain it is that when an appreciative view is taken of the proper basis of the future prosperity of San Diego and, in fact, of all California, the fruit and wine industries will absorb all other interests.

A. McC. C.

Mr. Wa Superintending Engineer of California Sugar Refinery, fell from the lower deck of the O. S. S. Co.'s vessel, the Alameda, on Monday into the hold. It was at first feared that he might be fatally injured. We learn this afternoon that beyond the fracture of two ribs, the doctors in attendance do not think there is any injury that will cause trouble. If they are right in their diagnosis of the case, Mr. Watson will be able to follow his usual avocations in a couple of months. Mr. Watson is a mechanic of more than ordinary ability, and enjoys the fullest confidence of his employers.

Mortuary.—Mrs. Carpy, *nee* Blanche Rety, wife of Mr. Carpy, of the firm of Andurau & Co., wine merchants of San Francisco and of Napa City, died on Wednesday last. Mrs. Carpy was a most amiable lady and much beloved and respected by all who enjoyed her acquaintance.

There is said to be a blind man in Jessamine, Ky., who is one of the best fox hunters in the country, and who can follow his dogs safely on horseback either by day or night.

THE LOCK OUT.

The Chinese Arrogance Effectually Rebuked.

A WELL CONSIDERED MOVEMENT.

PERMANENT GOOD FROM TEMPORARY TROUBLE.

A meeting of the Cigar Manufacturers' Association was held Saturday afternoon at 219 Battery Street, all the members present, together with a large delegation of leaf dealers. The Executive Committee presented the following report:

Gentlemen; Your Executive Committee, appreciating the very grave condition of our trade at the present time, have considered it a duty incumbent upon them to study the situation with calmness, deliberation and such wisdom as we can command, and suggest to the Association the most available measures of relief, not merely for the present moment, but for the future.

It must be obvious to every employer of Chinese labor, whether in the manufacture of cigars or other industries, that under operation of the United States laws restricting the importation or immigration of this class of laborers, a daily increasing scarcity results which, while dependence is placed upon that source for the supply of our manufactories, places the employers more and more at the mercy of their employees. This is clearly illustrated by the present strike of operatives in our manufactories. The Chinese as a race are shrewd, sharp, quick to apprehend an advantage, and equally prompt to avail themselves of any circumstances favorable to them. Thus, it must be apparent that no arrangements that can be made with them to-day furnish any guarantee of immunity from similar or more serious trouble in the near future. The supply of available Chinese laborers in our branch of business, in this country, is now limited, and no re-enforcement can be secured. The laborers understand this quite as well as we do. They know as well as we do that the present requirements of the trade call for the employment of every available man among them. Hence the arrogance and insolence with which they now meet their employer, and presume to dictate the terms upon which they will work, and this arrogant and insolent spirit will only increase from month to month as their numbers diminish by death and removal, with no arrivals to supply the vacancies thus created. Thus it is evident that if we wish to continue our business, we must look to other sources of supply for our labor in the future, and this alternative your committee is certain is not disagreeable to the members of the Cigar Manufacturers' Association of the Pacific Coast. Heretofore the emergencies of our trade have seemed to compel the employment of Chinese laborers, even though we hereby offended our sense of loyalty to the white races and gave cause of offence to many of our fellow-citizens. But this has been forced upon us by circumstances which we have been absolutely unable to contend against, notwithstanding the unanimous desire and preference of all of us for white labor, nor can we now immediately absolve ourselves from this dependence upon Chinamen except at almost ruinous losses. We, nevertheless, appreciate our duty as good citizens to make every exertion that lies in our power, and every sacrifice consistent with reasonable business prudence, to provide for our early absolution from this hateful and dangerous dependence, even though we should, at great cost and sacrifice, import a sufficient number of skilled white laborers from the East, the relief would only be temporary. The laboring man, whether white-skinned or yellow, has no guaranteed assurance of continued life and health. Thus, whatever temporary expedient may be now adopted, it becomes the part of practical wisdom to look well to the future, even though we unanimously substitute white labor for Chinese; importing from the East the substitute, we should either be compelled to continual recurrence to that source of supply, unless other provision is made in time to fill vacancies in our manufactories, as they will necessarily occur. While the shoe-shops, the clothing shops, the cigar manufactories and other similar industrial establishments of our Coast have been filled with Chinese laborers, the parents of white children in our midst have refrained from placing those children in such establishments as apprentices. We can but appreciate their natural paternal solicitude for the manners and morals of their children, and their repugnance to placing them in positions of familiarity with the heathenish habits, the vices and degrading practices of the masses of the Asiatics who come among us. Thus, while our white youths for worthy prudential reason have been kept aloof from the trades and pursuits to which they are well adapted, because no other opportunities of employment have presented themselves, they have been permitted to grow up in idleness; have largely recruited our hoodlum classes, and are, unfortunately and almost blamelessly, now filling our jails, industrial schools and prisons; it requires no argument to show that we now have a splendid opportunity to perform a great philanthropic work in our midst, while, at the same time, serving our own interest and directly ministering to the requirements of our trade by taking these youths and fitting them for the employment in our manufactories, where, as seen above, their labor must so soon be in requirement. Your Committee, in view of all these circumstances and conditions, most respectfully and urgently recommend that, regardless of any arrangement that may be made for the temporary supply of our manufactories, with laborers, that this Association proceed at once to fit up, establish and open a school for the education and training of white youths in the trade of cigar making. We would suggest that this be done as a joint stock or corporate enterprise, under the immediate direction and control of this Association, with such rules and regulations as would give to each subscribing manufacturer a proportionate number of the graduates of the school for employment in his manufactory, as he may require them. For this purpose, suitable rooms should be secured and furnished with the necessary tools, machinery and appliances of an ordinary cigar manufactory, a stock of leaf purchased, a proper superintendent and instructors employed, and all suitable youths offering themselves be set to work as students or apprentices, the product of their labor to be applied to defraying the expense of the establishment. The actual labor required of the student might and should be supplemented, as it could well be without cost, by lectures on the technicalities of the trade, whereby the students would acquire in a short time a greater familiarity with the calling than they could possibly acquire in an ordinary manufactory as mere apprentices, thus providing us not merely a supply of skilled laborers for our manufactories, but laborers of greater intelligence and value than we have hitherto been enabled to employ. We would make the school a model in its fittings, appointment and requirements, that the learner while acquiring a knowledge of the mere mechanical work of rolling or making a cigar, would also acquire habits of neatness, order and economy in the use of stock, judgment in its selection and other knowledge that would fit him for the actual conduct of the trade as an overseer, superintendent or manufacturer. Being fully impressed with the feasibility, desirability and importance of this scheme, your committee recommend the adoption of the following preamble and resolutions:

WHEREAS, The existing strike of the Chinese cigar-makers of this city has brought us face to face with the fact that we have now no recourse at home for the supply of laborers for our manufactories, but gradually diminishing Chinese; and, whereas, we have a large population of white youths in our midst, growing up in idleness, who would gladly avail themselves of the opportunity of becoming cigar-makers, could they do so without coming in contact with Chinamen, and, whereas a community of interest requires reciprocal terms; be it

Resolved, That the members of the Cigar Manufacturers' Association of the Pacific Coast proceed to the organization and establishment of a Technical School for the education of white youths to the trade of cigar-making.

Resolved, That for this purpose the members of this association form themselves into a corporation with a capital stock of $100,000, divided into 5,000 shares of the par value of $20 each, to be allotted to the members of the association in proportion to the number of hands employed in their several manufactories.

Resolved, Articles of incorporation of such corporation shall be immediately drawn, which shall provide for its government by a Board of Directors, with the necessary officers and a superintendent and instructors; that as fast as youths are educated in said Technical School they shall be allotted to the several manufactories for employment, in proportion to the amount of stock each manufactory may have in the corporation; that the expense of establishing, fitting up, conducting and maintaining said school shall be assessed equally upon all the stock, so that each subscriber shall pay his just and fair proportion thereof, and derive his equal benefit.

Resolved, That each member of the Association hereto subscribes his individual or firm name as assenting to the terms hereof, and agreeing to take the number of shares of stock which may be allotted to him, according to the number of employes in his manufactory, and pay the assessments thereon as they may be called.

STOCK SUBSCRIBED FOR

The report of the committee was unanimously adopted. The subscriptions were immediately opened, and the undersigned subscribed to the number of shares of stock of the Technical School of the Pacific Coast Cigar Manufacturers' Association set opposite their names;

J. W. Shaeffer & Co., 200 shares, $4,000.
Engelbrecht, Fox & Co., 200 shares, $4,000.
Ordenstein & Co., 200 shares, $4,000.
Mayrisch Bros. & Co., 200 shares, $4,000.
Koenigsberger, Falk & Mayer, 300 shares, $6,000.
I. S. Rosenbaum & Co, 300 shares, $6,000.
Sam Lewis & Co., 150 shares, $3,000.
E. Goslinsky & Co., 200 shares, $4,000.
H. Plagemann & Co., 200 shares, $4,000.
J. S. Bowman & Co., 200 shares, $4,000.
Sideman, Lachman & Co., 200 shares, $4,000.
Harris Bros., 200 shares, $4,000.
William Lewis & Co., 300 shares, $6,000.
E. Eisenberg & Bro., 50 shares, $1,000.
M. Werthemer & Co., 100 shares, $2,000.
Hahn, Levy & Co., 100 shares, $2,000.
I. Werthemer & Son, 50 shares, $1,000.
Siebenhauer, Meyerfeld & Co., 100 shares, $2,000.
Charles Jacobs & Co., 50 shares, $1,000.
Kaufman, Baer & Co., 100 shares, $2,000.
Michaltschke Bros. & Co., 75 shares, $1,500.
C. Klopstock & Co., 50 shares, $1,000.
Liebes Bros., 200 shares, $4,000.
G. Cohen & Co., 150 shares, $3,000.

The total number of shares to 2 o'clock yesterday afternoon subscribed for was 3,875 shares, or $77,500 capital.

DONATIONS.

The leaf tobacco dealers made the following contributions: L. & E. Wertheimer, $500; Esberg, Bachman & Co., $500; M. Rosensbine & Bro., $500; Joseph Schoenfeldt, $500; A. J. Brandenstein, & Co., $250; E Goslinsky & Co., $250; M. P. Kohlberg & Co., $100; Rosenbaum Bros., $100; A. Waldenstein, $250; Moses Rosenbaum, $250; Korbel Bros., $100; Gersen & Co., $100. Total contributions, $3,400.

THE OFFICERS.

The Cigar Manufacturers' Association have elected the following permanent officers: President, J. W. Schaffer; Vice-President, H. Engelbrecht; Treasurer, Rudolph Meyrisch; Secretary, J. M. Kauffman. Subsequent to the election, a committee was appointed by the President to secure suitable headquarters for the association.

The committee has secured the commodious premises on the south side of Sacramento street, between Montgomery and Kearny, formerly occupied by the Bar Association, and are having the necessary fittings set up, and are purchasing the tools. Up to two o'clock yesterday 172 girls and women registered their names with Mr. Ordenstein, 306 Battery street, and 741 boys for admission to the technical school of the association. As soon as the building is ready operations will commence. The instructors for the girls will be a competent woman, and the boys will be instructed by carefully selected male cigar makers. A Superintendent who will have the general management, is yet to be chosen. This bold stroke of the manufacturers has struck terror into the heart of the Chinatown heathen and the consular office plotters.

THE CIGAR MANUFACTURERS.

Chinese Consular Interference.

EDITOR MERCHANT.—*Sir:* In the report of the Cigar Manufacturers' Association meeting of Saturday the keynote of the present strike of the Chinese operatives is sounded when it says that the strike "was first inaugurated in the Chinese Consul's office, and is part of a concerted plan to force the Pacific Coast to beg for the repeal of the Restriction Act."

In proof of the correctness of your assertion, it is only necessary to direct attention to the fact that it has already been asserted on the floor of Congress, as an argument against the passage of the amended restriction bill, that there is now a scarcity of labor on this coast, and that our industrial enterprises are seriously embarrassed because of the partial stoppage of Chinese immigration. It is a well-known fact that the diplomatic representative of the Chinese Government in this country dictated the veto of the first restriction Act passed by Congress, and influenced the modification of the existing law, both as to the length of time during which the restriction should be operative, and the classes to be excluded. It is also as well known that the utmost efforts of diplomacy have been brought to bear upon the State and Treasury Departments of our Government, as well as upon the Judiciary, to secure such interpretations of the existing law as to permit of the landing of the greatest number of Chinese on our shores. Colonel Bee, the Vice-Consul on this coast, has repeatedly and openly boasted that our people would soon be begging for more Chinese laborers. He has written this so many times that he is now beginning to be anxious to see it come true. Hence his efforts to induce the Chinese laborers in our manufactories to strike, that the employers may be forced to cry out for a more liberal supply; and this first strike is now greedily seized upon as a justification of his position, and the announcement is sent East by him that our industries are entirely stagnated by the operation of the Restriction law and our people are clamoring for its repeal.

In my judgment, Mr. Editor, the Cigar Manufacturers' Association is entitled to the hearty thanks of all good people that they have not weakened under this official Mongolian pressure, but, on the contrary, have taken steps to secure absolute immunity from dependence on Chinese labor. In the technical school they are establishing for the education of our white youths as cigar-makers, they sign a declaration of independence which, if all other trades would follow, would be even more effectual than the Restriction law in ridding us of the Chinese. In this action they give the lie to the official Mongolian assertion that we are anxious for the repeal of the Restriction law, and emphasize the popular desire for its more thorough and absolute enforcement by showing that we have available sources of supply in our own midst for all the labor we need, without relying upon the imported coolie labor of Canton or other slave-exporting regions of the overcrowded Empire of China. Let us stay up the hands of the cigar manufacturers in their new and patriotic departure, and encourage other trades to follow their noble example, and the Chinese question will be settled on this coast without the problematical interference of Congress, whatever the influence of representatives of foreign governments upon that body may be.

TOBACCO MARKETS.

SAN FRANCISCO.—Tue leaf market is utterly stagnant owing to the White Cigar manufacturers having locked out their Chinese hands. The full account of the present condition of the struggle for supremacy between the owners of the factories and the Chinese cigar makers will be found in another column.

The demand for cigars is very fair and the manufactories have enough stock on hand, to meet the wants of their customers for some time. They, by their activity during the winter months are well prepared to face the struggle

Manufactured tobaccos continues to move in moderate quantities Of course the condition of the railroads in the interior somewhat limits business, but the outlook as the weather improves was never better

The Internal Revenue Department of this city reports sales of stamps as follows.

Cigars	$38,085 38
Cigarettes	137 00
Tobacco	745 05

The cessation of manufacturing for the present will not materially reduce the revenue receipts during the present month as manufacturers have good stocks of unstamped cigars on hand, and no three or four weeks or less there will be 2,000 white cigar makers from the East in full work in this city.

Total imports by sea and rail, 10,972 lbs Manufactured Tobacco, 34,986 lbs Leaf Tobacco, 27 cs Cigars, 32 cs Cigarettes. Total exports by sea, 591 lbs Manufactured Tobacco, 2,848 lbs Leaf Tobacco.

[U. S. Tobacco Journal.]

NEW YORK, March 1st —There was no change in point of sales in the market. There will be no change in this respect, either, for a good while to come. The only change that will take place, and that most assuredly so, will be higher prices for what is labeled as line tobacco. But then a lit what you will; if it is better than the last, it will sell and bring adequate (or make quarter) figures. There is so little of useful Sumatra now left in the market that the bugaboo of the leaf trade is at present exceedingly harmless. The new crop cannot be fairly offered in Amsterdam at the end of April. We have seen samples of it They looked bad; but as we have a faint suspicion that the best, or even the good, was not shown to us, any expression of opinion upon the crop we submit would be premature at this place. Certain it is that the new Sumatra will not be sold for a great deal less than present quotations at Amsterdam if growers will really carry out the generally adopted programme of raising Havana seed this year, the price of Sumatra will have very little bearing upon the market What agitates the minds now of packers, jobbers and manufactures is how to bridge over the spring, summer and fall for fine tobaccos. It stands to reason that whatever of the '83 crop turns out fine will be picked from the mass in very rapidly and, as can be imagined, at but little profit to packers. If, as we said before, Havana seed is raised this year almost exclusively, it will be bought when barely out of the ground.

[New York Tobacco Leaf.]

NEW YORK, Feb. 29th.—*Western Leaf*—The past week's transactions sum up 1,084 hogsheads as reported. They include sales effected previously

Spanish.—The week's transfers embraced 500 bales at 80c to $1 55

A large stock is still in the warehouse, held by growers and warehousemen. It will even exceed the wants of consumers in case this present year's crop falls in any degree.

If it is desirable to increase the crop of tobacco in the Vuelta Abajo, with a prospect of selling easily, it will be necessary to produce it more cheaply.

Prices have reached the highest point, and the merchandise suffers consequences which cannot be appreciated, by delays and losses of interest, and also by the extra duties in the direction which has to be decided among the consumers whose position permits them to use it To produce less or cheaper is the dilemma.

One of the causes which have burdened our market is the enormous amount of tails or strips which growers have brought to the market during the past three years.

This has been favorable to the manufacturers of cigarettes, but the reduced price and the refusal to complete sales in the majority of cases, should teach producers that it would be much better to leave these tails as manure on the lands.

Cigars.—Business this week has shared the dullness of the Seed leaf market, the reported sales not exceeding 200 bales, at from $1.40 to $1 80. Stocks in first hands are being rapidly depleted, which causes selections more difficult to make. Prices remain very firm.

Plug.—The demand has been good, but buyers and sellers are not yet in accord on the subject of prices so that transactions are of less magnitude than might otherwise be expected. Exports, 80,857 pounds.

Smoking.—Full average sales are reported.

Cigars.—We note a fair inquiry.

Trade Failures.

There were 237 failures in the United States reported to *Bradstreet's* during the week ending March 8th, against those in the preceding week, which had one holiday, 23 less than the corresponding week of 1883, and 85 more than the same week of 1882 This is the first time in the current year that there has been any material increase as compared with the corresponding week of 1883. About 85 per cent were those of small traders whose capital was under $5,000 Compared with the previous week the middle states had a decrease of 14; New England states 28, an increase of 2; southern states 58, an increase of 7; western states 79, a decrease of 3; Pacific states and territories 18, a decrease of 1; Canada had 38, an increase of 5. In the principal trades they were as follows: General stores, 41; grocers, 38, honors, 18; dry goods, 14, drugs, 13; shoes, 12; hardware and agricultural implements, 12; manufacturers, 8; produce and provisions, 8; clothing 7; furniture, 6; hotels and restaurants, 6, grain and flour, 5; bats, 5; books, stationery, etc., 5; tobacco and cigars, 4; carpenters and builders, 4; bakers and confectioners, 3; coal and wood, 3; fancy goods, 3, lumber, 3; millinery, 2, harness, 2; carriages, 2; stock brokers, 2

The British Grain Market.

LONDON, March 10.—The *Mark Lane Express*, in its weekly review of the British grain trade says: The fine qualities of White Wheat are firm, in some of the provinces from 6d so 1s dearer. Flour is dull. The foreign Wheat trade is rather worse, owing to more pressure to sell. A few California cargoes off the coast were taken at an advance of about 6d Sixteen cargoes have arrived, seven were sold, one withdrawn, and nine remain, including eight No. 1 California. The sales of English Wheat for the week are 64,505 qrs at 37s 7d per qr, against 47,497 qrs at 42s for the corresponding week of last year.

FREIGHTS AND CHARTERS.

The disengaged tonnage decreased from what it was two months since until a week ago, when arrivals again enlarged it. The copious rains and the prospect of a large crop have stiffened the views of ship owners who have waited for San Francisco business to improve, and they now demand higher rates. So far however, we cannot report anything like paying rates though the latest charters for wooden vessels have been drawn at 30s and 31s 3d Cork for orders for U. K., Havre or Antwerp. Yesterday the British ton ship British Duke was taken at 32s 6d Cork for U. K with option of the usual. Continental ports at the regular advance.

The engagements of the week have been: Ship St. Nicholas, 1,788 tons, wheat to Cork for orders to Liverpool, Havre or Antwerp, 28s 9d; direct port 3d less. Ship Snow & Burgess, 1655 tons, spars from Puget Sound to New York: $19,000 net, charterer to load ship—chartered prior to arrival. Hawaiian bark Kalama, 382 tons, returns to Honolulu. German brig Mary, 198 tons, merchandise to Europe; private—chartered prior to arrival. Schooner Anna, 228 tons, lumber from Humboldt to Kahului. British bark Corinna, 1,000 tons, wheat to Cork, U. K.; 35s. Chartered by Starr & Co. Schooner Claus Spreckels, 234 tons, returns to Kahului. British ship Bowden, 1624 tons, wheat to Cork for orders; 30s 6d to 31s; 30s. Ship Harvester, 1494 tons, coal from Nanaimo to this port. Schooner Corona, 375 tons, now loading for Seattle, proceeds thence to Port Blakeley to load lumber to Panama. Ship McLaurin, 1312 tons, wheat to Cork, U. K., Havre or Antwerp; 31s 3d. British bark Ada Browne, 960 tons, wheat to Cork, U. K., Havre or Antwerp, 30s. Schooner Chas. Hanson, 183 tons, merchandise to Honolulu in the Hawaiian Line.

MEAT MARKET

Mutton is temporarily scarce, on account of the late storm, and prices have advanced a trifle in consequence.

Hogs of good quality are scarce. Most of ahose now arriving are soft corn and grass fed. Following are rates for whole carcasses from slaughterers to dealers

BEEF—First quality, 6½@ 10; second quality, 7¼ @ 8c; third quality, 6½ @ 7½ c ₱ lb.

VEAL—Large Calves, 7 @ 9c; small ones, 7c to 11c ₱ lb.

MUTTON — Wethers are quotable at 7@7½, and Ewes at 6@7c ₱ lb.

THE WINE MARKET.

Dealers are well stocked with wine, but desirable lots of they could be had would command full prices. The family trade now is moving slowly at 65 cts at 70 to 75 cents for barrels and halfs, gauged previous to January, 1884, delivered in bond in San Francisco.

Older brandies are slow of sale and transactions have to be forced at the cost of sellers

Spirit of the New York Markets

NEW YORK, March 5th.—The general merchandise markets show very few important fluctuations in prices during the period under review Trade is hardly equal to the expectations indulged at an earlier stage of the season, and the reason assigned for the continued dullness is bad weather, the incertitude as to pending legislation in connection with fiscal affairs and the falling off in the export trade. Our most sagacious merchants and bankers have not believed, and do not believe, in a sudden recovery of confidence and consequent activity in trade, but they certainly did think that the advent of Spring would give more of an impulse to business than is now perceptible. The lack of confidence, being the result of a continued depression, is more difficult to restore than if it resulted from a sudden shock, as acute diseases of all kinds can be more easily and quickly remedied than those which are chronic. The natural growth of business from the forced necessities of depleted stocks; a careful building up on solid business principles appears to be the outlook for the future; and the prosperity so gained must, in turn, be more substantial and permanent than could be occasioned by a hasty change. The industrial situation is unchanged and the manufacturingcities continue to send in unfavorable returns.—*N. Y. Shipping List.*

THE WOOL MARKET.

The wool warehouses in this city are clearer than they have been for three years past, in this month There are of course a few small lots of wool unsold, and there have been a few trifling transactions during the week with loval buyers

The spring clip it is said will this year be a month later than usual in consequence of the backwardness of the season. But it is also expected that the staple will be much better both in length and condition in consequence of the late rains and abundance of feed

Some eastern papers still continue to howl about the worthlessness of California wool, but their abuse has little effect on manufacturers as the fact that our warehouses are nearly clean of stock show. Still there is a ground for complaint against our sheep men, regarding the careless manner in which our fleeces are handled and it would be foolish to ignore the fact that we are not doing our best to put our wool into saleable condition

The latest telegrams from New York, Boston and Philadelphia report wool quiet but prices steady. The probable defeat of the Morrison bill, though the tariff in existence to June 30th last year is not likely to be restored, puts our flock masters in better spirits

Some Notes about Canned Goods.

The business of canning almost everything that is used for food began within the recollection of men still young, and has grown to enormous proportions, involving the expenditure of millions of dollars annually. Corn was the first vegetable canned, in Portland, Maine, in 1854, the canning of tomatoes being begun about the same time in Boston. The canning of fruits began about ten years later, and of meats about 1872. The canning of soups of various kinds, pea soup, terrapin, mock turtle, tomato, beef and chicken, appears to have originated in Boston, and during the war, whiskey in the guise of canned pea soup occasionally found its way through the agency of a sutler to the tent of the thirsty soldier. A Long Island man began the canning of clams in 1870, putting up Little Neck clams, known in Rhode Island as quahaugs. Soft clams were first canned in Portland, Maine, and clam chowder, which tastes sufficiently like King Hiram's to tantalize the discriminating appetite, was first canned in 1880. Columbia river salmon, tripe, tongue, ham, corn beef and, in fact, everything edible is to be found in cans. It is claimed that canned goods, properly sealed, ought to remain in good condition for even ten years. An experienced dealer says that pineapples and peas ought rather to be benefitted than injured by being canned for five years or so, particularly the pineapple; on the other hand, tomatoes and peaches, while remaining in perfect order for years, are fully as good fresh as at any time. The same dealer has known a can of corn beef to remain in perfect order for eight years. He said, however, that it was important that the contents of a can, when once opened, should be turned into some other vessel, otherwise the atmosphere, acting through the acid upon the tin, might cause deleterious results. The law now requires soldering to be done from the outside, instead of the inside, which he regarded as a great improvement.

The four leading items in canned goods are tomatoes, corn, peas and peaches; next spinach, succotash, lima and string beans, cranberries and asparagus. There is also a large demand for apples in cans. Strawberries are a difficult fruit to can, for, while retaining their flavor, they usually lose their natural color and come out the color of the dark brown liquid in which they are canned. Canned salmon and lobster are largely exported to England.

The tin for canning is all imported, the supply being controlled by English houses, this great American industry thus paying a large but inevitable tribute to Great Britain. Much of the tin goes back, however, in the form of cans containing American product for the British market. Some large houses make their own cans, but most of the cans are made in factories devoted to that manufacture alone.

The market for canned goods has been very dull, owing to over-production, but low prices are stimulating activity. Baked beans go principally to the Pacific coast and the West. The canned goods business forms about ten per cent of the trade of the average retail dealer. It is chiefly confined to the United States, as far as manufactures are concerned, though the meat products are largely imported. An attempt in Mexico and South America to can green turtle appears to have proved a failure.—*New England Grocer*

"Where shall we find our teachers?" asks an educational exchange. Well, many of our sweet girl teachers may be found sitting on sofas with nice young men, any time after 8 o'clock P. M.

The life of a Kentuckian has been shortened by tobacco. A hogshead of the weed fell on him and crushed him out of symmetrical proportions. It cannot be denied that tobacco in large quantities is injurious.

"If there's anything I love, it's roast goose," remarked Pendleton, as he passed up his plate for a second helping. "It does you credit," said Fogg; "there's nothing so beautiful as affection among the members of a family."

VINE CUTTINGS.

SPECIAL REDUCTIONS

FOR

Nursery Purposes.

Being in danger of having a surplus of vine cuttings, on account of the unfavorable season, which prevents proper preparation of vineyard land for planting, I shall offer my remaining stock of the following varieties at reduced rates, preferring to sacrifice in cost, rather than to suffer these choice lots to be wasted. Those who intend to plant next year may take this opportunity to plant nurseries.

RIESLING	30,000
ZINFANDEL	160,000
BERGER	35,000
FOLLE BLANCHE	20,000
SAUVIGNON VERT	9,000
MEUNIER	40,000
CHAUCHE NOIR	35,000
MALBECK	12,000
RIPARIA	50,000

"The Wine Press and the Cellar."

A MANUAL FOR THE WINE-MAKER AND THE CELLAR-MAN.

DAILY CALL, OCT. 18, 1883.

THE WINE PRESS AND THE CELLAR.—A manual for the Wine Maker and the Cellar Man, is the title of a work just published, from the pen of E. H. Rixford. The work, the author says in the preface, is the result of research by himself, chiefly for his own benefit, and in going over the literature of the subject of wine making, he failed to find a work in the English language which is adequate to the needs of the practical wine maker. The book is intended to supply the deficiency. Elaborate statistics of the California wine product are given. Besides the preface, the work contains twenty chapters, each embracing a distinct subject relating to the manufactures of the various wines and putting it up for market; defects and diseases of the liquor; mixing wines; analyses, etc., with forty-two illustrations in all. The processes begin with the gathering of the grape, following each step and the processes attending it, in the manufacture; treating of the various qualities, and the causes upon which the various differences depend. The book contains 240 pages, and is thoroughly indexed.

[S. F. DAILY EVENING BULLETIN.]

"The most timely California book of the season." * * * It is safe to say that no work adapted to California wine-making and wine-keeping, which has yet been published is at all approachable to the volume under consideration. The arrangement, classification, and indexing shows a wonderful amount of care. The indexing is so thorough and the classification so perfect, that the person desiring to consult its pages for any particular information desired, pertaining to the special subjects of which it treats, can readily refer to it.'

WHICH IS THE BEST SYSTEM OF MILLING?

In your worthy paper, I read some time ago, that a new process flouring mill which was imported by me as agent, for other parties, was to be tried and experimented on. I come now to enlighten you on the subject, as to the results obtained. As you know, flour milling, is extending to large proportions in the country, for the simple reason that grain products are increasing every year and, bad enough to say, the time is coming when our export of grain will be closed and our farmers will be ruled out of other countries, unless cheaper navigation and other ways of transportation come to their rescue. At present our only resource is shipping flour; for this reason we must find the most adequate way of milling, by looking at all the modern processes and determine which will be the most advantageous, for the sake of reducing cost prices. Now, shall it be by the recently introduced process of Rollers alone or any other, which may be as profitable if not more. This is the point which must guide us and not the great number of Roller manufacturers and the so-called scientific men, very often paid to demonstrate that flour should be made only by the Roller process. Professor Kick is one of the scientists who confines himself to the Roller process; like the physician who invariably prescribes one medicine for all diseases, by these means such professor will soon become a laughing stock and will lose standing and the confidence of the public. Invariably his conclusive experiments are on paper only and do not deserve notice, not even when he advances that disintegrators require more horse-power to accomplish a given amount of work than a pair of burrs or rollers will and to refute the opinion of the Professor, a disintegrator, as he is willing to call it, which we will designate a flour mill, shall be shown to prove the contrary by a difference in its favor of 300 per cent against burrs or Rollers. Science should show us what is beneficial and aid us in accomplishing the best results, by pointing out the quickest, cheapest and most satisfactory machinery without letting personal preferences and sometimes interest interfere. This would be the course of a scientific man who aims at being of some use to the public.

Professor Kick has become aware, although otherwise a competent professor, that he can make mistakes by recalling his impressions when he announced the impossibility of the Atlantic Cable. Let him not be too sanguine on the Rollers by pretending that it is the only machinery to make fine and cheap flour. It is strange that a man of such deep science on flour is not aware that neither the Hungarian Rollers nor the American improved Rollers form a perfect process or can produce and show such a fine quality in all respects notwithstanding the hobby of Mr. Theodore Voss on the *germ question*) as the French burr mills at Altford, near Paris. Other mills in other sections of France are producing flour in *percentage* and *quality*, defying all other systems existing, notwithstanding the *germ question* they have to contend with.

The mechanical processes through which grain goes in flouring are so complicated that no fixed, peremptory rules should be laid down for the guidance of millers, not even those formulated by professors for the value and guidance of machines. Practice is only to be depended upon. Theory is one thing and practice another and the latter is the best. A wide divergence of opinion upon the merits of this or that machine and in methods of milling is offered by professors, according to the amount of money paid them by the owners of the respective systems. What we want is facts; good flour, and produced cheaply so that we may sell it at a profit and not be undersold. Mill men should not be controlled by foremen and professors; let them use their own judgments as to the true facts.

Tonya's patented flour mill comes to compete in this country as you are well aware. It is true that it had a sham trial, and to this the inventor objects, that a single experiment should not be a sweeping conclusion, the mill not even being set properly, and that the experiment was made on three different days with only two sacks of wheat each time. The capacity of the mill being one pound of wheat per second; this will show to any practical man the good will shown to this mill. This is why it should be called a "miniature test" by one who had a decided bias in favor of the Roller method. To obtain a fair trial the man called to run this mill should have been one personally interested in milling, trying to protect his capital by selecting the best machine to accomplish his desired ends without favor or prejudice. It should not be a miller (foreman) nor an engineer "specialist" who are very often induced by their personal preferences and interest to advocate a certain class of machinery and condemn any other kind. This mill when tried was not under the control of the inventor; for this reason he has concluded to show to the people of this coast the efficiency of his process by shipping at once a mill to his general agent in this city, so that he may have it set up and run according to his instructions and that every person interested in the milling business may judge for himself. If each should find it answer their purposes, the inventor will indnce them by his low price to purchase. Although a mill of the capacity of three hundred barrels per twenty-four hours, it occupies a very small space, say forty inches square on the floor and is four feet high. The power required is thirty horse, bolting power not included. This sample mill is now on the way from France and I will let you know as soon as it is ready for inspection. A quartz mill on the same system is also on the way to be set up and shown to all interested in quartz milling or any other kind of reduction or pulverizing to any degree desired in daily work. We want in this country every improvement for developing our industries, no matter where they come from. Hoping that you will favor me by inserting these few remarks, I remain,

LOUIS TARDOS.

Sole Agent for the United States and Mexico, for Tonya's Patent Flour and Quartz mill.

Our Rival Wheat Producers.

We printed in a recent issue some statistics of the grain trade of Great Britain, showing the extent to which American wheat has been supplanted in that market during the last two or three years by the product of British India, Russia, etc., partly by the aid of our speculators in maintaining prices above the parity of the trans-Atlantic markets. It is to be feared that the ground we have lost in these foreign markets for our wheat and other food stuffs cannot easily be regained. The development of the wheat-producing capacity of India, which is practically without limit, is part of the policy of the British Government. To that end, railroads have been extended from Bombay into the heart of the wheat-producing region of India, and transportation facilities between Bombay and Europe have been so increased and cheapened that the Indian product is being laid down in London and Liverpool at a smaller cost than our speculators have been willing to accept for American wheat. Russia is likewise increasing her exports of wheat to the markets of Western Europe, which are also drawing considerable supplies from Australia. Until quite recently it had been confidently assumed in this country that American wheat was supreme in the markets of Europe; that, because of the superiority of our soil, of our agricultural implements and of our system of transportation from the interior, we could have no formidable rival in this branch of agriculture. But in this, it would seem, we have been laboring under a mistake. India and Russia have not only been provided with transportation facilities, but also with improved American agricultural implements, which have enabled them to carry on a sharp and successful competition with us. The vice of speculation has not only been a great aid to India and Russia in their efforts to gain supremacy in the European markets, but it has maintained the cost of bread to our own consumers higher than it ought to have been, in consideration of our super-abundant supplies. The prices realized by grain-growers do not justify the prices paid by consumers. The stocks of wheat are controlled and manipulated by syndicates of capitalists, who force prices up and levy unjust and oppressive contributions from every one who buys flour by the barrel or sack, or who resorts to the still more expensive expedient of patronizing the baker. Full crops, in a normal condition of things, will always secure cheap bread, and that, too, without seriously interfering with the profits of grain-growers; but so long as a few men can command unlimited capital and suspend the natural laws of trade, consumers will have to pay exorbitant prices, and the European markets will continue to make good their deficiencies from the garners of India, Russia and Australia, rather than pay extreme prices for our surplus.—*N. Y. Shipping List.*

American and French Wines.

Reports of adulterated wines continue to reach us from France, and yet these wines have a large and ready sale in this country while pure American products are largely neglected. Six hundred and fifty bottles of wine, bought in different parts of Paris, have been analyzed at the municipal laboratory and the wine was pronounced pure in only 60 cases. The critical condition of the French wine trade may be judged from the fact that, in spite of adulteration and manufacture of sham wine, no less than 7,158,789 hectolitres of foreign wine were imported into France during the first ten months of this year as opposed to 5,788,115 during the corresponding period of last year. On the other hand the exportation amounted to a little over 2,000,000 hectolitres, a very slight increase. It is said that some of the California vintners have resorted to the questionable experience of disguising their wines with French labels and putting them upon the market as products of France. This is wrong. The California wines should stand upon their own merits. There is one thing that might with propriety be done. The last Congress passed a bill providing for the return or confiscation of adulterated teas, and a similar law in regard to wines would be of incalculable advantage to American wine producers and consumers. An analysis of wines would soon have the effect to place the native and the foreign product in their proper relation to each other. It is unquestionably true that the French have a very valuable trade mark in the wine trade. Their experience extending through several generations, and the reputation which has grown out of that experience, give dealers in French wines such an advantage that even if the superiority of our wines was demonstrated, the trade would for a long time remain in their hands. A good many consumers are content to throw the responsibility of selecting wines on the label. There are certain foreign varieties which are what they purport to be, but there can be no doubt that our markets are constantly flooded with doctored stuff which ought in some way to be inhibited.—*N. Y. Shipping List.*

Spring shearing has commenced in Southern Texas. Shearing in California will be later than usual.

Special Inducement.

[illegible] Special Inducement to our Viticultural Friends [illegible] and the general viticultural interest [illegible] which is their recognized organ, THE SAN FRANCISCO MERCHANT will [illegible] to any person sending us the name of [illegible] subscribers with their subscription [illegible] a handsome copy, bound in [illegible] cloth, of

THE WINE PRESS AND THE CELLAR.

BY E. H. HEINRICH.

For price and notices see advertisement in another column.

A VITICULTURAL CONVENTION IN FRESNO.

The vineyard owners and colonists of Fresno are very desirous that Commissioner West should call a District Convention of grape growers, wine makers and raisin curers in Fresno, and they promise most hospitable entertainment for all members of the Commission and other practical wine makers and experts who will visit them. There is no denying that Fresno has been neglected, and that a groundless prejudice has grown up against their wine products, which the result of last season's labors shows has been unjustifiable. This request of the Fresno people we think should be granted, and we hope that Mr. West will make early arrangements for such a convention. These good people, especially the wine men, do not profess to know it all, and are willing to learn, at every opportunity, but it is necessary that those who would teach should know something of the conditions by which their pupils are ruled and look at what they have already done. Telling people that they cannot make dry wines in Fresno when they have done it does not tend to give them much confidence in their would-be teachers. At such a convention held in Fresno we believe those who would learn most would be those who until lately held that no dry wine could be made except within one hundred miles or so of this bay, and until a year or so ago denied that Los Angeles and Anaheim could make anything but ports, sherries and sweet wines. San Diego has put in her claim this year on one or two samples we believe and her merits are admitted—why then refuse to examine the grounds on which Fresno claims recognition?

The Fresno *Republican*, in its last issue says:

The Viticultural Commission has done good service for viticultury in California, and has especially looked after the interests of sections adjacent to San Francisco—that is, Napa, Sonoma, Santa Clara, Alameda, Contra Costa and Sacramento counties have been especially benefitted. Last Summer the Commission attended in a body the district convention, called by Hon. L. G. Rose, and examined the vineyards and products of Los Angeles, Anaheim and other places. This winter several of the commissioners spent some time in San Diego, and gave a stimulus to wine and raisin culture in that county.

But Fresno has hitherto been neglected. Our own Viticultural Commissioner, Hon. George West, of Stockton, has never visited our vineyards, though he is personally interested in a young vineyard within the borders of the county. Now we believe that Mr. West has never exceised his authority by calling a District Convention, and we rise to ask why he should not call one at Fresno this spring. This is the most central point for the wine-makers and raisin-growers of this valley. We should be highly pleased to entertain President Haraszthy, Chief Executive Wetmore, Isaac De Turk, Charles Krug, R. B. Blowers, the raisin commissioner, also L. J. Rose, J. De Barth Shorb, and other wine-makers, such as Charles Kohler and some of our Anaheim friends, if they will come and see us, look at our vines, taste our wines, and give us their honest judgment and such advice as will aid us. If Prof. Hilgard, of the University of California, would come with such a party it would add greatly to the pleasure and interest of the visit. Will not Commissioner West call such a meeting? Do not the vineyardists of Fresno by the amount of their investment in viticulture deserve this recognition on his part? We think they do. In behalf of Fresno county, the *Republican* will guarantee that all visitors on such occasion will be hospitably entertained.

Grafting Bad Varieties.

Even in a county so comparatively new as Fresno, we are cursed with acres upon acres of the poorest varieties. The vineyardist who has a part of his vineyard in Rose of Peru, White Nice, Mission, Tokay, Chasselas, etc., contributes just so much, in proportion to the number of plants he has, to give discredit to the State. It is no excuse for him to say that he produces brandy, as poor kinds make poor brandy, which is a drug in the market. An effort, which promises to be a successful one, is now being made all over the State to improve the quality of the wine and brandy, and the vineyardist who plants varieties only for quantity, or still nurses his old and poor kinds, will soon find himself badly left, as he justly deserves. We read with amazement in the Los Angeles papers that Governor Stoneman and others are yet planting hundreds of acres of Mission grapes—the Mission, which has been a curse on the reputation of our vineyards for a quarter of a century. The idea that this grape was one of the finest sherry grapes of Spain has proven a most erroneous one, and it is much more likely that it is a seedling from some Spanish varieties brought out by the padres. Indeed, out of 1,000 seedlings of the best varieties, 999 are worthless, and it is therefore no wonder if the Mission is one of them. The sooner all of us come to understand the worthlessness of a number of varieties the better for us and for the State. From now until April is the proper time to change the poor kinds into good ones. The Mission and many more should be grafted to Cabernet, Carignan, Grenache, Sauvignon, and all the varieties of sherry and port wine grapes of real value. One season's crop will be lost, but this will be more than repaid by the increased value of the next year's production, and we would then be able to supply dealers with good wines, instead of poor stuff. When, from pecuniary reasons, a vineyardist cannot afford to graft over all his bad vines in one season, he should, however, not neglect to accomplish what he can. Another thing we would warn wine producers against is the attempting to make sweet Muscat out of Muscat of Alexandria or Gordo Blanco. It is not the grape for the purpose. The Grimavis de Frontignan is the best grape for this purpose, and some of the small-berried Muscatells are also available. But, by all means keep the raisin grapes out of the cellar.—*Gustav Eisen, in Fresno Republican.*

Mr. A. D. Bell, editor of that excellent weekly journal, the SAN FRANCISCO MERCHANT, spent several days in Fresno this week, examining the viticultural resources of this section. Mr. Bell expresses both pleasure and surprise at the advancement made in this industry by Fresno vintners, of which, he says, the outside world has, as yet, but little knowledge. Mr. B. is a pleasant gentleman, and we hope will be a frequent visitor to our city.—*Fresno Republican March 16*

VINE CUTTINGS.

SPECIAL REDUCTIONS

FOR

Nursery Purposes.

Being in danger of having a surplus of vine cuttings, on account of the unfavorable season, which prevents proper preparation of vineyard land for planting, I shall offer my remaining stock of the following varieties at reduced rates, preferring to sacrifice in cost, rather than to suffer these choice lots to be wasted. Those who intend to plant next year may take this opportunity to plant nurseries.

27,000 Acres of Choice Vine Fruit, Olive, Alfalfa and Grazing Land to be Sold in Large and Small Tracts.

To hasten the development of the colony now growing up in the Cajon Valley, San Diego county, the El Cajon Land Company will temporarily suspend the sale of its stock and will make most favorable offerings to induce rapid settlement of the country. The 27,000 acres controlled by the Company will, until further notice, be offered in tracts, as follows:

First—The 2500 acres of platted, leve land, in lots from 5 to 160 acres—uniform in quality—at $60 per acre, cash. These lands are most favorably situated for vine, olive, citrus and fruit culture, or for making pleasant homes, where the benefits of climate only are sought. Adjacent lands of same quality cannot be purchased at less than $100 per acre. The Cajon Valley already has the nucleus of a fine settlement, a school-house, church, post-office, hotel, etc. About 500 acres in vines and trees are already planted.

Second—The so-called "T." tract, containing 10,000 acres of land, comprising 2,500 acres of valley land, 1,500 acres of rolling mesa, suitable for grain, and 6,000 acres of hills suitable for grazing, will be sold entire. This would make a first-class stock ranch, or could be cut up advantageously for a small colony; wood on this tract is estimated at 20,000 cords. The price will be so low that an investor may subdivide and sell off 1,000 acres of the valley land, and clear all his expenditures.

Third—The so-called "Monte"—a tract of 1,000 acres of the richest alluvial soil along the San Diego river; carries about 20,000 cords of wood. This land in any upper county of the State would sell for $150 to $500 per acre. It will be sold entire, together with adjacent hills.

Fourth—The grazing lands of the "S." tract between the platted lands and the "Monte," about 10,000 acres, partly suitable for cultivation, will be sold either together with the Monte, or separately.

MALVASIA AS A WINE AND A BLEND.

ANAHEIM, March 8, 1884.

EDITOR MERCHANT:—In the *S. F. Bulletin*, December 12, 1883, is the following item:

"A wine dealer in this city who has had a large experience told us the other day that in his judgment Malvasia wine rapidly deteriorated after the first year, and it was a positive injury to mix it with Zinfandel, or even with any Mission, unless it was for immediate use."—*S. F. MERCHANT.*"

The Malvasia grape is largely planted in this section of Los Angeles County and therefore the above paragraph is calculated to seriously injure the interests of vineyardists and wine manufacturers who annually handle this fruit; in justice to these interested parties in question, it is but fair that a more minute explanation should be given by the originator of the paragraph quoted.

Individually, I must in all deference to the writer state that I have the Malvasia blended with a proportion of Mission as a port wine and, instead of it deteriorating it most decidedly improves. I also have Malvasia as a claret of 1882 vintage improving (in bottle) without a question of a doubt.

I also have Malvasia with a little Rose of Peru 1882, as a Port, anything but deteriorating, and 1883 crushing of the same fruit finds me in possession of Port wine that cannot easily be surpassed for taste, bouquet, deepness of color, and purity of condition. My claret, Malvasia 1883, is all that could be wished for by those who like the bouquet in preference to a Mission; Malvasia blend in fact is coming into more favor every year by consumers of second class Claret. Malvasia alongside of Mission I need not compare; more competent judges than I well know the difference, and so far as my wine is concerned I am proud of it, and do not fear the least when the time arrives, for the public to pass the verdict upon the same. In my opinion, to blend Malvasia with Zinfandel would be sheer madness, both being wines of specially strong bouquet. A little apart from my present notice of your author's remarks, I would here ask permission to state that I have yet to find Malvasia wine smell after having entered its second year or even completed its second year's maturity, as was stated on a previous occasion by a city merchant in San Francisco, and again quoted at the last Viticultural Convention in Los Angeles.

It is universally known that all wines are highly susceptible of taint, especially where the strictest cleanliness is not exercised, and I fear the Malvasia wine has been the sufferer in the instance referred to.

In conclusion, Mr. Editor, I trust some authority will take this matter up and do that justice to the Malvasia fruit that I really consider it deserves. I am no vineyardist and do not need to crush one ounce of the fruit but of my own free will; consequently, I write not from any interested motive, but purely with a wish to see the Malvasia fruit placed in that position that I honestly think it deserves.

THOS. P. HINDE.

The wine dealer referred to in the paragraph quoted is Mr. Charles Kohler, of the old-established firm of Kohler & Frohling, of San Francisco, Sonoma and Los Angeles. Mr. Kohler, to whom we have shown Mr. Hinde's letter, adheres to his view, as expressed to ourselves, and repeats the statement he publicly made at the last State Viticultural Convention held in this city regarding the worthlessness of the Malvasia grape for wine making. He makes, however, this reservation, that he is judging Malvasia by the wine or blend it makes in Sonoma and Napa counties. He has not, to his recollection, had any opportunity of judging of the Malvasia of Los Angeles, Anaheim or Fresno. In those, and other counties with similar soil and climate, it may do better than in the northern counties. We know that it ranks higher in Fresno than in Napa, and probably deservedly, but there it is used as a blend in making port, and not a dry claret. Mr. Kohler differs from some of our Los Angeles friends, and is of opinion that the planting of either Malvasia or Mission is a serious mistake, as there are several well-known varieties of grapes that will bear nearly, if not quite, as well, and make a wine or form a blend, of a much higher character than either. Not that Mr. Kohler would advise the destruction of growing Malvasias or Mission, but the entire cessation of planting and the gradual grafting over of those now planted. It may be, however, that the faults in Malvasia which we led Mr. Kohler to condemn it in such strong terms, are not found in the grapes of that variety grown in the southern counties, and we would, therefore, suggest to Mr. Hinde that he and other friends who have Malvasia, either as a claret, a port or as a blend, send, at some convenient opportunity, to this office or to the State Viticultural Commission, in this city, a small sample, say a pint each, of their Malvasia, in any form that they may have it. We will, in such case, see that the samples are tested by Mr. Kohler and other judges, and give our southern readers the result. It is far from the wish of any of our wine dealers, and most certainly not of the MERCHANT, to discredit the products of any district or to deny that a vine that gives inferior results in one locality may yield very different results in another.

Grape Growing.

We are fully satisfied that an extensive area in Humboldt county is well adapted to the cultivation of grapes. This being true, we deem it advisable for persons owning land at any point within twenty miles east of the ocean to experiment with the vine. Viticulture, as well as horticulture, is destined to become an important element of material wealth within our borders at no distant day. Those who now give this matter attention and put out vines, plant prunes and other fruit will reap a rich reward. Land which can be purchased for five dollars per acre, when put out in vines or fruit such as prunes, apricots, cherries, pears, peaches and apples, will readily sell for $80, $100, and even as high as $150 per acre, according to quality of fruit and advantages of location. Local railroads are being extended one by one from tide-water on Humboldt Bay back into the interior of the county in different directions, some ten, others twenty, and the Eureka and Eel River Railroad, fifty miles. On the line of these local roads good fruit land can now be purchased at $3 to $8 per acre. These local roads will furnish quick and reasonable transportation to tide-water; from tide-water the ocean gives cheap transit to home or foreign markets. The time will come when many who do not now esteem these advantages will say. "If we had only realized how changes would come, we might have been rich." They will come sooner than the most sanguine expect. We say to all who can do so, buy a piece of land in a suitable locality and gradually put it out in a judicious selection of fruit trees and vines. Any of the varieties mentioned in this article will prove profitable, especially French prunes.—*Humboldt Standard.*

A draught of good light wine or wine and water is the healthiest liquid accompaniment at meal times.

FREIGHTS AND CHARTERS.

Last week and in the beginning of this there was some demand for Continental orders at 30s to 30s 6d wood vessels for Havre and Antwerp. The demand has now ceased and all unfilled orders are counter manded. An iron vessel, the Golden Fleece, 1257 tons, was chartered yesterday for Cork, U. K orders at 32s 6d. There is however no market in Great Britain for our wheat and the Continent is also closed to us and no active business in ships can be expected. We hear of an iron vessel not yet arrived out being chartered for October or November loading, having been chartered at 47s 6d Cork, U. K.

The engagements for the past week have been as follows: Schooner Rosario, 144 tons, coal to Kahului. British ship Rock Terrace, 1768 tons, at san Pedro, proceeds to Australia to load wheat for Europe. British bktne, 1610 tons, coal Nanaimo to this port. Schooner Beulah, 339 tons, coal Departure Bay to Honolulu. British ship British General, 1754 tons, wheat and merchandise to Liverpool. British ship Kingsli, 1718 tons, wheat to Liverpool direct; owners account. German ship Roland, 1343 tons, wheat to Cork for orders to Liverpool, Dublin, Cardiff, Bull, Newcastle-on-Tyne, Havre or Antwerp; 30s 6d. British bark Ida Ellen, 1150 tons, coal Nanaimo to this port. Ship Challenger, 1456 tons, coal from Nanaimo to this port. Bark E. L. Pettingill, 842 tons, lumber from Puget Sound or Valparaiso for orders; 50s Ship North America, 1583 tons, Cork for orders Liverpool, Dublin, Havre or Antwerp; 31s 6d. Ship Sophie Koule, 1519 tons, merchandise to New York in the Dispatch Line, following rates. Bark Grace Ship Florence, 1681 tons, U. K., Havre or Antwerp; 31s 6d. British bark British Duke, 1420 tons, Cork, U. K., 32s 6d.

The British Grain Market.

LONDON, March 17.—The *Mark Lane Express*, in its review of the British grain trade of the past week says: Trade in cargoes off the coast is more active but the supply is bare. California was taken at from 39s 4½d@39s 3d, without extra freight. Seven cargoes arrived, ten were sold, eight withdrawn and one remained. The sales of English Wheat for the week are 68,699 quarters at 37s 5d per quarter, against 57,823 quarters at 42s 2d per quarter for the corresponding week of last year.

TOBACCO MARKETS.

SAN FRANCISCO.—There has been an active demand during the week for all descriptions of leaf tobacco. In sympathy with the strong tone of the Eastern market for the better kinds of domestic leaf, and in consequence of the detention of so much tobacco by the breaks in the Southern Pacific R. R., prices here are very firm. Since the close of the "lockout" our white cigar manufacturers have been purchasing freely of '81 and '82 domestic, the former for wrappers, also of Sumatra and Havana. Sumatra is very much in demand. The scare about '82 domestic, has passed away and it is now very generally admitted that this crop is nearly all that it was claimed to be some months ago.

The "lockout" of Chinese cigar makers is over, the Chinese having admitted the right of the employer to select his workmen, and discharge whom he liked, and an advance of 50 cents a thousand has been allowed, in those factories which were paying below the parity of the trade.

The Association of Cigar Manufacturers remains in full activity and the Technical School for the instruction of white boys and girls in the art of making cigars is to be maintained as if the "lockout" existed. The necessity of a larger force of competent workmen continues and the manufacturers are fully alive to the importance of having a considerable number of skilled workmen to draw on and to encourage in favor of white labor.

The fine weather coming after the protracted storms has given more life to trade in all classes of manufactured tobaccos and there has been a very large, though by no means extraordinary amount of business done within the past three or four days. It must be remembered that the mountain wagon and stage roads are generally in poor condition and except on the sea coast we have no communication with the three southern counties of California.

[U. S. Tobacco Journal.]

NEW YORK, March 8th.—Real nice and lively was our market this week. Buyers wandered through the classic regions in and around Water street in quantities, we'd almost say, to suit the most fastidious seller. Most of them were city manufacturers. They went at the market with a will, and, to use a term of our commercial forefathers, began to "gobble" up. Everybody looked for job lots. Nobody cared for this or that illustrious packing. The paternity or nativity of the goods also was not inquired into very closely. As long as the goods of red head wrappers, and as long as the wrappers were free from "bales" or "freckles," or such ailments as prevented them from coloring nicely, and interesting performance of covering a bunch, they were sold with refreshing alacrity—provided the prices, as an intelligent, upright and conscientious manufacturer told us, were within the bounds of decency. These "bounds of decency" comprised from 8 to 12 cents for '80 and '81 Pennsylvania; sometimes they were probably overstepped by 13, 14 and 15 cents. Furthermore, they comprised 17, 18, 19, 20 to 22 cents for '82 Pennsylvania. In these goods ('80, '81 and '82 Pennsylvania) from all accounts a great business was done. Brokers say 1,000 cases left. Our stanch, unshakable belief in the preciseness of the reports of most dealers—this belief, which to be robbed of by any circumstance would send asunder our faith in manhood and humanity—prevents us from whispering the sweeping assertion that this number may probably be short by one.

In addition sales of 100 cases of '82 Connecticut wrappers were reported. A manufacturing firm having bought 180 cases of wrappers, claimed to have paid but 17 cents. Others again claim that selections in lots of about 25 cases brought as high as 32 cents.

Sales of '82 Havana seed may also have been made. We know of none. Ohio sold, about 400 cases. Some of it contained some excellent wrappers, selling as high as 20 cents.

Cry what you like, Sumatra is king as yet. The demand for it this week was most extraordinary. It sold for as high as $1.85. In price it is like Banquo's ghost; it will not down.

Havana—Sold lightly. Sales summed up to about 500 bales only. Importers complained that buyers, especially manufacturers, don't appreciate fine stock when it is shown to them. Perhaps the weather probably gave them a cold, making it difficult to smell the difference between common and fine stock.

[New York Tobacco Leaf.]

NEW YORK, March 7th.—*Western Leaf*—Trade is dull. In a general way little has been done the past week, though for specialties there was a good demand.

Virginia Leaf—A light business has been done, but we note the arrival of some very fine bright wrappers, which our manufacturers, on this hint, will probably speedily look up.

Seed Leaf—A fair demand for the season is a fac deducible from the figures below.

Spanish—Havana fillers have been sold to the extent of 600 bales, at from 80 to 81 15c.

Plug—Trade remains extremely quiet, with order only for small parcels. Many tradesmen cannot realize that tobacco has been advancing for some time, and that they must pay more now.

Sales were principally bright 11-inch, with Navy styles. The exports were 149,855 pounds.

Smoking—The demand has been steady, and embraced all styles for current use.

Cigars—A fair but not active inquiry is reported.

PRODUCE MARKET.

A[illegible] reports [illegible] that crops of [illegible] States have been [illegible] weather, and that [illegible] States prospects are not so [illegible] markets the [illegible] of the world's [illegible] and weak, and from such latter fact it would not [illegible] that growers of Wheat and Barley on this coast [illegible] to receive specially remunerative rates [illegible] product. It is now conceded that the pro[illegible] of Wheat in this State will be fully equal, if not [illegible] greater, than in any previous year pro[illegible] that specially strong northerly hot winds are [illegible] encountered during the ensuing sixty days. [illegible] reported that in some sections of the State, [illegible] of rains and following warm weather, the [illegible] of Wheat and Barley has been unprecedented, [illegible] cases the grain has already become lodg[illegible] to such an extent that only partial products will be [illegible]. Such reports are not considered reliable by [illegible] dealers in the city and the belief is, [illegible], that they emanated from parties who were [illegible] for forward delivery.

The fruit crop is said to be in a most acceptable condition, and without specially unfavorable weather prior to May will show a greater product than ever before.

FLOUR.

Receipts for the week, 82,735 qr sks.

Quotations are without material change.

Extra, $5 37½@5 65; Superfine, $4 00@4 75; Country ditto, $3 50@4 30; Interior Extra, $5 00@5 37½ per bbl for jobbing parcels to local consumers.

WHEAT.

Receipts of week, 81,280 ctls.

Eastern and European advices are far from favorable, yet figures here are at an advance for both spot [illegible] and parcels for future delivery. Within the past [illegible] days fully 1000 tons of Choice Milling has been sold to local millers for $1 63¾@1 66¼, and shippers [illegible] more disposition to secure desirable lots and [illegible] bid $1.60, and at the close are reported to have paid upwards of $1 62½ for a lot of 500 tons No. 1 White for Port Costa Delivery.

Trading on Call daily increases and it now seems that the near future will develope an unprecedented amount of business, largely exceeding the heavy trade recorded in Barley during the past year. On Call yesterday No 1 White sold for $1 47¾, seller 1884. For buyer 1884 $1 63¼ was asked, and for buyer the season $1 62⅛ per ctl was demanded.

BARLEY.

Receipts of week, 14,584 ctls.

Crop prospects are all that could be desired, stocks on hand are large and the export demand is unimportant, yet in the face of all these facts figures for feed are higher, owing entirely to the movements of speculators in futures. Many bids and offerings are daily made for Chevalier and brewing for forward delivery, but, as yet no transactions in that line have been recorded, the difference in views of Buyers and Sellers being too great. In the Sample market No 1 Feed is quotable at 82½@87½c, No 1 Brewing, 92½@1 02½c, Chevalier, nominal at 1.25 for choice Bay.

On Call yesterday sales of No. 1 Feed were made as follows: buyer 1884, 92@85½c; buyer season 88⅝@89c; seller season 84⅞@5; Spot 85¼—sales aggregating 5700 tons.

OATS.

Receipts of week, 1722 ctls.

Though receipts are light there is a very weak feeling in the market, and no strengthening in prices is anticipated. No recent consignments have come to hand from the East.

We quote: Black, $1 35@$1 40; White $1 50@$1 55 for ordinary, $1 62½ @ $1 65 for fair to good and $1 70@$1 75 per ctl., for choice to extra choice.

CORN—

Receipts of week, 896 sks.

Arrivals are exceedingly light but prices remain about the same as for a long time quoted.

We quote: Nebraska, $1 37½@$1 40, California $1 45@$1 50 for white, and $1 60@$1 65 per ctl for yellow.

RYE—

Receipts of week, 105 sks.

Quotations are entirely nominal at $1@1 10 per ctl.

BUCKWHEAT—

Deliveries are very small and quotable rates entirely nominal at $3 25@3 50 for ctl.

MILLSTUFFS—

Receipts of week, 7475 sks bran, 2833 sks middlings, 925 ctls Ground Barley, 200 ctls Ground Feed.

We quote: Ground Barley, $21 00@22 00 per ton, Middlings are selling at $17@$20 00 per ton, Wheat Bran, $14 00@15 50 per ton; Oil Cake Meal, $30, old process, and $26 50 new process; Feed Corn Meal, $33 50@34; Cracked Corn, $34 per ton; Rye Flour, $6 per bbl, Rye Meal, $5 50 per bbl; Buckwheat Flour, 5c per lb, Pearl Barley, 4@5c per lb; Eastern Oat Meal, $8 75 per bbl; Cracked Wheat, 4c per lb.

HAY—

Receipts of the week, 971 tons.

Deliveries are light but former prices are continued. Grazing prospects are unusually favorable, and parties who laid in large supplies of hay two months since, in anticipation of a dry winter, are not likly to be benefitted by their investments.

We quote: Alfalfa, $8@10, Wheat, $11 00@13 50, Stable, $10 00@12 00, Wild Oat, $11 00@13 50 Cow, $9 00@11 50, Barley, $9 00@11 00 per ton.

STRAW—

Receipts of week, 45 bls.

Quotable at 50@60c per bale—as to condition.

SEEDS—

Receipts of week, 491 sks mustard, 5 sks alfalfa.

Full supply of most all lines, and the demand is good.

Flax quotable at $2 50@2 75 ₩ ctl; Canary, 5@5¼c; Alfalfa, 8@8½c ₩ lb; Timothy, 7@7½c for native and 8@9c for imported; Mustard, choice Brown, $3 25@3 75 ₩ ctl; White, $2 75@3 00; Hemp, 4c, Rape, 3@3½c.

BEANS—

Receipts of the week, 1772 bags.

Arrivals for past week have been very light, which, together with the fact that the roads are now open and shipments of all kinds are being made, has strengthened the market, even staying the panic on Whites which had taken possession of holders. And Limas, that are bound to go lower, before long, have been kept up to our quotations by the situation mentioned, for, without a doubt, there are much more than enough in the hands of farmers to fill any demand that can possibly come forward now, or next harvest. The opening of the roads has principally affected Colored, of which we have a very scanty stock, and it is col[illegible] that is mostly shipped to Texas, which the breaking up of the road had shut off from us for some weeks, so on Thursday last, there were several operations in Bayos on Change, at much higher figures than had been prevailing for many sessions.

Our quotations are, for round lots from the wharf, Small White and Pea $2 85, Bayos $4 70, Pinks, $4 2[illegible], Reds, $4 75, Butters, $3 [illegible], Limas, $2 00.

FRUITS.

The scarcity of oranges still continues. A better supply is expected on the arrival of the next steamer.

We quote: Domestic Apples, 75c@$3 00 ₩ box. Wisconsin Cranberries, $18 00 ₩ bbl, Western do, $17 00@17 75 [illegible] bbl.

Tropical: Lemons, $4 00@5 00 per box for Sicily Lemons, $10@11 per box for Mexican Lemons; Limes, 12@15c per lb; Bananas, $1 75@4 00 per bunch. Oranges, California, $3@3 50, Choice Riverside, $4@4 50, Choice Navel, $5 00@5 50 per box.

NUTS.

Prices remain unchanged. This has been the dullest season in this article for many years.

We quote: Cocoanuts, $6@6 50 ₩ 100, California Walnuts, 8½@9½c ₩ lb, Chili do, 8@8½c; California Almonds, hard shell, 6@8c, soft shell, 11@15c, Filberts, 15@16c, Pecan, 12@13c; Peanuts, 5@6c, Brazil Nuts, 15@16c, Hickory Nuts, 7@8c. Italian Chestnuts, 15@16c.

HONEY.

Market quiet and dull, no change in quotations.

We quote: Extracted, 6½@7c, Extra White Comb, 17@18c, White, 15@16c, Dark, 8@10cts.

DAIRY PRODUCE.

The supply of butter on hand is large and steadily increasing. The quality of present products is hardly reliable enough to pack as the new feed does not seem to give body enough to the butter to insure keeping properties, hence a large surplus stock remains on hand from last week's receipts. Retailers being afraid to take chances on any large purchases at present prices. Our impression is that if warm, genial weather prevails for two weeks or so, packing will probably commence and the market assume a different shape. As regards quotations we would add market declining.

We quote: Point Reyes, 25@26c; Choice, 22@23c; inferior lots from country stores 15@16c; firkin, 17@18c for old and 24@25 for new, Eastern, 15@17c, Cheese, California, 15@16c for choice, 11@12½c for Fair to Good, Gilroy, in drums, 16@18c, Eastern, 17@18c, Western, 10@15c.

EGGS.

Market overstocked, with small demand. We look for an improvement in quotations in our next issue.

We quote: California Eggs, Choice Ranch, 21@22 per doz.

POTATOES.

Receipts of week, 11,152 sks.

Our quotations are for round lots from the wharf; Early Rose, 85c, River Reds, 45c, Tomales and Petaluma, 65c; Humboldts, 75c, Pea Blows, 80, Peerless, 75c.

There was more jobbing for good Reds Wednesday than we have noticed for many weeks, which cleared up the wharves pretty well. Still, dealers will not pay much advance, for there were many inquiries Thursday with but little trade. Consignees were asking 70 cents, but were not selling. Early Rose are weaker, selling freely at 85c. River Reds are scarce, and doing a shade better.

ONIONS.

Receipts of week, 1804 sks.

Trade in Onions is slow. Shippers are loath to pay present prices for even the best stock. Some choice lots have sold on the wharf as high as $1 50.

BEESWAX—

We quote 26@28 c per lb.

HOPS—

Receipts of the week, 103 bls.

Market is in about the same condition as last week. Holders firm but buyers weak; sales of 170 bales fair Oregon at 14½c latter part of last week, is about the only transaction of importance since last report. New York and London markets are in about the same condition as here. While prices are pretty well sustained for choice lots, the demand is exceedingly light.

Quotations here 12 to 16c for fair, 17 to 20c for prime and choice.

POULTRY—

On account of the fine weather this week, the receipts have been very large, resulting in the lowering of all kinds of poultry $1 and $2 a dozen.

We quote: Turkeys, Live Gobblers, 27@28c per lb; Turkey Hens, 27c, Dressed, 30c; Young Roosters, $9@10 00; Old Roosters, $7 50@8 00, Hens, $7 50@9 00; Broilers, $6 00@7 50, according to size; Ducks, 12 00@14 00 ₩ doz; Geese, $2 25@3 00 per pair.

HIDES, SKINS, ETC.

Heavy Salted Steers, over 55 lbs, 10½c per lb. Medium Salted Cows and Steers, 50@55 lbs, 8½. Light Salted Cows and Steers, 50@50 lbs, 8@8 c per lb. Salted Kips, 10c per lb. Salted Veal, 11c per lb. Salted Calf, 15c per lb.

Dry Hides, usual selections, 18½@—c per lb; Dry Kips, do, 18@ c per lb. Dry Calf, do, 18½@21 per lb.

MEAT MARKET

Beef is firm at quotations, while the supply at hand is scant. Mutton is lower, owing to recent arrivals, but the supply is still very limited. Hogs are high, with very few good ones arriving. One band of the best quality and average sold at 8½c gross, but generally they bring ⅛@¼c less ₩ lb. Following are rates for whole carcasses from slaughterers to dealers.

BEEF—First quality, 9½@10; second quality, 8@9c; third quality, 7@8c ₩ lb.

VEAL—Large Calves, 7@9c, small ones, 7c to 11c ₩ lb.

MUTTON—Wethers are quotable at 8@8¼, and Ewes at 7@7½c ₩ lb.

Caligula, not satisfied with building ships of cedar with sterns inlaid with gems, had a pearl collar made for his favorite horse.

MERCHANDISE MARKETS

BAGS AND BAGGING—

Considerable sales of Standard Calcutta wheat bags have recently been made at 7½c, buyer June, and holders show little firmness in their demands. It is evident that growers' wants will be supplied at unusually low rates; California Jute are quotable at 7½c for Spot lots, Potatoe Gunnies sell for 14@14½c.

BORAX.

BRICKS AND FIREBRICKS—

A G Platt's private circular says: There is very little doing in firebricks as the requirements at this session of the year are not excessive. There are a few scattering orders in the market, from dealers who are out of special sizes or brands. Importers are diffident about accepting, as prices offered are about equal to importation cost and the profits on the business nil.

	Spot Ex. Wharf	To Arrive
Brown's Firebricks per M	35 00	32 50
Cowen's	35 00	32 50
T Carr's	32 50	30 00
Garterag.	32 50	30 00
Heathery Knowe	30 00	28 00

CEMENT—

A G Platt's circular says: The price of Cement still continues low and unremunerative to the importer. This is owing to the fact that last year a much larger quantity than was actually naeded was brought here and until present stock is greatly diminished we cannot look for any improvement. The only feature which will be likely to cause some improvement in prices is the fact that shipments en route are unusually light.

	Spot.	To arrive
Eastern-Rosendale, in round lots	$2 20	2 15
English choice brands, in round lots	3 12½	3 10
English outside brands, in round lots	3 00	3 00

COAL—

Although the quotations for spot Coals show a softening, yet the stocks are so light and in so few hands, that a united effort on the part of the holders to advance prices, could, without any difficulty, be effected. Fortunately for the public, the veriest harmony does not exist among dealers, hence former attempts at combinations have failed. Our bountiful and seasonable rain fall to date has so far assured us a copious grain crop, as to lead ship-owners to freely seek orders for loading Coals for May, June and July next, hence we have again marked down quotation "to arrive." Still if grain shippers follow out their present policy of not chartering prior to arrival, and the Liverpool market remains as at present, the chances for very low-priced Coals this season are very slim.

Importers' prices of coal, Foreign and American, to arrive: Australian, $7 50@7 75; Liverpool Steam, $7½@7 75; West Hartley, $8 25@8 50, Scotch Splint, $7¾@7¾; Cardiff Steam, $7 75@8; Lump Lehigh, $13@13¼; Egg Hard, $11@11¼; Cumberland, bulk $10@10¼. Spot prices are as follows: Australian, $8 00, Liverpool Steam, $8 00; West Hartley, $9½; Scotch Splint, 9 00, Cardiff, $8 00; Lehigh Lump, $13, Cumberland, bulk, $11 50; Egg Hard $11 50.

EX-SHIP AND YARD.

	Ship.	Yard.
West Hartley	$9 50	$10 00
Scotce Splint	9 50	10 00
Liverpool Steam	8 50	9 00
Australian	8 00	9 00
Coos Bay		7 50
Renton		7 50
Seattle		8 00
Wellington	10 00	10 00

do sks		16 00
English Foundry Coke, bulk		15 00
do do sks		16 00
Australian Shale		25 00
Southfield		9 00

COFFEE—

Coffee is in fair request for local consumption and in good demand for shipment East. There is no change in quotations.

We quote:

Costa Rica, good to prime	.13	@14
Guatemala, good to prime	.13	@13¾
Salvador, good to prime, washed	.13	@13¼
Salvador, good, unwashed	.12	@12½

IRON—

Our remarks of last week may be literally repeated now. Some few lots of Glengarnock are being landed, and in the absence of purchasers at covering figures, are being hauled into warehouse.

The outlook for any change of tariff in Iron is less encouraging than it was a week ago, evidently the influences of Eastern Manufacturers are being brought to bear very effectively.

The Foundrymen are kept moderately busy, and are preparing for a marked increase of business later on.

Importer's prices of Pig Iron, Foreign and American, to arrive: Shotts No. 1, $27½@—; Glengarnock, $26 50@—; Eglinton; $25 00, Clay-Lane White, $23 50; American, Eastern, Soft, $28 00. Spot prices are as follows: Glengarnock, $25 00, Eglinton, $24 00; Clay Lane, white, $23; Shotts No 1, $28 50, American, Soft Eastern, $28. Clipper Gap Nos 1, to 4 $32 50@$35 00.

Black Sheet Iron—Nos. 14 to 16, 5c ₩ lb; Nos 18@20, 5½; Nos 22 to 24, 6; No. 26, 6¼, No. 27, 6½, No 28, 6¾; Galvanized Charcoal Sheet Iron, Nos 10 to 20, 10c ₩ lb; Nos. 22 to 24, 11; No. 26, 12, No. 27, 2½; No. 28, 13¾; second quality 1c ₩ lb less than first.

Wrought Iron Pipe, discount, 45@50, Manufacturers' List; per ft, Black—¼-inch, 42 lbs ₩ 100 ft, 8c; ⅜, 60 lbs 9c, ½, 85 lbs 11c; ¾, 112 lbs, 13½c; 1, 167 lbs, 19c, pipe, 226 lbs, 27c; 1½, 270 lbs 33c; 2, 367 lbs, 46c; 2½, 576 lbs, 77c; 3, 755 lbs 95c; 3½, 905 lbs, $1 25, 4, 1072 lbs, $1 00. Galvanized—¼, 11c; ⅜, 12c; ½, 15c, ¾, 19c; 1, 22; 1¼, 40c; 1½, 47c; 2, 64c; 2½, $1 3, $1 30.

PETROLEUM—

Continental Safety, 150 deg., cases	.24½
" " " bulk	.20
California S W, 110 deg flash test, cases	.18
" " " " bulk	14
California W W, 115 deg flash test, cases	.24½
" " " " bulk	.20
Ursoleum, 150 deg test, cases	.30

QUICKSILVER—

Quicksilver is without change in; price $28 per flask and very little business is doing in the article. The Panama steamer on the 16th carried 500 flasks for New York, 435 for Mexico. both lots shipped on consignment—so understood.

RICE—

Imports, 2714 bgs. Exports, 61377 lbs.

No change in this article; the demand for this as well as all other articles of merchandise is greatly diminished by the bad state of the country roads.

Our quotations are as follows. $4 05@4 10 for Mixed, old; $4 70@4 75 for Mixed, new; $4½@4¾ for No 1 China; $5@5 25 for good No 1, $5½@5¾ for fair No 1; $6@6¼ for Extra No 1.

TIN, ETC.—

A. G. Platt's private circular says: The stock of Tin plate on Spot and to arrive is well concentrated in a few hands, and prices are firm with advancing tendency. Our fruit canneries will soon be in the market buying for this season's requirements, etc. Another advance in price may be expected. Estimates of visible supply on the way engaged for loading show that later in the season, tin plates are likely to do even better than at present, that is, providing the present encouraging prospects of an unusually large fruit crop are realized.

We quote:

A B. Grades	....	......

ADVERTISING CALIFORNIA.

Our Wants.—Our Opportunities. Making Known our Resources.

Let us Exhibit our Marvellous and Varied Products.

The following letter recently appeared in the *Evening Bulletin*. The occasion of the letter was two items which had previously appeared in that journal. Omitting the introductory clause, we reproduce the letter, with the items which called it forth.

Editor Bulletin:— * * * * * *

PLANS OF THE NEW ORLEANS EXPOSITION.

The New Orleans exposition grounds, which are to be lighted by electricity, will embrace two hundred and forty-seven acres of ground. There are to be four lakes within them, a belt railroad, with branches running to the Exposition buildings, gardens of the rarest tropical and semi-tropical plants, a horticultural hall and the largest conservatory in the world for the exhibition of specimen flowers and plants too tender to stand out in the open air, and for the display of an immense variety of fruit. The most skillful persons have been engaged to superintend the laying out of the grounds and the floricultural and horticultural departments of the exposition, while special Commissioners have been appointed to go to Europe, Mexico, Central America and Florida, for the purpose of obtaining the finest specimens of flowers, plants and fruits.

So much for the first item. Here is the second:

NEW ORLEANS PROSPERITY.

New Orleans has a regular building boom. A large number of costly blocks and buildings are under consideration, and it is thought that architects and builders will have as much as they can do during the next twelve months outside of the mammoth enterprise, the buildings for the World's Fair and Cotton Centennial.

Now, how does all this concern us? We have not yet reached that stage that we can contemplate our brother's good fortune without wondering how we are going to get our finger into the pie. We are, some of us, hoping for the great good fortune of a World's Fair in this city. The men who came the "plains across" or the "Horn around;" those who have dug gold and lived on beans, and cooked them themselves; those who drove stage and are merchants now, those who dealt faro but don't do it any more, those who took up large tracts and have grown wealthy, and those who did so and struck a Spanish grant; those, in fact, who all these years have been coming here and, in one way or another, have been building up homes, manufactures and commerce, all these fondly hope that it will be possible for San Francisco to have a World's Fair three years hence, when all their friends from "the States" can come and see what has been done here. The people of this State have only been about thirty years doing that which has taken other people a century. Having done these things, they feel a natural and justifiable pride in inviting the world in to spend the afternoon, and to stay to dinner. The question is not how many dollars can we make out of the crowd. The people of California are not street "fakirs," calling an assemblage together that they may make money out of their credulity. Their motives are nobler than that. While there is no disposition in this State to give everything for nothing, there is no desire (and the experience of our visitors during the Triennial Conclave proves the fact) to gouge our guests. We all feel that we have a State of boundless resources and undeveloped possibilities. We want people to come here and see what we have, to enjoy our scenery, contemplate our manufactures, eat our fruit and inhale the dust of our roads, drink our wines and smoke our cigars. We want them to come and see what we need. We would like to show them our Postoffice and a few other relics of the past. Also the new City Hall, together with prophecies of other improvements to be completed about the same time. For all these reasons do we want people to come hither in 1887.

"The gods help those who help themselves." Let us, therefore, be up and doing. There is throughout the East and in Europe an awakened desire to get information about California. This longing is never satisfied. The Eastern man will listen naturally to a Californian's description of some place or production, politely tell him he lies, and ask for another story. The exposition at New Orleans next December will be one of the golden opportunities that California cannot well let slip. While this State has been represented to a certain extent at several of the great expositions that have taken place during the past few years, the displays were not what they might have been—what they should have been. We sent a Commissioner to the Mineral Exposition at Denver, space in a conspicuous location was reserved for California, and the State had not a specimen to exhibit. Did I mistake not the Governor has appointed a Commissioner to represent the Golden State at New Orleans. Let me ask in all seriousness whether it would not be a good idea to send some exhibits as well as a Commissioner?

A SONOMA COUNTY COLLECTION IN LONDON.

Those who visited the last State Fair will remember that Pomona Grange of Santa Rosa exhibited a large, well selected and carefully arranged display of the products of Sonoma county. That collection was gotten up somewhat hastily, and was to a great degree the labor of two or three individuals. That collection which attracted so much favorable notice was presented to the Central Pacific Railroad Company, and in strict compliance with the promise made to C. N. Whitaker, who had charge of the exhibit at Sacramento, every sample was carefully divided, a part being sent to Chicago for exhibition, and a part to England, where, together with several hundred other specimens from all portions of California—representing all her varied productions—the collection made under the auspices of Pomona Grange is on permanent exhibition in London. Every sample bears a label of which the following is an illustration:

CALIFORNIA PRODUCTS.
White Australian Wheat, yield 30 bushels.
Raised by Frank Briggs,
Fulton, Sonoma county.
Contributed by Pomona Grange,
Santa Rosa, Sonoma Co., Cal.

There is no question but that the work done by Pomona Grange last year has accomplished much in calling attention, not only to Sonoma county, but to the State at large.

WORK FOR THE GRANGERS.

I see by the Santa Rosa papers that that Grange has appointed a committee to make a collection this year for exhibition. It is to be hoped that every Grange in the State will follow the good example. There is no farmer, merchant or manufacturer in California but has a direct interest in these matters. Abroad, while there is a desire to learn regarding our State, there is a great lack of actual knowledge. In conversation to-day with A. N. Hoag, who for so many years served the State faithfully as Secretary of the State Agricultural Society, and who has for over a year been filling the responsible position of Commissioner of Immigration at Chicago, Mr. Hoag stated that when he exhibited the productions of California at the State Fair and Inter-State Fair at Chicago last fall, he was surprised by many people expressing astonishment that the apples, peaches, pears, grapes and other fruit on display were not all raised near Los Angeles. Many persons said they did not know such things could be raised anywhere in California except around that city. What we want to let the outside world know is that we can raise all these things and many more throughout California. We have a State about the size of the French republic; we have an empire lying here by the western ocean; we have the resources that will support a population of millions. That population we need. A gentleman who has recently come hither from Oregon, and who has made an extended tour through that State and the "Great Northwest," says that it is surprising the number of families who have settled in that region during the last few years. All that section of country has been advertised extensively in the East and in Europe. To the man who visits Southern California and beholds on every hand the thrifty homes of people who have settled there during the past three or four years, the value of advertising is made patent.

WANTS OF THE STATE.

We want in this State a larger number of people who will come here to buy land, make homes, cultivate thoroughly small holdings, and take a hand with us in making California the Queen State of the Pacific Slope. Such people as this State requires, are to be found and are ready to come. They want to know what they can find here. The more of our productions we show them the better. They are men of families, men of means and of influence.

This State does not need a population that will be content to live in rough board shanties and divide the hospitality of their homes with intrusive chickens and the anti-Bismarck swine. The question is not the settlement of the State in that way.

There is perhaps no locality where living may be more enjoyable than here; there is perhaps no country where culture, refinement, that high and holy religion that seeks to treat all men with equal justice, may find more congenial homes.

Let us therefore strive to encourage in coming here that class who may be benefited by the change, and who by commingling with those of us who have been here during all the years since the young State of California was rocked in a miner's "cradle" may teach us some of the refinements of literature, of science and of art that we have overlooked.

How can we better accomplish these ends than by sending to every great exhibition that takes place such samples of what our soil produces, what our mines yield, what our factories make, as will fully, truthfully represent the advancement we have made and also show what opportunities exist for new industries.

THE CHANCE NEW ORLEANS OFFERS CALIFORNIA.

The Exposition at New Orleans takes place in a few months. From the extract first above quoted we see what the people of that city propose doing toward preparing suitable places for exhibits. The second quotation shows the effect of the enterprise on the growth of the city. Let every man in California be up and doing during the few intervening months. Let every portion of the State, without sectional jealousy, engage in a lively sectional competition, not only to make a display, but to make the best possible exhibition of its resources.

Do not let us wait idly till the last moment and then forget all about it. Let the newspapers take the matter in hand.

Let the various Grange and other similiar organizations act. There is no individual too poor to do California reverence. There is no one but who can do something. A handfull of snow may start the avalanche.

But that amount of snow never makes any stir in the world unless it *moves*.

As remarked above we would like to have a World's Fair here in California. Two questions present themselves for answers.

Can we raise the money required? Can we get people to come? The question of finance is important, but is easier of solution than the matter of attendance. Californee is, indeed, a long way off from the great centers of population. The only way to secure a large attendance is by awakening a desire to see our State. How better can this be done than by availing ourselves of every opportunity between now and 1887, of showing the world what we have here, what we are doing, and what may yet be accomplished in the future?

CHARLES B. TURRILL.

SAN FRANCISCO, March 17th.

California Wines In California.

If there is one thing all interested in viticulture or in the welfare of this country, should insist upon, it is the home consumption of domestic wines under their own label.

We may walk all day in Fresno and inquire for a decent glass of California wine without being able to get it, still we know that it could be had, but under foreign label.

The poor stuff that is sold us as California wine is generally the refuse from the wine cellar, which should have been distilled instead of having been allowed to be passed over the counter as samples of our native wines. In many saloons of both an inquiry for California wine is met by either the answer that it is not used, or that it is not kept. The key to the necessity of the saloon keepers to dose the wines is simply their greediness, their penal foolishness and penny wisdom. We are asked to pay $1. to $1.50 for wine which they buy at the wine cellar for 50 cents a gallon, the only labor being in bottling it and the putting on of French labels. How long the imposition on the good nature of the consumer is going to last is yet to be seen. Surely it is going to last until something is done to stay it. We need in every town a viticultural club or association whose members should agree to not frequent, except in extreme necessity, any restaurant, saloon or hotel whose proprietor knowingly sold California wine under a foreign label or who did not keep domestic wines. The wine makers are much at fault. They have so far done but little towards developing the home market which, they should understand is always the best, and nowhere have they attempted to establish what is known as a success in Australia—the wine shop where a glass of wine can be had at not over 5 cents.

The six large wineries around Fresno, would surely find it to their advantage to open wine depots in Fresno where nothing else would be sold than their wines and brandies. No doubt much could be done to promote home consumption of native wines, but it needs the establishing of viticultural clubs and help of wine makers, grape-growers and the public generally.—*Fresno Republican.*

Coal Fields

A statistician in the employ of the United States Geological Survey has gathered and massed some valuable statistical information in regard to the Coal fields of this and other countries. He finds that the area in the United States, exclusive of the Territories, 192,000 square miles of Coal deposits; in Great Britain there are 12,000 square miles, in France 2085 square miles, in Germany 1700 and in Belgium 510. The total product of the world in 1881, exclusive of China, Italy, Sweden and Chili, from which no returns have been received, was 360,890,000 gross tons. Of this Great Britain, with only a Coal area of 12,000 square miles, produced 154,000,000 tons, while the United States, with 192,000 square miles, produced (in 1882) only 92,000,000 tons. Of the output of the United States 64,000,000 tons was Bituminous and a little over 31,000,000 Anthracite. There has been an increase in the output of Coal in this country of 58,600,000 tons during the eleven years ended with 1882. The average cost at the mines was but $1.25 for Bituminous and $2.25 for Anthracite. The heaviest cost is between the mines and the consumer; in other words the cost of transportation. The Coal resources of the U. S. are believed to be greater than those of all Europe. While Great Britain is digging deep and the people are seriously considering the period when the Coal fields will be exhausted, we are only scratching on the surface in the United States, figuratively speaking. Coal is not only the basis of manufacturing industry, but it is also now so extensively used for domestic purposes that it has become a necessity.—*Shipping List, New York.*

Fresno Pleased.

The Fresno *Expositor* of March 17 says: "The San Francisco MERCHANT of last Friday contains a most excellent article on Fresno county, written by its editor, A. D. Bell. It is one of the best articles ever published on Fresno county, and one that is calculated to do it great good. At an early day we shall publish extracts from the article. We would suggest that real estate and mine men could do the county a great benefit by getting several thousand copies of the paper and sending them out over the country. The MERCHANT is acknowledged to be the leading journal of the State so far as the fruit and wine interests are concerned."

A. D. BELL, ... Editor.

FRIDAY MARCH 21, 1884

We have a good deal of information about Fresno county, its people and products which we have not used yet. We shall hortly recur to this topic again, and probably revisit Fresno within a few weeks, when the weather and roads will be more favorable for traveling than a fortnight ago.

The death of ex-Governor Stanford's only son has called forth many kind expressions of regret and sympathy for the bereaved parents, in journals that often have indulged in personal abuse of that gentleman and his associates. The sympathy probably came from the hearts of the writers; most of the abuse is dictated by policy and the idea that it pleases subscribers.

Speaker Carlisle at the Free Trade Club dinner said: "It is a monstrous abuse of the constitutional power to raise revenue to use it not for the purpose of revenue but for the purpose of prohibition of commerce. Again "Taxation only for the purpose of raising revenue for public uses should be established by law. I will add any body of men in bringing about this grand result." If Speaker Carlisle represents the Democracy, and on this occasion he seemed to speak in the name of the party, a good many producers and manufacturers who have hitherto voted that ticket will seek other leaders and associates.

MEXICAN TELEGRAMS. The Mexican Telegraph Company has reduced its rates. The revised tariff took effect on the 15th instant. Telegrams for Mexico are now accepted at all Western Union offices, Louisiana and Texas excepted, which have special rates, on the following terms: For ten words, date, address and signature free, to Tampico, $3.50; each extra word, 32 cents; Vera Cruz, $3.60; each extra word, 33 cents; City of Mexico, $4.00; each extra word, 37 cents. The tariff from San Francisco, via Negales, Arizona, to Aquazarca is $1.15; each extra word, 8 cents; Carbo, $1.08; each extra word, 8 cents; Guaymas, $1.39; each extra word, 11 cents; Hermosillo, $1.17; each extra word, 9 cents; Imuris, 90 cents; each extra word, 7 cents; Llano, 96 cents; each extra word, 7 cents; Magdalena, 90 cents; each extra word, 7 cents; Ortiz, $1.32; each extra word, 11 cents; Pesqueira, $1.11; each extra word, 9 cents; Querobabi, $1.00; each extra word, 7 cents; Santa Ana, 92 cents; each extra word, 7 cents; Torres, $1.23; each extra word, 10 cents.

TWENTY YEARS OF PROTECTION.

Before any American manufacturer or producer, or one who is indirectly interested in the welfare of manufacturing or producing; before any merchant engaged in internal commerce or any one indirectly interested in internal commerce; before any land owner or one indirectly interested in the profits or values of land, that is, before any American not chiefly engaged in importing or handling foreign merchandise, gives his vote or influence in favor of changing the revenue system of this country, let him ponder over the following facts under the protective system. We have grown from an agricultural country largely dependent on Europe for its manufactures, to a nation teeming with varied and important industries. During a little over twenty years of protection, we have added more than 20,000,000 to our population. The number of our cities and towns with over 8,000 population has risen from 141 to 286, or actually doubled. The combined population of the larger American cities has also more than doubled, rising from 5,000,000 in 1860 to 11,000,000 in 1880. The annual product of our coal mines has increased from 14,000,000 tons in 1860 to 80,000,000 tons in 1880. Our iron mines have increased their product from 900,000 tons of ore in 1860 to nearly nine times that amount. In 1860 our metal industries employed 53,000 persons; in 1880 they employed 300,000, consumed three and one-half times as much material, and produced more than three and one-half times as much value in manufactured articles as in 1860. In 1860 only some 130,000 persons were employed in industries relating to wood and its manufactures to-day there are 340,000, and the annual value of their products has increased three-fold. The number of hands engaged in woolen manufactures has increased from 60,000 to 160,000, and the yearly product of their industry is three and one-half times that of 1860. In cotton industries we have practically robbed England of 50,000,000 customers. There are now 200,000 operatives in our cotton mills, and the annual production of our cotton fabrics has doubled. In 1860 we imported 227,000,000 yards and only 23,000,000 yards in 1881, while, in the latter year we exported 150,000,000, or about six and one-half times as much as we imported. "But," says the tariff reformer, "this has been done at the cost of the consumer." It has not, in the case of cottons, for, except in a few unimportant lines which we do not yet manufacture to any extent, if at all, cotton goods in the United States are as cheap and sometimes cheaper than in England.

Nor has this extraordinary progress in manufactures interfered with agricultural pursuits; on the contrary, they have been stimulated. The number of farms has doubled: in 1860 there were 2,000,000 separate holdings and in 1880 a little over 4,000,000, and each year since has added a handsome percentage to the number. The average value of these holdings increased in these twenty years in the proportion of twenty to twelve. The production of cereals increased from 1,230,000,000 bushels in 1860 to 2,700,000,000 bushels in 1880, or about 110 per cent. The value of the live stock in the country rose from $1,000,000,000 to $1,500,000,000, and the annual products of our farms in 1880 reached $3,000,000,000. The number of sheep has doubled under the encouragement of a duty on wool, that is, has risen from 20,000,000 in 1860 to 40,000,000 in 1880, and the home product of wool has quadrupled, reaching the enormous quantity of 240,000,000 pounds. In the last ten years the ratio of increase in the number of persons following agriculture has increased more rapidly than the population of the nation at large. In 1870 it was 12,500,000 in 1880; it was 17,500,000. In these twenty years we have, moreover, more than doubled our exports, and, also, doubled our imports, though our population has only increased some 66 to 70 per cent in that period.

When our country is prospering so well; when our country is prospering as no country in the world's history has ever prospered, is it wise to enter upon a course of radical change in the system under which that prosperity has occurred? Tariff and revenue reformers tell us we should prosper as much or more under their system than under ours. We might or we might not. We have the evidence all around us of the advantages of our system, while their arguments are based on theory. Moreover, we can go further back in the history of this country and show that when their system of low tariff was in vogue the nation grew but slowly, and individually and in the aggregate the people of these United States were poor in money and poor in this world's goods. We are now the envy of the people of Europe and our growth in wealth and power is a source of uneasiness to Emperors and Kings. They know that our protective system is one of the stones, if not the keystone of the arch of the bridge over which the intelligence, the bone and sinew and the wealth of Europe is passing into the United States. European governments and European manufacturers know that out of and by means of protection at home we are building up an export commerce, with other nations that must in time eclipse the commerce of any one European nation and if persevered in all Europe combined.

And we are asked by Messrs. Carlisle and Morrison, two politicians of not any remarkable ability, and in Morrison's case without the slightest knowledge of the real needs of the producers and manufacturers of this country, to change all this, and why? Because forty years ago the Democratic party controlled by Southerners producing only raw material and manufacturing nothing at home, declared for the lowest tariff compatible with an efficient revenue for the nation's use.

If Democracy means a gradually reduced tariff until practical free trade is reached the majority of the people of the United States have no use for it and the party might as well disband. There are some intelligent men in the party, however, who are stout adherents of protection and believe that Democracy means something else than free trade, in short they believe that the low tariff notions are an excrescence on the party platform which should be cut off.

Mr. Watson, superintending engineer of the California Sugar Refinery, is gradually recovering. He, most fortunately, escaped internal injury by his terrible fall.

The Australians are producing a wool from a cross of the Saxony merino with Stropshire or Lincolnshire sheep, which, experts say, will worry our American wool growers, unless they are prepared to match it. In the grease it loses very little more than brook-washed wool and is nearly as strong as XXX Ohio.

IMMIGRANTS, SETTLERS AND LABORERS.

California could very easily support one hundred families where it now supports one. What we want just now, however, is not an immigration that would upset everything and make us grow in a year or two from a thinly-populated State to a great nation, as Jack's bean-stalk grew in a night. We would like, however, to add at least one hundred thousand to our agricultural population within the next twelve or eighteen months. If one-half were settlers and the other half laborers, we could dispose of them all to our advantage and, also, most certainly, to theirs. We do not want any more dudes, nor loafers, nor doctors or lawyers, nor merchants or merchants' clerks. We have enough already in the State of all these classes, but we want more men with capital and skill to make themselves homes on farms ranging from twenty to three hundred acres. We are getting some of these now, but not so rapidly as we should if the unexampled opportunities afforded for agriculture in its varied branches in this State were better known. Moreover, we want a large accession of white laborers, steady, industrious, docile people, who are willing to learn how we plow, how we plant, how we graft, how we prune, how we gather grapes and fruits, who will give a fair day's work for a day's high wages and will not run into drunken dissipation, leaving their employers' interests to suffer, on every occasion they get some unaccustomed dollars in their pockets. The intelligent agricultural laborer in this State who has not, at the end of five years, a small farm, vineyard or orchard of his own, or money enough out at interest to purchase one, has either been idle, extravagant or extraordinarily unfortunate. Any married laborer, with three or four growing boys and girls willing to help at such work as they can do, and settling in one of our numerous colonies, can make and save enough in two years to buy forty acres of land, build a nice house, and lay out an orchard or vineyard, or go into any other branch of farming he chooses. If boys prefer loafing to gathering fruits and grapes; if girls prefer thumping a piano to playing with a washboard; if women prefer gossiping to earning good wages by helping a neighbor, and the man's single pair of hands has to support five or six healthy people in idleness, he cannot save much, but even then he would probably be better off in California than in any other State in the Union. There are twenty counties in this State, probably thirty, which would each gladly receive one hundred such families during this summer and would insure them all fairly constant work and good wages. But these opportunities do not exist in the large towns and are not to be found as easily by hanging about San Francisco intelligence offices as by going direct to places where the new vineyards and orchards are being planted.

That from the lease of the seal catch of Alaska the United States has received an immense profit on the purchase and has the immense forests of lumber, worth many times the cost of the Alaska Territory, intact for future use. Seward did well in the bargain, and the lease to the Alaska Fur Company was, by far, the best and safest method by which the property could be made to bring in large returns, while reserving the main resources of the Territory until such time as the nation will need them.

That the last few days' fine weather has put more life into business.

That it is the fashion of London this winter to speak kindly of the poor.

That the Blaine boom is blooming too early and may yet be nipped by frost.

That the dynamite devils are devising more disasters for British property and people.

That there is much anxiety to know what the House of Representatives will do about the Mexican treaty.

That New York and San Francisco seem to pay more reverence to St. Patrick than any other cities in the Union.

That Justice Field has an adherent to his recent decision against the United States currency issue, in the New York *Herald*.

That the *Argonaut* wants presidential preferences. We will give ours two-fold. If Democratic, Randall; if Republican, Blaine.

That there are fifty ways in which the money the extra session will cost might have been spent more beneficially for the State.

That the Folsom State Prison investigation does not appear to have developed anything but what is creditable to the management.

That Boss Buckley probably has laid his plans to pass cinching bills to a stage that will force the railroad to confer with him and his lambs.

That Mapleson's opera troupe is excellent, but his management of the box office has been, may we say it, ————; no, we will instead say, execrable.

That California ought to make an exhibit of her products at the New Orleans exposition on a grander scale than anything yet attempted by this State.

That vine and wine literature is coming more and more into demand, and the MERCHANT is more sought after by those interested in vineyards and wine cellars.

That Pixley may be erratic, but he is candid. He acknowledges that he cannot help associating Minister Sargent, at Berlin, with Sargent, the California politician and Senator.

That there is no law in Idaho under which a railroad can be incorporated. Some of our malcontent Californians might gain happiness by emigrating to this favored Territory.

That, if the majority of the members of the Assembly are to be believed, they are going in for all that is unjust, fantastic and mischievous in litigation, and change the organic law until it will be more radical and irrational than it is.

That outside of those who make politics a calling and the managers of the *Examiner* it would be hard to find any one who wanted the Legislature called together or has any distinct idea what it is proposed to do in the extra session.

That owners of orchards and vineyards should give the Immigration Association some information as to the number of laborers they will need in the coming autumn in excess of last year, and how long they can furnish them steady employment.

That if a railroad is constructed from Manitoba to Hudson's Bay, it will make a short route during the five summer months and take not only much Dominion traffic from existing lines, but much of the traffic between the North-western states and Europe.

That we believe Neilson, *alias* McCann, has not been shamming, this time, but has really been sick; possibly a horrid nightmare of penitentiary gates ajar and stalking turnkeys following his steps, produced his illness. Verily, the way of the transgressor is hard.

That the San Francisco World's Fair project should not be allowed to fall to the ground. California in some respects has richer resources than any other State but the world does not yet believe it. We must gather the proofs and invite the citizens of other States and other nations to examine them.

That Dr. McDonald did not manufacture Vinegar Bitters so much for profit as to disgust the public with alcoholic liquors, by showing them how vile a beverage could be sold under an innocent name and attractive label. The public, however, only hollowed his head half way; they became disgusted with his bitters but drank more whiskey than before to overcome the evil effects of his concoctions.

WATER RIGHTS.

Those who are engaged in agricultural, horticultural and viticultural pursuits in Fresno and its vicinity were in high spirits last week over the findings of the jury in the case of Poly, Heilbron & Co. vs. the Fresno Canal Company, the trial of which had just concluded in the Superior Court of Tulare. The trial lasted about three weeks and was ably managed on both sides. The jury was carefully selected and it is generally conceded to have been composed of men exceptionally intelligent and impartial.

The most important of these issues or findings were these:

1. Have the plaintiffs sustained any damage by the reason of the diversion of water by the Canal Company? To this question their answer was "No."

2. Has the defendant diverted water from King's river for a period of five years prior to 1882, and, if so, has such diversion been made openly, notoriously, uninterruptedly and peaceably and with knowledge of plaintiffs and with their acquiescence? To all of which the jury answered "Yes."

3. In answer to the question of quantity of water diverted by defendant, the jury simply gave the dimensions of the various ditches by and through which the diversion was made.

4. In answer to the question as to whether King's river constituted one of the boundaries of plaintiffs' ranche—the Laguna de Tache—the jury decided that it did not.

Judge Cross, presiding, in previous trials has invariably decided in favor of riparian claimants and against the canal companies and settlers dependent on them. He has, of course, the power of setting aside the findings of the jury, but it is thought he will hardly do so, and, in any event, those interested feel assured that the Supreme Court will sustain them.

LET US HAVE LIGHT.

The California Electric Light Company besides its numerous private lights in stores and elsewhere is lighting the district bounded by Ellis, Pine, Powell and Leavenworth streets and practically showing the great superiority of the electric light by the "Brush" system over all other processes and especially for public street lighting over the best coal or coal and oil gas. There are now 35 lights in the district mentioned, on poles 35 feet in height, besides the five feet which are buried in the ground. The Company has now an application before the Board of Supervisors for a contract for lighting the whole city on the expiration of the present contract with the San Francisco Gas Light Company, which we hope will be accepted. Those cities in the United States, and we have two in California, San Jose and Los Angeles, which have adopted the Electric light, are far better illuminated than those which adhere to the coal gas lamp. The Mayor of Los Angeles in his last annual message, voiced the statements of that community and of all transient visitors, when he said that Los Angeles had deservedly the reputation of being the best lighted city in the United States. The Brush system of lighting is the most successful of all the electric inventions, the parent company has the largest electric factories in the world, and the parent and sub-companies are supplying a greater number of lights than all other processes combined. The Supervisors would make a great mistake if they renewed the coal gas contract for public lamps and neglected the opportunity now offered of lighting the whole city on the Brush system.

RETAILERS' CORNER.

The fine weather of the last few days has improved business with our wholesale houses somewhat, and the slight northerly wind has given them confidence, not only that the storms are over, but that the interior roads will rapidly get into such a condition that hauling can be resumed. We are still shut off from communication by rail with all of two and a part of three southern counties. Three times the Southern Pacific Railroad have repaired their track at an immense cost. Of course all these accidents have retarded the opening of the spring trade, but the condition of the country is so promising that our merchants are in good spirits, knowing that the demand though delayed must come, and that the agricultural interests of the State never rested on a sounder basis.

Besides the terrible expenses the southern railroad companies have incurred, and the enormous losses in receipts on traffic they have suffered and are suffering, California has borne other injuries by the unusual rains. The most serious of these is the destruction of crops on Roberts Island by the breaking of the levees, that it was estimated would yield half a million dollars.

The general prosperity of the State is, however, so well established, that heavy as these drawbacks are, they are only felt by individuals and localities and to a majority they are only incidents of news which do not affect their personal interests, and are therefore lightly borne.

Our refineries continue to have a good demand for all their products at card rates. The New York market, we learn by telegraph, is steady and fairly active at 7¾ for Crushed; 7 5-16 to 7⅜ for Granulated, 6⅞ for Standard A; and 5⅞ to 6¼ for Yellow.

Grocery grades have been very active during the week, but prices continue low. In fact Raw Sugars are selling at unusually low figures in all markets, without much prospect of any important immediate advance. One broker reports having sold 5,700 bags of Grocery Sugar during the week, at prices ranging from 4⅛ to 4¾ cents. He has no bags on hand and there are few in the market.

Although refiners have made no reduction in their list prices for Syrups, we hear of sales of round lots at a low figure, and the result will be seen in our Jobbers' Prices. It is said that stocks had accumulated and that Eastern Syrups, looking so well to the eye, but actually inferior in saccharine qualities to Californian, were interfering with the demand on our local producers.

Coffee is in fair request for local consumption, and there is a good demand for Eastern shipment, without change in prices. Good to prime Costa Rica, sells at 13 to 13¾ cents, also Guatemala and Salvador, and 12 to 12½ cents for unwashed Salvador.

Hawaiian Rice has advanced during the week in consequence of a brisk Eastern demand, which has come to the relief of importers. It is now quoted at 5 cents to 5¼, round lots, usual terms.

For Asiatic Rice, there is only a slight local demand on account of the condition of the roads, but we hear that there is some inquiry from the East, but this is not confirmed. Mixed is quotable at $4.50 and 4.75; No. 2 China from $5 to 5.25; No. 1 from $5.50 to $5.75, and Extra $6 to 6.25.

Tea is firm at advanced rates for some descriptions.

The Provision trade is quiet and has been so for several days, and without change in prices. All articles in this line are, however, firm at quotations given in another part of this day's issue, except Eastern hams. The market is somewhat overstocked with this class of goods. Beef products, on the other hand, are in light supply and very firm, and if anything quotations are a point higher.

Codfish is again lower all round one cent a pound, and is now quoted at 5 cents for 30 pound boxes, 4 cents for 100 pound cases, and 3 cents for 50 pound bundles.

The common descriptions of California Raisins are selling at $1.25, ranging to $1.60 per box.

Deviled Ham is quoted at $2.70 to $2.75; formerly $2.75 to $2.85.

Other Canned Goods of all descriptions, including Salmon, are quiet at unchanged prices.

In Dried Fruits, also, business is dull and we have no changes to report.

In Drugs and Chemicals there is no change to report, except in Morphine, which has slightly advanced, and Quinine which has dropped from $2 to $1.80.

Castor Oils No. 1 and 2, are 25 cents and 15 cents higher respectively.

In Lucca Oil, quarts and pints are now selling at $9.25 to $10.50, formerly quoted at $9.60, to $10.50.

In Nails another advance of ten cents all along the line has taken place, and a corresponding advance in Brads and Spikes.

Hunt's Axes (handled) are 50 cents higher.

The Paint Trade is quiet but looking for a more active business as the weather becomes settled.

The debate by the House of the bill for extending the time for payment of the revenue tax on whisky in bond, now due and coming due, has caused a wide-spread consternation and much financial uneasiness in the great distillery districts of the West and Southwest. The distillers had been led by the Cutler-Morrison wing of the Democracy to believe that the bill should pass; and some of them threaten vengeance in the coming Presidential election. The distillers have hath to do in large contributors to election funds and consider the moslves abused. Not only are the distillers and holders of the large quantities of whisky now in bond and in the application of the drawback, but at least half a dozen banks have used advances beyond the value of the securities if the same to be forced on the market and sold without reserve. The Treasury does not need the money now, and it was in the interest of morality, as well as of commerce and of finance, that the excessive stock should be allowed to remain in bond and further mature. But the exigencies of the tariff reformers demanded that the internal revenue from this source should be kept up that they might carry out their scheme of materially reducing the revenue from customs duties.

JOBBERS' PRICES.

MARZO 15 1884

The following Prices are those at which city and country Retail Grocers can buy in lots to suit their trade and are corrected weekly.

Staple Groceries.

SUGAR.

2c extra for bl bbls

In this short review of the nascent sugar industry of the north we should not neglect to mention the only successful beet-sugar manufactory in the United States, that is the Standard Sugar Refinery, of Alvarado, Cal. Last season was the fifth of its existence and work, and its balance-sheet for October, the first working month of the season, shows a very satisfactory result. There were 2,406 tons of beets worked up, for which they paid the growers $4.60 per ton. From this amount they produced 341,016 pounds of sugar, which sold for $34,894.17. The pulp sold for $722, making the total of receipts $35,616.17. The entire expense for beets and manufacture, including pay-roll, was $23,938.03, leaving as the profits of the month $11,678.14. Their product is a white lump sugar.

There are two obstacles in the way of introducing beet culture in the Eastern States.

One is the apathy of the farmers, whom it is difficult to persuade to raise the beets.

The other is that it exhausts the soil very rapidly, and necessitates high fertilization.

We believe, however, that if farmers could get $4.60 per ton for beets they would raise them. From fifteen to twenty tons can be grown per acre, and even with considerable cost for fertilizers the crop would be a paying one.

Crows have been known to go to roost with the barnyard fowls during a cold storm.

The Christians of Egypt burnt butter instead of oil in their lamps, in the third century.

It was not till after the ninth century that copyists began to leave spaces between words in writing.

If the ticking of a watch can be heard twenty eight-inches from the ear the hearing is normal.

THE WOOL MARKET.

We have nothing new to report this week. There is but a scanty stock on hand and the demand such as it is, is compared to local buyers.

A telegram dated New York, the 17th, says: The wool market continues to be very dull and uninteresting. Buyers are slowly making known their wants. It is only by persistent urging that sales of any consequence can be effected. Thompson's sales of the week are only 500 pounds. Fall California, unscoured 12 @ 14½ cents. Koehland has 30,000 pounds Eastern Oregon on Boston at 22 cents, and 5,000 pounds scoured California, here, at about 50 cents; also 80,000 pounds, Fall California and 12,000 pounds combing, Eastern Oregon on terms that he preferred to reserve. Harris, from San Francisco, arrived during the week and appears anxious to find a buyer for 150 bales Eastern Oregon. He possesses 22 cents, but the lot is regarded worth about 18 cents. George and Charles Abbott are also here from San Francisco seeking orders, but their efforts so far have not proved very successful.

We quote:

Northern Choice Fall	15	@16

Southern Fall, free	13	@15
do do defective	8	@10

Trade Failures.

There were 211 failures in the United States reported to *Bradstreet's* during the week, ending March 8th, 26 less than the preceding week, 3 more than the corresponding week of 1883, and 34 more than the same week of 1882. About 83 per cent were those of small traders whose capital was under $5,000. Among the failures reported were Lyman & Curtis, toys; John L. Brooks & Co., wholesale provisions, and Richard Stobo & Co., exporters of provisions, New York city; Schwalbach & Obrig, toys, and George W. Brown, builder, Brooklyn. Compared with the previous week the middle states had 51, a decrease of 5; New England states 29, an increase of 1, southern states 37, a decrease of 21; western states 77, a decrease of 2; Pacific states and territories 17, a decrease of 1; Canada and the provinces 12, an increase of 5. In the principal trades they were as follows: General stores, 12; grocers, 4; clothing, 17; shoes, 11; produce and provisions, 11; manufacturers, 9; hotels and restaurants, 8; dry goods, 8; liquors, 7; jewelry 6; drugs, 6; grain, 5; hardware and agricultural implements, 5; bakers and confectioners, 4; carriages 4; petroleum brokers, 4; tobacco and cigars, 4; bankers and brokers, 3; carpenters and builders, 3; lumber, 3; hats, 3; millinery, 3; books, stationery, etc., 3; toys, 2; butchers, 2; musical instruments, 2.

THE CALIFORNIA

Electric Light Company,

Nos. 222 to 232 JESSIE ST., S. F.

Has the sole and exclusive right for the Pacific Coast, including the States of California, Oregon, Nevada, and Washington Territory, to use and sell the various electrical inventions of CHARLES W. BRUSH, M. E., Ph. D. The most prominent of these inventions are his apparatus for Electric Light, consisting of his

Dynamo Electric Machines, Lamps,

Automatic Current Governors, Carbons, Apparatus for Electro-Plating, Apparatus for the Storage of Electricity, Apparatus for Producing Power from Electricity, Etc., Etc.

The "Brush" is the only complete and PERFECT SYSTEM of electric lighting. The "Brush" Machines. The best Lamps. The ONLY PRACTICAL Storage Batteries. The purest and best Carbons.

The "Brush" prices are the lowest. The factory the largest and the business the most extensive in the world. There are more "Brush" apparatus in use than all other systems combined.

Estimates furnished upon application.

VOL XI. NO. 25. SAN FRANCISCO, MARCH 28, 1884. PRICE TEN CENTS.

Mexico as a Market.

The completion of the Mexican Central railway, establishing as it does a line of direct communication between the United States and the capital, and other important cities and trade centers of the Mexican republic, marks not only an important era in the political history of the two nations, but, what is of greater moment to our manufacturers and merchants, in the commercial relations of the two countries as well. With this line of railway in active operation, and those now in process of construction between the two countries, east and west nearing completion, the time may be said to be nearly at hand when these neighboring republics, each producing mostly the things needed by the other, will begin a neighborly system of exchange and barter which cannot but enure to the benefit of both.

In considering Mexico as a market for hardware, it must not be forgotten that large as the population appears to be, the consuming part of it is limited to about 2,500,000, and therefore it would not be reasonable to expect to sell large invoices of any particular article. The Mexicans are, in many respects, a conservative people, and prefer to buy goods they already know, so that in opening up a trade in hardware it is absolutely necessary to have an intimate detailed knowledge of the shapes, sizes, qualities and prices of the goods already known in the market. Novelties, for a time at least, will hardly be safe to introduce in any quantity. It is a mistake that goods which are here unreliable may find a market there, the intelligent Mexican being a very good judge of quality and will have the best, if he can afford it. Even carpenters tools, for example chisels and gouges that are not of English make will scarcely find a purchaser, whereas American axes and augers on account of their superior excellence, defy competition, and instances might be multiplied indefinitely to show the discrimination with which every seperate article is selected according to its make, finish, and adaptability to the uses for which it is required. It should be borne in mind, also, that, in view of the possible development of Mexico, every country is striving to increase its share in her commerce, and the competition in quality, no less than price, is very keen. The United States is expecting as by right, a large share of Mexican trade, and ought to receive it under favor of a treaty of reciprocity; but it is well to remember that Germany is making great strides in steel goods, and that Belgium is straining every nerve to find a market there for machinery and heavy castings.

The imports of firearms and ammunition, which came entirely from the United States appear to have fallen off of late owing to the tranquility of the country. On the other hand the rapid construction of railways has caused a very large demand for tools and implements, such as spades, shovels, etc., as well as for such carpenter tools as saws, axes, adzes and augers. Besides these the following articles may be mentioned. Domestic machinery, including sewing and washing machines, coffee mills, etc., clocks, printing presses, iron piping, nails and screws, crucibles, rubber sheeting and tubing, oil cloths, belting for machinery, cutlery and table knives and forks, locks, bolts, small brass work, brushes, thread for shoemaking and saddlery, and numerous other articles. The consumption of wrought iron and steel is said to be increasing, especially in the item of iron beams for purposes of construction. The consumption of steel for use in the mines is considerable. A large quantity of sheet iron is also imported, besides corrugated iron roofing, and sheet copper. The lighter American castings are said to compete favorably with the heavier English, but in the larger ones, such as columns, piles, etc., the English are preferred, though the Belgians have become strong competitors. In the matter of machinery—agricultural, mining and industrial—the prospects for the future developments of a successful trade with Mexico are said to be very promising, as our machinery is regarded with most favor, as it is lighter than that of English make. As mining machinery has frequently to be transported great distances over mountainous roads, at great expense, the lighter the weight, of course, the more cheaply it can be transferred. Up to the present time most of the trade in machinery in Mexico has been carried on through the capital, and the business is usually conducted on cash principles. English machines are invariably more costly than others, often from 50 to 100 per cent more; but in spite of this, some of them are given the preference where transportation is not difficult or expensive, and where wealthy planters do not hesitate to pay a high price for an article that seems to promise the greatest durability. A fair amount of steam engines, pumping machinery for mines, and machinery for cotton and woolen factories is also introduced from England. France supplies a little high grade sugar machinery; Belgium sends some heavy machinery for the government arts; while the United States provides the infinitely greatest number of the plows, reapers, cultivators, drills, horse-rakes, corn coffee-mills, horse-whims weighing machines, safes, and machine rock drills, besides a large portion of the steam engines now in use in the country. On the whole, therefore, while it is not probable that the United States will achieve any immediate large accession of trade from the opening of the quicker rail communication with Mexico, one thing may be reasonably looked for, and that is an increase in the volume of the trade we already have; while the growth and extension of the trade between the two countries must come eventually. It is only a matter of a very few years at the most.—*Cotton, Wool and Iron.*

A Voice for Northern California.

Isaac N. Hoag, Land Agent of the C. P. R. R. at Chicago attended a meeting of the Board of Trade of Sacramento a few days ago and made a glowing speech in which he very justly lauded the productiveness of Middle and Northern California. Perhaps it was hardly wise to make any comparison between the citrus fruits of the Northern and Middle and the Southern Counties as regards quality. It is, however quite true that the fruits of the latter do not ripen so early as in some Northern locations. In the course of his remarks he said that when he told the people in the East that oranges ripened in Placer and Butte counties a month earlier than they did at Los Angeles his story was hardly credited. When informed that some of the finest orange groves in the State were on General Bidwell's place and in the neighborhood of Oroville, they were amazed. Chicago and Boston are on a line with the northern boundary of California, and he told them that within 100 miles of that line, in the foothills of the Sierras and the Coast Range and along the streams of the upper Sacramento valley, were grown oranges that excel in size and flavor and ripen a month earlier than they do in Los Angeles. He said you must educate the people in the East up to the belief that not all of California that is worth anything lies south of San Francisco. He was satisfied that since he went to Chicago he has turned hundreds of families into Northern and Central California that were en route to Oregon. The Central Pacific had spent upwards of $6,000 in publications for distribution, and he had been instructed to use $100 worth of postage a month.

He says if he was placed in Chicago to further the interests of Southern California his task would be comparatively easy, as they furnish him with all the pamphlets and painted matter he can use. But being the representative of the entire State—and he might say specially for Northern and Central California—he found it difficult work to turn the immigration hitherward, owing largely to the want of information furnished him through the press and other means. This he held was unfortunate, and steps should be taken at once to place in his office, at the disposal of immigrant bureaus information that would reach immigrant before he starts. These pamphlets should set forth the magnificent and boundless resources of Northern and Central California, especially that of Sacramento county and others adjoining. Let this matter be stirred up by the press in each county in the interest of their several localities, and a little investigation will convince us that we are the listless inhabitants of the most favored regions on the Pacific coast if not in the world.

The S. F. MERCHANT is more generally filed for future reference and for binding than any paper published in California.

How to have Good Credit.

For a merchant young in business it is of the greatest importance to him that he should possess a good credit, and this can always be had by the observance of certain lines of action. And first, and greatest of all, must be learned the importance of keeping all promises and engagements. A young merchant, for instance, buys a bill of goods on thirty days' time. Although there may be nothing said about the matter, the bill comes to him as a thirty-day bill, according to an accustomed usage of trade. When the time is up, he may think that a few days' delay will be of no account, so he delays sending the pay for a week or more. In the meantime, the wholesaler from whom he purchased finds the thirty days gone and no remittance made. He at once notes the fact down, and, perhaps, sends a statement calling the attention of the merchant to the non-fulfillment of his agreement, for that is what it really is.

Now, the retailer, though his intentions are good and while he may be perfectly responsible, makes a bad impression on the wholesaler, and his credit and standing are injured. The wholesaler reflects that here is a man behind in his payments. It may be because he is hard up and it may be otherwise, and the wholesaler says that caution must be exercised in selling such a merchant, and, as the payment is not prompt and risks are taken, the profit on what he sells him must be greater, to cover all these deficiencies. Thus the retailer not only hurts his credit, but he is hurting himself financially.

Promptness in meeting payments is a prime requisite to a good business standing, and one should learn that ten days means ten days, and not twelve or fifteen. It is natural for a retailer to think that it makes no difference if he don't pay his bill just on time, for it is not very large, and "I guess the wholesaler can stand it a few days longer." But when it happens that 4,999 other retailers are of the same opinion, it will be at once seen that the wholesale dealer can not stand it very easily, and sharp duns from him may become a necessity. It is the same with the retailer and his customer. He may not feel it much if one customer is behind in his pay, but when fifty are in arrears he feels himself on the ragged edge. The prompt payer, whether consumer or retailer, is the one that gets the best treatment.—*St. Louis Grocer.*

Vineyard work is in lively progress all over this valley. Many hundred men are employed, and there is every disposition evinced to take advantage of the drying weather. We notice that heavy loads of cuttings are still moving towards the vine yards.—*St. Helena Times.*

The young orange groves and pineapple trees along the coast of Florida, as far south as Manatee, having been seriously damaged by recent frosts.

The damage by flood in Los Angeles during the late storm was very great. J. E. Hollingsworth, the banker, losing vineyard and orchard valued at $20,000. The vines were said to be sixty years old.

John L. Hall, of Riverside, has sent to the *Press and Horticulturist*, a navel orange, measuring 15 inches in circumference each way, and weighing 1¾ pounds. It was raised in Arlington and has been placed on exhibition at Glenwood.

A FRESNO VITICULTURAL CLUB.

Those engaged in viticultural pursuits in Fresno county, whether for the purpose of making wine, curing raisins, or shipping grapes, have determined on organizing a viticultural club on the pattern of those of St. Helena, Napa, Santa Clara, Cloverdale, and Sonoma. About 100 vinegrowers have expressed their intention of becoming members. A hall is being fitted up in Fresno for the accommodation of the club, and the preliminary meeting will be held on Saturday. The more active clubs there are in the State, the more powerful the influence of viticulture will be on State and National legislation. The main purpose of such clubs, however, is the gathering and diffusion of information among practical viticulturists.

IRRIGATED AND NON-IRRIGATED RAISIN GRAPES.

The recent controversy between Messrs. Wetmore and Blowers arose on the question of summer irrigation of raisin grapes. The majority of raisin grape growers in this State, as well as Mr. Wetmore, are opposed to summer irrigation because while it may increase the yield, it has a tendency to grossly degrade the quality of the fruit. Miss Austin of Fresno in our interview reported on the 11th inst. condemns careless packing of raisins as well as summer irrigation. We have before us a copy of a letter written by the manager of the Dried Fruit Department of H. K. Thurber & Co., of New York, the largest grocery house in the United States and we believe in the world. This letter authoritatively confirms Mr. Wetmore's view that grapes that are not irrigated in summer yield finer raisins than those which are so irrigated and also Miss Austin's statement that indifferent packing should be avoided. We should explain that sample boxes of the raisins reported on, were sent to Mr. Macy for submission to the New York trade, and the following is the result:

OFFICE OF H. K. THURBER & CO.

NEW YORK, December 28, 1883.

MR. MACY—*Dear Sir.* Having examined the California raisins, at your request, below I give you my report. The ¼ box from Riverside, said to have been irrigated, I find a good, sound, and fair flavored raisin, better than the imported Malaga, "London Layer", but not put up in as good style; if put up with fancy papers and 22 lbs to box, the same as imported "L. L", they would sell for 10 to 15c per box more. Price of imported this year $2 15 to $2 20. As compared with the ¼ box of El Cajon, said not to have been irrigated, the Riverside is not as good, for the reason that they are not as large, or as good flavored, or as large bunches; there being many more loose raisins among them. The El Cajon is a very nice, fine flavored raisin, good size fruit and bunches and if packed 22 lbs to box and fancy papers like Foreign, would bring from 25 to 30c per box more than imported "L.L.". The Sultanas would not take the place of Currants, or of imported Sultanas; the flavor and color are against them as a substitute for Sultana raisins. They might sell to the baker trade, put up in 100 lb boxes without papers, at 6 to 7c per lb here. If you would like to make an Agency for your raisins here, I think I could handle your goods to advantage and would give you our ideas as to how they should be packed, etc. You don't want to lose sight of the fact that there is a duty of 2½c per lb on imported raisins that Congress may take off, which of course would reduce the cost of imported.

Yours, respectfully,

H. K. THURBER & CO.,

R. F. BROWN, Manager of Foreign Fruit Department.

NOTE. Mr. Macy, to whom this note is addressed, is a fancy retail grocer in New York; the box was sent to him so there would be no prejudice on the part of the examiner.

The box of Riverside raisins Mr. Benedict procured from raisin packers in Riverside, telling them at the time it was going to be sent in competition with Cajon raisins and was considered a fine box, as the report shows, but not as good as the Cajon.

Mr. Chas. A. Wetmore, of the Cajon Land Co., in San Diego county, is here perfecting a sale of a ten thousand acre tract of that company's lands, which will be developed at once. Mr. Wetmore informs us the continued rain has materially delayed the planting of vines, as the ground has been too wet to plow. This wealthy syndicate is doing wonders toward developing San Diego county, and demonstrating what we have always contended, the fact that too much irrigation had a tendency to reduce the standard of excellence in our wines and raisins, but we shall have more to say about that in the future.—*Los Angeles Express*, March, 20th.

Every day it becomes more apparent that we must have a road direct to San Diego. The necessity of a direct road down the coast to that harbor for deep sea vessels, as well as to get the trade and business of that city and country, forces itself on the practical observer with greater force this year than ever before. Either this must be done, or an expenditure of not less than two millions in one dab, at either San Pedro or Santa Monica.—*Los Angeles Express*, March 20th.

VINE CUTTINGS.

SPECIAL REDUCTIONS

FOR

Nursery Purposes.

Being in danger of having a surplus of vine cuttings, on account of the unfavorable season, which prevents proper preparation of vineyard land for planting, I shall offer my remaining stock of the following varieties at reduced rates, preferring to sacrifice in cost, rather than to suffer these choice lots to be wasted. Those who intend to plant next year may take this opportunity to plant nurseries.

RIESLING	30,000
ZINFANDEL	160,000
BERGER	35,000
FOLLE BLANCHE	20,000
SAUVIGNON VERT	9,000
MEUNIER	40,000
CHAUCHE NOIR	35,000
MALBECK	12,000
RIPARIA	50,000

27,000 Acres of Choice Vine Fruit, Olive, Alfalfa and Grazing Land to be Sold in Large and Small Tracts.

To hasten the development of the colony now growing up in the Cajon Valley, San Diego county, the El Cajon Land Company will temporarily suspend the sale of its stock and will make most favorable offerings to induce rapid settlement of the country. The 27,000 acres controlled by the Company will, until further notice, be offered in tracts, as follows:

First—The 2500 acres of platted, level land, in lots from 5 to 160 acres—uniform in quality—at $60 per acre, cash. These lands are most favorably situated for vine, olive, citrus and fruit culture, or for making pleasant homes, where the benefits of climate only are sought. Adjacent lands of same quality cannot be purchased at less than $100 per acre. The Cajon Valley already has the nucleus of a fine settlement, a school-house, church, post-office, hotel, etc. About 500 acres in vines and trees are already planted.

Second—The so-called "T." tract, containing 10,000 acres of land, comprising 2,500 acres of valley land, 1,500 acres of rolling mesa, suitable for grain, and 6,000 acres of hills suitable for grazing, will be sold entire. This would make a first-class stock ranch, or could be cut up advantageously for a small colony; wood on this tract is estimated at 20,000 cords. The price will be so low that an investor may subdivide and sell off 1,000 acres of the valley land, and clear all his expenditures.

Third—The so-called "Monte"—a tract of 1,000 acres of the richest alluvial soil along the San Diego river; carries about 20,000 cords of wood. This land in any upper county of the State would sell for $150 to $500 per acre. It will be sold entire, together with adjacent hills.

Fourth—The grazing lands of the "S." tract between the platted lands and the "Monte," about 10,000 acres, partly suitable for cultivation, will be sold either together with the Monte, or separately.

STATE IRRIGATION CONVENTION

A call was issued for a State Irrigation Convention to be held at Riverside on March 12th, 13th and 14th. The storm interfered with the attendance and the place of meeting was not well chosen. It was proposed to hold an adjourned meeting at Los Angeles, but Riverside being in preponderance finally settled that it should be held in that colony on May 14th.

Mr. Holt, of the *Press and Horticulturist*, has offered to give in his valuable paper a stenographic report of the proceedings. Such a report we are sure will be read with great interest in many counties of the State. In an editorial published at the same time as the report of the Convention, the *Press* said:

"We repeat here what has been frequently stated in these columns before, that the system of distributing water in Riverside is a disgrace to a civilized community."

The Convention was called to order by Mr. Holt, of the *Press*, and A. P. Johnson was elected President, and L. M. Holt, Secretary. W. H. Hall, State Engineer, telegraphed that he could not attend. Professor C. H. Dwinelle could not attend, but expressed his sympathy with the movement by telegraph.

Hon. J. W. Satterwhite thought discussion would do much good but did not think legislation would help matters.

The decisions of the courts must be relied upon to remedy whatever evils there may exist between riparian ownership and prior appropriation. The use of water under prior appropriation or prescription under statutes of legislation is rapidly settling these questions as against riparian ownership.

Legislation cannot interfere to say how much water should be used on an acre of land. Courts and juries must decide whether water is wasted or not. People will differ in opinion as to how much water is necessary. How much land a given quantity of water will irrigate is a question of fact. Courts cannot act arbitrarily, but their decisions will continually tend to settle these disturbed questions.

But the Legislature can act on the question of eminent domain—the public use of water. While in the Legislature he tried to amend the codes by making the construction of a ditch for one or more persons a public work, and the use of the water a public use, but he found it would not do. The code of civil procedure says that the supplying of water to a farming neighborhood is a public use; the Legislature can say that a number of farmers—say ten—constitute a farming neighborhood.

The San Bernardino Court, a few days since, had a case from San Timoteo for the division of water; the water had been used for twenty-five years; he appeared for the defense; he relied on prescription, prior appropriation, and statutes of limitation, but the judge decided on the basis of riparian rights, he divided the water according to the frontage of the land upon the stream. If it is impracticable to cut the stream up into small subdivisions, it can be divided by hours, giving each claimant the whole stream, making time the basis of division, according to the amount of irrigable land owned by each claimant. He was not so afraid of riparian rights as he used to be.

The new comers of California had demonstrated the fact that we could accomplish more with water than the old settlers had thought possible. In some localities it has been discovered that we can accomplish much without any water at all, while other localities need but comparatively little. The doctrine now is to economise the water and make it do as much duty as possible.

T. H. B. Chamblin thought the attendance too slim to do much.

John G. North thought that the question of eminent domain could be made to take care of the doctrine of riparian rights.

Mr. Satterwhite replied that such was the case; that riparian claims had been already condemned by legal process.

Capt. W. T. Sayward said: During the past five years nearly all legislation on water matters in this State, so far as irrigation waters were concerned, had been made with a view to affect Riverside and suit the interests of her people. Four years ago a meeting of irrigators was held in Los Angeles, and a bill was gotten up, but on some points they could not agree, and the bill was not presented. Soon after the State Grange attempted the work, but conflicting interests interfered, and the work was abandoned. The members of the Legislature, as a rule, don't know or care anything about this question. If a bill could be carefully prepared and backed up by a committee of intelligent men, it would be passed.

The question of riparian rights was carefully, fully and ably discussed in a report prepared by ex-Governor Downey. He ignored riparian rights; they were inconsistent with our laws and customs and wants. This country was originally under Mexican laws, and these laws were different from those of England. He had in his possession a copy of Spanish laws, touching irrigation, for the past 800 years. In most irrigated countries the ownership and management of the irrigating system were in the hands of the government. Where it was not, capital was protected. Spain, since 1866, had appropriated $5,000,000 for irrigation purposes, and Spain now owns all the canals in the country. The works were so expensive that the government had to take hold of the matter. The cost of water was an important one. It was not right to fix the price of water the same when the canals cost $100,000 as when they cost but $5,000. Spain fixes the price according to the cost of the works. In one case the cost is $1,865 per year for one cubic foot of water per second—50 inches perpetual flow under four inch pressure. In Fresno county one canal charges $800 a year for the same amount.

Mr. North of the Riverside Irrigation Company corrected Mr. Sayward with the statement that the $800 was for the first cost of the water right of 50 inch s, and that the annual charge thereafter was but $100 a year. He further stated as a reason for the united action of water consumers that the President of the Riverside Canal Company had informed him that the water companies of the State had formed a combination and subscribed money to procure proper legislation at the next session of the Legislature.

Mr. Holt stated that so far as Southern California was concerned, Riverside had the only water company selling water for irrigation purposes where the stock of the company was not held by the consumers of water.

Mr. North referred to Fresno county as having companies also, whose stock was not held by the consumers.

Capt. Sayward referred to his management of the canals, when Arlington was first put upon the market. He had no other idea in selling land in Arlington, but to sell the water stock with the land. The company, when organized, so decided. He thought they could irrigate 12,000 acres of land, and that the canals would cost $120,000—$10 per share, or acre. He thought the price of water stock should be fixed at $10 per share, and then they could sell the land for all they could get for it. Water contracts were proposed by him and endorsed by the company; these contracts compelled the company to sell the water stock to purchasers of land at their option, but did not compel them to buy; the idea was to sell the land and contract the stock, giving their purchasers time in which to take the stock,—they not to take the stock till the canals were completed. Pending construction of canals the company furnished water to owners of land on government tracts. The Satterwhite bill was then passed which compelled the company to sell water to all consumers at the same price, and then it was no object for the people to take the stock as they could get their water at bedrock price and save their $10 per acre. Had the people taken the stock the differences of to-day would not have existed.

Mr. Satterwhite stated that the Legislature had the power to regulate rates, as that would not interfere with any vested rights. He referred at some length to the proposition that so far as regulation was concerned, an individual stood the same as

Hints for the Inexperienced Vine Growers.

[illegible] r correspondent of the Contra Costa Gazette.]

"There are probably but few subjects pertaining to the products of the soil in California, at the present time that are claiming more attention, or being more discussed, than the subject of viticulture. We can see it in the newspaper but what our attention is called to the fact that hundreds of acres of vines are being planted in different parts of this State, also the statements of the large profits realized by those who have been engaged during the past few years in the production of grapes, realizing from $50 to $200 per acre each year. While many persons experienced in viticulture are enlarging their vineyards, others who are wholly inexperienced are engaging in the business believing that in a few years they will receive a competency, if not a fortune. That such will not be the case in many instances may be predicted, for many reasons, among which are the following: 1st, the adaptability of the soil. I consider it nearly [illegible] best to propagate grape cuttings in a still, black clay or adobe; the soil in such a case remains, say 12 to 14 inches below the surface, cold so long after the cuttings have been planted, that the cuttings before they can germinate, 2d, the method adopted in planting, that is, to make holes for the cuttings with an iron rod. I consider in no case should such a plan be adopted, unless in a sandy loam, where ground has been thoroughly subsoiled. 3d, there are many localities in California where the soil is well adapted to the vine, but climatic influences are such that it is nearly impossible to ripen grapes; such as fog causing blights or mildew. Another unfortunate condition is the late frosts in April or May when the young shoots are grown from two to six and eight inches, which being killed, it is rarely the case that even one half the crop is raised. And, lastly, which are important considerations, the manner of pruning and of cultivation. Many vineyards have been ruined in consequence of bad pruning, causing disease among which are the black knot, (anthracnose) etc. I know a gentleman in this county who owns a vineyard of 5 acres, well located, good soil, foreign varieties, which vineyard has been ruined by bad pruning, and allowing large quantities of sprouts and suckers to grow. This retained a year from said vine yard did not exceed fifty dollars. The inquiry will naturally be made by the inexperienced vine grower: "To whom shall I apply for information?" My answer is, to those who have had long experience in the cultivation of the vine, and particularly to those who have been successful, not those charlatans, or persons who fear that should you gather some important information from them it might injure them in the matter of dollars and cent. And, in conclusion, allow me to suggest that in addition to what oral or other information you may receive, observe closely the manner in which experienced and successful viticulturists prune and cultivate their vineyards, and remember in addition to the above suggestions that it requires a great amount of industry and constant vigilance to prevent noxious insects destroying the labor of years.

There was a light frost in Napa Valley on Monday morning, but no damage was done.

Improvements at Ontario, San Bernardino County.

The past week, since the close of the big storms, says the Ontario *Feud Grower*, has been improved extensively by real estate owners in the planting of orchards and vineyards. On every hand teams are engaged plowing, leveling and cultivating, while men are at work planting deciduous trees and vines, and getting ready the ground for orange and lemon trees. The brick kiln is in process of construction, the late rains having put back the work and ruined many bricks before they were ready to place in the kiln. Work will be pushed as fast as the weather will permit, and as soon as possible the kiln will be burned. There will be enough brick in the kiln to erect the college building, and several hundred thousand to spare for the use of those who desire to put up business blocks. A. E. Payne is getting ready to erect a two-story brick block the coming season. Building operations are very brisk all over the settlement. The Perry Lumber Company have put in a lumber yard at Ontario in charge of Mr. Waddingham. The work on the tunnel is developing a good water supply, and there is to-day over 200 inches of water under four inch pressure, running out of the mouth of the tunnel.

Napa City.

The Napa *Reporter* has a good editorial on the prospects of its city and popularity as a place of residence. The town levy is limited to 35 cents, and only two taxes have been collected in eight years. It has money in the treasury, and an excellent water system.

In addition to these advantages, says the *Reporter*, we have shipping facilities that are not surpassed by any town on the coast. Situated as it is on tide water, Napa is in direct communication with the metropolis of the State, by railroad, steamer and schooner lines, thus having a guarantee that freights and fares will always be down to the lowest point. Probably the most important advantage to be taken into consideration by the man looking for investment, is that Napa is on the up grade of prosperity, and that the summit of the same will not be reached in less than a quarter of a century. Our town and our county are but just entering upon an era of prosperity and growth that is sure to continue for years to come, until Napa is a city of at least 10,000 inhabitants, and the county supports a population of from forty to fifty thousand. the improvements being made on every hand, the factories now running and the new ones in course of erection and to be erected, all give evidence that men of enterprise and capital are becoming interested in this locality, and that our little city is but yet in her swaddling clothes as regards population and wealth.

St. Helena Wine Growers Association.

There was a slim attendence at the wine-growers meeting on Saturday, owing, probably, to the fact that most of the vine-yardists are very busy plowing, etc. Mr. Krug presided, and after the minutes of last meeting had been read and approved, a lively conversation of about half an hours, duration was indulged in regarding phylloxera. Mr. Krug said that too little attention was paid to this important question; that he had disinfected over 200,000 cuttings and that they grew nicely. That the affected vines should be operated upon by using Bi Sulphide of Carbon. He read an ordinance passed by the Board of Supervisors of Lake county, imposing a fine of from $50 to $100 for bringing grape vine roots or cuttings into that county which had not been previously disinfected. Mr. Lyman doubted if such an ordinance could be passed in this county. The President regretted that there was so small an attendance and hoped that the Club would soon be thoroughly reorganized for business, and he was certain that much good would result from regular meetings.—*St. Helena Times.*

The Napa *Reporter* says: From all that we can hear, the fruit crop this year in Napa valley will be very large. The trees look healthy, and the orchardists expect to get a goodly sum this season.

THE LABOR QUESTION.

The *Scientific* of Chevalade says

"The MERCHANT is beginning to express the opinion, which months ago we ventilated, that the first trouble to be faced by the viticulturists will be the dearth of laborers."

The MERCHANT not only expressed this opinion, but urged the wine and fruit growers to co-operate with the merchants of this city in promoting immigration, such as they needed, before our friend Livermash established his excellent journal. The *Scientific* continues: "In factory and in field the Chinese are becoming intolerable, and something has to be done. We suggest and believe that a movement should be made to secure the foundation of a State Bureau of Immigration. We understand that there is one in Texas, represented in London by a Mr. Kingsbury, who is the means of attracting numbers of persons to locate in the Lone Star State. Our climate is salubrious, the cost of living is reasonable, and wages are high; and yet nothing is done by the State to show the merits of our splendid country as a field for men anxious and willing to work. The matter of inducing immigration is necessary and pressing, and should be attended to at the next regular session of the Legislature. No time should be lost, for speedy relief is necessary, and should be instituted before numbers of our fruit and grape growers are ruined by reason of being unable to have their crops gathered at rates leaving the proper margin of profit. If there were such an organization among vineyard and orchard men, as we have heretofore advocated, a great, and strong, and successful effort could be made to force the notice of this matter by the next Legislature, and then some such Bureau as we suggest might be formed. It would be of much greater advantage to the State than the Bureau of Statistics."

We do not believe in waiting for the Legislature, and it is by no means certain that a Legislature of politicians would do anything if they were asked. Ambitious members would want to know before hand what ticket these immigrants would be likely to vote. We want labor this Autumn, and we shall want still more next. If vine and fruit growers will let the California Immigration Association know how much labor they need, how many months in the year they can guarantee employment, what wages they will pay, and will subscribe towards the expenses of the Association, now supported entirely by a few liberal minded merchants of this city, we can get 20,000 American and European laborers into this State within twelve months. Money is what is needed, so let every one interested subscribe five cents per annum for each acre of orchard or vineyard he owns, instead of hanging back waiting for a Legislature to tax the State for his direct benefit. The State may assist when the work is well started, but political lawyers, and they are generally in a majority in every Legislature, would probably wrangle over plans of organization, and end in doing nothing. But they might, if the Association continues doing such good work as now, and was giving satisfaction to employers of labor as well as others, consent to an appropriation of $500 or $1000 a month, or even more.

Goss & Dow, San Francisco, have under way a compound water works pumping engine, and an air pump and condenser, for the Spring Hill Water Company, of Seattle; also a compound pumping engine for an artesian well at East Oakland, owned by the Contra Costa Water Company. This engine will raise 15,000 to 18,000 gallons per hour to a height of 400 feet.—*Cotton Wood and Iron.*

A forest mathematician has figured out that there are enough pine trees growing in the South to furnish the whole country with lumber for 250 years to come.

RETAILERS' CORNER.

Our grocery jobbers inform us that some orders are coming in from travelers and by letters, which are cheerfully filled, though remittances from some districts are slow. The business of the month, however, is generally behind that of last March, as is also that of the year, as far as it has gone. The reason is attributable, not to the want of prospects for the future, but to the weather, which is interfering with transportation over some of our railroads as well as the wagon roads. Still, any depression in business from these causes is cheerfully borne, knowing that it only defers the brisk time coming that we have the certain promise of a remarkably good late Spring and Summer trade.

The local demand for Refined Sugar we have again to report excellent, despite the fact that our city jobbers complain that trade is not up to the volume usual at this period of this year.

The demand in the East for Refined is good, and prices steady at, for granulated, 7¼ cents.

The sales of grocery grades during the week have been 1500 bags at prices ranging from 4½ to 6¼. The demand for light colored grocery grades is very active. Of log Sugar there is none in first hands.

It may give an indication of how Sugar production, and, therefore, of how prices are likely to rule, that there are forty new Beet Sugar refineries constructing in Europe.

The last rates for Syrup, of the refineries, are unchanged, but there is a good deal of cutting going on amongst jobbers in prices, owing to the sales by the California Refinery last week of round lots at special figures.

Coffee continues dull, and the quotations we collect from brokers are entirely nominal, owing to the recent decline in the New York market.

We cannot report any transactions worthy of note occurring this week either for domestic or overland account.

The P. M. S. S. Colima arrived on the 22d, with 15,900 bags of Central American, new crop, but even this has given no life to the market.

In round lots Costa Rica is quoted at 13@13½. Guatemala, good to prime, and San Salvador, good to prime washed, at the same. For San Salvador, good to prime unwashed, 12 to 12½ is asked.

Hawaiian Rice is very strong, chiefly in consequence of Eastern demand, and jobbers are asking $5 25 to $5 52 per 100-lb. bags, according to sample.

For Asiatic Rice the demand is fair, without change in last week's prices.

The rich growth of natural and artificial grasses is having its effect on the production of Butter, and the stock is increasing daily as supplies come in; but until we have warmer or dryer weather, the quality will not reach the point at which it will be safe to pack. It does not yet show the necessary keeping, solidity. Prices are weak, neither wholesale or retail dealers nor large private consumers being willing to lay in stocks for future use. The best Point Reyes is quoted at 25 cents; other choice, 21@22c, and inferior lots from interior stores at 15 to 16 cents. Old firkin, 17 to 18 cents, and new Eastern 24@25c.

Cheese is more plentiful, and there is a prospect of lower prices. California choice is quoted 14 to 15½, and 11 to 12½ for fair to good; Gilroy, in drums, 16 to 18; Eastern, 17 to 18, and Western, 10 to 15 cents.

Eggs are coming in freely, choice ranch bringing 21 to 22 cents. A slackening in the supply is expected shortly.

Owing to the prevailing low prices of California Codfish, a speculative demand has recently sprung up among the dealers, and in the present unfavorable condition of the weather, fish cannot be cured fast enough enough to supply the demand. Between 40 and 50 tons of Fish have been marketed this week, and the demand is still active. There is, however, in first hands enough Fish uncured to supply all the demands of this market and still leave a large surplus of last season's Fish when the new catch comes in. Dealers anticipate no improvement in values for some time to come.

The tendency in Hog products is still downward, as will be seen by the slight reductions in jobbers' prices in some articles, notably in Lards, Hams and Extra Prime Pork in half barrels. This trade is even duller than the general grocery trade, making prices very weak, and quotations continue below the parity of the Eastern market, and below the production price of the California Hog.

San Diego and Los Angeles.

It is beginning to dawn upon the Angeleño mind that direct communication by rail is needed with San Diego. As this city is the metropolis of the south it should be in communication with all dependent points by the most direct routes. In order to reach San Diego the California Southern starts from nowhere in particular, so far as Los Angeles is concerned, and passes through a relatively unimportant region. The present roundabout way to San Diego is very inconvenient for the merchants of Los Angeles, and the inhabitants of that site expectant of a town situated in the extreme southwestern corner of the State, are put to unnecessary expense by being obliged to make use of it. It is a matter of surprise that the sagacious persons who control the Southern Pacific have not commenced ere now building southward along the coast from Santa Ana. Several surveys of the line have been made. It would be enough were the gap now existing between Santa Ana and the point where the California Southern reaches the seaside to be closed; such a line would run through the most important part of San Diego county. Kind natures has designed San Diego for one of the ports of Los Angeles, and it is a very good entrepot for our coming trade with the west coast of Spanish America. Therefore, the sooner that San Diego is put in direct communication with Los Angeles the the better for both cities.—*Los Angeles Express.*

Mr. Blowers denies any personal interest in the recent land sales in Yolo county, but does not deny what Mr. Wetmore asserts, that he had ventured his money in the enterprise and was anxious to get it back again; that he was doing this to assist another person is not a material point of difference.—*St Helena Times.*

Trade Failures.

There were 186 failures in the United States reported to *Bradstreet's* during the week ending March 15, against 211 in the preceding week, and 233, 110 and 133 in the corresponding weeks of 1883, 1882 and 1881, respectively. Additional comparisons are given in the following table:

	1884		Corresp'g weeks.		
States	Past week.	Previous week.	1883	1882	1881
Middle	41	51	57	31	40
New England	27	29	32	30	24
Southern	52	37	57	33	32
Western	53	77	73	40	51
Pacific and terr.	13	17	14	6	6
Totals	186	211	233	140	133
Canada	38	43	42	5	17

About 84 per cent were those of small traders whose capital was under $5,000. In the principal trades they were as follows: Generalstores, 41; grocers, 25; shoes, 10; clothing, 8; manufacturers, 8; books, stationery, paper and printers, 8; liquors, 7; dry goods, 7; bakers and confectioners, 6; hardware and agricultural implements, 6; hotels and restaurants, 5; jewelry, 5; produce and provisions, 5; carpenters and builders, 4; coal and wood, 4; drugs, 4; furniture, 4, grain, 4; harness, 4; millinery, 3; butchers, 3, tobacco and cigras, 3; petroleum brokers, 2, hats, 2; fancy goods, 2.

TOBACCO MARKETS.

SAN FRANCISCO.—There is very little doing in leaf, partially owing to the delay of ships with New York a month or two ago. The city closed the "clock out" though the differences are made up and all by the leaf trade. Domestic is dull for filler purposes still in demand, although the stock of that class is coming to an end. There is also a demand for 54. A scarcity of seed wrappers of all kinds is also noted before the end of this year, and a market for 1881 and 82 wrappers may ensue, in the East. There appears to be a tendency towards speculation in good 84 crops.

There is a fair inquiry for Sumatra cuttings, the quantity in present supply, what there is of good color, is held at pretty high figures. Havana is quiet but several lots now detained on the S. P. R. R. sold to arrive, are anxiously looked for.

The Clear trade is restricted by the uncertainty about future prices. Manufacturers are willing to deliver at former rates as far as their old stock goes, but in form buyers that no more can be accepted, except at an advance in proportion to the increased cost of making. Future prices are, therefore, uncertain, and it will take firmness on the part of manufacturers, as well as time to establish them on a satisfactory footing.

The business in shipping low priced cigars East or abroad will suffer more than any other branch of the trade, through the action of the Chinese makers.

Business in plug and other manufactured tobaccos is quiet for the season of the year, in sympathy with the general grocery trade.

The Technical School for teaching youths of both sexes the business of cigar making, promises after a few days experience, to be a great success.

[U. S. Tobacco Journal.]

NEW YORK, March 15.—It was calmer in our market this week, and sales were mostly confined to alleged superior grades. Holders of 80 and 81 Pennsylvania have become somewhat hardshiv in their demeanor since the recording of last week's heavy transactions, and it is now very difficult to purchase any such goods at "bargain" figures. The unfortunate first holders of 80 and 81 Pennsylvania, while considering every advance or every gloss as one a most acceptable blessing, never the less cannot suppress a sigh of regret whenever they effect a sale of their stock. In fact a sale under the present circumstances is nothing but a profit on their losses. A prominent dealer and holder of 81 Pennsylvania said: "I am offered 20 cents for my wrappers. Figure interest, storage and expenses, and you will see 15 cents." It is, therefore, natural that as soon as the market shows any activity in this, tobacco holders are inclined to ask higher prices than the stock is reputed at; hence the reaction in the market.

Incoming steamers from Germany are now bringing considerable quantities of Havana seed tobaccos which were shipped from the last half. It is generally Wisconsin Havana seed, which was bought by exporters at low figures compared with those now ruling. The markets in Europe did not follow the rise in prices which took place in our home tobacco markets, and as there is a perfect craze here most to secure such leaf, re-shipments are taking place. Sumatra is still selling with a ruling notwithstanding the existing difficulty of finding suitable goods, especially such as are perfect in burning. Consequently the purchases that are being made, while in the aggregate they are large, consist of small lots, mostly from 5 to 10 bales.

New York Tobacco Leaf.]

NEW YORK, March 14.—*Western Leaf.* We note larger sales and a better feeling in this market the past week, prices ranging from 7½ to 10½ cents.

Virginia Leaf.—Not much doing, and prices ½ off this week. A few lots of cutters sold at 20 to 22½ cents. There is a good stock of new wrappers on hand, but prices are so high that manufacturers are not willing to buy. Fifty cases of choice wrappers will be as high this year as in 1874. New bright cutters are beyond reason. Manufacturers who have not old stock to last them over this crop, stand a chance of being caught in a fight place. Our large manufacturers here have a fair supply ahead, both of wrappers and cutters.

Sumatra.—Havana fillers partake of the general dullness. Sales, 450 bales, at 80c to $1 15.

Sumatra.—The business transacted in this article since our last issue has been a very substantial one, the sales approximating 400 bales, 100 of which were taken by Philadelphia buyers. Prices ranged from $1 35 to $1 80. The feature of the week was the purchase by an uptown cigar manufacturer of 150 bales. Holders of fine lots do not seem having very stiff in their prices, they being from 10 to 15 per cent higher than they were three weeks ago. As we go to press we learn of an offer having made for a lot of 100 bales by a cigar manufacturer, which is four cents below the asking price. The dealer, however, refused to make any concession.

Havana.—The demand for plug tobacco was about as usual, with exports of 106,384 pounds. Manufacturers continue to complete advisedly with local factors. This week a firm here sold a lot of plug to a buyer from Texas, and the purchaser liked the goods so well that he immediately ordered another lot from the manufacturer in Virginia, which, of course, was promptly sent to him, and which, of course, ought not to have been done, as the seller here had a first claim on the customer.

Smoking.—Regular demand.

Cigars.—A great, but not active inquiry.

MEAT MARKET.

Following are rates for whole carcasses from slaughterers to dealers:

BEEF—First quality, 6½@10, second quality, 8@9c; third quality, 7@8c ₰ lb.

VEAL—Large Calves, 7@9c; small ones, 7c to 11c ₰ lb.

MUTTON—Wethers are quotable at 7@7½c and Ewes at 7@7½c ₰ lb.

Lamb—Spring is quoted at 12@15c ₰ lb.

Pork—Live Hogs, 7@8c for hard grain Hogs on foot; dressed do, 10½@10¾c ₰ lb.

BEANS—

Receipts of the week, 1649 sks

Colored have improved. Many cargos have been shipped during the past week. Yet there is no unusual excitement. Dealers are no doubt kept in check by the anticipated arrivals from Chili. The advance lots, of which we can expect any time next month. There are, no doubt, some coming for sand, but to what extent those on the inside do not relate. If we were speculating now, we would rather gamble on Pinks, for the supply of which we will have to depend on ourselves for the next crop. The very high prices for Reds have brought out several small lots. We make a general weakness in the Whites, although prices no not respond. Some few cars have been shipped. There are but few Limas coming in, and they are not put on the market.

Our quotations are, for round lots from the wharf small White and Pea, $2 85; Bayos, $4 70; Pinks, 4 25; Reds, 8 4 75, Butters, 83 75; Limas, $2 60

FRUITS—

On account of the difficulty of getting freight through on the railroad from the Southern part of the state, oranges are quite scarce. Lemons are in good supply, Mexican bring $1 or $2 ₱ box per box.

We quote: Domestic Apples, 75@$1 00 ₱ box Western Transcripts, $8 00 @ bbl; Western do, $17 00@17 75 ₱ bbl.

Tropical: Lemons, $1 00@5 00 per box for Sicily, Limes, $10@14 per box for Mexican, Tamarinds, 12@ 15c per lb, Bananas, $1 75@2 00 per bunch, Oranges, California, $2@3 50, Choice Riverside, $4 00@5 00, Choice Navel, $5 00@6 50 per box.

NUTS

Transactions in this article is still dull but prices are beginning to improve. A better trade may soon be expected.

We quote: Cocoanuts, $6 00@7 50 ₱ 100; California Walnuts, 8@9½c; Chili do, 8@9½c; Brazil Nuts, 8½@9c; Hard shell Almonds, 12@ 15c, Filberts, 12@16c, Pecans, 12@13c, Peanuts, 7½@8½c; Brazil Nuts, 11@12c, Hickory Nuts, 7@8c, Roasted Chestnuts, 15@16c

HONEY—

Prices of comb honey are lower this week on account of the new crop soon to arrive.

We quote: Extracted, dozen, Extra White Comb, 15@16c, White Comb, Bulk, 9@10c ₱ lb

DAIRY PRODUCE—

Butter is in great plenty and weak at quotations

Cheese is in larger supply with prospects of lower prices

We quote: Butter—Point Reyes, 25@27c; Choice 21@22½c; inferior lots from country stores 15@18c; Bulk, 12@15c for old and 24@ 25 for new, Petaluma, Extra 27½c, Choice, California, 11@12c for choice, 11@12½c for Fair to Good, Gilroy in drums, 16@18c, Eastern, 17@18c, Western, 10@12c.

EGGS—

We quote: California Eggs, Choice Ranch, 21 @22 per doz.

LIVE STOCK—

Receipts of week, 15,221 shs

Early Rose r. pie ibis but the b i k trade for them

Peppers are ...ly well cleaned up. River Reds are ...ve and prices are higher. Good Reds of all kinds are doing better. Shippers have concluded not to ship on so freely, so that the v can get better prices

There is no improvement in the trades for all kinds

Our quotations are for prime lots from the wharf, Early Rose, 80c; River Reds, 75c, Tomatoes and Petaluma, 60c, Humboldts, 75c, Pea Blows, 80, Peerless, 90c

ONIONS—

Receipts of week, 1076 sks.

There has been no good onions to arrive for this week, and as there are, fetch 1½c readily.

BEESWAX—

We quote 26@28c per lb

HOPS—

Receipts of the week, 6 bls

There is nothing new to report Prices are well sustained in London and New York markets, but the demand is light When sales are made they are on about the same basis as last week Quotations are nominal, made here this week, out a lot of 150 bales of prime California at 18c cents.

The principal dealers in London and New York, are firm in their belief that this depression is only temporary Quotations here are 12 to 18c cents for common to prime, and 19 to 21 cents for choice

Quotations here 12 to 16c for fair, 17 to 20c for prime and choice

POULTRY—

Prices are a little firmer on account of the recent heavy storms

We quote: Turkeys, Live Gobblers, 27@28c per lb Turkey Hens, 27c; Dressed, 30c; Young Roosters, 80@90 00, Old Roosters, $7 50@8 00, Hens, $7 50@8 00, Broilers, Small, $5 00@7 50, according to size, Ducks, 10@12½ ₱ doz, Geese, $2 25@3 00 per pair.

British Grain Market.

London, March 25th. The Mark Lane Express in its review of the British grain market says: "The nothing o e other continues and values in wheat are tending down and the trade is unanimate Foreign wheat is wretche ly dull. Off coast one cargo of No.1 California realized 39 shillings Seven cargos have arrived, one was sold, two withdrawn, and two remained, including one No 1 California. Cargoes on passage are neglected Sales of English wheat during the week, 56,682 quarters at 37s 7d against 64,324 quarters at 42s 4d, corresponding period last year.

Gum drops have got cheaper since the supply of gum arabic was cut off by EL Mahdi. How they are Mahdi's a mystery, by gum.

MERCHANDISE MARKETS

BORAX—

The price in New York, the leading market for our peculation, is quite low, nominally 10c ₱ lb for refined and 7½c for concentrated. Buyers there seem to be holding off, anticipating lower prices, arising from the apprehended action of Congress on the tariff as well as supposed over production on the coast. Receipts in town for the past eight days, 75 tons

Late quotations from London give the prices there £39 per ton 22 10 that f. o. b.

COAL—

The business done from first hands this week has been quite. Quotations remain unchanged from last week Bids have been asked by the Gas Company for the delivery of 10,000 tons of Australian Coal; when received it will have been on for 90 days, the market price for future deliveries will then become established. The outlook for abrogating the duty on bituminous Coals is not as encouraging as it was a few weeks ago; free Coal would give a marked impetus to manufacturing interests here, as it is only a question of time when it must assurredly appear on the free list. Cumberland Coal is in very full supply locally and en route

Inquirers' prices of coal, Foreign and American, to ar ive, Australian, $7 50@7 75; Liverpool Steam, $7½ @7 75; West Hartley, $8 25@8 50, Scotch Splint, $7½ @7½, Cardiff Steam, $7 75@8; Lump Lehigh, $13@ 13½; Egg Hard, $11@11½; Cumberland, bulk $10 @10½. IRON—

Nothing of interest to note in this article, simply to repeat that for the moment the market is over supplied, but the quantity here is being materially relieved, as recent arrivals are nearly all sold. Orders are being solicited for future loading, from which basis until they can form more conclusive opinions as to what their future requirements may be. Sales from first hands are very light.

Importer's prices of Pig Iron, Foreign and American, to arrive: Shotts No. 1, $27½@——; Glengarnock, $26 50@——; Eglinton, $25 00, Clay Lane, $25 50@——; American, Eastern Soft, $28 00@——; Spot prices are as follows: Glengarnock, $25 00; Eglinton, $24 00, Clay Lane, white, $25, Shotts No 1, $28 50; American, Soft Eastern, $28. Spirit of the New York Markets.

NEW YORK March 19.—The business situation has undergone a appreciable change, if we except a break in prices of certain commodities which are controlled, or regulated, by speculative cliques and syndicates, among them, Wheat and Coffee; the decline in the latter commodity having involved two or three speculators in financial difficulties Most of our export staples are, and have been since the beginning of the harvest year, marketed for less money much above the European markets, and it is largely because of this that our gold is now being drawn from us. But as money is cheaper on the other side, the drain of gold is decreasing, and it would without doubt cease altogether if the prices of our surplus produce were down to a point low enough to admit of their free exportation. Speculation just now is weedeling tame, the last operations in Wheat and some commodities having resulted disastrously for those attempting to manipulate the market for higher prices. In the opinion of good judges, Wheat will touch an enormously low price during the Spring, unless there shall be some unlooked for disaster to the crops.

FREIGHTS AND CHARTERS.

In the present condition of the European wheat market, a lively report of transaction in ships is out of the question There have been one or two vessels ordered to load for owner's account, but the regular wheat shippers have retired for the present. The disengaged tonnage in port today is about double that of this day last year and most of them are expected to wait for the new crop. We cannot this week report a single charter on account of wheat exporters.

The engagements for the week have been as follows: Ship W A Campbell, 1538 tons, lumber from Puget Sound to Sydney; 45s—chartered by Parrott & Co. Bohman bark Bon Nichols, 972 tons, returns to Departure Bay for coal, $5 50—Brodie. Brit bk Jewel, 1257 tons wheat to Cork, U. K.; 32s 6d—chartered by William Dreyback. Bark California, 368 tons, merchandise to Nicolaetsk—chartered by Freeman, Smith & Co. Barkentine Eureka, 276 tons merchandise to Honolulu in the Hawaiian Line. British ship Prince Oscar, 1249 tons, wheat and merchandise to Liverpool direct—laid on by Balfour, Guthrie & Co. British bark Munro Carmichael, 1202 tons wheat at Victoria, lumber from Hasting's mills, B. C., to Melbourne Brig Hesperian, 229 tons, merchandise to Apia chartered by Wightman Bros.

THE WOOL MARKET.

There is little or nothing doing in the local wool market Our warehouses are barer of stock, than they have been at this season for two years past. There are a few lots of defective wool on hand that have been rejected again and again but nothing better.

We have no change to make in quotations, they are merely nominal

The Eastern market is reported by telegraph quiet and dull but steady in price.

Of our seven regular scouring mills there, Geo. Abbott & Co's. (the Pacific Scouring Mill Co.) and two others have shut down for the season.

Falkner, Bell & Co's mill, the California Wool Co. (Knox) Frank P. McClellans' and Eaileys' are still running.

The spring shearing is fully a month late this year and can hardly be said to have commenced even in the San Joaquin valley. It will not be general in California for another month. The staple this year will be better, stronger, and freer from defects, in short, our wool will be better conditioned than ever. It is not unlikely, too, that more care will be used in shearing and handling of the fleeces than formerly, so much has been said by the MERCHANT and other papers on this subject and the loud complaints of Eastern wool growers must have some effect.

A. D. BELL ..... Editor.

FRIDAY ... MARCH 28, 1884

From the district around Mission San Jose, and from Livermore, as from all other parts of the State, we hear most favorable reports of the prospects for wine and fruit as well as all other agricultural crops.

The Marin Co. *Tocsin* is about to move into new quarters in the Gordon Bank block, San Rafael. Last week a fine new power press was put in place, and the *Tocsin* will shortly be as well equipped for journalistic and job work, as any office outside of San Francisco and Sacramento.

If the California & Oregon Railroad had been completed, one-third to one-half of the leading merchants of Oregon would have visited San Francisco to hear Gerster and Patti. And while here would have probably purchased enough merchandise to pay their expenses, amounting in the aggregate a large sum. Moreover, there are two or three hundred wealthy families not interested in merchandising, who would have seized the opportunity to hear the great divas, and among them would have spent thousands of dollars, in this city. The railroad is not yet completed and its early completion depends largely on whether the action of Congress in reference to the land grant is friendly or unfriendly.

The Free Traders who are urging on the Morrison-Carlisle wing of the Democratic party in their onset against the Protective Tariff, hope to be able to receive the same income from their lands and investments and the same prices for their products which they now receive under the policy of protection, and at the same time enjoy the advantage of free trade in making their purchases.

Their hope is not only a selfish but a delusive one. Once drive the vast army of people now engaged in manufacturing into agricultural pursuits, and change them from consumers into producers of raw materials by breaking down the protective system, foreign markets would soon be glutted with raw materials, and their prices would fall, while the prices of manufactures would rise, and the producers of raw material would discover too late that the exchange power of their products would be far below what it now is. In order to continue manufacturing in this country under free trade, the operatives must accept the conditions, privations, and scale of living of foreign operatives, which they will never do so long as there is in this country an unoccupied acre of tillable land.

HOW TO END THE RAILROAD CONTROVERSY.

Do those who talk most loudly about exorbitant local freights and fares ever consider the small amount of local business which hundreds of miles of railroads in this State yield to the companies? True, the traffic is growing, but we must have a much larger agricultural population in some districts before freight can be reduced to the small percentage over working expenses, which is sufficient in more populous States. California, is of course, a large producing State; but we are spread over such a broad territory that our productions per square mile, or even per mile of railroad, are very light. We are working out of the difficulty, but not so rapidly as we should if we were adding ten per cent to our adult population every year. Changing our agricultural equipments, or rather developing new branches, is doing much to increase business for our railroads, and is helping along the good time coming, of cheap freights. An acre of sheep range does not produce, annually, half a pound of freight in wool a year for a railroad. An acre of wheat produces from 700 to 1,500 pounds. An acre of large fruits produces from 5,000 to 7,500 pounds; an acre of full bearing wine grapes produces in wine and brandy in casks from 5,000 to 12,000 pounds of freight; an acre of table grapes, the same as wine; an acre of raisin grapes yields a freight of 2,000 to 5,000 pounds. An acre of alfalfa will yield in hay, in cattle, sheep or hogs, or wool, at least as much freight as 100 acres of wild land.

Now, at the present time, it may be roundly stated that if the gross earnings of a railroad in California are $6000 a mile annually, that one half the receipts go for working expenses, and one half for interest on capital. It is clear, therefore, that if the traffic could be doubled, after paying $6000 for working expenses, and $3000 for interest, there would be $3000 surplus and therefore room for a reduction of some twenty-five per cent in fares and freights. When the earnings again rise, a further reduction would be possible without cramping the railroad or cinching the bondholders, or owners of the stock. The valleys, and even the hill slopes of this State, have a capacity for producing a valuable freight unequalled in the United States, and it is certain that in a few years, the present roads and others yet to be built will have so much local freight, that ten per cent of the gross earnings will amply provide for the stockholders, and railroad fares and freights need be little more than the actual operating expenses. To hasten this good time, we need more agricultural population and it does not help us to get this population to have half the newspapers of the State advertising us throughout other countries as the impoverished slaves of a cruel grinding railroad monopoly. Suppose we all stop howling, through types or on the stump, and try to discuss railroad questions as temperately as we do the production of wheat and the outlook of our future export trade? Extra sessions of the Legislature, cinching acts and communistic amendments of the Constitution will not do half so much toward settling railroad difficulties and permanently establishing low fares and freights with greater facilities for travellers and transportation, as the Immigration Association, supported by a few of the members of the Board of Trade of San Francisco, is doing. Last year it materially helped to add 24,000 persons to our population, settling most of them on land. With half the money this extra session will cost that Association would within eighteen months put 100,000 people in California, mostly agriculturists, land owners and laborers. Within three years the products of that 100,000 agriculturists would make it possible for and advantageous to the companies for the mselves to reduce freights on many portions of their roads to lower figures than anything the most agrarian Legislature can enact or enforce. The true solution of the railroad fare and freight question, therefore, is immigration, and one way of helping that is for our brother editors to devote the space they now give to violent abuse of the railroad managers, to sober and well considered statements of the inducements California offers to agricultural immigrants.

The Democratic tariff reformers urge as one reason for the reduction of the custom duties, that the revenue is in excess of the legitimate needs of the country and they propose to remedy this by less ning duties. More practical men than Carlisle and Morrison would recognize the possibility of the steps they propose for reducing the national revenue, actually increasing it. An example will illustrate our meaning. Take a class of merchandise in general demand, of which we manufacture largely at home and import $1,000,000 annually from Europe, and this foreign merchandise pays 20 per cent duty, or $200,000 annually, into the Treasury. We reduce the duties ten per cent, and is it not likely that we will import $2,000,000 a month, and therefore bring the same amount of $200,000 a year into the Treasury? Is it not possible that the loss of that ten per cent of the former protection may close many of our domestic mills and that Europe may send us $2,500,000 or $3,000,000 a year? The experience of Great Britain under such statesmen as Peel and Gladstone was that up to a point which could not be ascertained beforehand, a reduction in customs duties on an article in general use increased the revenue. If the gentlemen in the House of Representatives who are posing before the country as statesmen, will advance the duties on such commodities as we can and are now manufacturing or producing at home, they will benefit the country at large, and bring the receipts of the Treasury nearer to the necessities of the Government.

The reduction of the tax on brandy, after the inconvenience of the change in values had passed away, would undoubtedly be a boon to our wine makers. But if the tax is to be reduced from ninety cents to ten cents a gallon, why not abolish it altogether? Why keep up for brandy distillation the costly and cumbersome revenue restrictions, regulations and espionage? But we have no expectation that such a reduction will be made We should have had more confidence if the proposed reduction had been from 90 to 50 cents and was to be tacked on to a bill granting the whisky men the two years extension they ask. We should then have had their powerful influence on our side; now we must expect their opposition. Fifty cents tax, limit of bonding period five years, right of repacking in bond and stamping under Government inspection with stamps showing date of original gauge, would have satisfied our brandy distillers.

No journal in this State is more closely read or more valued by its subscribers than the S. F. MERCHANT.

LAYMAN OR LAWYER FOR SENATOR

There never was an occasion when it was so evidently necessary that the country should be more largely represented by its business men, its producers, manufacturers, and merchants, and that lawyers and mere politicians should have less preponderance in Congress than at the present time. Yet, will political conventions take any note of this? Certainly not, until the classes who are now not represented at all, or misrepresented, force the issue. Already we have in this State, three or four lawyers, and a wealthy speculator, each and all of them allowing one class forensic ability, and the other coin, utterly unfit to represent California in its present needs, openly seeking to succeed Senator Farley when his time expires. We want none of them, nor do we see any use in re-electing Farley. It is true, he can only by courtesy be called a lawyer, and he has certainly no practical acquaintance with any of the business interests of the country, unless it be mining as it is or was carried on in Amador county. If the South could get the Senatorship, and it has a strong claim, why not send J. De Barth Shorb? He would represent the wine, fruit and farming interests of the country, and the wool men could vote for him in full confidence that their interests would be taken care of. If the North could get the Senatorship, why not let the choice fall on John Boggs, of Colusa? He also is a man used to public business, and practically acquainted with the needs of all agricultural producers. He is a wool grower as well as a farmer. If Sacramento had the selection, there is Speaker Larue. If the interior fails in securing the Senatorship, the Democrats could fall back on W. T. Coleman, of San Francisco; possibly he might be induced to accept the honorable office. None of these gentlemen, we believe seek the honor of office, and probably none of them ever entertained a thought of its ever falling to them. But there is not one of them but would make a far better and more useful and more intelligent representative of California than Judge Wallace, or any other member of the bar, however brilliant his legal career. We have already, thanks to the Republicans, one business man in the Senate, and how well he has done for us all! Next to General Miller, the interests of this State have been better cared for by John P. Jones, of Nevada, than any one else, and he is not a lawyer. Ex-Congressman Berry was a plain farmer; will his successor, Henley, outside of mere party politics, be an improvement on his predecessor? Probably not. Why should not California, whether Democrat or Republican, send a second business man to Washington and lessen the disproportion between lawyers and laymen in the Senate Chamber? Shall none but the sons of Levi serve in the temple?

PERSONAL.—Mr. W. H. Stowell, the well-known sugar and Island rice broker, has been confined to his bed for several days with pneumonia, and his numerous friends are very anxious about his welfare; still, we are most glad to say, there is no apprehension of a fatal result. Mr. Stowell, in every relation of life—business, personal and social—is so valuable a man, that even a serious sickness creates a feeling of uneasiness.

Subscribe for the MERCHANT, the recognized wine organ; $3 a year.

That Bismarck and Sargeant have made up and kissed.

That the next United States Senator should not be a lawyer but a producer of manufacturer. A speculator will not fill the bill.

That the subscription list of the MERCHANT is growing faster than those of all its commercial rivals put together.

That the MERCHANT is the most reliable commercial paper in California, invaluable to grocers and other country merchants.

That unless affairs improve in Egypt, the British Government will have again to change its policy, all of a Soudan.

That a good illustration of the meaning of the common phrase, "An opening event," is a preparation of a plate of oysters on the half-shell.

That nature having filled our land to the brim with rain, seems determined to keep us full to overflowing, by making good every few days the loss of moisture by evaporation.

That it is taken for granted that few of the bills and amendments introduced in the House will pass, but these attempts at Wild Cat legislation, show what kind of timber San Francisco selects for its representatives in the Legislature.

That Congressman Sumner made an excellent argument in favor of an appropriation for completing the Monadnock, now only needing engines and armament. Mr. Sumner succeeded, we hope, in enlightening Congressmen on the defenseless position of this coast.

That any man who earns his livelihood in any manufacturing establishment in the United States who casts a vote with any party that favors reducing the protective tariff commits suicide, and uses his ballot to drag himself and his family down to the level of the European pauper laborer.

That we hear of one or two small vineyard owners who want to sell, because they are afraid of over production. This is like Colonel Warren writing in the *Farmer* in 1863, that our wheat growers should reduce their acreage because wheat growing was overdone. Overdone, when twenty years' experience shows it had not begun.

That the vineyard owner who does not subscribe for the MERCHANT instead of taking the chances of some friend sending him his copy after he has done with it, is not wise. Every month the MERCHANT is worth its yearly cost to any vineyardist and many single numbers are worth one hundred times the cost, to the man who has his money invested in vines.

That should any bill reach the Senate, which, if it became law, would seriously lessen the protection now given to American manufactures and productions, John P. Jones, of California, can be counted on to make one of the most effective speeches of the session, in favor of the policy which has made the United States the richest country in the world.

That it is news to respectable journalists that Neilson, *alias* McCann, "controls the entire press of the coast." Yet, Neilson may have told Miss Althea Hill so for a purpose, as he told a partner of J. C. Merrill's that he "controlled the *Post*, *Alta* and *Chronicle*," when he tried to blackmail that firm to the tune of $1,000.

That the cruelest, the most undeservedly cruel thing yet said of Governor Stoneman was by Althea Hill, when she wrote to Mr. Reigharts that Neilson was his warm and particular friend. Governor Stoneman is a gentleman and a soldier, and would not associate with a forger, an ex-convict, and a blackmailer after he was informed of the fellow's character.

That Sunset Cox knows very little about the feeling in the country if he thinks as he says, that the division in the Democratic party will be healed by the Protectionist wing joining him in supporting the Morrison tariff bill or any measure like it. Thousands of Democrats love the party, but they love their families and their bread and butter more.

That party loyalty may be all right in some cases, and in others the veriest humbug. Is a man forced to be loyal to a party which is run by a lot of office seekers who are too ignorant to understand measures of importance to the country? Every voter has a right to rebel; and the fear that he will exercise that right is the only consideration that keeps "machine" and "slate" politicians within the bounds of decency.

That Speaker Laure should appoint a special committee to go through the bills, concurrent and joint resolutions, and amendments to the constitution, with which Assemblyman Leverson's grip sack is yet stuffed, and select out of every ten one of the least objectionable and destroy the others. After the committee had done this it might report for an early day being fixed for the purpose, and if Leverson commenced introducing his measures in the morning, the House could adjourn before midnight. It would be necessary, however, to bind Leverson to introduce no more until every other member had introduced a similar number.

Beef, Hog, and Dairy Products Export

In February last there were exported from San Francisco to foreign ports 281 head of cattle, value $21,920; canned beef, value $2,538; salted and other cured beef, 13,400 pounds, value $1,380; tallow, 15,639 pounds, value $3,626; bacon, 20,927 pounds, value $2,823; hams, 26,158 pounds, value, $4,343; pork, fresh or cured, 22,200 pounds, value $2,059; lard, 27,120 pounds, value $3,317; butter, 36,560 pounds, value $9,530; cheese, 14,945 pounds, value $2,760, making a total export of these products of $32,376 in February, 1884, against an export of the same articles in February, 1883, of $28,048. But when January and February combined of these two years are compared, 1884 is $5,000 behind the same period in 1883.

AMERICAN TIN PLATE.—The Hubbard *Enterprise* Penn., says, in regard to the location of a tin plate mill at that place: "The bonus subscribed by the citizens of Hubbard will be paid in as agreed in quarterly installments as work on the plant progresses. The master mechanic is now on his way from England. Upon his arrival work will commence on the plant, and within four months the manufacture of tin plate in Hubbard will be commenced."

The Manchester, New Hampshire, Locomotive Works have ready for shipment for Honolulu, Sandwich Islands, two steam fire engines of size 2, and two jumper hose carriages. It is believed that this will be the first shipment of the kind to Honolulu.—*Cotton Wool and Iron*

The Resources of California.

J. P. H. Wentworth is, in our estimation publishing a paper which is doing more to advance the interests of California, and every man who has property or who has determined to throw in his lot with us and grow with the State, than all the daily journals published in California. The truth is that the dailies occupy themselves too much with merely local personal matter. The Eastern States know us and the Associated Press is much to blame—principally through our crimes and the doings of our demagogues. The better side of California, the industry and enterprise of its people, is hardly ever mentioned in Eastern papers. Mr. Wentworth is doing a good work, a useful work, in informing Atlantic readers what kind of people we really are, and what our resources really are. The truth is we can offer nine-tenths of Americans and all Europeans a better field for their labor than that they have where they are now living.

Moreover, the *Resources of California* is typographically one of the neatest and most handsomely printed papers in the United States. It is a first-class representative of California, editorially, and shows rare skill, both in the mechanical and artistic departments. It is deserving not only of commendation, but the most liberal support from every one who desires to advance the material welfare of California.

The demand for labor is increasing rapidly year by year in this State. The new vineyards and orchards now maturing, will require in 1885, if not in 1884, at least twice as much labor to gather their fruits as all the vines and trees in California did in 1881. In the face of this increasing demand, the number of agricultural laborers in California is not increasing in a corresponding degree; indeed is hardly holding its own. Deaths and removals account for some of this decrease; and then during the two past years a good many laborers have taken up land and joined the labor employing class. In the eight months ending February 28th, 1883, 7664 immigrants entered the port of San Francisco by sea, of whom some 99 per cent were Chinese laborers. In the eight months ending February 29th, 1884, only 1047 arrived in this port, not nearly enough to make up for the death, and departures. In the month of February 1883, only 105 immigrants entered California by sea, and in February, 1884, this paltry number had dwindled to 62. In the latter month, however, 15,800 European and Canadian immigrants landed in the Atlantic States. Of this total number of immigrants, there arrived from England and Wales, 1885; Ireland, 864; Scotland, 215; Austria, 680; Bohemia, 128; Belgium, 66; Denmark, 131, France, 227; Germany, 5436; Hungary, 1861; Italy, 776; Netherlands, 66; Norway, 108; Russia, 690; Poland, 106; Sweden, 156; Switzerland, 625; Dominion of Canada, 1637; and from all other countries, 175. In the "all other countries," China is included. In the consideration of these figures, which are from the report of the Bureau of Statistics, Washington, will not California exert itself more strenuously to bring some of these white laborers flowing into the Eastern States, into California, where they are so much needed?

Since the ratification of the Mexican reciprocity treaty by the Senate, new subscribers have come in from all quarters for EL HISPANO-AMERICANO MERCHANT.

A Fresno Squabble.

Mr. Tupper, in a communication to the Fresno *Expositor*, has taken exception to our remarks on the action of the Supervisors of that county, in regard to the requested franchise for a branch railroad from the Fresno depot to the Barton and Eggar Vineyards, with the intention of carrying it to the foothills of the Sierras. There is nothing more to be said, perhaps, than that his assertion that such a road would injure the business of the town of Fresno, is foolish. Such a road, if constructed, would increase the value of property along the line and help the foothill settlers, besides, bringing business to Fresno merchants. Mr. Tupper's loss of temper under a mild criticism of his public acts, shows the weakness of his cause. Our information was not mainly derived from either Mr. Barton or Mr. Eggers, but from foremost citizens of Fresno, who have large interests in that town.

What the outcome of the Democratic caucus on Tuesday night will be, no one can yet foresee. Both Morrison's friends and the protectionists, led by Randall, claim that they gained a substantial victory. Neither is it certain that the resolution adopted by the caucus, on Carlisle's motion, looking to the repeal of the Internal Revenue taxes on tobacco, cigars, cigarettes and snuff and the reduction of the tax on fruit brandy to ten cents a gallon, will be carried into effect. Enough, however, has been done to disturb trade until this question is finally settled. The tobacco men would probably rather have been let alone than have their business again interfered with. The United States has not yet paid the rebate due from the reduction of the duty last year, and now they are threatened with another marked change in values, and of course they will be entitled to another rebate. Thus they will suffer from an entire stoppage of their business until the repeal takes effect, and then have to wait some twelve months for the money expended in cancelled stamps.

Our fruit brandy distillers may look at first with favor on the proposed reduction of the tax, but while the question is being mooted, if any serious attention is given to the action of the Democratic caucus on Tuesday last, tax paid brandy or brandy on which the tax becomes due before the law, if passed, takes effect, will hardly be saleable. Then arises the question, will a rebate be granted on brandy in original packages on which the tax has been paid? And perhaps after all the jealousy of the whisky men will be aroused, and they may want to know why spirits made from American grain are to pay a tax of ninety cents a gallon, and spirits made from American fruits only ten cents. All this confusion which will arise from mooting these questions, only shows the folly of this continual tariff and tax tinkering. But what do a lot of politicians and lawyers know about business. All their talk is about "party and what will help the "party." Not one word is said, upon what effect their action may have on the business interests of the country.

Watterson says "Either we have or have not a Democratic party. If we have not the sooner we know it the better." Just so, if outside of low tariff and free trade there are no Democratic principles, the sooner we know it the better.

Keep the S. F. MERCHANT on file for future reference.

Teaching Cigar Making.

The Technical Training School established by the Cigar Manufacturers' Association of the Pacific Coast opened on Monday in the rooms of the Bar Association on Sansome street. Twenty-five girls and one man were set to work at stripping the leaves, the sexes being placed in different rooms. The pupils' ages range from 15 upward. They were bright looking and well. There are many more applications for admission. A number of girls will be chosen daily until 250 have been taken in. The apprentice is will put on the work of stripping and will be taught how to roll cigars. After the months experience they will be employed either in the school or in the factories of members of the Association, and will be paid wages. The first floor of the school building has been fitted up for cigar making. The second floor is allotted to the stripping department. Superintendent McIntyre is in charge of the school, and the different schools assist him. It is thought that the running expenses will be $5,000 per month, but the promoters of the affair consider that in the end they will be repaid for this outlay by having enough skilled white labor on this Coast. It is said that this training movement has extended to the other trades and that other schools will be established. *Examiner.*

About Jute.

In the linen trade, jute plays a very important part. In many respects quite as important as is hemp or flax, and in the special trade in which it is used holds a place not much lower in the scale than king cotton. Jute, as is well known, is cultivated all over India for the sake of its fibers, and of it is made its bad ropes and twines, "gunny cloth," and of this is made the bags in which rice, sugar, coffee, and other like commodities are distributed over the wide, wide world. The rare two species of the herbaceous plant from which jute is derived; but the one best known is cultivated in and around Aleppo, where its green juicy leaves are eaten as a pot herb. The seed is sown about the beginning of May, and the first is ripe early in October. When ready for gathering the plants are cut close to the ground, the tops clipped off, they are then tied in bundles and steeped much like flax or hemp, till the bark recomposes, which is then washed off, the fibers cleansed, dried, and finally again tied up in bundles, when it is ready for the market which, for the English and American trade, is Calcutta. Toward the close of the last century the British East India Company endeavored to introduce jute fiber into England but without success. About 1825 a few bales of it found its way into Dundee, Scotland, and the canny Scotch weaver soon saw its value as a fiber. At that date the spinning and weaving machinery were, of course, far behind the place they now hold, and some of the jute was actually spun by hand. As the fiber is very much longer and considerably coarser than that of flax, dry, hard, and not pliant, as a consequence the yarn was found rough and unkindly; effort after effort made to spin it ended in disappointment, so after many an up and down, jute began to be used in combination with flax. Of course there was a strong prejudice against the material. The dog had a bad name and many said, "hang him at once." One said it had this fault, another, that, and merchants purchasing yarn required a guarantee that it contained no jute. The canny Scotchman, shrewd and intelligent, still wove on, and finally both manufacturer and merchant of Dundee were rewarded for their perseverance with a success far beyond their most sanguine expectations.

The first spinning of jute yarn was in 1833, and from that date we have had jute carpeting, and about the first consignment of which to this country there is a curious brief history. In 1834 James Neish, a Dundee manufacturer, sent a lot of jute carpeting to New York, where, after lying neglected for a whole year and almost forgotten, it was brought out for public sale. Bidders were taken with it, and the whole consignment was readily sold at a net profit of from four to five hundred per cent. Of course such a profit was too good a thing to last, but James Neish made it last long enough for him to retire, after a few more years of jute manufacture, on an ample fortune.

The highest importation of jute into America was in 1876–7, when the quantity was estimated at 50,000 bales; since then the trade, in the raw material at least, has very much decreased.

Jute is one of the most easily dyed fabrics known, and the colors it takes on are both bright and beautiful, but it is very difficult to bring it to a clear white without injury to the fiber. It requires a more complex process than that ordinarily used to make the coloring materials thoroughly penetrate the jute fiber, which is of a dry, smooth nature, and to a considerable extent impervious to moisture, all of which make s it difficult to give it a "fast" color. But it can be and is done, and the better class of ute goods under go this process. The name of two different kinds of goods manufactured now from jute solely is legion. In the list will be found, besides "gunny" cloth, sackings, sheetings, ducks, osnaburgs, carpets, rugs, and coarser fabrics too numerous too mention.

Among other things brought over to us by the great centennial show was an individual from France, who said his business here was to hunt up new fibrous plants. He New Jersey he had clared he had discovered a very valuable one in the common weed cursed by the farmer under the name of "devil plant," and to the botanist known as the *Datilon arlecnar*. It may be known by its heart-shap d leaf—very velvety and of a most beautiful green—its bright yellow flower and corrugated seed pod. It thrives in the hottest sun, withstands the hardest winter, and will spring up around the cow and hog-peas of the farmer in great profusion, in fact takes possession of his best land wherever it can get a foothold, to such an extent that it is no wonder that he curses it as a nuisance. When it was announced, however, that this "devil plant" was an American jute, by the French stranger, the case was altered, especially when the New Jersey Bureau of Statistics made itself responsible for the sum of $8 for every ton of the weed stalks. It was said that ten million dollars per annum could be saved to the United States should the Frenchman's discovery prove a success. The matter did not sleep; all classes in the State were soon interested in the devil plant, and in many a farmer's barn could bundles of it be seen waiting a market, while the seed for sowing a new crop was reported at a fabulous value. All at once, however, the bubble burst. The devil plant had no value as a fiber, and it soon sank back into its original state of "nuisance," though the time may yet come when, under better manipulations, it may be known as the American jute. There's something in it.—*Cotton, Wool and Iron.*

Another Wheat Competitor.

The United States consul at Buenos Ayres believes that the Argentine Republic is to be one of the great grain-producing countries of the world. He estimates the wheat crop of this year at about 19,500,000 bushels, more than half of which will be surplus for export, and adds that the surplus corn will amount to 5,000,000. The number of acres devoted to agriculture has more than doubled within the last six years, yet there are less than 8,000,000 acres under cultivation in the fourteen provinces, out of 800,000,000, the greater part of the remainder being used for grazing cattle and sheep.

"Wooly's" Stock.

Sutherland Hutton, of Los Angeles, writes us the Pelisier, French Merino, Rams are meeting with splendid sale in Texas, and already nearly all he can deliver this year have been engaged. Breeders of Merinos in all parts of the United States are interested in the stock of "Wooly," and rightly so, for the clip of "Wooly" beat the record of any sheep the world has yet produced. Even Vermont breeders are anxious to get the strain of "Wooly's" blood into their flocks.

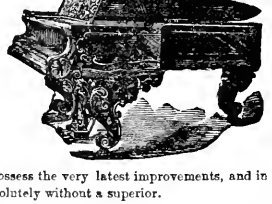
CALIFORNIA Piano Manufacturing Co.

INCORPORATED UNDER THE LAWS OF CALIFORNIA, MARCH 8, 1882

Manufacturers of Strictly First Class

UPRIGHT PIANOS.

Factory, 431 and 433 Fourth St., corner of Bryant. Old Kimball Carriage Factory.



Salesroom, 30 New Montgomery St., under Palace Hotel.

Our instruments possess the very latest improvements, and in TONE, TOUCH and DURABILITY are absolutely without a superior.

EVERY PIANO IS FULLY WARRANTED FOR 5 YEARS.

Our factory is the most complete on the Pacific Coast, possesses every kind of machinery, steam, dry houses, etc., in fact is as complete in all its appointments as any Eastern establishment, producing Pianos of uniform excellence and durability. An examination of our Piano-Fortes is earnestly solicited. Catalogues and full description mailed on application.

WALTER S. PIERCE, Secretary and Agent.

P. B. CORNWALL, President. GEO. H. ROE, Sec. and Man.

THE CALIFORNIA

Electric Light Company,

Nos. 222 to 232 JESSIE ST., S. F.

Has the sole and exclusive right for the Pacific Coast, including the States of California, Oregon, Nevada, and Washington Territory, to use and sell the various electrical inventions of CHARLES W. BRUSH, M. E., Ph. D. The most prominent of these inventions are his apparatus for Electric Light, consisting of his

Dynamo Electric Machines, Electric Lamps,

Automatic Current Governors, Carbons, Apparatus for Electro-Plating, Apparatus for the Storage of Electricity, Apparatus for Producing Power from Electricity, Etc., Etc.

The "Brush" is the only complete and PERFECT SYSTEM of electric lighting. The best Dynamo Machines. The best Lamps. The ONLY PRACTICAL Storage Batteries. The purest and best Carbons.

The "Brush" prices are the lowest. The factory the largest and the business the most extensive in the world. There are more "Brush" apparatus in use than all other systems combined.

Estimates furnished upon application.

Standard Sugar Refinery

MANUFACTURERS OF

PURE WHITE SUGARS EXTRA CUBE, FINE CRUSHED, AND A DRY GRANULATED.

Guaranteed free from Adulteration. Order sample lot from your grocer. For sale by all WHOLESALE GROCERS.

THE STATE VITICULTURAL COMMISSION.

Annual Report of Commissioner De Turk for the District of Sonoma.—With Appendices.

By Courtesy of the Hon. Isaac De Turk of Santa Rosa, and Secretary Wheeler, We are Permitted to Publish the Following Report in Advance.

To the Commissioners of the State Board of Viticulture: Gentlemen,—Having the honor to hold the Office of Viticultural Commissioner for Sonoma District, I herewith submit my report for the current year:

The District comprises the Counties of Sonoma, Marin, Lake, Mendocino, Humboldt, Del Monte and Siskiyou.

There is a large, rapidly increasing, and, I am glad to say, still more rapidly improving grape and wine interest in Sonoma county.

In Lake County, I note much progress, for an interesting account of which, see report of Mr. Ralph Nichols, herewith presented.

In Humboldt County it is claimed that there is a future for the grape growing based upon the fact, that the wild grape flourishes along the water courses of that magnificent county. As yet grape culture as an industry has not been inaugurated.

The other counties of my District have no vineyards, or none in which the grape is grown for other than home consumption.

In Sonoma county, since my last report, great progress has been made in viticulture. The all-important subjects of location and varieties have been much and intelligently studied. Grape growing is not now regarded as incidental to other branches of agriculture; it has come to be looked upon as a leading industry.

There will be fewer vines planted this year than last, or the year before, for the reason that vintners wish to wait until some of the many new varieties set out develop their characteristics, in order that the kinds best suited to soil and exposure, which are very varied, may be selected for new plantations.

I have heard of a few non-progressive farmers planting the old Mission grape, but they are the exception to the general rule in this particular.

Much more attention than heretofore is given to fruit culture. Farmers begin to realize that there is a profit in a more diversified system of farming. They no longer, to use a homely phrase, "carry all their eggs in one basket." Under this impulse, fruit tree planting has been vastly extended. Within the past year the area in orchards, as well as in vines, has more than doubled.

I have elsewhere referred to Lake county, but will take occasion to say, that in my opinion, most excellent results, both in fruit and grape culture, will be had in that county as soon as the trees and vines now planting come into bearing.

The vineyards of Sonoma Valley and some other parts of the county suffered from excessive heat, in June of last year, which brought on the blight known as coulure. There is nothing in this disease to excite the apprehension of grape-growers. It results from excessive heat at the earliest period of blooming of the grape. The damage from this cause was less in the western part of the county, where the sea breeze, in a measure counteracted the effect of the heat.

Red leaf is quite prevalent in Mission vineyards and has destroyed a small percentage of grape for some years past. I have not noticed it on other than Mission vines in Santa Rosa. Mr. Drummond, of Glen Ellen, reports it as also prevailing among his foreign grapes.

In Cloverdale some red leaf is reported, but is not so bad as in the neighborhood of Santa Rosa.

In 1881 I estimated the wine crop of Sonoma county, as under an average. For the years of 1882 and 1883 the same may be said. The crop in 1882 was much hurt by spring frosts, and in 1883 by excessive summer heat and north winds.

In my report of last year, I estimated the total acreage of vines in Sonoma county at 11,594 acres, of which 7,248 acres were old, and 4,346 acres were new, having been mostly planted in 1880 and 1881. These vines are not yet bearing. In 1883 the increase of acreage in vineyards was enormous, as will be seen from the annexed tabulated statement of the present acreage in grapes. It should be remembered, however, that there are not more than 7,000 acres of vines now bearing in Sonoma county.

Of the new vineyards ninty-four per cent. are of foreign varieties, and when they fruit there will be about 18,000 acres of bearing vines in Sonoma county, of which not more than 3,500 acres will be Mission vines. This indicates a wine product for Sonoma county alone within three or four years, of between six and seven million gallons of wine.

Viticultural Statistics

FOR SONOMA COUNTY, 1883.

	Acres.
Sonoma Township	6,000
Santa Rosa Township	3,853
Russian River Township	1,000
Mendocino	2,039
Washington	1,000
Alexander Valley	675
Knight's Valley	250
Cloverdale	1,500
Analy	1,000
Vallejo	400
Petaluma	200
Total	18,017

The product of wine for the year 1883 was as follows:

	Gallons.
Sonoma Valley	1,070,000
Gualicos Valley	152,000
Santa Rosa	260,000
Analy	60,000
Redwood	10,000
Russian River	124,000
Mendocino	150,000
Cloverdale	120,000
Total	2,023,000

From the above figures it will be seen that the wine crop was quite under an average. The outlook this season is promising, and there is a possibility of a yield of 3,000,000 gallons of wine in Sonoma county for the year 1884; all of which is respectfully submitted.

I. De Turk,
Commissioner.

APPENDIX A—Letter of Mr. R. K. Nichols on Viticulture in Lake County.

I. De Turk, Esq., Santa Rosa. *Dear Sir:*—In reply to yours of December 29th, I can say the growing of the vine in Lake county, is as yet in its infancy, only about three years old; still enough has been done, we think, to demonstrate the adaptibility of our climate and the productiveness of our soil for the successful growing of the vine. There are now planted in Lake county, about 600 acres of wine grapes, mostly European varieties, located in different portions of the county, as follows: At Upper Lake,

S. C. Hastings	115 acres.
George Thorington	12 "
J. L. Smythe	14 "

These are of the Zinfandel, Franken Riesling, Golden Chasselas, Muscat and a few of the old Mission varieties; all do very well, except the Muscats, although there are Muscats in gardens, in that portion of the county, that bear very well. On the shores of Clear Lake,

Buckingham has	43 acres,
R. S. Floyd has	5 "
I. Alter has	4 "

These are of the Berger, Golden Chasselas, Zinfandel, Muscat, Sweet Water, Black Hamburg and Flaming Tokay varieties. On Buckingham's place the Muscat does the best, and the Golden Chasselas and the Berger promise well. With Alter, the Muscat does apparently the best.

At Middletown, Lobree, Hamilton, Mattier and others have out about 50 acres of different varieties; the Zinfandell does well. Prof. Mattier has made a great success at his place, near Harbin Springs, grafting the finest European varieties on to the *Vitis Californica*, the grafts exhibiting an astonishing growth and bearing luxuriantly at two years of age. Prof. Mattier has made a specialty of the *Vitis Californica*, in demonstrating its virtues as a resistant and great capabilities for grafting stock. At Lower Lake,

Kuhlman has	30 acres,
Voight "	12 "
Tremper "	4 "

California Agricultural & Improvement Association, R. K. Nichols, Superintendent, has 300 "

These are the Zinfandel, Franken, Johannisberg, Riesling, Golden Chasselas, Berger, Charbono, Black Burgundy and a few Malvasie and some table grapes.

The Zinfandel, Golden Chasselas, Berger, Charbono, do remarkably well, both as to growth and bearing qualities.

The Rieslings are not sufficiently developed to tell what they will amount to, although Mr. Voight is sanguine of their success. These are the principal vineyards in the county. The Mission does well everywhere. As to the bearing qualities of the vine, Mr. Voight, who has the oldest vineyard of any size in the county, informs me that his older vines the past year, averaged him six tons to the acre, from actual measurement.

In regard to wine making, I can say but little, Mr. D. Voight, at Lower Lake, being the only one as yet who has manufactured wine for the market. His Zinfandel and Golden Chasselas are spoken very highly of, and command the highest prices. We think from our experience, thus far, with

our valley vines, that Lake county will produce both table wines, both white and red, that will equal, if not excel, any portion of the State. Our viticultural products will have to be delivered to the railroad at Cloverdale or Calistoga, by teams, at an average cost, for the whole county, of five dollars per ton wagon-mage. Our soil is a red volcanic sandstone bed rock, covered and interspersed with volcanic debris and bulbs, which I believe are the best suited for vines. Our valleys, although very rich, are too damp and frosty for successful growing of the vine, as a rule. Our climate resembles that of other coast counties in the main, although much warmer than Sonoma or Napa in the summer season.

I have noticed that in the spring, vines in and about St. Helena are about 15 days ahead of us in putting forth leaves; once started in the spring, our vines appear to grow faster and the grape ripens much earlier than either in Napa or Sonoma; last fall, '83, our Zinfandel were ripe three weeks in advance of those about Santa Rosa.

In the summer we have a great many hot days and nights, but sheltered in by high mountains we are almost entirely free from the hot north winds complained of in other localities. Our average rainfall is about 24 inches.

This county has not, since its inhabitance by the whites, failed to make a crop. Temperate fruits of all kinds do well, and as soon as the Napa and Clear Lake Railroad, now building, is completed, Lake county hills will rival any portion of the State with their wines.

Yours, respectfully,
R. K. Nichols.

APPENDIX B—Letter of J. H. Drummond on Viticulture in Sonoma Co.

I am indebted to J. H. Drummond, Esq., of Glen Ellen, one of the most progressive grape-growers in the State, for the annexed letter, which contains much of interest to grape-growers:

Glen Ellen, Sonoma Co., Feb. 5th, 1884.

To the Hon. I. De Turk, Santa Rosa.

Dear Sir:—With regard to your questions, I will first answer, that the phylloxera, as far as is known by me personally, has not appeared in any vineyards in which it was not known to be in 1882, but information on this subject is difficult to obtain, as many grape-growers refuse to recognize the presence of the insect, even when the vines clearly show that it is present, and some even when it is proved to them to be there will not acknowledge that the failing of the vine is thus caused.

It seems to be a fact that in infected vineyards where no precautionary measures were taken last year the vines showed remarkable development of the disease, but this may be possibly accounted for from the fact that the past two years have been unusually dry, and there being less moisture in the soil, that the vines were more easily affected, or more early showed that they were attacked. Mr. W. McPherson Hill informed me that never had he observed the phylloxera so active towards the end of the year as it was late last fall. The dry, warm season may account for this.

Regarding the question of vines best suited to Sonoma county, I can give you but little information, but am of the opinion that from the large amount of Zinfandel planted in the county this vine should no longer be propagated excepting in localities where it is especially found to produce fine quality.

The Zinfandel, from the ease with which it yields itself to blends, losing its identity when only a much smaller quantity of a superior wine is present, tends to the belief that it will ever be useful as a ground work for our dry red wines, for with equal facility—from the addition of the necessary grapes—it can be changed to a claret or a Burgundy, if grown on the most suitable soils and in the proper climate.

The Cabernet Sauvignon, though a small bearer, from its great quality must be necessary to aid our best clarets, and probably by judicious prunings and grafting on other roots it may be made to yield fairly. The Mataro is not bearing near Glen Ellen, but seems highly thought of in the Bay counties.

The Franc Pinot bears but little, but the Pinot de Permand yields a good quality of wine, produces well, the wine being of good color. It seems to need sheltered locations. The Gamay Noir bears well, and the wine is highly thought of by Mr. F. Pohndorff. The Syrah requires further testings as to pruning and locations. The Tanna bears well, and makes a wine of good color and excellent quality. The Mennier also seems adapted to the county, and in warm locations the Kadarka seems a desirable vine, it being a great bearer.

However, the newer wine varieties of late introduced are so numerous, and many of them so little known, that until further tested they need not be mentioned, though many seem of great promise. Wine from the Chauche Noir and Malbec should be in various parts of the county next vintage. Amongst the white wine varieties, the Gutedel, Franken Rieslings and Berger are too well known for comment. The so-called Big Riesling (Grosser Riesling) seems from late descriptions to be the Orleans Riesling and a vine that has been neglected in this county; it bears largely, and under favorable considerations of soil (not heavy or moist) and exposure, as it ripens late, it makes a fine wine of an extremely pleasing character. The Semillon (of the Sauternes) seems to be the greatest addition to our white wine vines. It bears well, ripens early, and produces wine of great mellowness and bouquet, and a wine most susceptible to kind handling. Here, in 1883, Semillon yielded at once to an early clarification. I am quite aware that the Sauternes of Europe require great age before being fit for use; but it is the custom to make them sweet from excess of sugar. The Semillon was made when possessing not more than 22 per cent saccharine, and here we have totally different circumstances of soil and climate to France,

Some of the grey and white Pinots seem worthy of attention. The Folle Blanche and the so-called Sauvignon Verte bear well, and yield good wine. You ask if here we have noticed the coulure. Last year especially so, when even Zinfandels, and Bergers were affected, Malvoisies were growing black and suffering much and the finer varieties of imported French vines seemed especially susceptible.

Both the Franken and Johannisberg suffered, but not the Big Reisling (so called) or the Gutedel.

I have observed this failure to set in many varieties for several years, and cannot trace it to any blight or to any insect, though a strong microscope has been frequently used, and would attribute it to unsuitable conditions of temperature at time of blossoming, or to want of proper pruning, some vines requiring large development, and short prunings, and others requiring the rustic growth with long canes; for example of the latter, the Chaintre system is often given as a cure. Here we have noticed a failure to be exceptionally severe when at the time of blooming and setting there was either extremely hot or abnormally cold weather; in fact the results of great heat or great cold seem to be similar. In one case the heat is too rapidly absorbed by the vine, and in the other too quickly parted with, and naturally the thin, tender stalk to the berry or flower through which the heat passes by radiation or absorption suffers and a check in the sap causes a failure to set or a dropping of the berries. A sheltered situation—for in this county at the critical season our hottest and our coldest winds come from the north or northwest—by preventing a too rapid loss or excess of heat by the vine seems to prevent coulure.

Numerous authorities agree that true members of the Chasselas tribe are not subject to coulure and the Gutedel (Chasselas Fontainbleau) well proved this last June.

Why rustic growth and long pruning should enable a vine to resist climate influences, I cannot say, excepting that I have often heard English gardeners remark that it encouraged a more vigorous flow of sap. Some English horticulturists claim that coulure is partly caused by want of "cross fertilization" of the flowers, and it is admitted "that the degree of fertility varies greatly according to external conditions," and on this place, we noticed last vintage, heavy yields in Malvoisies, Bergers, Zinfandels and Franken Rieslings when these vines were intermixed with other varieties, but under exactly the same conditions of soil, situation and pruning, the same vines when grown in blocks dropped their berries under the influence of the hot north wind of June.

"Constitutional coulure" may probably be cured by grafting on other stock. Comte Odart recommends this for the Bicane, a so-called Chasselas.

This is a subject of apparently no end, but in many vineyards many extremely useful experiments might be made with different "why sitters" to see whether the coulure resulted from soil pruning, manner of growth, location or constitution.

Respectfully Yours,
J. H. Drummond.

The San Jose Fruit Packing Company are arranging to plant over one hundred acres at Banning, to orchard and vineyard. They will put out 40 acres to vineyard, 30 acres of plums, 10 of raspberries, 5 of strawberries and 20 of blackberries. Mr. Wright of the Colton Cannery has charge of the works.—*Ontario Fruit Grower.*

27,000 Acres of Choice Vine Fruit, Olive, Alfalfa and Grazing Land to be Sold in Large and Small Tracts.

To hasten the development of the colony now growing up in the Cajon Valley, San Diego county, the El Cajon Land Company will temporarily suspend the sale of its stock and will make most favorable offerings to induce rapid settlement of the country. The 27,000 acres controlled by the Company will, until further notice, be offered in tracts, as follows:

First—The 2500 acres of platted, level land, in lots from 5 to 160 acres—uniform in quality—at $60 per acre, cash. These lands are most favorably situated for vine, olive, citrus and fruit culture, or for making pleasant homes, where the benefits of climate only are sought. Adjacent lands of same quality cannot be purchased at less than $100 per acre. The Cajon Valley already has the nucleus of a fine settlement, a school-house, church, post-office, hotel, etc. About 500 acres in vines and trees are already planted.

Second—The so-called "T." tract, containing 10,000 acres of land, comprising 2,500 acres of valley land, 1,500 acres of rolling mesa, suitable for grain, and 6,000 acres of hills suitable for grazing, will be sold entire. This would make a first-class stock ranch, or could be cut up advantageously for a small colony; wood on this tract is estimated at 20,000 cords. The price will be so low that an investor may subdivide and sell off 1,000 acres of the valley land, and clear all his expenditures.

Third—The so-called "Monte"—a tract of 1,000 acres of the richest alluvial soil along the San Diego river; carries about 20,000 cords of wood. This land in any upper county of the State would sell for $150 to $500 per acre. It will be sold entire, together with adjacent hills.

Fourth—The grazing lands of the "S." tract between the platted lands and the "Monte," about 10,000 acres, partly suitable for cultivation, will be sold either together with the Monte, or separately.

MORE ABOUT FRESNO.

The Raisina vineyard, the property of Miss J. A Fink Smith, and Mr. J. C. White is situated about 2½ miles due south of the town of Fresno, and comprises 80 acres of white ashy soil which, as we have reported, is claimed to be the finest fruit land in the world. This property is surrounded on three sides by a five-board fence, except the quarter mile fronting on the colony avenue which has a picket fence, backed by a pomegranate hedge. Fifty-five acres are devoted to vines mostly of the Muscatel Gordo Blanco for raisin purposes. Fourteen acres are planted with fruit trees, including peach, apricot, nectarine, plum, prune, apple, quince, and fig. Eight acres, separated from the vineyard by a strong board fence, is laid down with alfalfa The residence, yards, raisin packing house, carriage house and stable, barn and offices occupy the remaining three acres. The raisins produced on this place last season sold readily in San Francisco at top prices. They have been already spoken of by the trade and general press as being remarkably fine, being of rare quality, and packed with great care and artistic taste. We have before us a sample box which we have shown to several of our wholesale grocers, who all praised their beauty, some valueing them above imported London Layers, and all saying they were equal, if not superior to any they had seen of California production. Mr. Fred Castle, of Castle Bros., one of the oldest houses in the trade spoke particularly of the packing, and said that one of the too common faults of California producers was rough careless packing. The more care and taste shown in packing, the better prices and also more rapid sale, even where the quality of the fruit was equally good. Mr. W. W. Dodge, of Haas Bros., and Mr. Adams of Asa Harker & Co. both admired the sample very much.

There is only about 25 acres of this vineyard yet in bearing, and the product last season was about 20 tons of raisins. It will be much larger in the coming vintage. The orchard consists mostly of young trees which have been set out in this and last season. There are three acres, however, of five year old trees which bore fruit last year, and which were sold on the trees for $450 net. The alfalfa patch furnishes hay and pasturage for the year round for eight horses and three cows. The residence is a very pretty two-story cottage villa, 32x50, with French roof and cupola. A large wind-mill, tank and well supplies water for the house, stables, etc.; surrounding the house is an alfalfa lawn fringed with a variety of semi-tropical trees, plants, shrubs, etc. Immediately in front of the house is a rosary, in which there are about 50 varieties of roses. In fact, everything on the place is of a high order, for instance, the cows are full blood Jerseys; the horses, Clydesdales and Normans. The packing house is a two-story building, 40x40, fitted with all the apparatus for sweating and packing raisins of the most approved fashion.

THE BUTLER VINEYARD.

This vineyard consists of 415 acres, and is owned by Mr. A. B. Butler, formerly of San Francisco. It may be said to be exclusively a raisin vineyard, 360 acres being planted with Muscatel, Gordo Blanco and Alexandria, and 20 acres with Sultanas. There are about nine acres planted with various fruit trees for home use. Nine miles of avenues in and around the vineyard are planted with Bartlett pears. A beautiful curved avenue of large poplars leads to an open yard round the mansion. The yard is decorated with two large California fan palms of imposing size and beauty, and a number of fine shrubbery and roses. Another branch avenue is not less beautiful. The side roads consist of tall poplars, while a row of fan palms adorn the centre. The effect is very beautiful. This raisin vineyard is, undoubtedly, one of the finest in California. Mr. Butler has made a new departure in planting his vines, and instead of setting them as usual, 8x8 feet, he planted them 12x16 feet. The effect has been truly astonishing. The plants are at least three times as large and thrifty as any planted according to the old method, and even the second season after planting they had obtained sufficient strength to carry a very fair crop of fine grapes. The raisins made by Mr. Butler are put up in fancy boxes, and fetch fancy prices, and are very scarce at that. Mr. Butler is of the opinion that the distance of the vines from each other has little to do with the yield per acre. The farther the vines are set apart within reasonable limits, he thinks, the more they will yield, the finer the grapes, and the less the cost of pruning and cultivation. Mr. Butler is preparing to build a large packing house, 75x125, and on the prospects of his growing crop, has contracted for 25,000 full boxes, and 500 fancy 4 lb sample boxes. The latter, when filled, he expects to distribute by mail. He has made a nursery of wine and raisin vine cuttings of about half an acre; these will be planted out next season. Mr. Charles Williamson, the able foreman of this vineyard, is a young man who came there by chance, and by indefatigable labor, assiduity, and always making Mr. Butler's interest his first care, has raised himself to his present important position, and enjoys more than ordinarily, the confidence of his employer.

THE TAY VINEYARD.

The widow of the late Geo. H. Tay, of this city, has a vineyard of 160 acres, adjoining the Butler vineyard, and is under that gentleman's care. This vineyard is only two years old, and no important buildings have been erected on it yet, as the family live in this city. The vines selected are Muscatel and White Muscat, and for thrift and size for their young growth have nos superior in the State. Some of these young vines are nearly as large as the wrist of an ordinary person.

MARTHA'S VINEYARD.

Professor J. H. Braly, formerly Vice-Principal of the California State Normal School, caught the Fresno fever some three years ago and purchased 160 acres of fine land within a mile of the centre of the town. He calls his place after his esteemed wife, Martha's Vineyard. One hundred acres have been already planted with fruit trees and vines are making startling progress. Twenty acres of peach, pear and apricot varieties, now two years old, are as large, as ordinary four year olds; and the raisin vines, one year old, are starting out like race horses for the second heat. The system of ditches and levees for irrigation is very perfect, and the cost has been so great that it is a natural question: "Where did a school teacher get so much money?" Perhaps a rich relative left a friendly will. It will take some time to complete everything as the Professor wishes to have it; but if no windfall happens his way, the profits of what has already been done will

...CIFIC NURSERY.

...Creek Nursery has been ... F. Reading, of San Fran... ...Gustav Eisen, the lat... ...ent manager. Professor ... well known botanist and ... has had 12 years' experience ... horticulture, and his new ... ...pected, bids fair to rival ... ...the state. The site selected for the ... is one of the favored places of the ... offering facilities, hardly met with ... ...where. The land situated along ... Creek is constantly sufficiently moist to grow any horticultural produce of nursery stock, without any irrigation, and the lay of the land is so peculiar that it offers every variety of soil, from the sandy loam and the drift sand to the red chocolate-colored clayey loam and alluvial ashy creek land. The orchards already set out contain over 600 different varieties of pears, peaches, apricots and plums, imported from the various parts of the globe. The grape nursery is stocked with the very choicest vines for claret, port, white wine and sherry, and other departments are equally well represented. The growing propagation and origination of roses is also made a specialty, and the part of the nursery set apart from them is now green with thousands of young rose plants, in about 400 different varieties of the latest and the best, the long elm avenues leading up to and circling around the central hill are most beautifully laid out and kept. Among the number of fine fruits imported to this place to be further propagated, we especially remark of the melon pear, a new Himilayan fruit, according to the Professor, destined to be one of the coming fruits of not only California, but of the larger part of the States. It ripens in four months from planting, and grows very much as a red pepper vine. At the end of this year some of the stock grown here will be offered in the market, and we are satisfied the Professor's experience and integrity will be appreciated by all who wish to procure first-class varieties, etc., genuine and true to name.

Adjoining the Fancher Creek Nursery, are four sections of land, the property of Mr. Frances Locan, a gentleman well known in this city. Mr. Locan has engaged Professor Eisen to superintend the laying out of his property. The avenues are planted with ornamental shade trees; thirty acres have been planted with vines and several hundred fruit trees set out. Mr. Locan has built himself a neat cottage and commodious barn, and proposes to make this place his home.

(To be Continued.)

We have already spoken of the memoir on olive growing, read by Mr. F. Pohndorff before the State Horticultural Society on February 20th. It has been printed at the request of the Society, and is now for sale. It forms a pamphlet of 42 pages, and is profusely illustrated with cuts made especially for this work. E. Bosqui & Co. were the printers. On receipt of 50 cents in postage stamps, it will be mailed from this office to any address.

The Fresno Viticultural and Horticultural Association.

Fresno is becoming so rapidly a great viticultural and horticultural county, that it was generally felt that these interests were now important enough to warrant forming an association on the general plan of those in the older wine districts. Messrs. Barton and Denicke had a document drawn up and by personal labor secured one hundred signatures of grape and fruit growers, who pledged themselves to become members and pay an initiation fee of two dollars each. The future subscription will be 50 cents a month.

Preliminary arrangements were made for leasing for five years, the hall over Mr. Grady's new opera house. A call for the first meeting was made for last Saturday at 2 o'clock, and as the hall was not ready, it took place, by the courtesy of Mr. T. H. Reynolds, in the parlors of the Grand Central Hotel. Some 75 of the members were present during some part of the discussion.

Bernhard Marks was elected chairman pro tem., and explained the object of the meeting; Mr. James of the Fresno County Bank acted as secretary pro tem.

A protracted discussion took place on the question whether they should incorporate or not. After two or three hours' debate, the motion to incorporate was lost, and it was decided simply to form an association or club, the style to be "The Fresno Viticultural and Horticultural Association." Robert Barton was elected president, Mr. Denicke, vice-president, and Professor Gustav Eisen, secretary; the other trustees are A. B. Butler, J. C. White, Miss M. F. Austin, and Professor J. H. Braly; Mr. W. W. Phillips, cashier of the Farmers' Bank, was elected treasurer.

The days of ordinary meeting were fixed for the first and third Saturdays in the month. A vote of thanks was passed to Attorney Church for his services in drawing up the constitution and by-laws, and to T. H. Reynolds for the use of his parlors.

The meeting then adjourned until Saturday, April 5th, when the new hall and furniture will be ready, and the organization will be completed, standing committees appointed, the order of business agreed upon and other details settled.

The Hon. R. B. Blowers and his friends are airing Mr. Blowers' grievances every week in the Yolo papers. The *Democrat* of the 27th ult. contains a whole broadside on raisins and the Blowers-Wetmore controversy, in which we, ourselves, do not escape criticism. We are perfectly indifferent whether Mr. Blowers considers us "unworthy" or not. We know both the disputants, what manner of men they are, and who it was that began the mud-throwing, and are content that Mr. Blowers should use some other journal for personalities rather than the MERCHANT. When Mr. Blowers has anything to say in what the readers of the MERCHANT are interested, we may publish it; that is if after reading the manuscript, or the proof, we see nothing in' it that will, in our judgment, be out of place in our columns.

President J. B. J. Portal delivered a very able and carefully prepared address to the Associated Grape-growers of Santa Clara, on Saturday last, the 29th inst. We have not space this week to publish it entire, but will do so in our next issue.

A man who always tells the barkeeper to "hang it up" is a great bar-ower.

A Friend of Truth.

The San Francisco MERCHANT of the 14 inst. contained a full and carefully compiled description of Fresno. The MERCHANT has during the last years taken so much interest development of the wine and raisin interests of California, that it is now the leading paper on the subject in the United States. The prejudice against Fresno wines and Fresno raisins and fruit has been so great that for many years neither newspaper men, viticultural commissioners nor experienced vineyardists, excepting a few, have deigned to visit our district. Dr. Blasdale was the first to openly acknowledge our advantages, and we all know how he was set upon and treated for his open honesty. But, one by one the representatives of the press visited us, and after every visit, the representative papers came out with reports favorable to us. This year has been an especially favorable one. The *Alta*, the *Rural Press* and now, lastly, the San Francisco MERCHANT, have come boldly out, letting the so long hidden truth, that Fresno offers unusual facilities for the production of wines, brandies, fruit and raisins. The able editor of the MERCHANT, A. D. Bell who lately visited Fresno, was, so to say, taken by surprise and, the more honor to him, he has come out frankly in our favor and, we may justly say, in favor of the truth. No doubt he will be privately severely criticised by many of the land sharps in competing districts, and we think, in fact we know, that the effort he has now made to open the eyes of those who either will not or cannot see for themselves will result in a vastly increased circulation of his most valuable paper, as it is evident that a paper which will tell the truth in the face of such overwhelming prejudice can be relied upon at all times. Now, as Mr. Bell has done his duty, and, more than that, has shown himself a keen observer, good judge and most valuable adviser, let us do ours. Nobody who has a vineyard or orchard, even if only ten acres, should be without the San Francisco MERCHANT, which is in fact only merchant in name, the scope and field of its labors comprising in reality every branch of industry by which Californians advance toward prosperity and wealth, and pre-eminently so the raisin and wine industries.—*Fresno Republican*, March 29th.

To Make Good Wine.

These hints may be of some use to new beginners who have no experienced neighbors whom they can consult.

It is necessary to have a good cellar, clean casks, press, etc. Have your grapes well ripened, gather them in dry weather, pick out carefully all the unripe berries, and all the damaged ones, then mash and grind them with a mill. Don't mash the seed. To make the wine rose-colored let the grapes remain in a large tub a few hours before pressing.

To have more color leave the grapes without pressing after they are mashed. Having collected the must in a clean tub from the press, transfer it into the cask in the cellar. Fill the cask within ten inches of the bung, then place one end of a siphon in the bung and fix it air tight and the other end must be placed in a bucket containing cold water.

When properly made, the must will undergo fermentation. Keep the end of the siphon that is in the water full four inches deep. In 15 days fill the cask with the same kind of wine and bung it loosely for one week, then make it tight. In January or February next, if perfectly clear, rack it off into another cask and bung it up tightly.

In November rack it again, as it will improve by racking. The same grape makes different qualities of wine by separating the different runs of the same pressing. The first run is the finest. Mix it up all together to make good sound wine. When four or five years old it is fit for bottling. The whole expense of wine-making from the field to the casks should be but four cents a gallon.

Casks made of redwood timber are light, strong and tight. Large vats, tanks and cisterns are made from this timber. Wine cellars should be 12 feet deep.—*Exchange*

A coat-tail flirtation is the latest. A wrinkled coat-tail bearing dusty toe-marks means: "I have spoken to your father."

FRESNO.

Hay, Cattle and Hog Ranch

VINEYARD AND FRUIT LAND.

FOR SALE.

THREE AND ONE-HALF SECTIONS

2240 ACRES.

ALL UNDER

SUBSTANTIAL BOARD FENCE.

Dwelling house of seven rooms. Three cottages. House for twelve laborers. Store house; stable and barn, 60x80 feet, accommodating 20 horses.

HAY BARN, 60x200 Feet.
Cost $8,000.)

Blacksmith shop; Fairbanks, ten-ton hay and cattle scale (new); over

1000 acres in Alfalfa, 200 acres in Barley.

About ten acres of orchard, containing amongst other varieties, 200 almond trees, bearing, 100 fig trees, bearing; small vineyard, half-acre kitchen garden, half-acre chicken yard.

One of the Largest

Irrigation Ditches in Fresno,

Runs through this Property.

Two and one-half sections checked and necessary water gates.

Four Artesian Wells and Windmills,

AND ONE

Horse Power,

Produced 800 tons of hay, at two cuttings, from 300 acres of alfalfa, besides pasturing large herds of cattle and bands of hogs.

One section or more of this land is unexcelled in this most popular county for vineyard or colony purposes.

Around this property are now a number of the most promising young vineyards in the State.

This magnificent estate is to be sold at a low price because other occupations prevent any of the owners taking personal charge of the property.

Terms one-third cash. Balance in easy installments.

THE WETMORE RAISIN CONTROVERSY.

Letter from Chas. A. Wetmore Reviewing his Critics.

[From the Riverside Press.]

Editor Press and Horticulturist.—The irregularities of the mail service recently have deprived me of usual opportunities for reading the newspapers. While in this city temporarily, I have found back numbers of Riverside papers, and have been surprised as well as pained to notice that several of your citizens have made special efforts to grossly misrepresent the propositions which I have advanced concerning raisin culture and curing. I do not comprehend why this should be done. So far as I am personally concerned I do not consider this unfair discussion of much importance; the truth must eventually come to the surface, and I shall take the first opportunity that presents itself to meet the people of Riverside in such a manner that misrepresentation cannot be between us. The only misfortune is in diverting the attention of vine growers from the true issue.

Permit me, however for the sake of those who have not carefully noted what I have proposed on this subject, to say that I have not condemned irrigation, and that there is no such issue as irrigate vs. non irrigation between me and Mr. Glovers; that I have not advised Riverside not to irrigate; that I have not advised Riverside to plant vines closer, though there may be cases where such a practice would be desirable; and that I have not discussed raisin making from any local standpoint.

I did suggest some pertinent general principles concerning raisin culture, which, I hope will receive honest attention, as I have only one object in view, viz.: the advancement of viticulture by the development of its most excellent results. Wherever I have too broadly stated any general principle, I am only anxious to meet that generous criticism that will enable me to make all exceptions and modifications for the progressive perfection of our work in the interest of the whole State.

The object I assume to be attained in raisin culture is the production of raisins of fine quality in quantities profitable to the producer. I do not intend to discuss relations between the relative profits of different places, the relative abundance of crops, where the products are of good quality. I do, however, intend to call attention to defective products and to those principles which govern excellence.

There can be no worse enemy of this industry than he who pretends that all our raisins are of fine quality, that all of any given crop are of uniform quality, that any very large proportion of our raisin crop of the State is worthy to enter into competition with the best imported grades, or that there is no room for improvement even in Riverside. He who pretends that he has produced eight, ten, or twelve tons of grapes to the acre, of two or three separate crops in one season, and has thoroughly cured them all into first-class raisins, pretends what every sensible vine grower does not believe; and even if it were possible that such a result might be attained in any given place, it would evidently not be so in many other places. Such announcing propositions for Riverside alone, but for all the State, and I do not yet believe that even Mr. Cutter desires that I should assume that no exceptions can be made outside of Riverside.

The only criticism that I made concerning Riverside was in reference to excessive summer irrigation. I had distinctly stated that planting far apart could not be justified except where experience showed that perfectly matured fruit could be most profitably obtained under such circumstances; I mentioned Fresno as one place where such maturity might be obtained. I would have said Riverside, Ontario, Mayfield, Tulare, etc., etc., if I had thought it necessary to perfect the illustration.

The essential requisites in raisin making are, as I have endeavored to show: *first*, the production of a perfectly matured grape, with sufficient saccharine, pulpy, of delicate flavor and fibre; *second*, careful selection, curing and packing of the same.

It is on the first point mainly that disagreement has arisen. I am quite convinced that where the fruit is properly matured in good season, in any part of the State where the Muscadel succeeds well, there will be no difficulty in curing the raisins without artificial methods. I might have made exceptions of coast districts subject to fog and such high altitudes near the sea as the Santa Cruz mountains, but I do not think that in the one case the Muscatel will be found to succeed well in a practical sense, or in the other that it attains perfect maturity in good season. I make a distinction between what are called ripe grapes for ordinary market or shipping purposes, and what I call matured fruit for raisin curing. And here is where there is room for discussion, for here is the bone of contention. Those who talk about artificial dryers have in mind the kind of fruit which I call unmatured and which I claim cannot be made into first-class raisins. Those who have a thoroughly well matured first crop of fruit do not need any artificial dryer in any part of the State where raisin making is seriously attempted. If at the possible to obtain a second and a third crop of perfectly matured grapes, it may be that a dryer may become necessary owing to the lateness of the season, cloudy days and cold nights. The long bear of a little early rain is not worth considering, because it is presumed that an intelligent grower will protect his fruit from the showers and because slight rains in our true raisin districts, as in Spain, do not prevent the curing of raisins, though they may injure their appearance. Those who are trying to make raisins out of unripe grapes are welcome to their end of this controversy. I only desire not to be misunderstood by those who are trying to make raisins out of ripe, pulpy fruit. It may be difficult to dry grapes that have been forced to swell to unnatural size by summer irrigation, or sandy bottom lands, such grapes having little pulp and saccharine; but I have only to say that the owners of such fruit are mistaken in trying to make first-class raisins.

Now, what I mean by excessive summer irrigation is this, viz: irrigation that forces a flow of sap beyond what is necessary to well mature one good crop of fruit. While a second and a third crop are being nourished by a fresh flow of sap the first and true crop cannot be brought to its highest state of perfection for raisin purposes. If there is any exception to this rule let it be shown as an exception not as a rule. Certainly in Malaga they do not boast of the second and third crop, nor do they in places in the State where good success is attained with the first crop, and which I shall not mention for fear of exciting the ridicule of others unseemly. But it is true that the second crop in any place is more reliable and ripens well in good season, then it may be excusable to consider that the objective product and to encounter efforts for such production, yet such culture will, however, I believe accomplish for the first crop all that is desired.

One good crop of first-class fruit should be the aim of the raisin maker, let those who can get three good crops of first-class fruit be satisfied with claiming that they are exceptions to the rule and boast of their profits, but let them not undertake to defend those who are unable to do any better than they do in Malaga from being satisfied with their lot in life.

If I am satisfied with three to four tons of first-class fruit to the acre, and a net income of $100 per acre, equal to $5,000 a year from fifty acres, may I not be permitted to enjoy such conspicuous poverty without being considered excessively "modest," as Mr. North contemptuously puts it. I do not envy Mr. North, his enormous crops; he should not then in his pride of wealth so loftily snub those gentiles who are not ashamed of an income of $5,000 a year obtained with honor and peace. Indeed I am so little envious that I would even try to make Mr. North increase his fortune by improving his methods; if I am right "there s millions in it."

But, seriously, Riverside growers have sufficiently proved the excellence of their products to pass beyond that doubtful Constitution of provincialism, which is confirmed when every suggestion of improvement is misconstrued into a personal attack. It is only new places or doubtful success that ar so "touchy," and I am quite sure that Riverside is not fairly represented by the temper of the articles of which I have had reason to complain.

How to adjust all the questions of pruningand a irrigation, proximity of vines, etc., etc., consistently with the production of one good well matured crop of raisin grapes, is a matter for study and experiment. If the vines show a tendency to make large showings of second and third crops, "excessive" summer irrigation, or bad pruning, or both, are indicated in such places as Riverside; on low bottom lands large second and third crops, where pruning is not to blame, would indicate a soil unsuited to raisin culture. Such soils, with water six to ten feet from the surface I condemned in San Diego county and elsewhere for raisin vineyards, and such were approved by Mr. Hilgard, and on that account all our differed somewhat. There is no reason why a second and third crop should be tolerated in Riverside, if methods of irregation are properly studied. Pruning will also have something to do with the question. Now when I say that I believe that with proper pruning and judicious irrigation one good crop of grapes of first class quality can be procured in Riverside, no one has the right to misrepresent me as an enemy of my people. If I contend for improvement in your products, nothing can excuse any of your people who complain of the same, except the charge of ignorance, want and your difference. There is no reason why a second and third crop should be tolerated in Riverside, if methods of irregation are properly studied. Pruning will also have something to do with the question. Now when I say that I believe that with proper pruning and judicious irrigation one good crop of grapes of first class quality can be procured in Riverside, no one has the right to misrepresent me as an enemy of your people. If I contend for improvement in your products, nothing can excuse any of your people who complain of the same, except the charge of ignorance, want and your difference. There is no reason why any second and third crop should be tolerated in Riverside, if methods of irregation are properly studied. Pruning will also have something to do with the question. Now when I say that I believe that with proper pruning and judicious irrigation one good crop of grapes of first class quality can be procured in Riverside, no one has the right to misrepresent me as an enemy of my people. If I contend for improvement in your products, nothing can excuse any of your people who complain of the same, except the charge of ignorance, want and your difference. There is no reason why a

PRODUCE MARKET.

The [illegible] are favorable and the [illegible] condition, and the prospects [illegible] harvest will be fully as large as last year. Considerable [illegible] which is [illegible] the case of fruit, which is greater than ever before, this owing to increased acreage and specially favorable weather.

In the vicinity market both wheat and barley are dull and weak, consumers and shippers taking only sufficient for their immediate requirements. At the above seasons of the year dull and weak trade is the best price recorded during the past fortnight have largely favored the seller.

As reported to the secretary, transactions on "Call" during the past month have been as follows:

Subject to call, March 1884. Wheat, 32,500 tons, value, $1885,210; Barley, 110,000 tons, value $2,427,000; Bran, 100 tons, value, $5, 250. Totals, 132,600 tons, value of, $4,150,710.

FLOUR—

Receipts for the week, 149,279 qr sks.

Quotations are without material change.

Extra, $5 37½ @ 5 62½; superfine, $4 00 @ 4 75. Country mills, $5 50 @ 5 30; Interior Extra, $5 00 @ 5 37½; per bbl for jobbing parcels to local consumers.

WHEAT

Receipts of week, 3143,881 ctls.

During the week there has been a very decided decline in both the Eastern and European markets, and from this present outlook no improvement can be reasonably expected. Farmers and speculators have very positively come to this conclusion, and are liberal sellers of parcels for future delivery at exceptionally low figures, as will be seen by quotations given below. It would now seem that we will have fully 1,500,000 tons for export, and that such will be the result we predict, unless very unfavorable weather is met with later in the season.

In the vicinity market, good shipping is not available above 1 57½. Small parcels of extra choice milling were sold yesterday for 1 65, which is an extreme figure. At all the bidding prices for No 1 white, were as follows: Spot, 1 50@; seller '84, 1 40; buyer, '84, 1 56; buyer, '84 after July 1st, 1 48; buyer, season, 1 56; seller, season, 150 per ctl.

BARLEY—

Receipts of week, 13,132ctls.

Owing to the favorable crop prospects holders and growers are very weak in their demands, and prices are rapidly declining, much to the disconfiture of parties who are long in the market. In the sample market No 1 feed is quotable at 85c @ 87½c; good to choice brewing 95 c @ 1 02½; Chevalier, 1 20c @ 1 30 for choice bag. On call yesterday afternoon sales of No 1 feed were made as follows: Buyer '84, 90½ @ seller season, 85½; buyer season, 87½ per ctl.

OATS—

Receipts of week, 8257 ctls.

Delivers are unimportant, and would-be sellers of lots for future delivery are willing to accept materially lower rates than are now quoted.

We quote: Black, $1 35@$1 45; White, $1 50@ 1 55 for ordinary, $1 62½ @ $1 65 for fair to good and $1 70@1 75 per ctl., for choice to ex tra choice.

CORN—

Receipts of week, 739 sks

We quote: Nebraska, $1 37½@$1 40; California $1 45@1 55 for white, and $1 60@1 65 per ctl for yellow.

RYE—

Receipts of week, 311 sks.

Quotations are entirely nominal at 95c @ $1 per ctl.

BUCKWHEAT—

Receipts of week, none.

Stocks are exceedingly high and a choice article would probably sell for a fancy price, say 3.50c @$4 r ctl.

MILLSTUFFS—

Receipts of the week, 6896 sks middlings, 1220 ctls ground barley, 43416 sks bran, 50 sks ground feed.

We quote, Groun l Barley, $20 00@22 00 per ton, Middlings are selling at $17@19 00 per ton, Wheat Bran, $14 00@15 50 per ton; Oil Cake Meal, $36 00, old process, and$26 50 new process; Feed Corn Meal, $33 50@34, Cracked Corn, $34 per ton; Rye Flour, $5 per bbl; Rye Meal, $4 50 per bbl; Buckwheat Flour 6c per lb; Feed Barley, 1c5c per lb; Eastern Oat Meal, $8 75 per bbl; Cracked Wheat, 3½c per lb.

HAY—

Receipts of the week, 1305 tons.

We quote: Alfalfa, $8@10; Wheat, $12 00@13 50; Stable, $10 00@12 00, Wild oat, $12 00@13 50 Cow, $9 00@11 50, Barley, $9 00@11 00 per ton

STRAW—

Receipts of week, 76 tons

Quotable at 50c@60c per bale as to condition.

SEEDS—

Business very quiet. Nothing worth mentioning.

Flax quotable at $2 50@2 75 ₱ ctl; Canary, 5c for 5/8 c; Alfalfa, nom$2 @ $3; Timothy, 5c@5½c per lb; native and Surfie for imported; Mustard, choice Brown, $3 25@3 75 ₱ ctl; White, $2 75@3 00; Hemp, 4c; Rape, 3c@3½c

BEANS—

Receipts of the week, 330 sks

Arrivals of all kinds have been unusually light. There is but little jobbing trade going on and but little trading among dealers Values of all descriptions are stronger, although there has been no material advance in prices. Whites are extremely weak. The largest holder has got scared and is jobbing in two pound lots at our quotations—though that prove was realized for the last lot offered on 'Change. The market is fully prepared for a heavy collapse in this variety.

Limas also are under the weather—wholesale parties are using many small devices for keeping up prices, while they are getting from under with great alacrity.

Our quotations are, for round lots from the wharf small White and Pea, $2 80; Bayos, 3¾; Pinks, 4 30; Reds, $4 75, Butters, $3 75; Limas, $2 90

BUTTS—

A good supply of Oranges and Lemonsis on hand this week, communications having been established with the Southern countries.

We quote Domestic—Apples, 75c@$3 00 ₱ box, Wisconsin Cranberries, $18 00 ₱ bbl; Western do, $17 00@17 75 ₱ bbl.

Tropical—Lemons, $4 00@5 00 per box for Sicily; Limes, 8@7 per box for Mexican; Tamarinds, 12@ 13c per lb; Bananas, $1 75@$4 00 per bunch; Oranges, California, $2 75@3; Choice Riverside, $4 to 4 50, Choice Navel, $5 00@5 50 per box.

NUTS—

We quote: Cocoanuts, $6@6 50 ₱ 100; California Walnuts, 8½@9c ₱ lb; Chili do, 8@8½c; California Almonds, hard shell, 6@8c, soft shell, 11 to 15c; Filberts, 12@13c; Pecan, 12@13c; Pea Nuts, 4½@5c; Brazil Nuts, 10@12c; Hickory Nuts, 7@8c; Italian Chestnuts, 15@16c.

HONEY—

We quote: Extracted, Gorle, Extra White Comb, 15@17c, White, 12@15c, Dark, 8@10c ts

DRIED FRUIT—

Better run in good supply with moderately demand. The principle sales (of which there are few to note) of fresh fruit have been made to parties who are desirous of obtaining package. The majority of retailers seem to be buying just enough to supply their customers and no more, hence trade may be said to be quiet.

Cheese is coming in freely and meets with ready sale at those reduced quotations. Bran cheese in particular is wanted, but the market is bare, so quotations are nominal.

We quote Butter Point Reyes, 24@25c; Choice, 22@23½c; inferior lots from country stores 15@16c. Eggs, 15@15c for ordi and 24@ 25 for new, Eastern, 15@17c, Cheese, California, Thrl 11@c for choice, 10@12c for Fair to Good, Lemon, in drums, 17@18c, Martin's N. Y., 20@21c, Western, 10@15c.

HOGS

Some receipts of Eastern stock and a rather brisk demand has kept the market rather lively lately, without making much change in quotations. By Easter no supplies are in, though present figures will rule firm until after that festival.

We quote: California Eggs, Choice Ranch, 22 @23½ per doz.

POULTRY

The best there are bring two cents readily.

Receipts of week, 989 sks.

POTATOES—

Receipts of week, 11,622 sks

Our quotations are for round lots from the wharf, Early Rose, 90c; River Beds, 65c; Tomales and Petaluma, 80c; Humboldts, 95c, Pea Blows, $1 05 Peerless, 85c

All odd lots of Early Rose were cleaned up at our quotations on Thursday last. The wharves are bare of all kinds. River Beds are not t be had. Tomales and Petalumas are sold on arrival, at much higher figures.

BEESWAX—

We quote 25@28 c per lb.

HIDES

Receipts of the week, 37 lle

There is no change in the market to report. There was a somewhat better feeling during the last days of last week, and dealers hoped for an improved market this week, but it has not come and they seem to have jumped into the normal condition of the last few weeks.

Prices are well maintained in all the markets but the demand is so light that in order to effect sales reductions have to be made; quotations 12@13c, for common to prime and 19@21c, for choice.

POULTRY—

Price are higher this week. Hardly enough coming in to supply the markets.

We quote: Turkeys, Live Gobblers, 28@30c per lb Turkey Hens, 28@30c; Dressed, 30c, Young Roosters, $10@12 00; Old Roosters, $8@9 00, Hens, $5@ 10 00, Broilers, $4 00@5 50 according to size; Ducks, 10@12½ doz, Geese, $2 25@3 00 per pair

GAME—

We quote: Hare, $1 5 or2 00; Rabbits, small, $1 50@1 75, cottontail, $1 25@$1 50 ₱ doz. Teal, $1 50, Snipes, $1 75@2 25@2 50, Widgeon, $1 50 @1 75; Mallards, $2 75@3 00 ₱ doz, canvas-backs, $2 75@3 00 per doz, common snipe, $1 00@1 50 ₱ doz; Plover, golden, 50 or 3 00 ₱ doz; Grey Geese, $1 75@2 00 White Geese, 50c, Honkers, $2 50@3 00 per doz. Brant, 50c.

HIDES, SKINS, ETC

Heavy Salted Steers, over 55 lbs, 10 to 10½ per lb Medium Salted Cows and Steers, 50@55 lbs, 8½ Light Salted Cows and Steers, 30@50 lbs, 8@8½ per lb. Salted Kips, 10c per lb; Salted Veal, 11c per lb. Salted Calf, 15c per lb.

Dry Hides, usual selections, 18@19c per lb; Dry Kips, do, 18@—c per lb. Dry Calf, do, 18½ @21, per lb

VEGETABLES—

Receipts of week, 345 sks peas, 106 sks hutils.

We quote: Peas, 3½@3½c; Turnips, 50@65c; Cauliflower, 65@75c ₱ doz; Cabbage, 90@$1 00 ₱ ctl; Garlic, 2@2½c ₱ lb; Celery, 50c ₱ doz; Dried Okra, 30c ₱ lb, Dried Peppers, 15@15c ₱ lb; String Peppers, 18@20c per lb; Artichokes, 40@50c ₱ doz; Beets, 75c ₱ ctl; Parsnips, $1@1 25 ₱ ctl; Marrow Fat Squash, $25 ₱ ton; Mushrooms, 60c per lb; Cucumbers, 50@75 per doz; Tomatoes, 8@10c per lb; green peas, 8@12c; string beans, 15@17c; Asparagus, 10@12c per lb; Rhubarb 9@11c per lb.

THE WINE MARKET.

Said a servant presenting herself to a London housekeeper: "Which I'm a hagnostic, if you please 'm, but no objection to a Christian family!"

MERCHANDISE MARKETS

BAGS—

Spot lots of Calcutta Standard wheat sacks selling for 7¾@7½c; June and July delivery 7¾ @7 8c; California Jute, 7¾c; Potato gunnies, 14@ 14½c.

BORAX—

Dealers are shy of buying beyond their immediate wants, waiting the action of Congress upon the tariff. The price in New York is nominally 8c for concentrated in round lots of 10 tons or more, and refined 1c higher, with but little doing Refiners there are reported out of the market, or only offering such figures as to preclude transaction.

BRICKS AND FIREBRICKS—

	Spot. Ex. Wharf	To Arrive.

English outside brands, in round lots	3 00	3 00

COAL

Very few sales this week from first hands; and jobbers state that there is a complete stagnation of trade with the retail dealers, this is very evident from the quantity of Wellington, Seattle and Coos Bay Coals which are being carried, that a few weeks since there were lines of teams awaiting their turns for delivery

The last Australian mail shows the departure of Coal from Australia for 5200 tons for the month of February, and loading for San Francisco about 18000 tons; 80 per cent. of this has been already contracted for, so we need fear no over-supply from that section. The average cost of Wallsend now en route is about $8 25 per ton to the importer

The Coast Collieries are keeping the market liberally supplied.

Importers' prices of coal, Foreign and American, to arrive: Australian, $7 50@7 75; Liverpool Steam, $7½ @7 75; West Hartley, $8 25@8 50, Scotch Splint, $7½ @7 3; Cardiff Steam, $7 75@8; Lump Lehigh, $13@ 13½; Egg Hard, $11@11½; Cumberland, delivered at $16@17 per ton; prices are as follows: Australian, $8 00; Liverpool Steam, $8 00; West Hartley, $8½; Scotch Splint, 9 00, Cardiff, $8 00; Lehigh Lump, $13; Cumberland, bulk, $11 50; Egg Hard $11 50.

IRON—

The market for this article is at a perfect standstill, suffering the inevitable consequences of over-supply over production in the Eastern, and over importation in the Western markets, have been the bane of this little trade. Any reference to Pacific Coast revival is premial, and our importers in 1884 will probably confine their shipments to orders only, and avoid loading on their own account

The quality of foreign arriving this month has been exceptionally light.

Importer's prices of Pig Iron, Foreign and American, to arrive: Shotts No. 1, $27 50@—; Eglinton, $26 50@—; Eglinton, $25 00, Clay-Lane White, $23 50; American, Eastern, Soft, $28 00; Spot prices are as follows: Glengarnock, $25 00; Eglinton, $24 00; Clay Lane, white, $23; Shotts No 1, $28 50; American, Soft Eastern, $28. Copper Sap Nos. 1, to 4 $32 50@$35 00.

Pork—Live Hogs, 7@8c for hard grain Hogs on foot; dressed do, 10½@10¾c ₱ lb.

Spirit of the New York Markets.

NEW YORK, March 26.—There is no appreciable improvement in general trade, but the fine weather of the last day or two has created a more lively feeling and the dealer markets are looked for. Among the more important commercial events of the last few days has been the opening of freights on the trunk lines from the West And now costs but fifteen cents a hundred pounds to bring grain from Chicago to New York, and it is reported that rates have been cut to a still lower figure. The reduction was for the purpose not only of securing harmony among the trunk lines but to stimulate foreign trade in cereals. But while there has been a further decline in wheat, corn and flour, the exports have continued moderate. Reports from the growing wheat crop are favorable to another abundant harvest. The "bull" manipulators of the market begin to see that they cannot hold on forever. The competition of India, of Australia and of Russia must be met, not by hoarding our grain in excess of the wants of our people, but by selling at the market prices of the world. This will give cheaper living at home, as well as better foreign trade. There has been a decline in the transportation rate on wheat from Chicago to New York of ten cents per bushel within a recent period, and it is claimed that the lines can make no money at a less rate than 12 cents. If the local schedules should be made to conform proportionately to the through rates it would probably have a better effect on general trade than the present arrangement From nearly all parts of the country come reports of unfavorable weath r, bad roads and a generally sluggish and unsatisfactory trade. At a few points a better condition is reported, but, on the whole, the trade of the season has not been up to that of last year.—*Shipping List.*

FREIGHTS AND CHARTERS.

There has not been a transaction in wheat chartering for several days. The last was on Saturday; an iron vessel to Cork for orders, 30s, or if to a direct port, 27s. No one seems to want a ship, either wood or iron, and the owners of wooden vessels do not want charters at present prices. The engagements for the week have been as follows:

Bark Nonantum, 1150 tons, lumber from Barrard's Inlet to Shanghai, Bark 0. C. Murray, 432 tons, returns to Honolulu. British bark Dhanuh Lomlee, 1271 tons, wheat to Cork, f. & l. 30s Ship City of Brooklyn, 1700 tons, merchandise to Seattle. Ship W. H. Starbuck, 1330 tons, coal from Seattle to this port. Ship Eclipse, 1538 tons, lumber to San Jose de Guatemala. Ship Eclipse, 1538 tons, coal from Nanaimo. The charter of the British ship Nebo has been cancelled.

Customs Duties.

A. D. BELL. ..... Editor.

FRIDAY ..... APRIL 4, 1884

The report of the St. Helena Wine Growers' Association and the table of wine exports by the P. M. S. S. Colima will appear next week.

The Woodland *Democrat* estimates that there is in Yolo county, counting only vineyards of five acres and over, more than 2,000 acres of vines, chiefly from one to five years old.

The Mapleson opera receipts it is said were about $200,000, in which case, with the ticket scalpers' profits, dresses, bonnets, carriages, etc., this State spent $500,000 over Patti and Gerster, and would have spent considerably more if the troupe had stayed another fortnight, and yet we cannot find money for a World's Fair.

THE LATE W. H. STOWELL.—W. H. Stowell, the well known broker, whose serious illness we reported last week, died on Saturday last shortly after noon, and was interred on Tuesday from Calvary Church. Mr. Stowell was born in New Bedford; his father was a sea captain, and was lost at sea about the time of his birth. Young Stowell had to make his own way in life at a very early age, but prospered, until he found himself in business in a large way in the oil trade. The panic which followed the general introduction of gas into American cities brought reverses. In 1849 he came to California and entered the service of Simmons, Hutchinson & Co., the first agents for the Pacific Mail Company. He afterwards went into business for himself, as a merchant, and was very prosperous for a time. Reverses came again and he commenced as a broker and followed that business without interruption for twenty years. Nearly all the grocery sugars sold in this market and most of the Hawaiian rice has passed through his hands. Mr. Stowell was very popular among our business men, his strict integrity and suavity of manner making all his customers his friends. In his relations with the pastors and congregation of Calvary church, he was much beloved, in short, he was an admirable sample of a merchant who carried his religious principles, though unobtrusively, into his business career, as into every relation of life. Mr. Stowell leaves a widow and three daughters, one married, one a widow, and one single. The body of the church on the occasion of the funeral services was crowded with mourning friends, among whom the business community was well represented. Mr. Stowell was 73 years of age at the time of his death.

IMPORTANCE OF PROTECTION FOR MANUFACTURERS

The manufacturers of New England, it would seem, in connection with their brethren throughout the country, are fully agreed in regard to one thing, and that is that the tariff, as it now exists, should be left alone. They have many arguments to advance as to why this conservative policy should be pursued by Congress, and why a reduction of duties on imports would be disastrous to various industrial interests. They hold that continuous agitation, with a view of tariff reduction, and the constant aggressiveness of the free trade advocates who are all book theorists—are disturbing and very bad influences in the industrial economy of the country. They also say that the recurrent presidential political campaigns have an unsettling effect upon business, chiefly from the apprehension that a change of the party in power may result in legislation that will make such changes in our tariff as will operate disastrously upon some of our industries, and through them upon all others; for they hold that the varied interests of this country are so interwoven, one with the other, that what will injure one will injure all others. There are about 3,000,000 people in the United States directly employed in manufactures outside of agriculture; and allowing that each of those has, on an average, four others depending upon him for support, it would give, say, 15,000,000, or one-fourth of the entire population of the country, dependent upon those varied industries.

One of the first things in the tariff schedule that is usually attacked by free trade advocates is wool. Give us, they say, free wool, and not only can we manufacture more cheaply for the people of the United States but we can compete with the other wool-manufacturing nations in the markets of the world. Where are the nations in the world, ask the protectionist manufacturers, that it is worth our while to compete with England, France and Germany in? We need not go abroad for a market at all, and if we did we should find none of any account,—not one equal to the one we have at home. America is the greatest woollen cloth consuming market of the world. Situated in the temperate zone, where there are from eight to nine months of cold or cool weather in the year, it is just the place where woolen garments are universally in demand. It is a growing, thriving and prosperous nation, with the most magnificent resources of any in the world, and stands at the head of all the nations of the world in the ability of its people to consume largely of woollen fabrics. It is likewise one of the largest—if not the largest—wool-producing countries in the world, the last clip approximating to 300,000,000 pounds, and promises to reach to 500,000,000 inside the next ten years. Its woolen manufactures are only second in extent to those of Great Britain; but, as it costs more to equip and operate a woolen mill in the United States than in England, it is out of the question to attempt to compete in this country with the British manufacturer.

Curtis, Dixon & Co., whose advertisement will be seen in another column, are one of our oldest established cigar manufacturing firms, and from the high quality of their goods and their honorable dealings, enjoy throughout the coast a most enviable reputation.

TAXATION OF SHIPS.

While Senator Whitney, of Alameda, is giving some attention to the political code, regarding the taxation of ships, we would suggest an amendment of the Constitution, by which, for the encouragement of our commercial marine, all deep water ships, registered and chiefly owned in California, should be exempted from taxation, for State, County or Municipal purposes. Failing this, that all deep-water vessels of 500 tons register and over, built in this State, owned or partially owned and registered in this State, if they have loaded or discharged a cargo in a California port within fifteen months of the time at which other property in the State is assessed, shall be exempt from State, County or Municipal taxation. We have the timber for building wooden vessels, and we shall soon be prepared to build iron vessels, sail and steam, of the largest class. If such vessels by being built here, chiefly owned and plying to and from our ports, would be exempted from State, County and Municipal taxation, California would soon have a fleet of vessels, sail and steam, in every business, European, Australian, South American, Pacific Islands, China and Japan, and in whale and codfishery, of which any State would be proud. Every steamship company running from this port would find it its interest to build its steamers here. Even the Occidental & Oriental Company would find it cheaper to build steamers here than charter English steamers from the White Star Company for the China line. Under the present system, California does not collect a dollar of taxation from the Occidental & Oriental, on its vessels, nor from the Pacific Mail, for its ships. The latter are taxed in New York and the former ships are owned in England. Such a boon as freedom from taxation and the fine new steamships of the Oceanic Steamer Company would have been built here, instead of Pennsylvania. In freeing ships from taxation, to encourage shipowners and shipbuilding, we should only be doing what the United States did when it wanted to strengthen its credit and float its bonds at home.

THE LATE JOHN PARROTT:—Mr. Parrott, who died on Saturday last, at the age of 73, was a wealthy man, as fortunes were counted in those days, when he arrived in this country from Mexico, in 1845. He was one of our earliest bankers, and his conservatism kept his bank in the best repute when more reckless concerns went under. To Mr. Parrott's mind, we owe some of the most important enterprises and improvements carried out in the early days. A few years ago he transferred his banking business to the London & San Francisco Bank (limited,) and since then has gradually withdrawn from business, and passed most of his time with his family in his residence on Folsom street. Mr. Parrott's mind was clear and bright to the last. The funeral ceremonies were held at St. Ignatius Church, and the body was afterwards taken to San Mateo, and after prayers by the Rev. Father Varsi, S. J., was interred in a spot chosen by the deceased some time ago.

If the anti-railroad Democrats read the more conservative members out of the party, and Morrison, Carlisle and Watterson read all the protectionists out there will be no one left to vote, but bosses, office holders and office seekers.

INCIDENTAL PROTECTION.

We are often told that there should be no other protection except what is incidental to duties imposed for revenue. That as a matter of fact revenue duties upon articles which this country is capable of producing necessarily involves some degree of protection is undoubtedly true, but that duties should be imposed for no other direct purpose than revenue is entirely unsound. The tariff bill passed by the First Congress, under the present Constitution of the United States, expressly declared that protection to manufactures was one of its purposes. That protection, not as an incidental result of revenue duties, but as a direct and primary object, is within the powers and obligations of this Government, is settled by now nearly a century of uninterrupted practical construction and administration.

In fixing the scale of tariff duties there is an incongruity between the two objects. The degree of protection is measured by the degree of the exclusion of the foreign article, while revenue increases as importations increase, and in the proportion in which a duty proves to be more protective it yields less revenue. It is a haphazard and wholly unscientific proceeding to leave protection to follow as a mere incident of duties levied for another and quite distinct purpose.

FRESNO WINES:—We are indebted to Mr. F. T. Eisen, of Eisen Bros., Stevenson street, in this city, and the Eisen Vineyard, of Fresno, for samples of his new raisins, of 1883 vintage, Norton's Virginia Teinturier Port, and a dry Sherry—we presume Feher Zagos or Pedro Ximenes. The two latter we have not tasted. The Norton's Virginia we have again tasted, and our first impressions are confirmed that it is good claret wine by itself, and even more valuable for a blend. We should be glad to know more about this wine because it has been said that it is a shy bearer and possibly if so by a different method of pruning, this objection might be overcome.

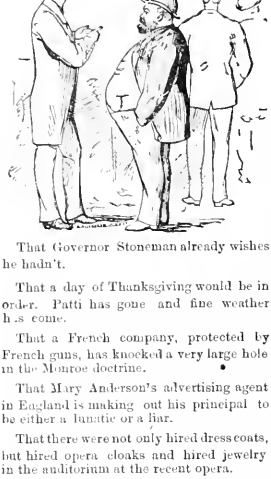
We have also received from Mr. M. Denicke, of Fresno, a sample of his Carignan, the wine which has attracted so much attention, and deservedly so, for its high character, as a claret of the true Medoc type.

We have received from Mr. N. Peteovich of Fresno, a sample of Zinfandel, which promises well.

We have said before we have also samples of all Mr. Barton's products, Zinfandel, Berger, Muscat, dry and sweet port and brandy. All these wines are young and made from grapes of vines which came into bearing for the first time last autumn, and without exception they are well up to the average of the productions of the other parts of the State, and some of them promise to rise above the average.

It is hardly worth while now to stop to inquire whether there are "ten prominent men not having been in office, nor seeking office, not having a personal quarrel with the railroad corporations, and paying taxes on a reputable assessment," who approved the calling of the extra session or not? We have the Legislature in session. The important questions of the day are, what is it going to do? how much will he bill be?

The power behind the throne in London is dynamite—in the White House, Washington, it is the next President.



That Governor Stoneman already wishes he hadn't.

That a day of Thanksgiving would be in order. Patti has gone and fine weather has come.

That a French company, protected by French guns, has knocked a very large hole in the Monroe doctrine.

That Mary Anderson's advertising agent in England is making out his principal to be either a lunatic or a liar.

That there were not only hired dress coats, but hired opera cloaks and hired jewelry in the auditorium at the recent opera.

That the spring poetry market has "declined" more than usual this year, even the *San Francisco*an is not a free buyer.

That Mapleson, we betide us, threatens to come back next year; come back with a costlier troupe than ever. How can we stand it if wheat only brings $1 25?

That General Stoneman has found out probably that it is much easier for a gentleman to spoil a reputation in the Gubernatorial chair, than to add to that he has.

That even churches will burn like secular buildings. One hundred and nineteen went up in smoke last year, and the insurance companies settled with the mortgagors.

That Bierce of the *Wasp*, in a fit of very virtuous indignation at Patti's loose conduct, strikes hands with those clergy who say the the profession of an actor is one that ought not to exist.

That if cheap labor, labor as cheap as it is in Europe would make a country rich, then the Chinese in our midst ought to have made California rich; on the contrary the influx of Chinese made the State poor.

That Pixley and Bierce agreed last week for the first time for four years. Both acknowledge that they have no taste for operatic music. One would not go near Patti and the other confesses to being bored.

That we would suggest to Cincinnati rioters, that chastising a weak or corrupt jury for bringing in a verdict contrary to their oaths, would be less unjust than killing sheriffs or their deputies for discharging their sworn duty.

That the pardoning power should only be exercised in extraordinary cases. It was expected that Governor Stoneman would have shown more firmness in dealing with the worst class of criminals than he has hitherto exhibited.

That some good should come out of the Cincinnatti riots. The death and wounding of over two hundred people, ought not to be without effect. The jury in the Berner case are directly responsible for this destruction of life and property.

That the Viceroy of India proposes to build 2000 to 3000 miles of railroad per annum for ten years, at a cost of $100,000,000 a year. This, if irrigation works are continued as they have been of late years, will not only obviate famines in the isolated districts, but will make a short ending of the wheat export of both the United States and Australia.

RETAILERS' CORNER.

The fine weather after the protracted storms has put some life into trade, and some houses report business very fair. There is a general feeling that the regular Spring trade is just opening and that April will be a very busy month if we have no return of the heavy rains. We do not hear this week any complaints of a lack of remittances.

Portland grocery houses have had as much to complain of this year as our own, and trade is dull on the Willamette. The Los Angeles houses had good times during the bad weather, and in consequence of the lack of transportation from this city, had orders given them that under other conditions of the railroads would have come to San Francisco.

The notable feature of the week has been the reduction in refined sugars of one-half a cent all around. This makes cube and crushed 9¼ cents each, the lowest price ever known in this market. The cause is the decline in New York. The demand here is excellent and it may be expected that low prices will induce a larger consumption. The demand for refined in the East is quiet, but steady. The New York prices of dry granulated by telegraph is 7 3-16c.

Syrups are selling freely by jobbers at prices much below Refinery Card rates, and the demand on them is large; on refiners nothing.

There have been no arrivals of Hawaiian sugar this week until yesterday, when the W. H. Dimond, brought 8644 bags. We have not a single sale of grocery grades to record. Quotations for bags are nominally 4 to 5¼c; kegs 6c. The jobbers are fairly stocked and are selling freely.

The demand for coffee is very light; prices are regaining strength, but are in fact nominal. Since the panic in New York, which culminated on the 26th, there has been a reaction, beginning on the 27th, and continuing to the latest telegram. The stock here is only 29,200 bags including the 6,000 received by the steamer San Jose.

The failure of a large tea firm in New York, a few days ago, caused a sharp drop of four cents in values, in that market. The failure was caused by over speculation, and an attempt to bull prices. In San Francisco, the tea business is as legitimately conducted as in anything we consume. There have been no speculation, no attempt to force advances, and therefore, no sudden and disturbing reaction. This is not the season for contracting or shipping from Japan or China and nothing has occurred in those countries to lead to the fall in prices in New York. The wholesale trade here is quiet and prices are lacking in the firm tone which prevailed a fortnight ago. That is all that can be said.

The stock of Hawaiian rice is small the Dimond brought 2125 bags yesterday. There is at present little Eastern demand, but some speculation here and quotations for round lots are 5¼@5¾c.

There is a fair demand for China rice, at unchanged rates, namely $4.05@4.20, for old mixed; $4.75 for new; $4.50@4.75 for No. 1 China; $5.25@5.40, for good No. 2; $5.75@$6.25, for good to extra No. 1.

Some descriptions of canned fruits are lower. Blackberries have fallen 30 to 40 cents; Jellies, 10 to 25 cents, and also Green Peas, which are quoted 15 to 30 cents lower than last week.

Salmon have just begun to run on the Columbia river, and the outside boats are fishing, and the canneries are buying the catch. The chief canneries, however, by agreement, will not send out their own boats for some days, as the run does not commence large.

The sharp cutting in cod fish continues. A number of vessels have already sailed for the Chaumagin Islands and Okotsch Sea, and they will soon all be away.

Banner Lard in 10 lb pails is quoted 12½ a cent cheaper. Refined tallow is also ½ a cent cheaper.

In hardware, axes are 50 cents lower, for Collins', Hunt's and Hurd's patents. Brads of all sizes have advanced from 25 to 50c and 3d fine nails have fallen 10c.

TOBACCO MARKETS.

SAN FRANCISCO. In fact, there is an active demand for Sumatra at advancing prices. The stock of low duty tobacco is nearly exhausted, and prices are assimilating to those which will rule shortly under the advanced duty, which is 40 cents higher than formerly. There is a good general demand for domestic leaf reported by some houses, while others speak of low trade. There is a much better feeling among manufacturers regarding '82 Penn-sylvania than there was three months ago. Connecticut binders are in demand, and are firm at more than full rates. There has been a growing scarcity noticable for some time. We also notice freer sales of '81 Pennsylvania, and this is particularly noticeable in the lower grades. Havana is moving fairly, especially wrappers.

Cigar manufacturers, or some of them, complain of a lack of orders, and also of delayed remittances from the country; others are selling freely, and consider payments fairly regular.

Plug and other manufactured tobaccos are not moving as rapidly as they should at this season of the year, but a considerable improvement has taken place during the past fortnight, and by the middle of June, no doubt, the volume of trade will equal that of the corresponding period of 1883.

A former manufacturer of cigars paid a visit to the Technical School on Wednesday and expressed his surprise at the rapid progress made in cigar making. He says that the girls are so far decidedly ahead of the boys. Moreover, that if the association follows up the principle with which it has so auspiciously started, the Technical School will be a great success, and fairly meet the growing demand of our cigar factories.

The sales of Internal revenue stamps for the month of April at the San Francisco office were as follows:

Cigars	$14,758 80
Tobacco	3,144 80
Cigarettes	136 50

The name of Herman Heyneman is synonymous in the Tobacco trade with enterprise, and from his first appearance among us, now many years ago, his career as a merchant has been extraordinarily successful. Any tobacco sold by him can always be safely foreseen in popularity, both in this city and throughout the Coast; and whatever is new, good and the very best he has already secured. Mr. Heyneman returned a week ago from an extended tour through the most notable eastern factories, and brought with him or rather commenced his journey with a heavy stock of the very choicest brands following him. Before he reached here a large proportion of these purchases had been diverted from their first destination, and distributed amongst his old customers along the road. What did come through is now on sale at the well known leading tobacconists in all parts of the coast. His orders were renewed in larger quantities and heavy supplies are now on the way. Mr. Heyneman has removed to 20 Front Street, between California and Sacramento Streets, having secured the whole premises, two-story, with a large, light basement. The latter will be devoted to storing plug tobacco, and will hold conveniently, several car loads, and is connected with the main floor by an elevator. The counting room is in front, and is fitted with safe, desks, writing tables, etc., and a large business in the first will be private office. The remainder of this floor will be devoted to samples. The upper floor will be used for storing cigars, etc., and is a very large, light room, and has no superior in the trade for showing goods. Mr. Heyneman is going to great expense in fitting up his offices and show rooms, and in elegance, commodiousness, and business like appearance, they will, when completed, have no rival in San Francisco.

Mr. Heyneman has all the new brands of Straiton & Storm's cigars as well as the old favorites. He has also secured the sole agency for the celebrated Messrs M. E. Mc Dowell & Co's (of Philadelphia) tobaccos, and also, of Lotther & Co's of Richmond Virginia including their famous Bull Durham and Silver Coin

---

There are glaring differences in the reports of the New York Tobacco Markets by the *Leaf* and *Journal* during the week ending March 21st., as will be seen below:

[U. S. Tobacco Journal]

NEW YORK, March 22.—It was chillingly dull in cash market this week, and many of the oldest leaf men do not remember a dullness of similar density and obstinacy. A few struggling out-of-town buyers sauntered through the market with the vain hope of being introduced to somebody that was willing to part with lots containing three-fourths wrappers, sixty and fine, for 20 cents. One or two up-town manufacturers were also seen around the leaf houses, evidently glad to have escaped from their own dull precincts, and ready to take in or give out some horrible yarns about business and things in general. The truth is, business among manufacturers in New York city is really lonesome. The individual members, throwing do not admit it, this section or hardly ever do. The usual expression is: "We are doing pretty fairly, but we hear it is very dull with others." It would not do for a manufacturer to admit that his travelers have been on the road for six weeks at an expense of some $12 a day, outside of a salary of $5 to $10 a day for the same length of time, and that their orders consisted chiefly of the usual expressions from great leaders for nominations of cigars at a future period not altogether clear.

However, the cigar business is bound to improve very soon and "the boat knocks" at both the East and West. As matters stand, the quotations for 80, 81 and '82 tobaccos remained unchanged from those of last week, and the dullness did not induce any holder to lower his prices.

In the meantime the interest in the Seed-leaf crop on the part of jobbers and manufacturers is growing. Incoming samples are inspected with unusual eagerness, and to our knowledge several offers for packings of Havana seed have been made. Pennsylvania has long gained out as a leading grower of Havana seed, the growth of that State has virtually no bearing on Havana seed tobaccos. The force other States, Wisconsin, New York and Connecticut, so far exhibited, to find Havana seed stock, on which apparently, packers will make some money. In the estimation of the trade the '83 native seed tobaccos occupy at present the following positions, 1st, New York state, 2nd, Pennsylvania, 3rd, Wisconsin, 4th, Connecticut, 5th, Ohio. The '83 connecticut samples, samples of which we saw this week, are exhibit that for the thin tissue of the '82 crop, and those are at 20@35 cents, 12 cents, is rejected. The sales that have been made will hardly aggregate 800 cases, comprising various crops and realizing last week's prices.

SUMATRA.—Still lazily dull, hardly 150 bales changed hands, prices, $1.15 to $1.80.

HAVANA.—Was quiet. Sales 150 bales, at 85 cents to $1.55.

N. Y. Tobacco Leaf.

NEW YORK, March 21.—During the past week the fire has been a very good demand for low grades of Wrapper Leaf, for which prices are somewhat firmer, and there have been several sales of them. This applies particularly to new tobacco, the old being well nigh exhausted. There have been some inquiries and sales for and of Africans, both old and new, and we unhesitatingly state that a Philadelphia stuff manufacturer was in the market buying such stock as he could find suitable for his wants at the full market prices. Binder leaf is also firmer, Thursday's transactions being larger than in any day since the opening of the place.

SUMATRA.—We note sales of a few fair lots of old stock at higher prices than have been recently brought, also of some fine new tied wrappers. Bright wrappers have not been in market to any extent though there is a good stock in the market. Some desirable lots of new fancy Manila qualities can be found here, though they range at stiff prices.

SEED LEAF.—The much desired and reasonably expected boom in the seed leaf interest has set in, the Seed leaf market, but its coming in, in a veritable tidal wave, and that specially. With a full week's trade, which will soon set in, and an end to dispatch the hurried episode which is the curse of the factory, there will be a decently brisk, also of some fine, new tied wrappers. Bright wrappers have not been in market to any extent though there is a good stock in the market. Some desirable lots of new fancy Manila qualities can be found here, though they range at stiff prices.

SEED LEAF.—The much desired and reasonably expected boom in the seed leaf interest has set in, the Seed leaf market, but its coming in, in a veritable tidal wave, and that specially. With a full week's trade, which will soon set in, and an end to dispatch the hurried episode which is the curse of the factory, there will be a decently active demand for seed leaf, as it is impossible to meet the wants of our cigar manufacturers, if from no other quarter, as their requirements are likely to be larger than ever this summer. Seed leaf is in the market, prices are moderate, and a better time than the present for buying will not be presented during the remaining months of 1884.

SUMATRA.—The inquiry for the week has been an animated one, but the sales were limited to 300 bales, owing to the scarcity of suitable stock. It is now almost impossible to purchase any lots, except at jobbing prices. Advices from Amsterdam, dated March 7, say: "Fine dark Sumatras are very scarce, and in good demand. The new crop will be very inferior in quality and of very light color." There are also a number of orders being placed during the week for future delivery.

PLUG.—A fair inquiry is reported and some good sales have been effected for both home and foreign account. The exports were 112,367 pounds.

An observer and parts paint writes as follows:—

"The past week has been a little less monotonous than previous ones. While the inquiry remains very quiet, there have been some orders and a few sales made, but jobbers are disposed to work off the last pound before replenishing.

"The whole trade should pray for the abolition of tax, caution notices, the tags and other devices that only benefit the manufacturer. Let us have done with internal revenue and have an equal chance with manufacturers."

SMOKING.—Demand steady, but not active.

CIGARS.—A rather better inquiry than for the past few weeks.

WOOL MARKET.

There is no stock of old wool of any moment on hand, no orders, no buyers, no market, and therefore no quotations to give.

A couple of hundred bales of Spring fleece arrived from the San Joaquin this week, from small, straggling flocks, but they are no indication of what the Spring clip will be. It is fully a month late, but if this fine weather holds we may now expect that shearing will be commenced in earnest in ten days and a fortnight hence wool will begin to arrive freely. The general opinion is that it will be freer from defects than last year's clip, and that flock masters will exercise more care in handling their fleeces.

Recent telegrams from New York, say: "Action in wool is yet deferred. Manufacturers continue to exhibit some indifference and business therefore drags. It is doubtful to forecast an early demand. Value, as all principal holders are sellers and it rests with buyers entirely as to what prices shall be paid. The object is to sell. No forward buying is permitted to grow cold. The outlook is indeed unfavorable for the new clip, but should buyers enter the market to cover the wants of old wools, which they are liable to do at any time, to judge by past experience, an excited and higher market would certainly follow. Included in the sales are 4000 pounds scoured Oregon at 35@55 cents, and 8000 pounds spring California, 20,000 pounds Oregon combing, 5000 pounds valley Oregon and 15000 pounds scoured Oregon, on private terms.

The Boom of Bad Butter.

Could not a cow make her butter from cow's milk, but it seems it is not so in New York for the Board says. From all the facts that may stigmatize us furnish, we are inclined to believe that butter is passing out of existence very much as wax-tapers and stage coaches did. Experts give it as their opinion that the real article is exceedingly scarce. Vast quantities of another substance have taken its place in Washington Market. Milk, which it may not be generally known to our readers is a necessary ingredient in the manufacture of butter is not long or put to that purpose. It is mixed with water and sold for cream. Machinery and chemistry have come into the field, and it does not pay to make butter.

The fond delusion lingers on by the world, that it still spreads its bread and pancakes with the dairy product, is almost pitiable in the light of recent facts. It is not that at least is certain. It is spreading its bread with tallow. Oleomargarine has won its unctuous way with marvelous rapidity. Butter may be said to have been nearly exploded. We believe in it, as we believe in a great many things, but it cannot be demonstrated. Every analysis strikes our faith.

However, let us be brave and readjust our simple beliefs to the teachings of science. Butter is a beautiful dream of youth. Let us relegate it to poetry, but in the stern, practical duties of life, let us boldly recognize the scientific factor of oleomargarine.

JOBBERS' PRICES.

APRIL 4 1884

The following Prices are those at which city and country Retail Grocers can buy in lots to suit their trade and are corrected weekly.

How Plate Glass is Made.

To cast, roll, polish and burnish plate glass requires machinery of special construction and a "plant" that is costly by reason of its complex nature. The pouring of liquid glass from the furnace upon the cast iron plates, and the subsequent rolling are processes comparatively simple. Any housekeeper who has used a rolling pin on a batch of pie-crust dough performs an opperation very similar to this stage of plate glass making. It is the succeeding processes of grinding and polishing and final burnishing that require the time and costly mechanism. After leaving the rolls and bed plate, the glass is rippled and rough only fit for grating or sky lights. Each plate must be transferred to machines that resemble the turntables of a railway. On that revolving platform the glass is cemented in a bed of plaster of Paris and the machine started. Bearing heavily on the surface of the glass are blocks of metal and while in motion the surfaces are supplied with sharp sand and a constant stream of water. The next stage of the glass grinding process is the same as to machinery, but instead of sand, coarse emery is used. Then finer emery is used on another revolving table, and so on for half a dozen times. The final polishing is done by heavy reciprocating devices fed with rouge, and maintaining a constant backward and forward motion, and also lateral movement over the surface of the crystal. All this requires the assistance of a large force of men, many of them skilled laborers. After going through these different grinding and polishings the plate that measured an inch in thickness is only three-fourths of an inch thick, has lost all of its roughness, and is ready for the show window of the purchaser.—*Weekly Union.*

A Sensible Merchant.

We have on several occasions alluded to the fact that some men in business, when asked for a statement of their financial condition, resent the question as an insult. There are others, however, who have no hesitancy in making such a statement, feeling that when asking for credit it is the proper thing for them to do. In conversation with a merchant on this question he showed us a letter from a retailer, which was certainly a very sensible one. The retailer had sent in a statement of his affairs, and in doing so, says: "I am glad to fill out this blank, for I want those with whom I trade to feel that they are not taking unnecessary risks." This is the right spirit to manifest, and we venture the belief that the writer of the above letter will have no difficulty in getting all the goods his standing will justify. Had he sent in an improper reply, even though he was financially responsible, his credit and standing as a merchant would have been seriously compromised. Why should a retailer resent the asking of his true standing as a basis on which to establish his credit. If he wishes to do a straight forward business, there can be no objection to his giving the information sought. If he refuses to give such information, his action is such as to give rise to the thought that his intentions are not of the best. In the long run a frank honorable course in business transactions is the best and most successful. If a merchant expects to get rich only by sharp dealing and dishonorable practices, he is not much better than the open thief, even if his acts come under legalized robbery.—*St. Louis Grocer.*

"Eighteen-carrot vegetable soup" is to be had at some of the restaurants.

RIVAL WHEAT PRODUCERS.

A writer in the *Sun* discusses the wheat question and the competition into which the American farmer has lately been brought by the agricultural development of India, Russia, etc. The writer says that the prosperity of our country depends upon its agriculture. The price of wheat, he adds, is steadily declining. In spite of the shorter crop of last year, it is selling in Chicago below 90 cents a bushel, whereas in 1883, when the crop was larger, it brought $1.06. Exportation has fallen off forty per cent compared with the corresponding period last year, all of which tends to support the statement that the farmers are not prosperous, and that there is ample cause for their complaints. So long as foreigners will not buy our wheat, even at its present figure, something must be wrong. His explanation is that the Patent laws are responsible for the comparative costliness of wheat raising, and injurious railroad methods for the excessive cost of transportation. The Patent laws tax the farmer ten times as much as the tariff does, and the tax is direct. He estimates that a farmer's whole outfit does not contain more than a ton of iron and steel, the tax upon which during the life of the implements would be equivalent to but $2.50 a year; while the tax for the patentee's benefit must be, according to his calculation, $25, or $200 for the eight years. Supposing a reaper to represent one-third of his metal outfit, then $100 of its cost must go to the patentee and $200 must be consumed in wages and material. Moreover, the tariff on wood does not tax the farmer, because he wears woolen goods only for underclothing, and long ago discarded blankets for the more comfortable which is mainly composed of raw cotton. It is therefore the $25 a year tax for patents that prevents his producing wheat at a price low enough to compete with the agriculturists of India, where the price of labor is but six cents per day. His inability to sell it cheaply in Liverpool is due to the extortion of the railroad corporations, not to economic conditions. The transverse lines of the country are built, we are told, upon the proceeds of bonds and not by paid up stock; the stocks are held till they become profitable, and the extortions practiced through the pooling systems and other devices prevent the cheap transportation of the patent ridden corn to tide-water.

There are only two remarks worth making on the above: one is, that without railroads the wheat could not have been transported to tide-water, and that without the invention of improved implements, it could not have been grown.

Canned Tomatoes.

During the year 1883 the tomato pack of the United States reached 70,645,896 cans. This means nearly one and one-half cans per capita for every man, woman, and child in the country. How much the canning industry has grown within a year or two may be gathered from the fact that while the pack of 1883 reached 2,943,579 cases, that of 1882 was 2,180,123 cases, and in 1881, 1,635,966 cases. Within two years, therefore, the industry has almost doubled. Maryland is the banner State of the industry, and Harford county its stronghold. She packed this year nearly half of the total stock—1,450,000 cases. New Jersey comes next with 612,000 cases; Delaware third, 156,000; California fourth, 117,000; Ohio fifth, 112,000. All other States packed less than 100,000 cases.—*Eastern Exchange.*

CALIFORNIA
Piano Manufacturing Co.

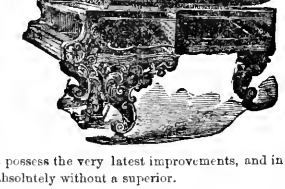
INCORPORATED UNDER THE LAWS OF CALIFORNIA, MARCH 8, 1882

Manufacturers of Strictly First Class

UPRIGHT PIANOS.

Factory, 431 and 433 Fourth St., corner of Bryant.

Oil Rimball Carriage Factory.



Salesroom, 30 New Montgomery St., under Palace Hotel.

Our instruments possess the very latest improvements, and in TONE, TOUCH and DURABILITY are absolutely without a superior.

EVERY PIANO IS FULLY WARRANTED FOR 5 YEARS.

Our factory is the most complete on the Pacific Coast, possesses every kind of machinery, steam, dry houses, etc., in fact is as complete in all its appointments as any Eastern establishment, producing Pianos of uniform excellence and durability. An examination of our Piano-Fortes is earnestly solicited. Catalogues and full descriptive mailed on application.

WALTER S. PIERCE, Secretary and Agent

P. B. CORNWALL, President. GEO. H. ROE, Sec. and Man.

THE CALIFORNIA
Electric Light Company,

Nos. 222 to 232 JESSIE ST., S. F.

Has the sole and exclusive right for the Pacific Coast, including the States of California, Oregon, Nevada, and Washington Territory, to use and sell the various electrical inventions of CHARLES W. BRUSH, M. E., Ph. D. The most prominent of these inventions are his apparatus for Electric Light, consisting of his

Dynamo Electric Machines, Electric Lamps,

Automatic Current Governors, Carbons, Apparatus for Electro-Plating, Apparatus for the Storage of Electricity, Apparatus for Producing Power from Electricity, Etc., Etc.

The "Brush" is the only complete and PERFECT SYSTEM of electric lighting. The best Dynamo Machines. The best Lamps. The ONLY PRACTICAL Storage Batteries. The purest and best Carbons.

The "Brush" prices are the lowest. The factory the largest and the business the most extensive in the world. There are more "Brush" apparatus in use than all other systems combined.

Estimates furnished upon application.

PATENTS

MUNN & CO., of the SCIENTIFIC AMERICAN, continue to act as Solicitors for Patents, Caveats, Trade Marks, Copyrights, for the United States, Canada, England, France, Germany, etc. Hand Book about Patents sent free. Thirty-seven years' experience.

Patents obtained through MUNN & CO. are noticed in the SCIENTIFIC AMERICAN, the largest, best, and most widely circulated scientific paper. $3.20 a year. Weekly. Splendid engravings and interesting information. Specimen copy of the Scientific American sent free. Address MUNN & CO., SCIENTIFIC AMERICAN Office, 261 Broadway, New York.

Special Notice.

For the last twenty years this Whisky has taken precedence of every other brand on the coast; and for a quarter of a century, as shown by trustworthy analyses, has preserved its original purity.

Recommended for medicinal use by our best physicians as the only safe stimulant.

HONOLULU

HONOLULU

MARINE RAILWAY

Built in 1882 for the Hawaiian Government by S. G. WILDER, and opened January 1, 1883. H. J. CRANDALL, Engineer.

Has a capacity for taking up a vessel of 1700 tons in Light Ballast

Having leased this property, and placed the same in charge of MR. JAMES LYLE, a Competent Engineer and Master Shipwright, I am prepared to

Haul Up and Repair any Vessels to the Maximum Tonnage

As above. Charges for the use of the Railway—50 cents per registered ton for the first 24 hours; lay days, 20 cents per ton each day.

Repairs as per arrangement.
